

Arceus 381

Chapter 381 Brand New Numberers

"You guys really have two strokes."

"Of course, just stay in your own place."

"Don't be too happy, this NO.40 position will be mine sooner or later!"

The numbers on them are proof of their status within the Beasts. They are the numbered people in the Beasts Pirates today, and they are also among the best in the Beasts Pirates except for the three major cadres.

Kaido has a plan for the top-level big kanban, but more givers are not easy to divide in detail. In the end, Arceus chose a simple number system.

The person with the highest strength has the qualification to be numbered. The smaller the number, the stronger the strength, and the higher the status within the beasts.

And the way to decide the number is also very simple, hit.

Whoever wins, this number belongs to whoever is. Even if they become the numbered person, others are also eligible to challenge.

There is a fixed time for a transposition battle every month, and the winner can take the place of the loser.

However, in order to reduce the meaningless waste of time, the challenge of ordinary members must be limited to 10. Only after obtaining the number of 91-100, can they be qualified to challenge 81-90.

If you get a single-digit number, you are qualified to challenge the big kanban.

As for the original real fight, complicated titles such as Fei Liubao were canceled in the internal optimization of the beasts. There are 101 numbered people under the big kanban. Compared with the disasters who are the trident blades, these cadres are the only ones. The ultimate cornerstone.

The benefactor and the giver are their means of gaining power, and numbers determine their status.

Of course, there are also special cadres such as Shaina, Zeraora, and Koga Ninja. Although they have no number and are not disasters, they have no less than three disasters and single-digit numbers directly under Arceus. position and strength.

"What did they say..40 and 41?"

"Numbers, those people are the officers of the Pirates."

Yamato explained to them what a number is, but Ulti didn't say anything this time, but listened carefully. This style is like a real pirate group.

"The transposition battle isn't over yet, do you want to see it in the afternoon?" *NOvelusb.com*

Kaido gave them an early vacation, and Yamato planned to build a closer relationship with new friends, so he made this suggestion along their wishes.

After eating, Yamato took them to the second floor of the ghost island. This is her viewing platform. The first floor below was completely transformed into a huge martial arts arena. Now there is a new round of duels. .

"Lotto! In the next round, No.16 Davego will challenge No.4 Babanuki! Loto, the game starts!"

Baba Nuki has no opinion on his deputy challenging himself. This is a very common thing within the beasts. The two used their abilities almost at the same time, and the arena has become a battle between the king of leave and the armored warrior.

In the end, Baba Nuki defended his position as the head of the caretaker, and defeated Davego with the top of Mount Tai. After all, his carapace was only one layer, and it was not meaningful to face a brute-force player like Baba Nuki.

And his characteristics are not without benefits, at least he simply chose to admit defeat before he was fatally injured, but he was still sent to the Pokémon Center to check his body.

In addition to these benefactors, the givers also competed for the number. The dazzling ability made Ulti unable to close her mouth. Fortunately, the mask helped her avoid the embarrassment of being discovered.

For those who are rough and domineering, but have limited talent, their ability has a great influence. The top rankings are basically God-blessers, and then there are gift-givers. There are very few people who are unable to rely on their bodies to get rankings.

Because people with that kind of ability have already acquired special abilities by virtue of their military exploits, this kind of competition has increased the number of people in the Arceus religion.

There are people who successfully defend their status, and naturally there are also people who can't keep their positions, and now it's time for the Tutu dog to appear. Apart from occasionally painting some tattoos for Yamato, the biggest role of the Tutu dog now is to keep them for them. number below.

The paint of the Tutu dog does not fade, has many options, and can be changed at will, which is most suitable for the changing group of today's numberers.

"Do numbers determine status?"

"Of course, but there are always special cases."

Looking at the duel between those "ability people" and the number determining the status, Ulti seems to have some new ideas. Kaido revealed a lot to the sister and brother, intentionally or unintentionally, when he finally reached the ghost island. information.

"Kaido, Rotom said that you have opened permissions for newcomers."

"Huh? Yes, Ulent's children are better after all."

"I remind you, those two transformed fruits are very powerful types."

"I know, but the fruit is meant to be eaten by people. As long as it is a human being, it will eventually be able to exercise strong abilities. Strong abilities are important, but domineering is also the same."

Onishima's things are not that easy to steal, not to mention the now heavily guarded Onishima, the same is true of the original timeline.

Without Kaido's advice, it would not be so easy for them to get it, whether it was Yamato's Oguchi True God, or the ancient species of the Ulti sisters and brothers.

Especially, the Ulti sister and brother were able to steal two fruits soon after they came here, and there was no punishment, and they successfully climbed to the position of Fei Liubao, which is almost impossible without Kaido's advice.

This is a completely different concept from the 15,000 enemies that sneak in on Onishima. If nothing else, if Kaido doesn't reveal the news, it will be a big project for Ulti to find out where the fruit is placed.

This is even more so at this time. If Kaido doesn't let go of authority and doesn't tell Ulti on the way, she can't do such a thing at all.

