

## Arceus 351

### Chapter 351 Acting Dreams and Pink Diamonds

Last year, he did not have this qualification until he was promoted this year, so he valued this event very much and spent a lot of money to prepare this gift.

Hundred Beast Fruits are very friendly to talented high-level executives. They enjoy the shares of Hundred Beast Fruits. The more Beasts earn, the higher they can get.

Up to now, the position of the general manager of Hundred Beast Fruits has been a part-time job, not an official appointment. The actual decision-making party is still the Hundred Beast Pirates, which is one of the reasons why Kojiro is bald.

"I still don't think it's appropriate to send diamonds."

"No, Stella, this isn't just a gift, it's also about the advice I'm going to make. You have also discovered in the past two years that the jewelry industry in the New World is vacant, and most jewelers are only regional. Industry, they fight with each other, no one can beat the other.

And the beasts and fruits have a huge trade channel and relationship network, as long as they make use of it a little, they can solve the problem of transportation. As for raw materials, treasures, or minerals, as long as they can be found, the supply of goods is not a problem.

Relying on this can definitely knock them down and become the overlord of this area. There is no reason to let go of such a lucrative luxury. "

The jewelry industry has developed very deformed in the world of pirates. There are many elements in it, such as some wonderful islands full of gold. Occupying such islands can directly reduce the price of commodities.

At the same time, due to the rise of the era of the great pirates, shipping has become more dangerous, and jewelry is not a wholesale food, even if a jewelry store buys very little goods at a time, which leads to the fact that the income earned by one trip may not be enough for bodyguards. cost of.

There are chain jewelers only on the safer red soil continent, most of the other islands are regional jewelers.

But these are not a problem for the beasts. Wandering around is the purpose of the beasts today. Originally, ships sailed around various sea areas in order to find the slate beasts, and it was not a problem to carry jewelry.

As for the supply of goods, the financial support of the beasts and fruits, or finding some special islands, these should not be difficult. Tezzolo didn't know how rich the gold under the beasts was, this was just his speculation.

As a regional manager, he has the right to mobilize some funds, so in this case, he made his wife popular, and even brought himself to the stage to perform several times.

In this way, even the endorsement fee can be saved, or the endorsement fee can directly become the extra money for his family at the cost price.

And his star dream is not broken, the only requirement for him is to make money.

Those people don't deal with poisonous beasts, but other things are different, as long as the income is enough, they won't mind opening up a new department.

Since the support of capital, Tezzolo has seen more of those dirty things, so he doesn't believe in those so-called economic companies.

But now he has no decision-making power, and can only submit an application report in this way, hoping to attract the attention of the above.

The power to mobilize some of the funds does not mean that they can mess around. The forest is big and there are all kinds of birds. Corrupt elements have also appeared in the beasts and fruits, but a company of a new world pirate warlord, the end of corruption can be imagined.

"You can decide for yourself, I don't know much about this."

"Meow~"

At this time, the cat boss came out of the room, and when he saw the cat boss coming out, Tezzolo rubbed his cat's head kindly, and the cat boss didn't resist too much, so he accepted Tezzolo.

It also accepted these two people for two years, but it did not forget its responsibilities.

As long as Tezzolo doesn't have any crooked thoughts, the cat boss is a cute pet, otherwise it will kill people, and its claws are already stained with blood.

That's what happened when Stella was socializing. At that time, no one thought that a cat could kill two drunk adult men, but after that, Tezzolo became closer to the cat boss and let Stella I got into the habit of taking my cat with me wherever I go.

Picking up Stella's packed luggage, Tezzolo and her set foot on the ship heading for Wano Country.

And the cat boss is even more excited than them, he knows what it means to return to Wano country.

The ship docked on an island near Wano country after sailing for a while. Stella, who came down, looked around, but did not see any celebration. *NoVeLUSB.com*

"Is it here? Not like that."

The people around were still busy, and only the two of them were waiting with their luggage, which seemed a little out of place. At this time, an iron man came over, and the footsteps of the metal transformation made a clanging sound.

"Sakagi."

He didn't call out Tezzolo's name, but his internal code name.

"It's me, you are"

In front of him is Scotch, who has been stationed abroad for many years, and Scourge has also ushered in a rotation time. In the next two years, he will switch positions with Holdham.

Yamato's birthday party is the time for him to hand over. At the same time, he has a new task to return to Wano country with Tezolo.

"Scourge, I'll take you to the base"

Scourge took out a metal plate to signal them to stand up, then magnetically picked up the metal plate and flew towards Wano Country slowly.

After flying for a while, the unique rock wall of Wano country appeared in their field of vision.

Tezzolo handed the carefully prepared gift box to Rotom at the door, and then went to the venue under the guidance of some maids, these people were people who came to Oni Island to work in Wano.

Ever since Kaido took up his position as King Protector of the Kingdom, it has become the norm to work in Onishima, and the invitations of the beasts are only given to some of the external subordinates, and there is no such thing for the internal people.

This led to one thing, as the current general, even if there is no invitation card, he had to take the initiative to participate in Yamato's birthday party.

Of course Jin couldn't forget such a trivial matter, he just wanted to see the other party's attitude, and now it seems that there is no problem.

After is the familiar part of opening gifts. Today, Yamato lacks everything, and most of the things they want can be satisfied, so it is more of a sense of ritual.

But when she saw the diamond, as Stella said, this kind of thing means nothing to Yamato.

"Shiny stones?"

After playing around for a while, Yamato seemed to have lost interest in it, but the good news was that the letter Tezzolo left inside was not ignored by her.

At first he thought Yamato had some decision-making power, but it turned out that he overestimated some things.

"Father, look at this, it's so complicated."

Arceus took over the development proposal, and then found a development plan from his desk that had just arrived. Looking at the diamond in Yamato's hand, he had some new ideas.

## Chapter 352 The Princess of Diamonds

"A show company and jeweler, the largest recreational ship at sea, is a really good idea."

Gambling on this sea is completely legal. Compared with the nominally forbidden but never stopped human trade, gambling even seems a lot gentler.

The sea entertainment ship, that scale should be called an entertainment city, Tezzolo even put forward the idea of Guran Tezzolo earlier.

However, unlike the ships he built after he obtained the golden fruit, Tezzolo at this time planned to rely on the beasts to complete a similar idea, and there were different settings in many details.

Now this is still a draft, and even that ship is just an idealized sketch. In terms of scale, it would take years to build such a ship even in the pirate world where the shipbuilding industry is very developed. .

Arceus read the report written by Tezzolo, and at the same time arranged for someone to bring Tezzolo over. At the same time, the busy Quinn received the order.

Quinn is comparable to a universal screw in the Beast Pirates, medical treatment or research, development or hosting programs, fights or beatings, mediating psychological emotions, Quinn in many places can play a very powerful role.

And when Yamato happened to be hot for three minutes at his age, although he had no interest in the pink diamond just now, he turned his head and had a new idea.

A diamond that cost a lot of Tezolo's salary seems to be used by Yamato as a finger top. The refractive index of the diamond is the highest standard among gemstones. The fifty-seven facet cut can express this property most vividly.

So the light reflected by the pink diamond is still very beautiful.

"Like it?"

"It's interesting, but it's too small, and it's not interesting to be just like that."

