

Arceus 191

Chapter 191 Yamato's few good days left

"Bai Duo ~ Bai Duo~" A few stinky muds waved at him, he understood what he meant, let him figure it out for himself, don't disturb them eating snacks.

Smelly slime's body itself is composed of poisonous slime. Unless it is a skill attack of other Pokémon, ordinary physical attacks cannot damage them. Their bodies are very similar to Caribou that eats swamp fruits.

It's not the first time for Quinn to do this kind of thing. These stinky slimes also like this "good guy who always brings desserts" to them, so they just do what Quinn does.

Then Quinn picked a few of the brightest colors, and took a part of the strangely colored liquid from each stinky mud and put it into a sealed bottle.

Due to the difference in individual food intake, the composition ratio of toxins in the stinky mud is also different, and the effect is the strongest after mixing.

These liquids look colorful, but in fact they are weapons of mass destruction, and he will be tricked if he doesn't pay attention, so he has been carrying the original peach peach fruit. Can be detoxified.

After that, he collected some toxin crystals from the stinky mud, and was about to leave here.

"Okay, go ahead, I'll go first."

"Bai Duo~"

Smelly Mud's head turned 180 degrees to bid Quinn farewell, and on the ghost island, the preparations for the Siwon's voyage were also completed.

But before leaving, Yamato was being lectured.

To be precise, she wasn't the only one being reprimanded, Jack and Maria were standing by, but it was clear that Yamato was the mastermind.

In the office of the Beast Pirates handling external affairs, many documents are scattered all over the place. As the few children on the ghost island, the three of them are naturally familiar, and it is common to play together.

But don't look at Maria and Jack's superiority in height and age, but Yamato is the leader of the three, Kaido's biological daughter, Arceus' righteous daughter, and only she dares to come here.

"Yamato, did I tell you that you can't run around in some places?"

"Sorry, foster father, I had too much fun and I forgot"

It's just a simple hide-and-seek, but the scope is the entire ghost island. The building that allows the giants to run inside is very empty for the three children. Because no one has been found, Yamato didn't pay attention to what kind of room this is. Just jumped in.

After that, he accidentally knocked down the documents on the table. Shaina was originally here, but she and Arceus just went to check the situation of the Siwon, so Yamato ran in.

"Take care of this place, you two are not allowed to help her."

Even if he cared about her very much for the past two years, he couldn't just dote on her blindly. If he made a mistake, he would have to be punished, but if he didn't raise his hand like Kaido was like a stick, there would be problems with that kind of education.

Since she messed up this place, she had to tidy it up herself, and no one could intervene, and it was the same for Maria and Jack.

When he and Shaina returned here, there was only Yamato in the room, and they were called over afterward.*noVeℓUsb.cOm*

It may be a matter of talent. If she wants to destroy something, she can already do it, but it becomes very difficult for her to organize things. It took more than half an hour for her to completely organize the scattered documents.

Although it is not very neat, but I can see that she is trying her best to restore her previous appearance, but the order has been completely disrupted.

There are no page numbers on the document, and she doesn't know many words now, so it is definitely impossible to restore her.

"This is the first and last time, understand?"

"understood"

"Okay, this time it's over, go back and rest, we'll go to sea tomorrow." Now he's not too strict with Yamato, and she doesn't have many good days left.

When Kaido's training starts, it's impossible for her to relax like this every day.

Jake thought Yamato would be punished by something else, because he would get a stand if he messed up, but when it came to Yamato, the result seemed to be a little different.

The auspicious eggs who take care of them will also prioritize Yamato's problems. For some reason, he suddenly feels that the world is so cold.

After sending the children away, Shaina reclassified the documents within a few minutes. Those documents had special marks on them, and it was easy to classify them according to the marks, but Yamato didn't know them.

"what is this?"

From that stack of documents, Arceus saw some unfamiliar marks.

"This is... some uncertain news. We want to report it to you after verification." Arceus glanced at the piece of paper, and the words "lots of gold" and "slate" appeared in his field of vision.

"No need for research, now you explain to me the things above."

"You also know that you slept in the clan for a long time, and then we put a slate on another island due to various accidents, but the insider died before he could tell us the news. Jin vaguely remembers that he mentioned it. There's a lot of gold there"

"Is that why you often brought back gold when you sailed during that time?"

"Yes, but that description is too broad, so we didn't tell you."

"It doesn't matter. Tell those people to change the course. The target is the first half of the Great Route, a place called Gaya Island."

He couldn't remember anything else, but if there was a lot of gold there, he still remembered it.

But it seems that Yamato's luck has come back. If she hadn't messed with those documents, she wouldn't have noticed the message. Jin and Shaina may be able to find the message slowly, but the time it takes is not necessarily.

As for whether it is the island or not, he is not very sure. There are all kinds of islands in this world, and the islands with a lot of gold may not necessarily refer to there, but if there are clues, he will have to go and take a look.

"As ordered." She didn't know why Arceus wanted to temporarily change the course, but it didn't matter, she just wanted to execute the order.

When Shaina went to deliver a new order, Arceus also found Kaido.

"This time we'll be out for a little longer. It may take a few months to go back and forth. Yama and I also took it with me."

"Understood, let's take it as Yamato's last trip. When she comes back, it's almost time to start special training. By the way, you should take the remaining two little guys to meet the world."

"I'm not telling you this, I'm here to tell you that the situation in Wano is developing very well now, don't drink too much and mess with me!"

There is no difference between a child or three children, he is just worried that Kaido does not know when he is drinking too much again, drunk and Kaido and sober Kaido are completely different concepts

Chapter 192 Premier Seat at the Bow

Some things may not be effective if they are said, but they cannot be completely ignored, such as the case of Kaido.

As a person who doesn't like drinking, probably no one can control Arceus after he leaves, but as long as he doesn't drink too much and go to the Flower City to breathe fire, it's not a big deal.

The temporary change of destination made some pirates busy for most of the night, replenishing more supplies, adjusting routes, and planning new charts. At first, they didn't understand where Gaya was.

However, they are not those who are closed to the country in Wano. According to the chart, they quickly made a new route. Although they do not have the eternal pointer of Gaya Island, they have the eternal pointer of some famous islands in the first half of the great route. store.

Due to the search for the slate, it is a very common thing to randomly set sail in the Beast Pirates. The eternal pointer at the iconic location is a must-have material. You can get there first, and then readjust the course.

On this voyage, he only took Zeraora, Shanna, and Mandelfish. Due to Shansen's lack of actual combat, she had to go out and walk a lot. As for Mandelfish, it was for convenience.

Mandelfish has become more and more proficient in the profession of scout, and he has almost explored the ruins under the Inner Sea of Wano, just to find something to do for him.

The pirates who are preparing to set sail are not the same group of people who will set sail tomorrow. Those people are already recovering, but there are still people who are not asleep at this time.

Like Yamato, she was tossing and turning in her room and couldn't sleep, and she was so excited right now that it was the first voyage she could remember.

Although she was taken out once when she was younger, she has no memory of that voyage.

"lucky!"

She just wanted to go to see if Maria was asleep, but she just lifted the quilt and was greeted by the eyes of four auspicious eggs.

"People can't sleep, so I'll go see what Maria and the others are doing, and I'll be right back."