As for why he did this, although he is the maker of the rules and can change the rules arbitrarily, he still has to abide by the rules within the pirate group. He will increase some places to get rewards according to his preferences, but he will not ban them.

Those who have the ability to get this thing will definitely get it. The privileged person gets extra things. Absolute fairness hardly exists. Most people can tolerate others when their own interests are not affected. .

You can give others more things, but you can't give away what belongs to me.

Kaido's notification to Rotom was naturally hidden from Arceus, after all, they were the creatures he created.

Soon the Ulti siblings got their own identity cards, and the siblings lived in the same big apartment, but when the night came, a new contradiction appeared.

"He's a boy and should be in a room with me."

"He's my brother! He must live with me!"

Chapter 382 Kaido's Abacus

Ulti and Jack had a new debate about where Peggy Wan lived. Peggy Wan was only three years old after all. After his own wishes, he still slept in the same room with Ulti for the time being. As he got older, This situation will gradually change.

But Peggy Wan fell asleep, but Ulti didn't. In the middle of the night, she quietly walked out of the room.

The auspicious eggs outside seemed to be sleeping soundly, but Ulti didn't know that these auspicious eggs would open one eye and close the other when they slept, even if Yamato said something in a dream, they would wake up immediately.

But now they turn a blind eye to Ulti, and they have also been instructed in advance. Of course, in fact, Ulti's every move is under the surveillance of Kaido and Arceus.

This is today's Ghost Island. Through Rotom, they can control every corner of the Ghost Island even if they stay at home and don't need to see sex.

"Well, this little girl is not bad, she acted earlier than I thought."

Kaido revealed to Ulti, and deliberately let Yamato take them to play. With Yamato's character, it is impossible to miss the numbering battle.

He just wanted to see what choice Ulti would make in this situation.

He has already given the opportunity. This is the biggest chance for the two of them to lead others at the starting point. If it doesn't work, then they have to exercise slowly.

Kaido's estimate was that Ulti would act within a week, but she didn't expect that she would act on the first day.

"Although I have no problem with you doing this, it's not impossible to create a few more similar abilities, but are you sure they know how to go?"

"Um?"

"Yawa didn't bring this pair of siblings to the treasure room. Are you sure she can successfully find the location of the treasure room when she came here for the first time?"

Kaido was silent. Onishima was the home he built, and he was very familiar with it, but as Arceus said, Ulti might not be able to find a way.

"I knew you would always forget something, Rotom."

A Rotom flew over after hearing this.

"Send a message to Olga and ask her to lead the way, but don't get caught."

Through the relatives and friends of the Ammonite development, the beasts are eavesdropping on the communication of the world government every day, and some secret news is obtained like this, and those agents must have a large number of eavesdropping phone bugs, and white anti-eavesdropping phone bugs are very rare. This shows that phone bugs are not absolutely safe.

So the beasts are popularizing the second communication tool, Rotom.

Nowadays, almost all the cadres have a phone bug + Rotom, and the phone bug is used to deal with ordinary contacts, such as ordinary reports on the islands outside.

And some covert action plans, such as the development of Tezolo, covert troop movements began to rely on Rotom mobile phones.

The phone bug has turned the sky upside down and doesn't have the ability to steal signals from Rotom.

As for a certain six-path punk, if he has developed a machine that records the radio waves emitted by Rotom, then he can only be said to be powerful.

However, such top talents should not be fools, and they will not give their lives to the World Government wholeheartedly, and will not leave behind at all.

There is an order on it, and a broken leg is running below. Olga just lay down when she receives a message from Rotom. Rotom's mobile phone can set the Do Not Disturb function, but Arceus's command has a higher priority than their own settings.

So Olga's Rotom floated directly in front of her and announced the mission.

“.Why am I here?”

"Loto, don't know Loto, do you want to send a reply?"

"No need, I'll just go directly."

She wasn't complaining, but she didn't quite understand this kind of trivial matter and there was no need for her to go there in person. After all, she was considered a graduate student, but now she wants to be the leader of the first-class trumpet.

Although it is to keep secret and not hurt the self-esteem of the other party, it is still a bit of a fuss.

But this time out, she discovered something special, such as what her dad seemed to be doing sneakily.

As the only scumbag in the Onishima cadres, the only one who doesn't have any domineering presence, of course Asiee couldn't find Olga, who used the illusion to hide.

Olga's daily routine is very regular, so he will come out at this time, but Olga didn't pay too much attention to Assie, people over two hundred years old, many things should be their own.

On the other side, as expected, Ulti got lost. Although the Oni Island has not been built into a maze, it is big enough, and it takes more than ten minutes to walk from the bedroom to the bathroom.

And she was still avoiding those who might see her, and her movements were very slow. When Olga found her according to Rotom's surveillance, she had just found the stairs.

And he went the other way. The place where the stairs go down is the power generation room, not the treasure room. The only thing that can be found is the electric shock monster.

Under the influence of Olga, Ulti found that the road in front of her seemed to have changed.