"There will be more than one soon. Tomorrow you just want to play marbles with diamonds, no problem."

A knock on the door sounded from outside.

"Lord Arceus, here I come, this is the high-purity sea stone and other chemical materials you want."

Quinn is holding a sea floor stone in one hand. Although he is transformed from the fruit ability, he will become weak if he directly touches the sea floor stone, but he can't stand it. He has a prosthetic hand. few.

"But what do you want high-purity Hailou stone for?"

"Of course, the special little guy has to prepare some extra things, and Pokémon still needs to order cards."

Small Fist Stone, Pangyan Monster, Big Rock Snake, they are all Pokémon born from Hailou stone ore. Although the body structure has Hailoushi composition, the skills used also have Hailoushi effect, but the high purity There are essential differences between Hailou stone and Hailou stone ore.

At this time, Quinn brought a piece of high-purity sea floor stone obtained after purification by the unique process of Wano Kingdom, which is much stronger than ordinary raw ore to suppress the ability.

temporarily brought over the diamond that Yamato was playing with as a spinning top, and then a streamer spun around him, and the two stone slabs, the rock and the fairy, were separated.

Ordinary Pokémon like the Small Fist Stone are enough to inject two energy at will, but the Pokémon of the phantom beast is still a big project.

The Hailou stone was on the bottom and the pink diamond was on the top. The two minerals gradually merged together and formed a human-like body. With the continuous influx of energy in the slate, a pair of red eyes opened on the face.

"Guian, Your Majesty."

There is a golden excellent arc ring on the neck set with a pink diamond, the upper part of the body is a white skirt shape, and the top of the head is also composed of pink diamonds to form a crown.

As her consciousness gradually improved, she bowed slightly to Arceus with her hands in the skirt.

Diamond Princess - Diancie.

is not an evolution of the little diamond, but a mutant of the little diamond. The princess-like etiquette and upbringing are almost her standard, and the human language is not a later endowment like Zeraora, but a natural ability.

"Every time I feel that this power is amazing, does lifeless ore have life like this?"

Quinn sighed at the magic of this power while holding a cigar, while Yamato was a little bit closer to Dianxi. Dianxi's height was about 70 cm, more than twice that of Frost Milk Fairy, who had no legs. She also floats in the sky with a special power. ***NOveluSB.com***

"Miss Yamato, hello."

"You know me?"

"I am the creation of the Lord, I know you naturally, but I only know you. Please take care of me in the future, we will probably be companions."

"Don't underestimate her, her name is Dianxi. According to legend, she can save traveling companions from disasters and diseases."

But this is just a legend, Dianxi is very rare, only hidden in the depths of the mine, and the people who can see her are usually very lucky people.

It is easy for a familiar personality with the power of Vibrant to communicate with a mild-mannered Pokémon, and they become acquainted in just a few minutes.

Frost Milk Fairy, Tutu Dog, Dianxi, Geely Egg, Big Milk Tank In a sense, her team has taken shape.

Compared with Yamato's frequent babbling, Dianxi behaved very generously and decently, and has always maintained an elegance. She will also be the teacher of Yamato etiquette in the future.

Although that thing is not very important, it is still something to pay attention to sometimes.

"Master Arceus, you didn't specially let me come here just to send that piece of sea tower stone."

Looking at Yamato who was playing with Dianxi, Quinn also raised this question. Wano Country is the territory of the beasts. Now even if you send a random minion to deliver things, there will be no problem.

There is no need for him to come here because of just a piece of ore.

"Your chemistry should be good."

"Of course."

In the face of Arceus' answer, Quinn still gave his own answer. His technology is mainly about chemistry and biology, and he is an expert in this regard.

"What is the essence of a diamond?"

"Diamond.. Elemental crystal composed of carbon."

"That's right, so Diancie, show your abilities."

"clear."

Tianci stopped playing with Yamato, and then made a squeeze-like movement with both hands on his chest.

It was just a pink halo at first, but soon there was a crackling sound of falling, and pink diamonds appeared here out of thin air, and soon filled the ground here.

This is not creation, but compression, Tianci can compress the carbon element present in the air into such a diamond with his own power.

In other words, Diancie's ability can compress things at the atomic level.

The dislocation of the carbon atoms themselves or the deformation of the internal lattice will form pink diamonds, which is why all the diamonds made by Diancie are pink diamonds, but she can do much more than that.

### Chapter 353 Quinn's New Position - Tianhi's Chemistry Teacher

In addition to her own diamonds and sea towers, Dianxi's birth was also mixed with some other materials, so she can compress more elements, and any crystal that can exist at room temperature can be compressible for her. .

If the environment is suitable, some unconventional crystals may not be impossible, but she can only control the compression, no matter how meticulous micro-manipulation can be done.

"Compressing carbon in the air into diamonds"

Hearing the principle of Dianxi making diamonds, Quinn felt that his chemistry teacher's coffin board might not be very stable. This ability is simply amazing. If other elements Dianxi can also be compressed, it means that he can Easily get a lot of elemental crystals.

Part of the research, including the so-called bloodline factor, can also be done more conveniently. The way he looks at Dianxi has changed. He thought it was just a magical creature created by Arceus, but now it seems that this is a big baby. what.

Even if Dianxi can't do anything more terrifying, she can only compress the elements in the air, then she is also a supermodel atomic compressor.

Not to mention, there is a high probability that Dianci can get a bug in the thermal power station and recompress the carbon element in the smoke into a combustible object.

"That is her innate ability. As for whether it can produce other results, it depends on how well you teach it."

Not to mention, at least there is nothing to worry about in terms of diamonds. With Dianxi, they have the ability to directly break the balance in the market. Even if the diamonds made by Dianxi are tested, the results are natural diamonds.

And also diamonds of different colors.

Pink diamonds formed by the distortion of the lattice structure, blue diamonds formed by absorbing trace amounts of boron, yellow diamonds formed by absorbing light when nitrogen atoms replace some carbon atoms in the diamond crystal, black diamonds caused by dark inclusions, and crystals caused by radiation. Green diamonds formed by grid changes.

It took some time for Diancie to get a large natural colorful diamond, and since then the entire diamond market has been left to their discretion.

Although pink diamonds and red diamonds are the most valuable ones, the entire market is in Tezolo's plan.

Just when Quinn was thinking about something, Tezzolo also came here, and Xiaobai, who was transformed into a cat boss, jumped in front of Arceus in a few seconds, while Tezzolo watched the diamonds all over the ground sink into the ground. sluggish.

"These"

"It's all natural diamonds. Your suggestion is very good, but that diamond will cost you money. Just pick up a few and take them back to play. They're all worthless things."

"This"

Originally the diamond was the size of a pigeon egg, but the diamonds in this place, let alone pigeon eggs, he even saw the size of an ostrich egg, the things stored here can directly collapse the existing market.

But what happened next made him even more sluggish.

"Quinn, grind those similar ones into marbles, and then let them play with them. The rest of the powder. Make it into a handicraft.

Looking at the room full of diamonds, their destiny is to become toys in the end. Although the price of diamonds itself is also related to the hype, such a massive influx of diamonds into the market is bound to lead to collapse, so only a part of them will become jewelry the company's heritage.