This request was naturally not agreed, and the next moment, a soft singing sounded in her ears.

In order to make an overactive little guy go to sleep on time, all four auspicious eggs have mastered the hypnotic skill of "singing". In the hypnotic singing, she failed to achieve her goal after all.

On the second day, a pirate ship that was more like a picnic team than a pirate group set off from Onishima.

In addition to Yamato, Maria and Jack's three children, four auspicious eggs, a large milk jug and Lizi all followed.

According to their age, they have been weaned, but the milk of the large milk tank is suitable for the age group from 0 years old to old age, and supplementary nutrients are also needed for growth.

Riko chose to go together only because she was worried that Maria would go out alone for so long. After White's death, Maria was already her spiritual sustenance.

This is also what Kaido means, they can't grow up if they stay on the ghost island.

Even on the original timeline, except for Yamato and the others, they didn't stay on Onishima all the time, otherwise the Navy wouldn't have a bounty on them.

There are suitable people to lead the team, and their sailing time has been greatly advanced. Today, the most famous and powerful people in the world show their superhuman talents at a young age.

There is nothing wrong with giving them a glimpse of the sea in advance.

In the diving port, the Siwon sailed out of the waterfall. The helmsmen of the Beast Pirates had become accustomed to the changeable and complex currents in the vicinity, even if the currents were extremely turbulent, it would not affect their navigation.

"Wow, what a big carp, Jack, what are they talking about?"

"I don't know. I'm a murloc, not a merman."

The mermaid regards fish as partners, so they can understand the words of ordinary fish, and they will not eat the meat of fish or sea beasts, but only eat shellfish such as clams.

But the murlocs are different, fish and sea beasts are in their recipes, most murlocs can't understand the words of fish, only a few good-hearted murlocs have the ability to communicate with fish.

Although those giant carp kings like small boats have been surrounding the Siwon, and from time to time they would jump up and down with water, as if they were saying something, but Jack couldn't understand what the carp king wanted to convey.

"That is the life created by the holy beasts. When the Origin is out, they will definitely send the ship out of the waters of Wano Kingdom. You will get used to this kind of thing after you come here a few times."

Mandelfish stood by and explained this issue for Yamato and Jack. In terms of combat power, he is not the strongest in the Beast Pirates, but he is probably the most knowledgeable in terms of human relationships.

He is very clear about the relationship between several big cadres. Of course, the biggest contradiction among cadres is that Quinn may be beaten, which is no longer a big deal in today's Beast Pirates.

Some pirates don't like children. In Mandelfish's view, those people are fools. The future belongs to young people. These young people who are valued by Kaido and Arceus will inevitably go further.

If you don't take advantage of their childhood to deal with them well, when you grow up, you can only sacrifice your life to fight for merit.

Yamato, who had just set sail, was extremely excited. She was very interested in everything in the outside world, even the news birds passing by nearby. However, the height of the ship's rail prevented her from observing the outside.

And she also found a good position. When the ship left the dangerous waters of Wano Country, she took advantage of the time when Geely Egg couldn't react and climbed directly to the bow.

The place with the best view on the ship must be the watchtower on the flagpole, but she definitely couldn't get up there, so she took a fancy to the place on the bow with the widest view.

The bow of a ship usually has iconic items to indicate the ownership of the ship. Now that the Siwon has undergone some renovations, the position of the bow is a flat variant of the Thousand Universe Arm, similar to a stretched cross.novelusb.com

The position of the cross in the middle gives her enough platform.

Looking down was the rough sea, but she was not afraid.

"It's decided! From now on, this will be my seat! Is it okay? Lord Yoshifu!"

The collision factor was taken into account when the bow was built, so it was built so sturdy that even a few adults sitting on it couldn't overwhelm it, let alone a big and a small child.

If it is a child of an ordinary family, a dangerous reason will be directly taken down, but in this world, this is nothing at all.

"Okay, from now on, there will be your special seat. In an instant, go look at her and don't let her fall."

After all, it's definitely not okay to let her be there alone, even if Kaido's bloodline is too small now, it's still safe to let someone watch her.

Chapter 193 Magic Valley Town

The first half of the great route, Gaya Island, this is an island shaped like a skull, but its eyes are obviously missing a large piece.

The part that disappeared after was the goal of Arceus's trip. If there is a lot of gold, then he is most impressed by the empty island above Gaya Island.

The ancient city of Shandola, known as the Golden Land, was once here. Shandola means a glorious city. It can really be described by gold everywhere.

But nearly four hundred years ago, Gaya Island suffered an accident.

The soaring ocean current is generated just below Gaya Island. A large part of Gaya Island was washed up to 10,000 meters in the sky, and part of Shandola is naturally included.

The one that was washed into the sky did not fall, but just landed on the island cloud in the sky, and thus became a part of the sky island.

Sky islands are distributed all over the world. The small sky island where the Millennium Dragon lived in the past is the sky island where Kaido played the jumping machine after several decades of development according to the original timeline. The sky islands composed of island clouds are scattered in the sky throughout.

However, because of the limited distribution of sea clouds available for ships to navigate, the islands may not necessarily be connected, so there are not many connections between the islands.

Small islands will even be blown away by the wind, only large ones will always exist in a fixed place.

There are also small man-made islands, like Visalia, where a group of meteorologists live.

There are still many islands like this, because the Golden Lion is still active. Even if the fleet loses more than half and a rudder is inserted into his head, he is still a powerful pirate and enjoys his own hegemony in the new world.

Although a part of Gaya Island was sent to an altitude of 10,000 meters by the ocean current, other parts still exist in the Qinghai Sea and gradually became an island for pirates.

Because sailing on the great route needs to rely on the record pointer, the record pointer will only point to the next island after the information is stored on one island, but Shandora, who rushed into the sky, causes the record pointer in the hands of the pirates who arrive here to point to the sky.

There is no eternal pointer, and they don't know the way to the empty island, so they are trapped here and become in a dilemma.

In the end, a special town was formed on the island, a town composed of pirates - Magic Valley Town.

And here has become a signpost for Arceus to locate the empty island he needs.

Two months later, Gaya Island, the nearby waters, the Siwon has appeared here, and the recording pointer has begun to point to the sky.

"Foster father, foster father, is there really an island in the sky?"

"Of course, whether it is in the sky or in the deep sea, there may be islands, and the starry sky is no exception. This world is much bigger than you think."

She may not have understood the words behind , but Arceus' words made her understand one thing, that is, there are really islands in the sky.

She has never seen the fish-man island in the deep sea. When he crossed the red soil continent, Arceus directly used the electromagnetic float to take the whole ship up, and then flew over from high altitude.

It's just that he crossed there and landed on the sea again. He didn't plan to float the ship in the sky all the time. This voyage was also mixed with some educational significance.

"Master Arceus, we are almost there, what should we do now?"

"How are the supplies on board?"

"Food is enough, but fresh water needs to be replenished."

"Then stop at the island in front to rest for a while, and the next stop will be the empty island." In order to rush on the road for two months, the people on the ship have not stopped, and it is just a simple stop to replenish the supplies.

You should also take a good rest before the official action. There is an altitude of 10,000 meters. It is not good if you are too tired and fall a lot of people because of altitude sickness.