"What are you doing, why is there a dead end here?"

With living navigation, Ulti successfully found her destination, and then took out her ID card.

"I think about it, what that white hair said, by the way, you need to swipe the card."

Looking at the location of the access card, she took a long time to swipe her card successfully, and Rotom also directly placed the prepared fruit in the front position according to the newly entered data.

looked around, Ulti didn't see anyone, grabbed two fruits and left the treasure room.*ovelus.com*

"Xiao Pei, Xiao Pei, wake up."

This is also one of the reasons why she insists on living with Peggy Wan, otherwise it will not be so easy to operate.

"elder sister?"

Peggy Wan obviously didn't understand what was going on, but Ulti didn't let him ask at all, and just took out the two fruits.

"Little Pei, hurry up, choose one to eat."

"what is this?"

"What kind of devil fruit, you can get power by eating it. You can also see that this is a pirate group that needs power. Without power, it will not have a position. You choose first."

The changes in the Ulent Pirates made her more aware of how important strength is, and she slightly misunderstood the competition mechanism within the beasts. After all, those people in the ring did not give up at all.

In the dark, Peggywan couldn't see the fruit, so he just grabbed one at random.

"Quick, eat it all, don't leave any of it."

She just wanted to destroy the evidence.

"Sister. It's so unpalatable"

Just taking a bite, Peggy Wan's expression almost distorted.

"I have to eat it even if it is unpalatable. Forbearance, Xiaopei, this is all for the future."

Then he pinched his nose and ate the whole fruit, including the meat.

Chapter 383 There is love, but not much

There are many delicious things in the world. Due to the differences in human taste, the definition of deliciousness is different for everyone, and even some foods have two extremes, such as Houttuynia cordata, coriander and the like.

Those who like it are indispensable, and those who don't like it will feel uncomfortable to smell it.

But devil fruit is different. Although it smells fine, it is something that even a fool would find unpalatable.

The unpalatable extreme is the common feature of Devil Fruits to everyone. Among all the known fruit power users today, only Yamato is the exception.

Arceus spent a lot of effort and specially transformed the God of Big Mouth, so she did not understand what the so-called unpalatable was.

"Cough, cough, what a horrible thing to eat"

After swallowing the last mouthful of the fruit, Ulti had a severe retching feeling, but she couldn't spit out anything. The fruit was only its external manifestation. As long as she swallowed the first mouthful, the power of the fruit would be destroyed. The body absorbs quickly.

"Little Pei, how are you?"

"I'm fine, but sister, why do you want to eat this? It's too bad." *ηovEIUδb.com*

"Wait, the change should come soon."

The vast majority of ability users will know the ability brought by this fruit as long as they eat the fruit. Brook's Yellow Spring Fruit is probably an exception. After all, no one dares to try the ability that can only be triggered by dying once.

The animal system is different. Even a child can master the three most basic changes quickly after eating them, but now these fruits are phantom beasts, and it takes a lot of money to fully grasp the "phantom" power they bring. time.

Ulti felt her ability first, the underside of her skirt squirm for a while, and soon a green tail broke through her original clothes and hit the ground.

The green scales are wrapped around the body, the palms have also become slender dragon claws, and there are scarlet claws at the front. In the human-beast form, she is not much different from the swollen head dragon ability on the original timeline.

However, at the connection between the upper and lower jaws, two battle axes with a slight inclination of 30 degrees are formed. The two-axe battle dragon is proud of the battle teeth. These teeth have superior destructive power, and the hard steel pillars can easily Break loosely.

The position where the teeth extend is just the outer edge of her mask. Her mask is very special, not a head-mounted or ear-mounted type, but more like an adsorption mask.

However, this ability is not so simple. Quinn has proved one thing with medicine, that is, the body structure of animal-type abilities can be changed, so the ability of this two-axe dragon has some special abilities.

A hidden will made Ulti bring her arms close to her face, and then the pair of teeth fell off like assembled parts, and were adsorbed on the scales on the outside of the arms to form two external axe blades.

Fake Axe - Axe Mongka, real Axe - Ulti.

Whether she uses her head or her hands, she can unleash the power of this pair of teeth.

Although it looks a little unscientific, it is not surprising that Ulti's changes are based on the Triceratops using a rotating pelvis as a helicopter rotor, and the transformation of Quinn Brachiosaurus snake.

At the same time that Ulti changed, Peggywan's body began to swell.

The black and purple scales are all over the body. If you don't look carefully, you can't tell that they are scales. When combined, they look like shark skin.

It looks smooth, but it can actually cause serious scratches to the enemy.

Because the fruit prototype is different, his fierce bite land shark is much bigger than Ulti, especially his transformation is still a beast form.

So his height surpassed Ulti for the first time since he was born, and he was nearly three times as tall, but the house in Onishima was big enough, so it wasn't a problem.

"Wow, Pei, you've grown so big, great."

Looking at the growing Peggy Wan, Ulti didn't feel scared at all, but crawled directly onto his back. If she hadn't had scales herself, she would have been rubbed off a layer of skin. The current Peggy Wan can't control these things.