"It's not the first time we've met. Do you need to be so nervous? The people below reported to you very well, especially at the negotiating table, but they didn't back down."

"Where, thanks to the background of the beasts, those people don't dare to go too far."

Yamato also saw Tezzolo, who was very respectful. Looking at Tezzolo, she seemed to remember something.

"Brother Tezzolo."

"Miss Yamato, happy birthday, but it seems that my gift is a little inconspicuous."

Although his main purpose was his plan, the pink diamonds all over the floor made him feel that his gift was too cheap.

"No, it's a nice gift."

After all, that pink diamond is also one of Dianxi's bodies today, but Yamato's next sentence surprised Tezzolo.

"I suddenly remembered, do you owe me 300,000 Baileys?"

She is not stingy, 300,000 Baileys are nothing to her, but this is a matter of principle.

If it was given, she would never ask for it, but since it was borrowed, she had to pay it back.

"Miss Yamato, don't worry, I just made a presumptive claim to invest in some financial products for you. This is the income of those 300,000 Baileys over the years. If you don't believe me, you can take a look."**nOvELusb.coM**

Tezolo took out a passbook from his arms. It was a voucher stored in a bank in the beast territory. In two years, the 300,000 Baileys had been doubled by more than ten times.

"The 300,000 is a lifetime of kindness, and I will never forget it."

"Okay Yamato, take Dianxi to meet your new friends, I have something to talk about here."

"Okay, I know my foster father, by the way, can I stay up tonight?"

"As you like, but I won't interfere in tomorrow's training."

"That's okay"

Without Kaido's training, it's fine to stay up all night with her energy, but with Kaido around, sleep is indispensable.

Yamato pulled Dianci away from here, and Quinn also found something to take away most of the diamonds. The order he got was to polish marbles. Although it was a bit extravagant to use diamonds as marbles, it was no problem.

"Come on, tell me in detail what your development plan is like."

After the child ran back to play, Arceus and Tezzolo also chatted about business affairs. Now their news network and sphere of influence are not small, but these are all illegal links.

There are more than 200 member countries of the World Government, and the wider area is still under the rule of the World Government. Tezzolo's idea of developing a performing arts company is just enough to expand the scope of information investigation.

At that time, there may be a lot of licking dogs. The power of licking dogs is sometimes endless. Maybe it can really dig a stone slab three feet into the ground.

Overall, the conversation was quite pleasant. Tezzolo's idea was very good, and the development plan was reasonable. Arceus generally passed his proposal and let him do it.

Tezzolo and Arceus chatted almost overnight. Now that he is in his prime, he is very excited that Arceus supports his plan. Arceus also looked at other documents shortly after he left.

There is the recent cadre rotation of the beasts, and there are some private applications for cadres, most of which are based on their own interests and hobbies, hoping to adjust the scope of tasks.

For example, Mandelfish's application is hoping to be responsible for the task of going to and from the New World and the Paradise area.

The author is a liberal arts student, and a science major is basically scrapped. Dianxi's ability roughly stops at the elements in compressed air, what will this lead to, and what can be done, please feel free to comment.

ps: There are still dozens of monthly passes to 5,000. Although it is a bit late, if you have stock, throw it out (dog head saves your life)

#### Chapter 354 Strange application and good days when Kaido was away

There are many similar applications, such as Babanuki's application to add a breeder position in the Hailou Quarry. Although the appearance of the Pangyan monster has greatly enhanced the mining efficiency, Boscordola and the small fist stones also let the security guards. Level up.

But the food intake of these rock-type Pokémon is also a problem. Ore is their food source, but their food is not only ore, but also needs some normal food and special food to supplement nutrition to thrive.

Normal food is okay to say, but special food includes but not limited to tree fruit products, metal powder, rare ores, etc. Letting them forage on their own will easily lead to the loss of some ores, so Babanuki thinks that it is necessary to send some specialists. .

Ximei's Cotton Ranch has applied for additional special personnel or equipment that can fly or control the wind. Although there are some Millennium Dragons to assist now, the Wind Fairy and Shuttlecock Cotton still occasionally get lost.

Although it will be sent back soon, it is better to avoid it as much as possible.

These are basically valid reasons for applying, and even Mandefish's reasons are very serious. Although he can't fly, he can dive freely as an aquatic person.

"That kid Jack is over eight years old. It seems like a good idea to go out and see the world. Let Mandefish take him."

Many things can be learned under the leadership of Kaido, but there are some things Kaido can't teach, such as murloc jiu-jitsu and murloc karate. This is Kaido's blind spot of knowledge.**nOvELusb.coM**

Although the murlocs are embarrassed by their status, the murloc karate that affects the water in the enemy's body to cause higher damage is one of the few things murlocs can do well.

This is a skill that murlocs have evolved over thousands of years. It is the most suitable skill for murlocs, and this is not something that only murlocs or mermen can learn, humans can actually learn.

So this type of application was approved very quickly.

In addition, there are some peculiar applications that were rejected. For example, Quinn suggested to expand the access control system. It is better to add security doors to all plantations. This kind of meaningless suggestion was naturally passed.

He did this purely because the last plantation invasion made his heart ache, and there was also Kojiro's suggestion. After the beasts really took control of Wano Kingdom, Kojiro's business presented an alternative family dominance.

On the one hand, there are indeed no other businessmen in Wano who can compete with them, but the existence of Kojiro has not destroyed this market, because he has become a special state-owned enterprise.

But his application is to find something for Binggoro, because now Binggoro is going to train Kojiro when he has nothing to do, and he still goes to train Kojiro when he has something to do. Decadent old man.

In his prime, he was still the famous underworld boss, and Kojiro was often miserable due to his strong armament and good swordsmanship.

Naturally, this application has not been realized. Today's Binggoro has nothing to do. He will stabilize some security issues and mediate some conflicts and disputes in the flower capital as before.

He is also very cooperative with the new policy plan formulated by Hundred Beasts. Although he did not wave the flag, he did not take the lead in making trouble. He just watched all this silently, so training Kojiro is where he exerts the greatest value.

In terms of armed color beasts, there is more than one stronger than him, and his teaching Kojiro just saves a lot of time. After all, this is a world where strength determines everything, so strengthening strength is also a necessary part, even if he is essentially just a Just a businessman.

A new day comes as promised. Every year, the birthday will be a fixed day off for Yamato, but everything will not change the next day.

However, there was an extra bed in her room yesterday, a bed made entirely of diamonds. That was Dianxi's position. Yamato thought it was unnecessary, because her bed was big enough. Anxi is also fine.

But Diancie refused this, and made this diamond bed on the side, diamonds were the most familiar object to her, but also covered with new sheets.

Her room is similar to a large duplex structure, occupying a large area in the ghost island. After entering through the door of the corridor, it is the room where the Geely Eggs live, and then the room of Geely Egg is their bedroom, except for the original three small ones. Only, there are still many empty rooms.

Some of them are prepared for the latecomers. Originally, they lived alone, and the auspicious eggs also acted as the dormitory task. If there was movement in the room, they could immediately detect and rush over.

But the door is not necessary. For a creature named Kaido, whether it is the floor, the ceiling, or the window and the outside wall are all places where raids can be made.

But today is different, Shaina was here a few minutes before the alarm went off.

"lucky?"