As for the children on the boat, Maria and Jack could see fatigue on their faces. The two-month voyage had wiped out a lot of their excitement of going out to sea for the first time, but Yamato still maintained the initial excitement.

Although Magic Valley Town is a town where pirates gather, it is not an illegal area, but it is not much different from an ordinary town.

The supplies here are all relying on the passing merchant ships. If it becomes an illegal zone and other ships will bypass here in the future, then the people here will not be able to live, so there are still some rules in the town.

After the Siyuan docked, these pirates began to replenish the materials needed on the ship to check whether the hull was damaged, and some people walked into the town. As Arceus said, this was a time for them to rest.

The grooming of pirates is not about sleeping on the bed. Going to a tavern on land for a drink is the most basic performance. Almost every island has its own special drink and food, which is also the way for pirates to spend their time on their voyages. .

However, there are always people on the ship, so the people on the pirate ship who stayed behind were rotated, and the people who didn't disembark when they docked last time left first this time.

"Jack, Maria, let's go too, we've been on the boat for so long."

Both of them looked a little excited, but they didn't answer, but looked at Arceus, they were not as privileged as Yamato.

"Go if you want, it's just a paradise anyway, Mandelfish, Zeraora, look after the three of them, don't let anything happen."

The people had already taken them out to sea, and he naturally did not intend to keep the three of them as fragile items, but the necessary protection was still needed.

Otherwise, like the Nine Snakes, it would be outrageous to allow the children of their own pirate group to be captured by human traffickers.

"Yes, please rest assured."

Mandelfish has a characteristic: he never touches alcohol even if he is relaxed when he goes out, and he never touches women. Among those cadres, he is the most reassuring one.

Plus Zeraora, he didn't think anything could threaten them on Gaya Island.

Therefore, a very strange configuration appeared in the team of pirates, a strange combination of three children and four auspicious eggs. As for Riko, she has never been out of Wano country recently, so she is just resting on the boat.

There are also two female pirates accompanying her. Although the number of female pirates is relatively small, there are quite a few under the Beasts.

Magic Valley Town Tavern, this is not a prosperous town, so there is only such a store.

also shoulders the responsibility of a restaurant, the only option for people on the island who want to drink or find food.

Those pirates and the residents of Magic Valley Town who have given up their identity as pirates are here at this time. They brag about the past or discuss the latest big news here every day.

And when new people come, it will also give them some new topics.

And today, a bunch of people with a strange style of painting walked in.

nOvEℓUS&.cOM

Chapter 194 Sky Island Exists!

Children, orcs, walking eggs, this is their most intuitive feeling.

"Are you pirates too? Did this come to the house?"

Judging people by their appearance is a common problem for most people. Three children are very rare, not to mention the creatures they have never seen before.

But there were more than a dozen pirates from the Hundred Beast Pirates who came here. These people kept them from speaking too arrogantly. Seeing that the other party didn't pay attention to them, they left angrily.

Those muscle masses and scars don't look like they're easy to mess with, so there's no need to make fun of yourself.

"Boss, is there any food suitable for children? Bring three servings up, and you can handle the rest."

said and threw a stack of Baileys on the bar, and then Mandelfish motioned for a few people to clear an area near the bar.

This is for Yamato and the others. This time Arceus brought not many people. Except for Zeraora, he was the highest-ranking cadre on the ship.

Although Mandelfish seemed to have no change in his expression, he was very nervous now. Arceus asked them to come out with three children. With Zeraora by his side, he knew that nothing would happen.

But even if Yamato loses a hair, he has to worry about whether it will make Arceus unhappy. This is an opportunity, but if he is not careful, it will affect his career.

"Four."

"Zeraora, I'm not a child anymore!"

"Wait until you are taller than me." Arceus helped him to correct the question of height, so his height surpassed Moment again, and he was also qualified to say this sentence.

"Understood customer, our specialty is cherry pie and cherry juice, are these okay?"

Different from general taverns that use various spirits or wines as their main products, cherry products are the most sold here, which is also caused by the environment here.

The large cherry forest on the island allows people here to choose local materials. In addition, there are various cherry-related dishes such as cherry wine and cherry sea beast pie.

He opened the door to do business, it doesn't matter how strange the people who come here give money, it doesn't affect his money anyway.

The Cherry Pie and Cherry Juice in Magic Valley Town are magical foods that can cause disputes between the Four Emperors in the future.

Because it is a signature dish, the cherry pie has long been a semi-finished product, and it was quickly taken out.

Yamato and Maria still liked it more, and they were still able to work together in an instant, but Jack was different, and he was not interested after only one bite.

"That. Can it be replaced with meat? I don't like this very much"

How confident Jack is twenty years later, how humble Jack is now. Although Arceus did not discriminate against him, he has everything he should have, but others will get more.

For example, the care of auspicious eggs, he can see a boiled egg of auspicious eggs at every meal, and Maria is the same, one per person is standard, but auspicious eggs can lay several eggs every day, those are many Naturally, it is distributed to Yamato.

After all, they were created by Arceus, and personal preferences will also have an impact on them, the first generation.

Yamato's request will be satisfied even if he is willful, and he can do some things willfully. Maria also has a little preferential treatment, and he will already be exploring underwater with Mandelfish.

But this kind of small request is naturally nothing, let alone that Mandelfish is here. Not to mention, the person Jack is most familiar with now is Mandelfish. After all, Mandelfish has been diving with him some time ago. .

Anyway, the money has been given, and the boss can ask the cook to do whatever he wants, and soon a few huge steaks were brought up, which looked like some kind of small sea beasts.

The bar has almost been contracted by the Beast Pirates, and even the Geely Eggs are eating some food. Originally, nothing would happen here until Yamato asked a question.

"Uncle, have you been to Sky Island?"

"Sky Island? Haven't been there, are you going to Sky Island?" He didn't believe in the existence of Sky Island, but this was obviously the child of the gold master's family, so naturally his EQ was not low if he could open the tavern in this place.

Anyway, it's just a matter of a few words, it's good to coax children.

"Yeah, I'm leaving tomorrow, I don't know what the empty island looks like."

"Maybe it will be very beautiful, if you really get there and you have time, remember to tell Uncle."

But some pirates are different. Yamato's voice is not small, and it naturally reaches their ears.

"Hahahaha, where is this kid from? Things like Sky Island lie to children, and they don't exist at all, okay?"

"That is, Dort, you can say anything to make money, didn't you believe it before?"

The people here are basically drinking, and the chain reaction of small laughter spread almost all over the tavern, which also made Yamato blushed.

"Nonsense! The Sky Island is right here!" *nOvelus&.cOm*

was loud and victorious, and she almost alone suppressed the laughter of the entire tavern, but then more violent laughter broke out, and some people even knocked over the wine bottles on the table.

"Little devil, don't be naive, empty island is a trick to deceive children, empty island doesn't exist at all, you know?"

"Impossible, the empty island is right here! Adoptive father won't lie to me!"

"Looks like you still don't understand reality, kid."

The pirates who just spoke stood up and approached here. If the sky island really exists, they would become real fools after wasting so much time here.

So everyone who stays here has a consensus, that is, the empty island does not exist.

Even if it's just a child's remarks, they don't want to accept it.