"Sister? What are you doing?"

"It's nothing, I used to hold you, but now you can carry me when you grow up."

In a nutshell, this older sister has love for her younger brother, but maybe not much, and it's weird.

At this time, Ulti grabbed Pejiwan's dorsal fin and swayed on his back, and then Pejiwan fell directly to the ground because he couldn't adapt to his new body.

The movement made by shocked the siblings, but after waiting for a long time, no one seemed to notice that they were making big moves.

"Huh, these people are sleeping really dead. Xiaopei, how are you? Why did you suddenly fall down, are you alright?"

"Sister, while you're talking about this. Can you get off me first?"

In Peggywan's few memories, most of them are Ulti, and they are mixed.

For example, he was almost choked to death by the water supply, and he was almost suffocated by the quilt, but she was always in front of her if there was any danger, which made Peggy Wan's feelings for her sister Ulti very complicated.

She can rely on when there is danger, and when there is no danger, she is her greatest danger, such as now.

The two struggled for most of the night before they fell asleep, but just after dawn, they were woken up by an explosion, and at the same time, there was Yamato's helpless and forced scolding, and Kaido started again. His makeshift test is out.

Even sisters and brothers Ulti and Pejiwan were not spared, and were directly swept up by the spreading flames.

Although he deliberately allowed the siblings to get the right fruits because of their relationship with their father, it also meant that the **** time that belonged to the siblings began early.

"Run, you have to be worthy of those two fruits. Powerful abilities can't be wasted because your body is not strong enough, run for me!"

Under the passive training, Ulti felt more and more that she was being tricked by Kaido.

Time also quickly came to February 1506. In the past time, a lot of things happened on the sea. For example, the red-haired Shanks came to the East China Sea and invited a man named **** Bu to join his pirate group. .

In the forest of Drum Kingdom, a group of elk gave birth to a new group of deer, Goya Kingdom, Ace and Sabo met for the first time and became friends, and Ulti was also taught by Shaina several times.

She didn't remember Yamato's instructions, so she suffered a lot from her unwillingness to admit defeat, but she had enough experience and lessons in this regard, at least when facing Arceus, she understood etiquette and respect. importance.

She doesn't want to be spanked in front of her younger brother anymore, Shaina is really ruthless.

It is a very severe strength to make a proud child convince verbally.

Chapter 384 Is there anything wrong with the ground system flying?

Exercise the body and control the ability. This is the training that the sister and brother have been doing recently. They can't learn high-level skills, but they are gradually familiar with their own body structure. For example, Peggy Wan has a dedicated teacher - Elizabeth.

This has something to do with the way he flies. It is also a ground system, but the stinging land shark has the ability to fly, but the flying of the stinging shark is different from ordinary flying. After an adult, the savage stinging shark can take off in place. Then fly at high speed like a jet fighter.

But Peggy Wan has not yet reached this point. At most, he is a glider and needs a run to barely take off, so Elizabeth, who is good at gliding and flying, has become his special education.

"Little Pei! Come on!"

"That's right, Pei, don't be afraid, I'll catch you!"

"You are not allowed to call him Xiaopei, only I can call him that!"

Standing on a slightly higher hillside, Peggy Wan is preparing to take off, and below are the crowd watching the fun, although Ulti has understood that this warning is useless after a few months, Yamato and Jack are calling them. Peggy Wan Xiaopei.

But she still didn't give up her act of declaring sovereignty. As for whether this kind of flight training would be dangerous, she didn't think so, after all, when she taught Pejiwan to walk before, he took him and walked for a few days, and he learned it.

She was still waiting for Peggy Wan to take her to fly. At this time, Peggy Wan was vaguely labeled as a mount in her impression. After all, except underwater, the stinging land shark can be free whether it is underground or in the sky. *action.nOvEℓuSB.com*

As for why she didn't refuse Jack's move to catch Peggy Wan, she was a younger brother, not stupid, she couldn't catch Peggy Wan of that size.

"Close your body, spread your arms, spread your fins, and run with all your strength."

Elizabeth was demonstrating in front of Peggy Wan, and after a while of running, she took advantage of the wind to fly up, but Peggy Wan was not so smooth. No accident, his first flight fell directly.

continued to fall after breaking the protective web of spider silk left by Maria, and was finally rolled up by Jack's nose.

The height plus the trunk is a height that Ulti cannot touch today. For Ulti, everything is fine in Onishima, even Shaina did not continue to target after she corrected the problem. of.

She can get used to that familiar white-haired slut.

Only this Jack was fighting her for his younger brother every day, which made her very unhappy.

"Put down Xiao Pei! You scared him, didn't you see it?!"

After a long period of exercise, Jack's nose has become as flexible as his arms, and the load is extremely heavy.

"I asked you to put it down on him, not on your back!"

Peggy Wan, who failed to fly, had already released his transformation, so he was directly placed on his shoulder by Jack.