A few Geely Eggs watched Shaina stop her work. This duplex room is not only a bedroom, except that there is no bathroom, the kitchen and other equipment are all available here. Geely Eggs is preparing breakfast every day, simply make them earlier. Still no problem.

Meat, eggs, milk, vegetables, simple carbohydrates, these foods are very little compared to the hill-like food at noon and at night.

Riko was also helping here at first, but since last year, she changed her place of residence and returned to Yukor.

But this time, it is no longer a simple errand, but the person in charge of the entire tour. In terms of treating the widow of his former comrade-in-arms, Kaido has not treated or surpassed anything.

"Well, it's me today, or I've been in charge of this place for a while."

"lucky~"

As the minute hand moved to the 7 position, the alarm clocks in each room sounded on time, and within five minutes everyone walked out of it.

And Yamato had a look of joy on his face. Although Kaido often makes surprise attacks, more than five minutes means that today's training is not his responsibility, at least not in the morning.

"Sister Shaina, are you here to train today?"

"Yeah, Mr. Kaido left last night, and he probably won't be back in a short time."

"Okay!"

Worried about Kaido? It is estimated that that kind of emotion will not appear in her heart in this life. She does not feel that there is any danger in Kaido leaving Wano, but it is others who should be worried.

"Don't be too happy, my training won't be easy, Lord Holy Beast has already arranged new indicators for you."

"It's okay, it's okay, it's better than Father's training." Although Kaido's departure does not mean that the training difficulty will be reduced, at least this training will not be life-consuming.

Chapter 355 Small body, big shadow

"Go wash first, I'll go see Iska."

Although there is no bathroom here, it is not that there is no water supply system, but because the bathrooms in the ghost island are all group bathrooms, even the single rooms are all in the same area, so there is no separate bathroom.

Wano country also has many baths and natural hot springs, enough to meet the needs of most people, for Yamato and the others, it is just a few more stairs.

It's not too early to say, and Shaina had some knowledge of Iska's biological clock when she was on the ship earlier, so she should have woken up by this time.

Shaina pushed the door directly and entered. The door of this room did not have a door lock. After all, the existence of that thing was a bit redundant here.

The alarm clock in the room was also beeping, but Iska didn't wake up because of it, it seemed that he slept late.

There were some tear marks on the pillow, and Shaina had some speculations about the reason.

Yamato's birthday party did not forget her yesterday, but just a few months ago she also had a complete family of her own. Although her parents couldn't give her such a big birthday celebration, they would celebrate for her.

A fire ruined everything for her, and it took only a few minutes from happiness to being unaccompanied, and such examples are far from isolated, pirate attacks, rebellions within the kingdom, cleanup of the world government, wars. spread.

Unfortunate things have never gone away. In the past, the country of Wano was able to avoid disasters because of its closed-door policy and strong military force. Now it is the deterrence of the beasts. Ordinary people can't even reach the coastal waters of the country.

"Iska, wake up, it's time."

If she chooses to stay in a broken hometown, or grow up in other places like most ordinary people, then she can naturally continue to sleep now, and Shaina will not care about her.

But she chose this path and did not go back to the battle path of this option.

"Sister Shaina"

"Call me Instructor. You chose this path yourself. Although your current training is different from Miss Yamato and the others, you also have your own adaptive training."

"It's Instructor Shaina."

At this time, Shaina was a little different from being on the boat. Although she lost the aura that strangers should not enter, she also became more serious.

"You can be sad, you can cry, but the training will not be reduced because of it, Iska, what happened has already happened, tears can't reverse time, and crying can't comfort your heart."

said and pulled her off the bed, and put the prepared sportswear on her in three or two strokes.

"Whether it's your slightly naive ideal, or you want to avenge your parents completely, tears can't help you, fists will do."

"I understand, but."

It is obviously impossible for her to forget the past. She has already remembered things at this age, and the sea of fire that night can be said to be her lingering nightmare.

"No, but if you are always affected by this emotion, then you are not destined to be strong, and the weak can only rely on others in this world, and give everything to the good deeds of others.

Your experience is indeed unfortunate, but in this pirate group, there are also people who have suffered worse than you. "

She wasn't talking about anyone else, it was actually her and Jhin herself, she understood Iska's feelings, and because of that understanding, she would only be stricter. ***ηOvelusB.com***

Iska's talent is not enough. Compared with Yamato, Maria, Jack, she is born with a gap, so she has to work harder.

"The naval officer died at my hands, but the navy is still there.

And Isca, you must understand one thing, the pirates who entered your village and looted are also one of the root causes of this incident, and some of them also live in this sea. "

The ideal is the ideal, and the goal is the goal. She wants to set a short-term goal for Iska.

Hatred is not a good goal, but it can make a person get out of the cage that bound him in a short time.

"Go wash your face when you figure it out. The body is the capital of the revolution. The first thing you need to do now is to exercise, but I have to say that again, and it's too late for you to regret it."

"I don't regret it, a tragedy like that is enough"

About thirty minutes after the breakfast, she was taken to a place with a lot of fitness equipment, some of which were deliberately reduced in size. This is their training ground.

With the addition of the newcomers, the intensity of the training has also begun to change. The training that Yamato and they are going through now, Iska, can't bear it at all, so all they have to do is exercise.

It is not difficult for a beast with a big family and a big business to create such a special fitness equipment, and there are even some strangely shaped fitness equipment for Geely Egg.

Shaina didn't teach Iska how to use them, but left her with targets, and how to use them became Robin's task.

She is not a pirate, just an archaeologist, but almost none of the archaeologists in O'Hara are of poor physical fitness, and their physical exercise is very good in the category of ordinary people.

There are many dangers in archaeology here, not only to sail, climb mountains and mountains, but also to face poisonous beasts, pirates, natives, relic agencies, and other troubles, a good body is necessary.

Otherwise, he would die of illness before reaching his destination. Even if Dr. Kloba was shot in the chest, he could continue rescuing books, and after the operation, there was no sequelae at all, and he is still alive and kicking.

Moreover, the combat power of Huahua Fruit is closely related to her physical fitness, and the strength of her arms determines the upper limit of the strength of her branched arms.

And while Robin explained to Iska how to use the gym equipment, Shaina's training began.

"As before, you can use whatever means you want, whether it is given to you by Mr. Kaido, gifted by Lord Holy Beast, or whatever you have thought about yourself, you can use it, including your abilities, although I don't know how to use fire, but I'll use wings this time."

Yamato and the others didn't understand what Shaina meant at first, but when the training started, they realized how much difference there was between the winged Shaina and the wingless Shaina.

For the Lunaria, wings are natural limbs like hands and feet. Air combat is what they are best at. In the previous training, Shaina did not use wings, which is equivalent to binding her arms. At this time, she is liberated. own bondage.

Even though she had control over her strength, she still did not keep her hands during training, and even Yamato was kicked out by her.

"This can't be done, Miss Yamato, you have to understand that a flying enemy means a whole new way of fighting."

#### Chapter 356 The difference between labor and life

Flying means a three-dimensional combat space. Even if there is a physical technique of staying in the air, it is still fundamentally different from the ability to fly, and Shaina used her fists most of the time before.

And she has all the kung fu on her legs. This time she liberated not only her wings, but also her own legs. In this case, the pressure they faced directly doubled.