It was only Mandelfish's wrist that caught him.

"My friend, I advise you to be on your own. With the children today, we don't want to do too much."

Yamato and the others will inevitably go through the process of seeing blood, which is inevitable for them who were born in the Beast Pirates, not to mention that Kaido and Arceus both intend to train them to be strong.

But he has no right to decide when he sees the blood. Before Arceus or Kaido have no plans, he will maintain their innocence as children.

"Who is your friend? Three years ago, Lao Tzu was also a big pirate with a reward of 30 million! Haven't you heard the name of Harlot the Jackal? You idiots who believe in empty islands."

As he said that, he wanted to throw Mandelfish away, but the opponent's hand grabbed his wrist like a pincer.

"Sorry, I'm not interested in the name of the trash fish. Lord Zeraora, I think the next picture may not be very good, otherwise you should take Miss Yamato and the others away first."

This man smelled of alcohol, and he was obviously drinking too much. The companions behind him also made some movements. It seems that it will be difficult to take care of the next thing.

If you can't even get rid of the miscellaneous fish in these paradises, then these people really have no face to stay in the Beast Pirates.

Chapter 195 Are all the pirates in Paradise so naive?

Zeraora also felt that what he said was reasonable, so he held Yamato in one hand and Maria in the other and planned to leave, and then said:

"In an instant, you stay and participate more, Jack, don't move, it's time to go back."

It's not that he discriminates. Now that Maria's height has not grown, he can still hold it, but Jack is different.

He is too strong, and in the case of holding Yamato and Maria, his body structure does not allow him to pick up the third person, so he can only be captured with a magnetic field and taken out.

"Uncle Zeraora, let me go, I want to reason with that guy!"

"There is no need for Yamato, Lord Arceus said, don't reason with fools, they will pull you to the same level and beat you with rich experience, Mandelphish will handle those things, let's go to the empty island first OK?"

"lucky~" Gili Egg, who was next to him, was also chatting with Yamato, which eventually made her forget about it for a while.

As Zeraora led them away, the air in the tavern became more serious.

"Trash fish? Who are you saying is trash! Lao Tzu is a big pirate with a reward of 30 million!"

"Okay, it's boring to tell this kind of joke a second time, but before I start I want to ask, does anyone want to go out? Those who stay here will be regarded as enemies."

said and threw Harold out, knocking the tables and chairs in the tavern into pieces.

Seeing that this place is really about to fight, irrelevant people have also left here, but most of the pirates still stayed, and the 30 million bounty can be regarded as the leader in today's Magic Valley Town.

The pirates that left behind can be said to be his younger brothers. After Harold was thrown out, the battle was basically unavoidable.

"I'm sorry boss, then you can use his 30 million head to repair the tavern."

Although the pirates stayed here, it did not mean that there was nowhere to go. The merchant ships passing by used the method of going to other islands, and their supplies were also traded with those people.

As for why they didn't grab those merchant ships and leave here, there are no ordinary people who can do business on the Great Route. The pirates in these paradises really don't have that kind of skill.

"Little ones! You've seen it too, this guy wants to do something very dangerous to Miss Yamato." Now Yamato hasn't gotten the title of Ghost Princess, and most people call her Miss Yamato.

"boom!"

Mandelfish's words were not finished, and a gunshot had already sounded the signal to declare war.

"Shoot! Let this arrogant guy know how good we are!"

Under his cry, a series of gunshots sounded, and bullets were fired at Mandelfish from all directions, and they intensified.

The strong and irritating smell of gunpowder smoke diffused around, and the white smoke generated by the burning of the old-fashioned flintlock gun even obstructed the vision of many people.

"You bastard, I don't believe you are still dead with so many guns?"

A series of laughter also sounded, but this time it was the people of the Beast Pirates who laughed.

"Are all the pirates in Paradise so innocent?"

"I don't know, I was born in the new world, Rodra, I remember you came from Paradise, right? You were like this before?"

"Don't talk nonsense, I'm not as stupid as this guy."

The last pirate to be asked repeatedly denied it, and did not want to have anything to do with the person in front of him.

"Bastard! Your boss is dead! Can you still laugh out loud?"

However, this was still used as a joke by them. They all knew that Mandelfish could not be hurt by these muskets, after all, his scales were already very strong.

The next moment, Mandelfish's voice also came back.

"I'm disappointed, but how could these things kill me? I even thought about where to live after retirement."

A handful of bullets fell from Mandelfish's hand, and a lot of projectiles were already scattered on the ground. A red scale grew on the exposed skin outside his clothes. It was this fish scale that blocked the bullet.

Then Mandelfish, who was in human and beast form, gave the order to attack.

"Okay little ones, let these cowards in Paradise understand what a pirate in the new world is!"

He gave these people a chance, but they didn't grasp it. From the time he said the map gun, their beams had already been forged.

As for the name of a coward, they even despise the rookies who have just entered the new world, let alone these pirates nesting in the paradise.

"Don't be complacent, you're just a capable person! I'm Harold the Jackal!"

Harold roared, and his body also began to change. The originally thick legs gradually became the hind legs of canines.

Compared to the four seas, Paradise is at least familiar with the existence of Devil Fruits, and he is not too surprised to see the change of Mandelfish, who also turned into a wolf form.

However, it is impossible to recognize the specific wolf Mandelfish.

"Animal department, it's a pity that you have wasted this fruit." If the fruit is brought back, then the Beast Pirates will definitely have one more person with the ability of "phantom beast".

In Mandelfish's view, letting him eat this fruit would be a waste.

"And it's all said, 30 million jokes. The third time it's meaningless!"

Mandelfish kicked on the ground of the tavern, with a huge force bouncing off the nails inlaid on the floor, one end of the board was raised high, while Mandelfish's legs were wrapped in scales and domineering, The leg whip hit Harold directly on the neck.

The huge impact was transmitted to him, and the wall of the tavern broke a big hole. After hitting several walls in a row, Harold was buried in the rubble.

Then Mandelfish directly disengaged his ability and began to organize his clothes. The pirates of Paradise were too weak for him. After all, he was also the cadre of the Beast Pirates, and the scout team was also a combat member.

Using ability and domineering at the same time, he didn't keep his hand at all, such an enemy blow is enough.

The battle ended very quickly, and those who stayed in Magic Valley Town had almost forgotten how to fight, and even just ran out of bullets in their guns.

Their enemies are the elites of the Beast Pirates, and they are somewhat domineering. In melee combat, neither swords nor armor can stop the weapons under the domineering blessing.

"These people are so weak."

Looking at the pirates who were killed by a casual blow, she suddenly showed a puzzled look. Born in Zou, she couldn't understand why some people were so weak. Those people in the organ trafficking and assassination group were much stronger than them.

"It's just trash in the paradise, this is normal, check each other, tidy up the clothes before going back, and throw away the **** ones. Don't blame me for being rude to anyone who makes Miss Yamato feel wrong!

By the way, the boss, this guy's head will be given to you, but I remind you that the sky island really exists. "

The bounty for the pirate's head was enough for him to build a new tavern, but the people from Hundred Beasts didn't have time to find someone to exchange it, and he didn't refute Yamato just now, no matter what his purpose was, Mandelfish didn't mind letting him Get a cheap one.