If you are not familiar with them, to outsiders, these people do not look like pirate reservists at all. Everyone has their own training. In the office of Ghost Island, Mandelfish also temporarily left Fishman Island. Back to work.

"How's the situation on Fishman Island recently?"

"It's a lot more stable, but it's still the same overall. Although the Whitebeard flag has made many people dispel their crooked thoughts, there are still occasional abductions and trafficking incidents on Fishman Island."

Whitebeard's flag is a deterrent, but there are still many people who want money or death. Slavers and pirates who dare to attack mermaids or murlocs still exist, especially the high price of mermaids attracts many desperadoes.

Whitebeard is scary, but he is not everywhere. If he is encountered by members of Whitebeard, it will be bad luck, but as long as he can't meet, then nothing will happen. Many people still choose the right Mermaid strikes.

In addition to external worries, Fishman Island also has internal troubles. Some members of the slave-catching team already have fishmen, and they have no guilt for their compatriots.

The management of the royal family of the Ryugu Kingdom was not successful in this regard, especially the inspection of entry and exit, and sometimes it was useless.

"Besides, the subordinates have discovered some rare mineral deposits on the seabed near Fishman Island. I have used some equipment to test them, and the reserves are extremely rich. I am afraid they have not experienced mining in the past few hundred years.

But mining is expensive, unless you can hire those murlocs.

And there is no way to use large equipment underwater, and there is the threat of large sea beasts, if you really want to mine, you can only rely on your strength. "

Although Mandelfish's transfer application was because of Rusaka, he also did a lot of business, and he understood that only by showing the value of transfer can he stay in this position forever.

The area of the ocean is much wider than that of the mainland, and the world of pirates is even more so. Under the seabed of the deep sea, there may be many precious minerals buried, and even some treasures of sunken ships mean extra income.

It's just that although the coating process can allow boats to dive, it is not suitable for underwater mining, and the technology tree that is crooked has nothing in this regard. If you build a submarine to mine, I am afraid that the income will not be as good as the investment.

"How about the attitude of murlocs or mermen?"

"The subordinates have been using the appearance of murlocs to contact them. The polarization is serious, and most of the murlocs don't have a good impression of humans, but if necessary, I can still get some people."

The population of Fishman Island is about five million, and the ratio of mermaid and murloc is roughly balanced. After all, their birth is completely random.

And because of the random changes in the types of murlocs and mermen, it is actually a bit difficult to confirm whether they are biological.

The reason Mandelfish said he could get some people was because he had actually made a name for himself in Murloc Street.

Murloc Street is not inside the bubble film of the Dragon Palace Kingdom, but in the deep sea outside, but the murlocs live here, so it doesn't matter.

Fishman Street was originally a large place for orphans, but due to the incompetence of management, Fishman Street became a gathering place for illegal groups.

Fishman Street is the biggest slum for Fishman Island.

The laws of Fishman Island are not very useful here. On the contrary, fists are the best. Fisher Tiger, very famous fishmen are basically born here, but this makes the Dragon Palace Kingdom even more bizarre.

Innately has a stronger body than humans, and as a result, there are no strong people in the kingdom. All the people who can be called gangsters are born, and they are as ridiculous as some people who play football.

In this environment, Mandelfish can naturally play some names with his fists. After all, he needs some murloc subordinates on Fishman Island, so he just became a small leader of Fishman Street.

Chapter 385 Returning Jack and Commander Chopping

And those little brothers are quite reliable, because Mandelfish not only can play, but also has money. If you give him some time and enough funds, it is really not a problem to create a mining company.

It's just that the overall prejudice of the murlocs and the policies of the Ryugu Kingdom are a problem.

"But the princess of the Dragon Palace Kingdom has some very naive ideas. If there is a need, it should be no problem to send Tezzolo to communicate with her."

Mandelfish directly stated possible suggestions. His current goal has become an honorable retirement and marriage, and he has another flag on his back.

"The suggestion is good, you can use another identity to try the other party's tone, how about the fishman karate and jiu-jitsu?"

This is also the task of Mandelfish when he set off to Fishman Island, to figure out the cultivation method of this thing. There is also a real fishman in Onishima.

And for himself, Murloc Karate is also a way to increase his combat power.

"This. I have learned a little bit of murloc karate, but I can't learn murloc jiu-jitsu very well."

"This time you go back with Jack, let him exercise with you for a while, and let him learn about this by the way."

This is almost an arranged thing. 12 years old is already a suitable age for apprentice pirates. Like the nine snakes, the new generation of beasts will also start their own voyages, but their destinations are different.

Jack arranged the Fishman Island, while Yamato chose an island he liked. As for Maria, where she likes to go is up to her.

As for the safety issue, the flag of the beasts will not encounter any trouble when sailing on the sea, and the flag of the Whitebeard is hung on the Fishman Island. Although there are constant small movements, no one will make a big move on the Fishman Island.

The most important thing for the big pirates is the issue of face. No one can bear the slap in the face, unless there are considerations that make them have to endure, such as the issue of interests and casualties.