And when she realized that Shaina's attitude was very different from the past, Yamato took the lead in starting her own changes.

"Instructor, you are playing for real."

"When have I been slack with you guys in training? It's just more serious today."

Due to habitual problems, it is easy for Shaina to overlook a problem, that is, she has always been under the form of an ability person, and whether it is attack or anything, she enjoys the bonus brought by the flaming chicken.

The wings and legs were liberated, and the training that Yamato and the others faced was not much easier than when Kaido did it himself, but they didn't have to worry about being sent to the hospital.

Shaina will have extra control, and the technique of pulling force is not difficult for Kaido, but he has never done it because he thinks it is unnecessary. In Kaido's opinion, only the pain can be learned enough. .

As for being in the hospital, for him, there is no difference between being in the hospital and being in pain.

Rubbing his stomach, Yamato's center of gravity shifted slightly, and A Jian No. 5, who was still standing strong, was also held in his hand. At the same time, Maria and Jack also changed their abilities, and the scene suddenly became The battle between the four capable ones.

As the three people who have been training together, Yamato and the others naturally have their own cooperation. While Yamato is rushing forward, Maria also threw out her own power grid.

The appearance of the skill Grid has almost changed a generation. For example, the iron armored chrysalis that will only harden has a new skill that can be mastered.

Maria tried to limit Shaina's movements with the power grid. The three of them had a clear division of labor. Yamato was the main attack, Maria was the auxiliary, and Jack was a large meat shield.

At the same time as the power grid flew out, Yamato's attack also followed, but unlike Kaido's brute force confrontation, Shaina chose to use softness to defuse Yamato's attack.

"Miss Yamato, there is more to attack than just brute force."

Shaina grabbed Yamato's wrist and threw her directly to the grid that Maria synchronously threw. Although it would hurt for a while, she was sure that this level would not pose any threat to Yamato.

The shortcomings of the lack of cooperation among the three were also reflected at this time. Looking at Yamato Maria who was thrown back, she wanted to take back the power grid, but in a panic, she accidentally injured Jack on one side, and finally was thrown back by Yamato and hit her on her body. , the first attack of the three was resolved in this way.

"The idea is good, but I'm not skilled enough. I'm not the type of Mr. Kaido who can only be reckless. You have to learn to be flexible."

Accurately speaking, Kaido is not only reckless, but most opponents can solve it with recklessness. For example, in the face of Yamato and their attacks, Kaido will choose to face hard, and then directly hit back.

But Shaina is different. Even if this attack has little effect on her, she will try to avoid it as much as possible. The change of fighting style made Yamato and the others unable to adapt to it in a short time.

"Go ahead, it's not time to rest yet, if you guys don't attack, then it's my turn."

Under the threat of Shaina's words, Yamato and the others continued to fight. As for tactics, it's better to explore slowly during the battle.

On the training equipment on the side of , Iska was sweating profusely because of the training target, and her hands and feet started to become sore. She had much more rest time than Yamato and the others, but the training ground there kept her frightened.

For example, Jack incarnates the king's bronze elephant and tries to restrain Shaina's movements, but when he wraps Shaina's leg with his trunk, he finds that she still lifts her leg effortlessly, and then puts Jack's body heavily. fell to the ground.

This training ground is on the first floor, and the fighting arena where they are located is all simple grass. If she read it correctly, a big hole seemed to be thrown out of the grass, and she felt the ground vibrate.

Even if the king's bronze elephant's body was thrown like this, Jack also felt dizzy, but he didn't let go of his nose and hands. Of course, this only made him hold on for a few more seconds, and the result did not change.

"scared?"n*0Velusb.com*

". Are their usual training so hard?"

"Hard? Actually, this is a relatively easy training method. You may not have seen the training brought by Mr. Kaido, but you should add some salt water, it will dehydrate."

A row of arms rose from the ground and passed the drinks prepared in the lounge area.

"I am the power of Huahua fruit, and can create limbs in other places like flowers."

Since he came here, Robin has become more and more confident in his abilities, and he is no longer afraid of anything. Even in the face of newcomers, he can use his abilities naturally.

No one will be afraid of her ability, whether it is the biological mother who has been separated for a long time or the people here, even some local people in Wano can not accept it, but they will not show any resentment.

"thanks."

Looking at those arms Iska just froze for a moment, and then took what Robin handed over.

The training here is still going on intensely, and Quinn's chemistry class is also starting. He took out some hand-drawn diagrams and explained some elements to Diancie.

Some of the cadres began to leave Wano and return to their duty areas, while Tezzolo and Stella visited Wano.

Each island has a completely different scenery, this is the magic brought by the sea, even two adjacent islands can bring completely different scenery.

"Stella, for you."

Looking at the diamond necklace Tezzolo took out, Stella was puzzled.

"Didn't you give the diamonds as gifts? How come there are so many of such good quality?"

"This is an interesting story, I have to tell you slowly"

At the same time, Zeraora also returned to Ghost Island from Jiuli's farm. In fact, Zeraora's previous applications also included Zeraora, but his request for leave was a three-month vacation.

"Lord."

"I read your news, you can go if you want, but don't forget the business."

Then, the radar on Shaina was handed to Zeraora. Shaina did not have the task of leaving the ghost island for the time being, so it was temporarily handed over to Zeraora who was out, and she would have to pay it back when he came back. for Shaina

#### Chapter 357 An unexpected "honeymoon" trip

Looking at the gradually growing Zeraora, Arceus also has a feeling of relief that Yamato is the righteous daughter, even if he raises her as his own, this has not changed.

He created a lot of Pokémon, but compared to those created without much effort, the phantom beasts with language ability and stronger strength like Dianxi and Zeraora are more like his own children. There is a feeling that my son has grown up.

Zeraora's fake note is not one person, but two people. He intends to go on a trip to the open sea with Setsuna, and traveling is a very popular pastime among the Beast Pirates. For Arceus, they go on a trip. About the same as working overtime.

Anyway, everyone who arrives on other islands will not forget this.

"Need to arrange a boat?"

"No need, Lord, I have discussed with Faerun. This time he took us there. In fact, he is also curious about what other sea areas are like."

Faerun is a very young individual among the Millennium Dragons. He also has a great curiosity about the sea, but due to the living habits of the Millennium Dragons, they will not easily leave their residences too far unless that day comes.

So Zeraora succeeded in making a deal with Faerun, they took him on a trip to sea, and all he had to do was temporarily serve as a means of transportation.

There is no need for him to take a special leave when he goes out normally, but after all, he has been there for a long time this time.

Zeraora first went to the basement to find the Electric Shock Monster to power himself up, and made sure that he had his wallet and radar with him, so he was ready for everything he needed to go out.

When he returned to Jiuli's residence, he had already packed a large bag of things.

"Uh, do you have a lot of things to pack, just buy what you need now."

"It's different, these are all necessities, let's go, Faerun couldn't wait last night."

They haven't decided where to go, but they have temporarily chosen the area to play in the West Sea, but their first stop is not the West Sea, but Zou.

Zou's position was not fixed because the elephant lord's movement was not fixed, and this time it happened to come to a relatively close place, so it didn't take long for Faerun to arrive at Zou with Shanna and Zeraora.