Chapter 196 Jack who was treated as a fish in the sea of clouds

Mandelfish looked at the appearance of his subordinates, and after confirming that no one was injured, he led the team and left, leaving only the stunned tavern owner Dot.

Harold has been here for three years. Since he arrived here three years ago and defeated the former boss, he has become the uncrowned king of Magic Valley Town.

These people with strange combinations are so powerful, which is somewhat beyond Dort's imagination. The most important thing is that he doesn't seem to be the captain, just an ordinary cadre.

It wasn't until a pirate lost his blood-stained coat that he understood why. The flag of the Beast Pirates on that vest was very eye-catching.

"Why did the big pirates of the Hundred Beast Pirates in the New World appear here.."

But this problem didn't bother him for too long. The next moment he rushed towards the ruins. It is not a good person who can open a tavern here, but he is not as extreme as those of Harold.

The two-sentence thing has to be involved in it. In the past, no one dared to resist when they used to make a fortune, but now they kicked the steel plate all at once.

The tavern was damaged a lot, and he also expected to use Harold's bounty to repair the tavern.

On the Siwon, Yamato was not unhappy because of this, because she was already attracted by the huge water column in the distance.

That is the sky current near Gaya Island, and it is this current that sends Shandora to the sky island.

"So big, righteous father, righteous father, are we going to ride up this ocean current?"

"No, that kind of current only happens once in a long time. If you miss it this time, you will have to wait for several days. We have a safer way to go up."

"Is this the way to float across the Red Continent before?"

"Yes, but this time we will fly higher."

There was no incident all night. The battle of Mandelfish in the tavern made everyone with crooked minds settle down. The pirates in Paradise lacked understanding of strength. In their opinion, the strong are nothing more than Harold. people.

If it was just the banner of the beasts, then there would still be a few people who were not afraid of death trying to provoke them, but Mandelfish made them completely extinguish that kind of mind.

Early the next morning, Dot picked cherries in the cherry orchard as usual, which was the main ingredient for their cherry pie, and then he saw the Siwon slowly rising towards the port.

"A flying ship. Are there really empty islands in the sky?"

This thought appeared in his mind and gradually changed his view of the world.

On the Siwon, Yamato was also pulled down from the bow of the ship. The position during the flight was not suitable for her, but it was not difficult for her. She used the firing port of the naval gun in the original cabin as her observation port.

Under the control of Arceus, the Siyuan gradually approached the clouds. As the main mast touched the clouds, a strange fish actually landed on Jack's head.

Looking at the salmon-shaped fish with an elephant trunk, Jack felt that the fish was delicious.

"This is... an empty fish growing in the White Sea? Looks like we're almost there."

The well-informed pirates recognized what it was, which meant that the clouds above them were no longer ordinary white clouds, but sea clouds for ships to navigate.

Then an electric current was released by Zeraora, a big hole was punched in the White Sea in the sky, and the Siwon also followed the gap to reach the White Sea.

"You can really sail on the cloud."

"Yeah, Maria, look, the sun is so close to us, it feels like it's just ahead, foster father, let's go to the sun!"
The sunset in the sea of clouds has a different kind of beauty, that is the ghost island Unseen scenery.

"That's not good, Yamato, the sun is still higher, and that's not our destination."

Here is the White Sea, which is 7,000 meters high, and the empty island is even higher. It is still 3,000 meters away from the empty island, and the Baibaihai at an altitude of ten thousand meters is their destination.

Logically speaking, to enter the sky island is to pay one billion ike, but the environmental inflation of the sky island is serious, one billion ike is only 100,000 baileys.

These have nothing to do with the Siwon ship. If you follow the normal entry method, whether you are slowly driving up from the sea of clouds at the top of the Western Sky, or rushing up by the soaring ocean current, you must finally enter from the entry point.

And for those who can fly, a straight line is enough.

After waiting for the people on the boat to get used to it a little, the Siwon began to continue to float upward, drifting towards the higher Baibai Sea.

Baibaihai, a man and a woman are sailing with two U-shaped irons sprinting in the Baibaihai. The U-shaped irons on the soles of their feet are bound with wind shells, which are special shellfish of the island and have a variety of functions.

The wind shells can store the wind, and at this time they are using it as a surfer, and they are catching fish that live in the sea clouds at this time.

Their costumes are similar to Indians, with feather ornaments on the back of their heads, and even a pair of small handmade wings on the back.

They are the Shandia people, the aborigines of Gaya Island, who were sent here together with the part of Gaya Island from the sky current nearly four hundred years ago.

In the sky island, land is a very rare resource, so the island with a large piece of land has caused competition among the aborigines of the sky island.

The Shandians left their hometown and established their own Yunyin Village in the clouds of Baibaihai, but they have been trying to retake their homeland for hundreds of years, which is now the island of the gods - Apaya many.

The two of them pulled a fishing net to catch the food the tribe needed in the sea of clouds. At present, the harvest is not very good, and there are only a few small fish scattered in the fish basket behind them.

But there was a big movement in their nets at this time, and they struggled badly.

"Kodor, it seems like a big fish has been caught in the net!"

"I know, it looks like today's dinner is in order, work harder, Satila!"

The work of the Shandians is not divided between men and women, only whether they are adults or not. Every adult of them is an indispensable labor force with a sparse population.

The two increased the output of the cloud shell under their feet, and finally pulled the prey up below, but when they closed the net completely, they found that it was not the prey they had expected, but a person.

"How can it be a person?"

To be precise, it is not a human, but a fish-man. Jack, who was swimming in the sea of clouds, was accidentally caught on the net, and no one at Jack's age would let him act on his own. Jack's presence here means that the Siwon is on the line. Nearby.

Before they had time to release Jack from the fishing net, the huge Siwon had already appeared.

"Two, is it convenient to release our people? It's better not to refuse, otherwise we will have a hard time."

Mandelfish's voice came from the far side of the ship, and a row of muskets was raised

I have something to do during the day. Today's update will be postponed. There will be four updates, but I'm not sure what time it will be. I'll send it out when it's done later, so don't worry.

Chapter 197 The embarrassment of going the wrong way

The Siwon had just arrived at the Baibaihai Sea. After arriving here, Arceus also noticed the familiar atmosphere, so he delineated the direction for the Siwon.

As for why Jack is in the cloud, he just wanted to try to swim in the sea of clouds.

After arriving at Baibaihai, except for Lizi, who had some altitude sickness, the other pirates were basically unaffected, and their physical fitness was still able to adapt to this situation.

There are also large fish living in the sea of clouds, but those fish have now been scared away by the breath of Arceus, and the nearby sea of clouds has completely turned into a swimming pool. After all, Yamato wants to swim, so he has to open up the field.

After the surroundings were safe, Mandelfesh didn't go down to accompany them. Jack was a murloc after all. If he drowned in the sea, it would be a joke, so he just told them not to go too far downstream and not accidentally fall out of the sea of clouds. go down.

Because he was a murloc, Jack swam far away, so he plunged into someone else's fishing net. The net is woven from rope clouds and has extremely strong toughness. The young Jack was caught in the net like this. .

But in the end, it was just a misunderstanding. Not everyone in Shandia was so irritable, and they did not act aggressively. There has never been such a big ship in the sky, and these can only be visitors from Qinghai.