Before the war, Shanks was able to stop Kaido because of interests. Otherwise, if there was a real fight, Shanks couldn't have rushed to Marine Fando at the end of the war. He didn't have the ability of Kaido in an instant.

"Yes, I'll take care of Jack."

"Jack just needs to be careful, you should take care of Kojiro."

"Lord Arceus, do you want to take him there?"

"The best ones to deal with business problems are Kojiro and Tezzolo. Tezzolo has recently been studying business on the red soil continent, so of course it will be handed over to him, but don't worry, he won't hold back, it's just the first. It's just a trip away."

It's not like Kojiro didn't do anything for such a long time. Under the careful training of Binggoro, he finally got rid of the embarrassing state of dislocating himself and straining his muscles with a single blow. Now he can use it at least three times.

And he has also acquired his own abilities. Although military exploits are the most important feats within the Beast Pirates, they are not just combat exploits.

The breakthroughs in business, development, and technology are all considered. Kojiro's behavior in developing stable business within the country has given him another chance to be rewarded. This time, he didn't give it to his pet.

After the traditional process, he finally obtained the commander of Chopping and Slashing, which was directly transformed into the form.

The shape of is very similar to the human steel + evil-type blade Pokémon, wearing armor similar to the samurai of the Wano country, there are sharp blades on the top of the head, limbs, and abdomen.

Among the various Pokémon today, the ones that can increase combat power most intuitively are the Rock and Steel types. Even without training, these two types of Pokémon are directly immune to most conventional attacks. The upper limit is unknown, but the lower limit is very high.

For details, you can refer to Daz Bowness's quick-cut fruit, the steel body and the swordsmanship tempered by Binggoro, in the first half of the great route, Kojiro is basically not in danger.

Mandelfish's actions were quick, and just after leaving Arceus, he had already passed the news to Jack.

"Jack, the order of Lord Arceus, you and I will go to Fishman Island in the next period of time."

"Fishman Island?"

"Yeah, that's where you should have been born. It's also necessary to take you there to see, and you can learn something new, like this."

Looking around, Mandelfish saw a kettle, and after pouring some water in his hand, he punched the specially made wooden figurines.

"Murloc Karate · Water Strike!"

Water strike, one of the basic moves of murloc karate, is a special move that uses liquid as a bullet.

"How about it, this is a murloc move, it's very suitable for water battles, but unfortunately I haven't been able to find the trick to that murloc jiu-jitsu, Jack, it's up to you when the time comes, I should find you a good master. ."

"Wow, what a cool look, can murlocs make splashes like this?"

Jack's response was okay, but Yamato seemed to be intrigued by this, and began to ask about Mandelfish's experience in Fishman Island.

And hearing that Jack was leaving, Ulti couldn't stop her smile from being able to stop her mask.

"Very good, you better never come back."

"Hmph, I will not only come back, but I will also bring gifts to the little one. Fishman Island's desserts are very famous." Jack stated a very impressive fact. Whoever has delicious desserts in the pirate world will ask Charlotte. · *Lingling.NoVelus.b.COM*

As long as the desserts she likes can be said to be quality assurance, Fishman Island can use the desserts to obtain the protection of the banner of the BIG·MOM Pirates, which is already an affirmation of this quality.

At first, Jack would quarrel with Ulti, but he gradually found that there was a better way to deal with this arrogant, that is to ignore her for a while, and then start with Peggy Wan.

"Is it really delicious?"

"Little Pei! It's just mere food, don't succumb to this kind of thing! I can also cook something delicious for you."

"Sister U, forget this, what you made"

It's not that he discriminates against Ulti, it's true that he doesn't want to die so young, the food that Ulti makes is only liked by those stinky muds, which already shows how outrageous the food she makes.

Looking at the extra children, Mandelfish was not surprised at all, after all, this is the tradition of the beasts.

At the same time, Kojiro, who received the news, also came to Binggoro's house to bid farewell, mainly to tell Binggoro that he did not need to train him tomorrow, and he would also be away for a long time.

Most of the things in Wano have been on the right track, and he no longer needs him to watch, but I heard that he was going abroad, and Binggoro gave him a gift instead.

Chapter 386 "Three Swords" and the Mermaid's Diet

"For you."

Hyogoro handed a box nearly two meters long to Kojiro.

"This is."

"Knife, that knife of yours may have been handed down forever, right?"

"That's right"

"That's right, I found some biographies some time ago, which contains some descriptions of your ancestors. If there is no mistake, he is shorter than the current one, but this is normal, after all, it was many years ago."

Binggoro took a sip of tea, and then continued: "The knife is tailor-made by him, but it may not be suitable for you. If I am not wrong, the knife is still shorter for you, and this length is more suitable. you."

and Kojiro have practiced against each other for so long, and witnessed with his own eyes that the opponent will dislocate himself from a single blow to the complete use of Yanhui. Hegoro witnessed the growth of Kojiro, and also discovered the effect of the length of the blade on his moves.