Since Shanna and Zeraora bring back some new things from time to time, Zou has also undergone great changes. The most intuitive changes are some hanging chicken coops.

The fur tribe does not eat mammals with hair, so most of the meat comes from fish and sea beasts. chicks.

has greatly improved the quality of Zuowu's food. In the past two years, those chicks have grown up. Although the number of chickens is not too many, eggs have basically become popular in Zuowu.

The food for the chickens is mainly insects, and they are all free-range chickens that grow in the original ecology, but this also gave the children of Zuowu a new job, that is, before the rain of the elephant Lord's grace falls, the animals in the forest will be swept away. Pick up the eggs.

Those chickens have learned to return to their nests regularly to avoid the impact of the rain of grace. This is the adaptability of organisms, and chickens that cannot adapt to the environment of Zowu have long been eliminated.

Faerun put away his wings and landed on the back of the elephant lord, and then turned into a rude man with a height of more than eight meters. The form of others who ate the primitive man fruit was a circle smaller than his body, but he was also such a little giant. In appearance, even the sheep Jishan is a lot shorter than him.

"Faerun, do you need to rest?"

It took a few days for to fly to Zou. Although Faerun was a free labor force who was fooled, he had to take care of his state.

"No problem, it's nothing these days."

When        flew back to the ancestral land, the Millennium Dragon may not stop for a month, and their stamina is very outstanding among flying creatures.

"Then we will continue to set off later, you wait for us here."

After settling in Faerun, Zeraora found Shanna's house with ease, and then saw Shan's helpless face and Wanda holding her thigh.

Wanda, who has never left Zou, always wanted to go with Setsuna and Zeraora after she accidentally leaked out about the trip.

Zou's change is not only the extra chicks, but what she brought back is also wrapped in something similar to a satellite pot.

It is a unique device for receiving telephone bug signals, and through that, you can also receive TV programs from the Red Continent or some countries in Zowu.

It's just that what programs you can see depends entirely on the moving position of the elephant owner. After all, many countries are still in a state of primitive society, not to mention TV, and even lighting a fire is a problem.

Wanda, who occasionally saw the outside world, developed a strong curiosity about the outside world. He wanted to go out before, but now he couldn't help it when he heard Moan's words.

It was really hard to shirk at the last moment, and he was worried that Wanda would sneak out and suffer the same misfortune as himself back then. After discussing it with Zeraora, he took her out with him.

Whether you can meet the savior is a probabilistic event, even Wanda brought it, which means that the nature of this trip has changed. In order to free up his hands, Zeraora simply invited Hatch and Ling together. came out.

The original honeymoon trip became a family trip.

After watching it for a few hours, the team of two had turned into a team of five, Phelan blinked inexplicably.

"I'm sorry Faerun, there are a few more people temporarily, can you do it?"

If it doesn't work, he plans to fly with Moment by himself, and flying is not difficult for him.n0vεI**USB.com**

"Yes.. but no more, no more."

Loading is not a problem. These are nothing to the Millennium Dragon. The main problem is the area. If the number of people continues to increase, then his wings will be affected.

"Don't worry, there is no one else, I promise."

There are no grandparents in the moment, and although the fur tribe is relatively close, this is obviously the behavior of family travel in the past.

After a brief pause in Zou, Faerun spread his wings and flew south.

At this time, Wanda realized how big the gap is between reality and imagination. Although Zeraora applied for three months of vacation, at least two of the three months were spent on the road. under the premise of flying.

At first, Wanda still had a lot of interest in flying, but as time passed, there was nothing but clouds and the sea in her eyes, and the blue sky made her feel very bored.

"Mom, when will you arrive?"

Ling didn't know how many times this was Wanda's question. She was a little impatient, but after passing through the clouds in front of them, a vast land appeared in front of them.

The second stop, West Sea - the Land of Flowers, arrived.

#### Chapter 358 Baoyu Glacier, Overclocking Vibration

The Land of Flowers, a strong country in the West Sea, one of the countries that joined the world government, and a strong country with the right to participate in the World Conference, whether it is economic strength or military strength, the country of flowers is not weak in the West Sea.

In addition to the kingdom's own army, there are also several violent groups, including the Erbao Navy and the Babao Navy. The Kingdom Army maintains domestic security, while the Babao Navy and other violent groups are national naval forces with official looting licenses. thief.

The wealth they plundered will also be handed over to part of the country of flowers, and the two parties are special existences with an agreement.

However, this has little to do with Zeraora and the others. They are only here to travel, not to fight and cause trouble.

However, when they entered the country of flowers, they still attracted the attention of many people. The combination of five fur tribes and a sturdy little giant like Faerun was very rare in the country of flowers.

"Wanda, don't run around!"

Wanda, who had left the sky, was obviously rejuvenated. The completely different styles of Flower Country and Zou were attracting her attention, and Hatch and Ling also took the initiative to look at Wanda.

They also knew that coming out like this might ruin their eldest daughter's original plan, and they could only minimize their troubles.

"If this girl hadn't hugged my leg and didn't let go, I definitely wouldn't have brought her out."

"I'm afraid this is your family's inherited ability."

"Um?"

"I heard that you held onto Shaina's leg more than ten years ago. I knew that someone should have taken a photo of you to commemorate it."

". Forget it! Let me forget about those!"

Looking at the eldest daughter who was making a fuss, Hatch and Ling showed relieved smiles on their faces, and in the dark part of the Flower Country, a group of people were secretly observing Zeraora and the others.

They are people of the Land of Flowers. Logically speaking, the Land of Flowers, an allied country, is obliged to help the navy arrest pirates, or report to the navy after the pirates enter.

But this kind of thankless thing, the country of flowers did not follow, but acted in the way of watching people eat. If it was just tens of millions of ordinary pirates, then these people would be arrested soon.

It takes little effort to arrest such a person, and the impact is limited.

But in the face of some powerful pirates, the Flower Country will be careful, as long as the other party doesn't do anything major in the Flower Country, they will only watch the other party leave.

Pirates of this level are not easy to take down once a battle occurs, and if a battle breaks out within the country, innocent people will be injured. The world government and the navy will not care about this kind of thing.

And if they arrest, even the bounty has nothing to do with the country of flowers, and no one will do thankless things.

Zeraora belongs to this level of pirates, with a reward of more than 500 million, the cadre of the Beast Pirates, this kind of person has long been on the alert list of the allied countries.

"I didn't find the other party's purpose, it seemed that they were traveling."

"In the new situation, they found the most famous restaurant in the area. One of the chefs was tired and fainted, but they gave money and there was no trouble."

Some news was sent back like this. After confirming that the other party was really traveling, the people in the land of flowers also relaxed their vigilance against them.

Inside the restaurant, Phelan and Hatch seem to be competing for who eats more, and the competition between the two of them is also the source of the chef fainting from exhaustion.

In the end, Hatch chose to give up.

"you win"

"Concession." Faerun wiped his mouth. The Millennium Dragon has a special habit. After a full meal, he can not eat for several months, which is also to better travel far.

As the son of the leader, Faerun, who is responsible for opening the way, generally consumes more energy, so he can eat more, which is half full to him.

But even the chef was exhausted and fainted, and they stopped there.