Some time ago they saw a pirate ship rushing up from below, but that ship was much smaller than the Originator.

After undoing the fishing nets, they took a few steps back, indicating that they were not hostile, and then opened Fengbei and left here. They didn't seem to want to have too much communication with outsiders.

"Father, are those the people who live here?"

"Well, they are the ones who were brought up with the sky and ocean currents, but their ancestors are different.

Manderfish turned left fifteen degrees and sailed at full speed.

Zeraora, get Jack up, it's almost time to play. "

Siwon caught Jack by the way when he passed by, but the two Shandians found something wrong. The direction they were heading was the location of the tribe's gathering place.

"Go! Go back to the tribe!"

There are not only sea clouds on the sky island, but also island clouds. Ships cannot sail on the island clouds, but their homemade jet device can allow them to glide on the island clouds.

The island cloud has the same properties as the land, allowing plants to grow, but there are no seeds in the island cloud, so the seeds of the plants growing here come from ships in Qinghai and the washed up part of Gaya Island.

"Chief! Chief! A ship from Qinghai is coming, and they are heading towards us!"

In the depths of the island cloud, one by one pointed tents are distributed here in an orderly manner, and there are some totem poles in the middle, many of which have been lit with flames as lighting tools.

Although it used to be a part of Gaya Island, it has been living in isolation for nearly four hundred years, and the Shandia people are thinking about how to take back their homeland every day. This is a battle that lasted for hundreds of years war.

Both the Sky Islanders and the Shandians have paid huge casualties for this, and the manager of the Sky Island in previous years has become Gan Fuer.

His policy of peaceful coexistence has eased their conflict, but it still hasn't solved the problem fundamentally. The blood feud that has been in existence for hundreds of years is not so easy to resolve.

A slightly old man with a hood made of animal skins walked out after hearing the sound.

"Kodor, Shatila, don't panic, what happened?"

"Chief, it's a boat from the Qinghai Sea. It's a big boat. We were fishing before, and then."

They briefly said what had happened, and then waited for the chief to arrange.

"All adult warriors get ready, Kodor, you two take people to the beach to see where those people are going."

The Sandians underestimated the speed of the Siwon, which had docked beside Shimaun not long ago.

After leaving some people to guard the ship, others walked down. The empty island jungle at night was full of mystery, but no one in the Beast Pirates felt scared.

Yamato even ran at the front, although this was unreasonable, but Arceus didn't think that any creature could hurt the opponent right under his nose.

"Father, is what we're looking for right here?"

"Not far ahead."

"Is that a treasure?"

"It's of no use to anyone else, but it's my own treasure, I just lost it many years ago."

"So father is often away from home just to help foster father find things?"

"probably."

He originally wanted to say yes, but according to Kaido's character, he might do something on the way out. According to the time, Yamato did it at that time, so he is not very sure.

In fact, at this distance, he can directly guide the slate out. As long as it is not blocked by obstacles like the evil slate in the belly of the sea king, he can directly guide the slate to return.

But he wanted to see where the Lunaria people hid his slate, so he followed his perception.

"Then as long as you get the things back, will your adoptive father, father, and Sister Shaina be a lot easier?"

"Almost, but it will take a long time."

"Understood, I will help foster father get everything back!"

"You're still too young, Yamato, but you've already helped a lot."

"Is there? How come I don't know?"

Yamato didn't know how much her own luck had helped her, but she tripped over a tree root under her feet without paying attention, and the soft Shimayun didn't hurt her.

On the contrary, the Geely Egg behind him looked distressed, but Yamato was used to bumping and bumping, he got up after a roll, and saw a brand new path in front of him, and Shandia's secluded village had already appeared in them. before.

Kodor did take people to check the situation before, but the problem is that the scope of the sky island is circular, unlike Wano country, where there are only a few paths to enter, so they are perfectly staggered.

Looking at the strangers appearing on the outskirts of the village, the warriors who were ready raised their weapons one after another, even if the old and the weak were no exception.

The members of the Hundred Beasts were never afraid of fighting. Seeing this, they went to the front to pick up their weapons and confront each other. As long as an order was given, they would start their own fighting without hesitation.

"Outsiders, what are you doing here?"

The chief did not know the strength of the opponent, but he was ready for battle.

"Don't be nervous, I'm just here to get my stuff, it's here."

Chapter 198 The Promise of Four Hundred Years

"There's nothing for you here, outsider."

Seeing the voice of Arceus of unknown race, although the chief was shocked, he calmed down and communicated with the other party.

He is the most peaceful person among the previous chiefs, and he does not want to see the bloodshed of his tribesmen because of meaningless battles.

They have sacrificed too much to take back Appayado.

"It doesn't matter if you say it or not, I already feel its existence."

A gust of wind blew through here, and the outer skin of the tent whirled under the wind.

The place where the Sandians live is simply set up leather tents. They did not gain much advantage in the battle with the Sky Islanders, so they mainly fought in a guerrilla manner.

The place where the tribe lives is also regularly shifted, so setting up tents is more suitable for their way of life.

A huge vine grows where they live, and a huge piece of gold floats down from above at this time.

"Mold into gold? That's a good way to hide."

He could feel that his slate was in that piece of gold, and it seemed that the Lunaria people did such a thing because they were afraid of being discovered.

But it seems that this slate was lost hundreds of years ago, and Shaina and Jhin only kept some records by word of mouth.

Seeing that the piece of gold was taken down by Arceus, the expression of the chief of Shandia changed a bit.

"Outlander, put things down, it's not yours."

The chief of Shandia took up his weapon. That piece of gold is related to a promise. They have already broken their trust once, and they cannot break their trust a second time.

However, this sentence is equivalent to an inverse scale to Arceus. Any creature that covets his slate is an unforgivable sin, so a fierce and incomparable aura emanates from his body.

That was his coercion, dominated by the evil-faced slate, and an aura of fear swept across the entire Shandia village, both men and women, young and old, were crushed to the ground by this coercion.

"Master Arceus. Angry."

"Master Arceus, let's get rid of these guys, don't keep getting angry about it."

This coercion was not aimed at them, but it still made them feel heart palpitations. Jack and Maria even felt that breathing became difficult. Even Yamato felt that Arceus was a little strange at this time.

"No, I'll give you one last chance to explain what's going on, or destruction will be your only end."

Walking to the chief, Arceus gave his ultimatum.

If it is the original Arceus, the phrase "does not belong to you" is the biggest taboo, but the current Arceus is willing to give him a chance to explain.

"That is. Ancestor's promise. We will protect it for others. Unless you kill us all, you will never take it away!"

Speaking of the end, he actually stood up against that fear. Although Arceus removed the coercion on the level of power, it was a great thing for him to stand up.

"The reason is very good, but what you are keeping is what belongs to me, and the people who hide it here are my people. Now I am awake, so I came to retrieve my things, so you understand? "

"How do you prove it?"

"I advise you to keep your promises is a very good quality, but it is stupid to be too self-sufficient."

Arceus did not say anything, but proved everything with his actions. Under the influence of his power, the gold block began to melt, and soon revealed the true content of the slate.

Under the influence of his power, the slate bloomed with brilliance and finally merged into his body.