But in the final analysis, this is still a question of Kojiro's strength. If he can reach the realm of a great swordsman like his ancestors, and integrate his moves into his sword instead of imitating it blindly, then the effect of the length of the weapon will not be so great.

"Thank you."

"The old man just doesn't want his moves to decline. Even if you're not in Wano, you have to practice more."

"Yes, I understand."

For this reason, there was another knife in Kojiro's luggage, but this knife was actually inconvenient, because it was too long for Kojiro's height and arm length, so he had to bring another knife for convenience. Evolved into a two-knife flow.

Although his family passed down the first knife style, it is not without any research on the second knife style.

Musashi's mother, Miyamoto, in order to thank him for giving Musashi a very stable job, specially gave him an ancient sword manual as a thank you, which records the two swordsmanship called Nitian First-class.

At the same time, in order to use this two sword style, he brought another sword, so he became a three sword style samurai with two swords on his waist and a long sword on his back.

Although this three-knife flow cannot use three knives at the same time.

The next day, Jack and Kojiro left Wano under the leadership of Mandelfish. Before leaving, his friends said goodbye to him cordially, especially Ulti, and hoped that he would never come back. .

"Sister, it's not good, Big Brother Jack treats me very well"

"Huh? You are not allowed to call him eldest brother, you only have my sister!"

Everything else is easy to say, but when it comes to Peggy Wan, Ulti will become like a powder keg, and no matter how many times it is the same, it will explode at one point.

"But that Jack is actually a murloc, it doesn't look like it at all."

On the outside, Jack really has nothing to do with the murloc, he can't even see the webs between his fingers, and the only feature is a set of fangs.

On the boat, Kojiro and Jack are doing their practice as always, Mandelfish is reading notes, and has the same virtue as Zeraora, and his love experience is not rich, but he has someone to learn from.

Zeraora became his forerunner. Mermaids and fur tribes are considered minorities, so there is a bit of commonality in them.

At the same time, there are Quinn's love secrets and the like, which is very outrageous. At present, Quinn is the one with the richest love experience (self-proclaimed).

The distance from Wano Country to Fishman Island is not short. During this time, Jack found that Mandelfish has changed a lot.

When Mandelfish applied for a transfer to Fishman Island, he was still sad for a few days, after all, he was his big brother.

Humans always have feelings, even if he was in the original timeline because the place where he fought became barren as if he had experienced a drought, so it was called a drought, and he also had a gentle side at this age.

For example, the frost milk fairy on his shoulders felt that Jack was very gentle.

And the biggest change for Mandelfish was that he started to go down to the kitchen.

"Jack, how about trying this scallop meat."

During dinner, Jack saw a variety of food made from scallops and clams and conch.

Mermaids don't eat fish or the meat of sea beasts, but shellfish are in the mermaid's recipe. Although Jack is just a murloc, Mandelfish thinks their tastes should be somewhat similar.

These shellfish are all processed, although Fishman Island is in the deep sea, but they have a way to cook the food.

There are electrical appliances in Murloc Island, which can be used to heat food or coffee. Through Yangshu Eve, Murloc Island not only gets sunlight, but also electricity. Their power generation technology is very special compared to the outside world.

Of course, eating raw is also a very common thing.

Mandelfish was learning to cook, so something strange happened on the ship.

On the first day, facing the table full of shellfish, Kojiro and Jack felt very novel. Although Mandelfish was not a master chef, it was not too bad to cook.

After a week, they started to look expressionless, and after a month, looking at a table of shellfish, they couldn't help it.

"Brother Mandelfish, don't you have anything else to eat?" *noVelusB.cOm*

Three meals a day, no matter how much they do, they have enough of these things.

"Jack, it's not right to waste at sea. Food should not be wasted under any circumstances, you know."

"But Brother Mandelfish, what does this have to do with this?"

Although he doesn't like vegetables and fruits, after a month, he thinks Shuang Dai's fruit set is more delicious than these shellfish.

"Hold on, stick with it for a few more days, and I'll soon understand the tricks of these dishes."

In the experiment, he made a lot of failed products. In the past days, his little brothers have eaten enough of these things, so the two newcomers Jack and Kojiro are honorably promoted to new tasters.

In the end, Mandelfish learned the practice of scallops and other shellfish during the voyage, and Jack and Kojiro also successfully crossed the shellfish from their own recipes.

After a long voyage, they once again reached the junction of the center of the great route. Kojiro not only came alone, but also brought some land commodities, and some businesses have to be done.

Because of the goods, he was waiting for the coating at the stronghold of the beasts, while Mandelfish and Jack dived in advance due to their abilities and races.

"Brother Mandelfish, is this Fishman Island?"

"No, Fishman Island is over there, here is Fishman Street, I'll show you there first, remember, I'm a fishman here."

This is the vest he has been wearing for a long time. It would be bad if Jack ruined it with a single word.

"Don't worry, Brother Mandelfish, I won't talk nonsense."

"Well, follow me."