After the big meal, they went to a hotel first. Phelan stayed alone in a room, and Hatch took Ling and Wanda to live in a room. Although Wanda wanted to sleep with her sister, Hatch and the others had this idea. strangled.

At night, Zeraora quietly woke up Mo Mo, and flew out of the window with her in his arms.

"What's the matter? Why are you sneaking?"

"I heard from the people here during the day that there is a continent of ice in the south of the land of flowers, where there is aurora phenomenon, and it is a place where couples often appear."

The West China Sea and the South China Sea are both located in the southern hemisphere, so their south is colder than the north, and the land of flowers has formed such a special continent.

However, there is one sentence that Zeraola did not ask clearly, that is, although people in the land of flowers usually go to see the aurora, they will not go to the continent of ice to see the aurora, because it is occupied by the Eight Treasures Marine Corps and is not open to the public. public.

After discovering the traces of the aurora all the way to the south, Zeraora did not pay attention to the distance, and came directly to the top of the glacier continent. The two enjoyed the beauty of the aurora in the sky. Except for the slightly discordant height, everything looked wonderful.

But soon I found that the ice layer had some differences, and the light it reflected was very different from a single layer of ice.

"Zeraora, do you see something under the ice?"

When they landed on the ice, there was an invisible treasure below. The massive treasure seemed to fill a gap in the ice, and the reflection they noticed was the reflection of gold.

And there are many corpses on those treasures, and it seems that they have died of starvation.

Looking at the radar in his arms, there was no response to this, and Zeraora's interest was less than half, and a single treasure could not arouse his interest.

"Zeraora, how did you say these things were put down?"

"I don't know, but it's probably done with brute force." He raised his right leg high, and smashed his heel on the ice with domineering. Although some cracks were smashed, he didn't directly smash it open. , and those cracks were quickly repaired.

This is the special feature of this glacier. It is a special glacier that can heal itself. Even if it is smashed open, it will still heal after a period of time.

This made Zeraora interested.

Then he knelt on one knee on the ice, and touched his hands slightly after slightly separating them.

A few currents flashed between the fur, and Zeraora's hands didn't seem to move, but in fact he was shaking the ice surface at an extremely fast frequency. The illusion that he wasn't moving at all.

In this case, the frozen continent suddenly shook violently, and then the solid ice layer cracked a wide gap, and the dazzling golden light even covered the moonlight in the sky.

At the same time, at the end of the glacier, a man with a round head looked at the cracked glacier with an unbelievable gaze. *novelUS.com*

#### Chapter 359 The battle caused by misunderstanding

Baoyu Glacier is a very special ice continent. It cannot be destroyed by knives and axe or flame calcination. The way to open it is to pour a huge force into it. Only in this way can this special ice layer be opened.

But different substances have their own natural frequencies. When the vibrations generated in the outside world are close to their natural frequencies, the object itself will resonate with it, resulting in fragmentation.

In terms of speed, Zeraora is second to none within the Beast Pirates, so it is possible to do this kind of thing, using resonance to break the ice layer above.

At this time, I would like to thank Quinn, who is giving Dianxi a supplementary lesson, and Assie, who is doing experiments. As the top scientific and technological talents within the Beast Pirates, they have learned well in physics and chemistry.

Although the specialization aspect is not here, the basic theory is still fine.

"Come on, go down and have a look."

Of course, the ice layer was not opened for the purpose of studying physics. Even at this height, you could jump directly down, and the gold coins on the ground were bounced aside. Even if you have seen the big world, these massive treasures will still make people shocked.

It is a little cold under the ice layer, but this temperature is not a problem for the fur tribe, like the temperature on the main back is not high, they are cold-resistant races.

Activities in this cold environment will not be affected, and then he grabbed a handful of treasures and looked at the golden mountains and silver seas that could not be seen, and doubts appeared in his heart for a moment.

"Zeraora, these treasures must not have come here by themselves, right? Who would put treasures in such a place?"

This way of hiding treasures is very willful. At first, John's treasures were in a field that ordinary people couldn't reach, but here anyone who came could see them.

can be called an undefended storage. It only requires strength. It is like casting silver into a giant ingot of several tons. As long as the other party can't move it, it is fine to put it outside.

"I don't know either, but I'll find out soon."

His eyes looked above the ice layer, and he had already sensed that a person was approaching here rapidly.

Shinkan is right, treasures will not run together by themselves. These treasures are the accumulation of generations of the Eight Treasures of the Flower Country, and the person who is running over is the semi-retired leader of the Eight Treasures.

The pillar of the twelfth generation - green pepper.

Ten years ago, the reward of the gang leader who had reached 542 million Bailey, known as the green pepper of the cone, was also a famous figure in the sea.

But he slammed his head into Garp, and in the duel with Garp, his proud awl head was knocked out by a punch.

Probably the country of flowers used the status of an alliance country to put pressure on the world government, and the downed green pepper was not arrested, but was brought back to the country of flowers by his subordinates.

But the loss of the proud awl head led to a tragic consequence. He could no longer open the Baoyu Glacier, and could only see those treasures across the air.

The reason why the green pepper of the cone is called "cone" is because of his wonderful head. Now that he has lost the head of the cone, his heart is half cold. Since then, he has lived a semi-retired life in the land of flowers. The most common thing to do is to teach my grandchildren.

Remembering the past in Baoyu Glacier is also something Green Pepper often does. Although he can't touch it, looking at the treasures under the ice can help him calm down a little.

Anyway, no one in the Land of Flowers can break through this ice layer. Only those who have learned the profound meaning of Eight Chongquan and obtained the name of Cone Dragon Cone Nail have the possibility to break the ice layer.

But today the solid ice layer suddenly cracked, and it was bigger than the gap he opened in the past. In the past, he only opened a part of the gap, but this time the crack spreads over a large glacier.

"Could it be that"

Looking at the cracked ice, the strong man got up and followed the crack.

Although he lost his cone head, his heart was still alive, and his domineering skills were still used. His strong body was running along the ice, and soon he saw Moment and Zeraora on Baoshan. .

"You two treasure thieves, stop me!"

Being able to break the Baoyu Glacier proved that the opponent's strength should not be underestimated, but when he saw the opponent was on his treasure, the reason in his mind seemed to evaporate.

Just now he was able to restrain his urge and did not go down, because he knew that once the glacier closed, he who could not break the glacier would be trapped below.

But when he saw the suspected treasure thief, he still couldn't hold back. At this time, his beard was still black as a whole, but there were some white beards in it. At this time, there was a breath on his body, even The beard also fluttered.

Then the green pepper jumped high, wrapped in a domineering layer on Garp's rounded head, and then aimed at the person below and smashed it down.

"Eight Chong Fist · Martial Head!"

Looking at the big man who suddenly fell from the sky, Zeraora pulled it up and floated in the air for a moment, and the green pepper smashed into the treasure mountain below.

"That.. we are not treasure thieves, this is actually a misunderstanding."*noVeluS&.COM*

Qingjiao's cry of the treasure thief just now could be heard clearly. She was traveling, not to rob people's treasures. She was even more curious about this piece of ice than treasures.

"Ahhhhh. It's hard to believe this kind of thing, little devil of the fur tribe, Baoyu Glacier is not a place for outsiders to step on, not to mention you are standing on my treasure."