"Now do you believe it? Only I can use its power. Your promise has been fulfilled, and it has been fulfilled well."

Things related to slate tend to make him act impulsive, so he will be more violent than usual, but after calming down, he is not an unreasonable person.

It must be the ancestors of Jhin and Shaina who made an agreement with these Shandians, and they have been fulfilling their promises for hundreds of years.

"Put down your guns, these people are not enemies, ship doctor, go and examine them some bodies."

Incidentally, he felt the properties of the slate again, and then looked at Yamato with a little more strange emotion.

After a while, the misunderstanding has been explained clearly. Arceus and the others are not predators, they are just people who come to retrieve their own things. His behavior just now is enough to prove that it belongs to him.

Although his appearance is peculiar, the Shandians have more respect for him. In their beliefs, different animals represent gods.

They also acted impulsive before, but this relatively primitive tribal folk customs is relatively simple. After figuring out the reason, they did not bother about the previous things, but started to celebrate, because they finally fulfilled the promise of the ancestors.

That was also more than 400 years ago. The legend of Shandia, the great warrior Calgara, was still a young man.

Their ancestors had an intersection with the original Lunalia people, the Lunalia people helped them heal, and they also took over the task of keeping the slate.

They are not greedy usurpers, but trustworthy custodians, so that Arceus' previous actions went a little too far.

So he asked his men to bring back all the supplies on the ship, and a new banquet was held here. As for Kodor, who went the wrong way, they just caught up with this banquet.

They who were pulled into the bonfire party by the tribe didn't even understand what was going on.

"Father, you are just scary."

"Scared you?"

"No, but such a foster father"

"Don't think too much, I get angry occasionally, just have fun, and if you don't want me to be angry, then you will be obedient."

She is now full of promises, but it is uncertain whether she can remember it in the future.

The young Shandians danced their own dances around the bonfire, the Beast Pirates were also pulled in, and the patriarch was talking in front of the young people.

"We have fulfilled the promise of the ancestors! Hundreds of years have passed, and the things we have kept have returned to their original owners! This is a good momentum, and the promise of the great warrior Calgara and Rolando will definitely be fulfilled!

We will definitely be able to take back the Appayado that belongs to us! The bells of the golden bell will surely resound through the sky! "

"Oh!"

However, a strange voice was mixed in among the coping noises.

"Grandpa, what is the golden bell?"

Looking at the questions from Yamato and other children, the patriarch was not unhappy, but instead told the story of the Shandia people again, a story that has been passed down by word of mouth for hundreds of years

Chapter 199 Yamato's Thought Lesson, Planning for the Sky Island

Nearly 400 years ago, when Gaya Island was still intact, Shandora did not come to Sky Island.

Vinbrand Rolando, a navigator in the North Sea at that time, came to Gaya Island unexpectedly to avoid the heavy rain, and saved the Sandia family from the "tree fever", making a great contribution to Gaya Island.

He also forged a deep friendship with Calgara, the great warrior at that time.

But because of cutting down the trees in the minds of the Sandians that harbor the souls of their ancestors, there was a conflict between them, and it was too late when Calgara knew that those trees were the truth of their illness.

Rolando's ship has gone to sea.

Calgara vowed to ring the golden bell every day and use the bell to guide Rolando.

Sandians also cast special commemorative statues for Rolando.

"Because of the ocean current, we came to the Sky Island, and those Sky Islanders also stole our land. After hundreds of years, we still haven't been able to grab our own land, and we haven't been able to ring the golden bell again."

The chief is still telling the history of Shandia, but Yamato's thoughts are no longer here.

"Rolando Rolando. I seem to have heard this name somewhere. Where is it from?"

"It's a fairy tale from Beihai, the big liar Rolando. My mother used to read story books to us."

Maria reminded Yamato that the well-known fairy tale Beast Pirates in the North Sea can naturally be found, and several of their children have heard similar stories.

But it was different when the words reached the chief's ears.

"Big liar? How could Rolando be a big liar?"

And when he listened to Maria and Yamato telling the story of Qinghai in a few words, a burst of tears came out of his eyes.

"Actually. Is this the case? Because our incompetence actually caused the benefactor to suffer such a big grievance."

"Father, why don't we help them."

"Why do you do that?"

"Because. Because I think they are so pitiful, they can't even keep their own home"

"Yawa, do you know? Hundreds of years have passed, and those Sky Islanders have also regarded it as their home. What we do is to take away their homeland for the current Sky Islanders, do you understand? "

Yamato's brain capacity seems to have reached the upper limit because of this. She originally thought that the Sandia people were pitiful, but it became strange to say so.

"Even for Wano Country, we are outsiders. Even if we can make that country live better, we still can't cover up this essence. People may not care because they can get benefits.

But to those in power, we are the invaders, the conspirators, and the enemy. "

"Father. I don't understand"

"You will understand in the future, but now you must understand that this is a cruel world. Without power, everything is empty talk. Only the strong can help the weak according to their own preferences.

You said before that you want to help us, and everything you want to do now requires strength, so Yamato, you have to learn to become stronger, understand? "

He took this opportunity to educate Yamato. She is too naive now, and she may not be able to remember these words now, but this sign will gradually affect her.

Before Kaido's training started, he had to make Yamato want to become stronger.

"Understood, you have to become stronger."

But in the end, Arceus decided to help the Shandians take back Apayado, but the reason was not as simple as Yamato, not because he thought they were good people.

First of all, the Shandians did help him keep things for hundreds of years and kept their promises back then, and his coercion just now also caused a lot of influence, which is a little compensation.

On the other hand, it was because he took a fancy to the shellfish in the empty island. The shellfish here have various effects and are widely used in life and weapons. Through the shellfish, the Shandians of these tribal civilizations actually DIY their own products. handmade rocket launcher.

These shells have high strategic value. On the one hand, helping the Shandians regain their territory, on the other hand, he intends to plant the banner of the beasts here.

The flag is used to deter other foreign pirates. In essence, they will not interfere in the management of this place. Everything will be handed over to the Shandians to manage themselves. They only need to provide some shellfish every time.

Like the affiliated islands recruited by other big pirates, many sovereign countries in the New World are like this, and they are also under the protection of other forces while they are autonomous.

There are already two forces here, and he doesn't plan to send someone to manage this place directly, so choosing one of the two is a good result.

For these reasons, he chose the Shandians, but when Mandelfish and the chief brought it up, the chief refused.

"Why? Grandpa, we are helping you."

"Little girl, this is our own business in Shandia, you are friends, we can't let friends bleed because of our business.

Keeping that thing is the promise of our ancestors. Your wine, food and medicine are enough for us, so don't worry about what happened yesterday, after all, it was a misunderstanding. "

He had already decided to lead his clan to attack Appayado after the Beast Pirates left and regain his homeland, but he did not want outsiders to get involved.

"You don't have to worry about the bloodshed. If the combat power of the Sky Islanders is this level, we will have no problem."

At this time, a Sandian warrior came to the chief and said a few words, which changed his expression again.

Because he said that at the end of the banquet yesterday, Shandia and the Beastmen had a friendly competition, and Mandelfish defeated all the warriors here with his bare hands.

"So what do you get? Do you want Shandorah's gold?"

Although Shandia didn't develop much, he didn't think that someone would fight for others for no reason. Gold was the most direct thing he could think of. If he could recapture Appayado, it wouldn't matter.

"This is what Arceus-sama means, and it's a reward for keeping your promise for hundreds of years. We want shellfish, a specialty of the sky island, rather than gold.

So every year after the recapture of Appajado, you have to collect shellfish for us, we can also bring you the necessities of life, and at the same time hang our flag at the entrance of the empty island. "

Mandelfish offered his own terms, which were easy terms for the Shandians.

"What's the point of flying the flag?"

"It means that this place is under our protection. If there are people who come from Qinghai to make trouble, as long as you contact us, we will expel those enemies for you, but don't worry, we will not interfere in your own internal affairs."

"So you want to occupy the entire sky island?"

Mandfish was talking about flying the flag at the entrance to the sky island, and the chief noticed this too.

"It can be said that Apayado is returned to you, the sky island is occupied by us, and you manage the sky island for us."

"Chief, don't hesitate, this is the best chance to take back your homeland, have you forgotten, the benefactor has suffered grievances for hundreds of years in Qinghai!"

The chief was still thinking, but the other main battle factions who heard the news couldn't bear it anymore and expressed their willingness to take back their hometown.

Sky Islanders are a feud for most Shandians, and they naturally don't worry about Sky Islanders' fate.

Under the instigation of the tribe, the patriarch finally accepted the conditions of the Beast Pirates, mobilized all the adult warriors in the tribe, and prepared to take back his homeland.

Chapter 200 Anyone can claim to be a god

"Retake home!"

"Retake home!"

There is no doubt about the efficiency of tribal civilization in war mobilization. The recapture of Appayado is the obsession of the Shandians, although the current chiefs hope for peace, which is a dove of the Shandians.

But this dove faction is only relative. It is his bottom line to take Shandora back. This is almost an irreconcilable contradiction between Sky Islanders and Shandia people. Living at an altitude of 10,000 meters, they have an obsession with the land. read.

Handmade DIY weapons with shellfish from the island, stone spears, simple bows and blowers, as well as iron products from Qinghai.

Sandians have a wide variety of weapons, and many pirates have come to Sky Island over the years.

There are also pirate ships that come up from the top of the Western Sky by normal means. They have fought and traded with those pirates, and this is also the source of those weapons.

The Sandians seemed to be planning to fight back, and all the gunpowder stored in the tribe was brought out.

Gunpowder is a scarce resource in the sky island. The raw materials for making gunpowder cannot be found here, so the source can only be Qinghai, and when the supply is unstable, use less.

"Yawa, what are you shouting after them?"

"I can't help it. Adoptive father, so Rolando is really not a liar?"

"Well, he's not a liar, he was really their friend back then, but his behavior was stupid."

The Shandians were mobilizing over there before the war, and they didn't notice them here. According to the Shandian people's customs, it is not a good choice to speak ill of Rolando face to face.

"Why?"

"What did he do after returning home in the fairy tale?"

"He brought people from the kingdom to find the Golden Land, but he found nothing, so he was called a big liar."

"That king sent his men because he was greedy for the gold here.

If it wasn't for the sky-high currents that sent them to the sky island, what do you think would be the result when the army of the kingdom who wanted gold encountered these poorly equipped Shandians?

The result will only be a massacre. If he helps his friend, he betrays the country, and if he helps the Kingdom Army, he backstabs his friend. What do you think he has gained by doing this? "

The common man is innocent and guilty. The Shandians have too much gold, and their ability is not enough to protect their own safety. When they are discovered, their fate will never be very good.

Rolando shouldn't have spoken out about this, he really regarded the Shandians as friends, but he couldn't deny his naivety.

"So Yamato, if you really treat each other as a friend, then think about the consequences before doing this, and don't impose what you think is good on others.

Maybe Rolando felt that the arrival of the kingdom could help the development of the Shandians, but once people's desires started, it was difficult to stop, and he was wrong from the beginning. "

He seized the opportunity to educate Yamato. This age is the time to be determined. As long as you pay attention to education, there will be basically no problems in the future.

But looking at Yamato's confused little eyes, he felt that she might not have understood much of his words.

In addition to the young and the old, even the women of Shandia have taken up their weapons. In fact, it is not only this time. Every time they act, they are fighting against the odds. home.

They are already familiar with the direction of Appayado, stepping on the skateboard made by Fengbei, the Shandians once again embarked on the journey to Appayado.

The chief also set foot on the expedition team this time, and set foot on the Siwon with several young clansmen.

The original Kodor and Shatila were also included. Although the two of them accidentally went the wrong way just now, Kodor is actually the strongest warrior in the clan today, and he just married Shatila.

However, on the Siwon, something special caught the attention of the Shandians.

"Chief, it's Bass, a lot of Bass."

Pointing to some green plants on the boat, Kodor showed an envious look, Bass was referring to the soil here, and the Shandians who were driven out of their homes could not find other land in the air island.

The bottom layer of Haiyun is not sediment, but will fall directly, so the soil that can be seen everywhere in Qinghai is very precious here.

"Yeah, if the ancestors of Bass lived in that direction, if they went full speed in that direction, it would take about half a day to reach Apayado."

He did not tangle in the soil in the potted plants for too long, but continued to point the way to the Origin. Arceus could rely on the perception of the slate to find the Yunyin Village in Shandia, but he could not find the empty island. Where.

Half a day is a theoretical time, but in fact they need a shorter time, because the people on the empty island are not fools, they are not ignorant of what happened in the Baibaihai Sea.

Siwon's way of entry is strange, and the route it travels is different from ordinary people, so they didn't find it.

But now that the large army of Shandians is advancing towards Appayado, the people of Sky Island naturally discovered all this.

It is said to be a large army, but in fact, there are only one or two hundred people in pieces. For nearly 400 years, the Shandians have no other tribes to communicate with, and wars have been breaking out, and the number of tribes has already begun to decrease.

Before reaching Appayado, the army of the sky island appeared.

Fengbei skateboards are not exclusive to the Shandians. They also learned these things from the Sky Islanders. Although the tribal system is still relatively primitive, it does not mean that they will not learn from others.

Compared with the miscellaneous equipment of the Shandians, the costumes and weapons of the Sky Islanders are more uniform. Except for the few people in the lead, everyone else is in uniform white robes.

"Those are the guardians of Sky Island, and the leaders are their priests, and the one on the horse is the current **** of Sky Island, Gan Fuer."

The **** here is not a **** in the true sense, just like the general of Wano country, it is just a name for the ruler of Sky Island.

Looking in the direction of the chief's finger, you can see a thin middle-aged man.

He wears silver knight armor with a goatee at the corners of his mouth. Although he does not only have a slit in the glasses like the silver axe, he also wears a thick helmet, and a medieval-style lance is his weapon.

Yamato was still observing the situation here from the launch port of the turret, but her focus was not on Gan Fol, but on the horse.

"Winged horses? Do all the horses in the sky have wings?"

Unfortunately, because she was observing from the cabin position, no one answered her question, and the two little ones around her also didn't know the answer.

"Lord Holy Beast, let me do it, this subordinate thinks that this person is not enough to bear the name of God."

Zeraora's shoulders flashed with electric light, and she applied to Arceus to fight.