Green Pepper chuckled a few times, obviously not listening to what he said, and after crawling out of the treasure, he again aimed his head at the two above.

"Zeraora."

"Yes, I know."

It is impossible to be beaten. Since this angry person can't listen to them, I want him to listen to them.

The retired Green Pepper paid little attention to the outside world, and didn't know much about Zeraora's identity. When he adjusted the angle and attacked again, Zeraora and Shanna were already separated in the sky on both sides.

Instant can fly through electromagnetic levitation, but it can't reach the speed of Zeraora. After thinking about it, she did not take off the bow on her back, but transformed into Lucario's form.

Unless the purpose is to kill, she can't use a bow, so she chooses this enhanced fighting stance.

"Those who are capable, you little devils! You guys were still playing the game of the family when I was sailing the sea, Bachhong Fist and Hunting!"

This time, not only his head, but even his hands were also wrapped in armed colors. The seemingly bulky body was very flexible, and he jumped to a higher position in the blink of an eye, and then punched Zeraora.

But Zeraora was faster than him. Although the fist was much smaller than the green pepper, the dazzling electric light quickly shone on the ice.

It is impossible for me to write it year by year. The timeline will naturally jump if it jumps. If it doesn't, I still have things to write this year.

Chapter 360 Isn't this guy shaking M?

Green Pepper was beaten bald by Garp. Although he lost his proud cone head, his armament color did not weaken.

The fists of Zeraora and Green Pepper frequently clashed, and after a while of probing, Green Pepper headed Zeraora again.

Although Ba Chongquan is called boxing, each generation of users has different usages. Green pepper uses the head and Lao Cai uses the feet. This boxing method is more similar to a special force-generating technique. *novelusB.Com*

Facing the green pepper's top-down Zeraora did not meet him directly, but took advantage of the flight to avoid the edge and kicked the opponent's head from the side.

Boom!

A thunderous roar occurred on the Baoyu Glacier.

Green Pepper didn't expect that Zeraora didn't have a hard connection, but chose this method. With his downward momentum and Zeraola's kick, he directly hit the ice.

Boom! boom!

Baoyu Glacier is not only strong, but also very smooth, and the green peppers slipped out of it for a long time before it stopped.

And in the process, some icicles on the ice were also smashed by the body of the green pepper. These icicles are different from the glaciers below, and they do not have such a solid texture. The huge sound is the sound of the icicles collapsing.

But this is the effect of Zeraora's leverage.

There was a clattering sound from the collapsed icicle, and the figure of Green Pepper climbed out of it, and the broken icicle scum on his body kept scattering. Except for a lot of damage to his clothes, he didn't seem to be injured at all.

"Ahhhhh, sly kid, but I'm still a long way from winning! Treasure thief!"

"It's just a misunderstanding that we're not treasure thieves. We're just curious about the ice layer, and we come here to see the aurora. Can people of this age not be so impulsive."

There was no change in the tone of the angry green pepper Zeraora. If the green pepper was only at this speed, he would never be able to touch himself.

But Green Pepper still didn't listen to his explanation, just kept attacking Zeraora from various angles, but in the end, Zeraora avoided them.

"Little devil, what are you afraid of, you have the ability to pick me up! Those of you who can open Baoyu Glacier are afraid!"

"I just don't want to bother with the trip."

Zeraora, the two characters of eight treasures on the green pepper clothes, are still familiar to me. The Eight Treasures Navy is a local snake in the land of flowers. Zeraora, who comes to travel here, naturally does not want to affect the mood of the instant family.

Shinan was of the same idea. She felt that when Green Pepper calmed down, she should be able to hear her words, but they underestimated how much Green Pepper valued the treasures here.

Unable to attack Zeraora, he changed the target of his attack and aimed at Moment aside.

He does not believe that these two fur tribes have such strength.

But Moment is not as good as Zeraora, but it is not a pretentious one. When the green pepper slammed into her, a strange light flashed in her eyes.

Fighting skills - see through.

If defending is another version of the barrier fruit, then seeing through is a short-term prediction of the future, the position of the green pepper's next attack, the plan, the strength, and how to block. Similar information flashed through his mind in an instant.

Then the claws of both hands extended and a metallic sheen flowed out. The crossed metal claws successfully blocked the blow of the green pepper, but due to the huge impact and the smooth ice surface, she was knocked out a long distance.

It was beyond Green Pepper's expectations that his thin body could block this head-butting hammer, but there was a powerful sound of electric current in the air.

Sizzling, before he could turn around, Zeraora kicked him.

"You guys don't listen to explanations at all!"

He doesn't mind playing with Green Pepper slowly, as long as he doesn't affect it for an instant.

"Ahhhh, are you angry? Seeing you standing on my treasure, I feel the same as you."

Hearing Green Pepper say that, Zeraora suddenly understood something.

"It seems that normal means are useless, you can only get down first."

"If you can do it, try it, but you're like a loach, I'm afraid you don't have that ability, right?"

The braid-like structure on the back of Zeraora began to drift with the current, and those who were familiar with Zeraora knew that this was a sign of his anger.

"The Profound Truth of Eight Chongquan - No Cone Dragon · No Cone Nail."

This was originally the highest meaning of Ba Chong Fist, the Cone Dragon Cone Nail, but after the head was flattened, Green Pepper's move became like this, which can be said to be his unique move.

"I know a navy, that guy always likes to talk about the saying that speed is power. I will give you this sentence today."

The words of Polsalino, the king of fish in the navy, were copied by Zeraora, and he did not intend to dodge again when facing the green pepper that jumped into the sky and used his own weight to increase the attack power.

The current surrounds the body, and almost all the limbs enter a state of electric current, but it is not elementalization, but the plasma of the plasma lightning fist. In this state, the speed of Zeraora itself will reach the extreme.

Without using electromagnetic levitation, he stepped on the ice with the soles of his feet. With the reaction force, Zeraora met the falling green peppers.

"Million-ton kick!"

One million tons of heavy kicks, one million tons is just an exaggerated imaginary number, not that the power of this kick can really reach one million tons.

But this is also a powerful kick. With the blessing of the plasma lightning punch, Zeraora's ordinary attack will also be converted into an electrical attack. As a skill of this type, he can make this kick more powerful. the power of.

Boom!

The soles of the feet shining with lightning and the head wrapped in domineering collided with each other, with the contact point of the two as the center, the aftermath of the collision almost tore the atmosphere.

boom!

After a while of confrontation, the two fell almost at the same time, but Zeraora was still standing, and the green pepper flew out again. This time, he hit more icicles than before, and even the ice surface seemed to be full. Cracks occurred.

"Zeraora!"

"I'm fine, but if the guy is so determined, then we'll have to travel to another country."

Whether it is to kill the green pepper or whatever, the result means that the land of flowers cannot continue to stay.

The power this time was strong enough that the green pepper didn't come out for a while, but Zeraora knew very well that such an attack would not kill an enemy of this level. Ten years ago, people who had a bounty of more than 500 million were also very strong in the sea. By.

As he expected, after a while, Green Pepper got up again, but this time he was smiling all over his face and raised his hands to indicate that he did not want to continue fighting.

"Zeraora, this guy. Won't be shaking M??"

Looking at the green pepper with a smile on his face, a very strange thought appeared in his mind.