There is a bubble behind him, which contains gifts that cannot be soaked in water.

Chapter 387 Fishman Street and Fishman Island, Otohime's sight

"New, Brother Mandelfish, are you back?"

As soon as he entered Murloc Street, a six-armed octopus spotted Mandelfish and greeted him warmly. It was one of the Murlocs that Mandelfish had known over the years - Little Eight.

At the end of 1502, he proposed to be transferred, and the transfer was completed at the beginning of the following year. Now he has been on Fishman Island for three years, and some acquaintances are normal.

Xiaoba is not his younger brother, but one of the murlocs who has a good relationship with him. After all, Xiaoba's boss is actually Aaron.

As for the relationship between Mandelfish and Aaron

In the beginning, Mandelfish fought Aaron when he was fighting on Fishman Street, and easily defeated Aaron. Later, he defeated some slave teams and other pirates in Fishman Street. The relationship with Aaron is not bad.

Aaron, the Jagged Shark, a racist.

When he was young, he had a longing for the human world. Later, human beings discriminated against murlocs, and the advent of the era of great pirates broke his fantasy.

Although he hates human beings, but unlike the madman Hody Jones, Aaron is very friendly to his compatriots. After being defeated by Mandelfish, he quickly accepted him and helped Mandelfish integrate into Fishman Street.

This has something to do with Mandelfish's appearance. In the form of a capable person, he is actually a bit similar to Fisher Tiger, and Fisher Tiger is the recognized boss of Fishman Street, so Mandelfish's Appearance is very close to him.

The two sides had a period of close cooperation for a while, but then gradually became distant. The reason is very simple, because Mandelfish is too friendly to humans, Aaron hates all humans, and Mandelfish will only shoot at some humans. , and will help some people.

As a result, the relationship between Aaron and him is no longer as good as before. Although there is no breakup, they are gradually estranged.

But Xiaoba has not changed much. He does not have as much resentment towards humans as Aaron, and he also has a good relationship with Rayleigh who lives in the Chambord.

"Ah, back here, this is a gift for you, a machine for making takoyaki."

He not only brought gifts to Rusaka, but also to some friends and younger brothers.

"New?! Really give me New! That's great!"

As an octopus man, Hachi's biggest ideal is to open a takoyaki shop, but Fishman Island does not have a complete industrial system, and he has no money, so he has been eyeing this kind of machine for a long time.

"Well, for you, here is a bonus recipe, find a place where there is no water and look at it. There is also that machine, which can be used on Fishman Island, but not on Fishman Street, so let's do some serious business. , that guy Aaron will have an accident sooner or later."

Mandefish is very aware of Aaron's jinliang, that is, he can bully others underwater, and when he encounters someone with real skills, he will be beaten down in minutes.

But he is still very arrogant. In Mandefish's view, it is only a matter of time before he has an accident.

"New"

"Mandefish, you don't speak ill of people behind your back, what can those humans do to me? The murlocs are the real kings at the bottom of the sea!"

"Well, you're right, just be happy."

At first, he persuaded the other party, but then he gave up and just let Aaron be happy.

"Cut, I advise you to be careful, the curse on Rusaka has always worked well before."

"You don't have to worry about it. I haven't seen any curses for so many years. I still live well."

Mentioned this issue, Mandefish became less friendly, and there was a hint of threat in his tone, but Aaron did not delve into this issue, but left here with a few murlocs.

"New, Big Brother Mandefish, actually Big Brother Aaron."

"Okay, Xiaoba, you don't need to talk about this."

"Okay, but is this a kid?"

Looking at Jack who was following Mandefish, Hachi showed a suspicious look. Now Jack's face is still immature, but he is too big. Whether it is Mandefish or Hachi, there is no way to match Jack's height. In comparison, it is more than one head shorter.

If it weren't for that face that was still a little immature, I would have believed him to be an adult Xiaoba.

"Oh, his name is Jack, a grouper murloc, and I was entrusted to take care of him for a while, by the way, what about Haku?"

After thinking about it, Mandefish changed his name, and then inquired about another murloc, who was also the teacher he planned to find for Jack.

Haku, the big red snapper, although he is in his early 20s, he is proficient in murloc karate and murloc judo.

Known as Haku Duan Haku, he may not be the strongest, but he is very good at teaching people and he is friendly to human beings. According to the development of the normal time line, he will join the revolutionary army in the future and become an instructor of the revolutionary army.

"It should be still on Fishman Island. I haven't seen him in Fishman Street recently."

"I see, by the way, Little Eight, help me send some of these things to them. I'll go to Fishman Island first."

"New, I understand, leave it to me."

The benefits of octopus murlocs are reflected in the presence of soap bubbles in the deep sea. These things are very light, so with enough hands, he can pick up many things.

Those things are not expensive, but they are things that murlocs like but are hard to get. The murlocs are just below Chambord, but murlocs rarely go there. After all, the Chambord Islands are very dangerous to them.

Many mermaids or murlocs have a dream of going to the soap bubble park to play, but they may never set foot on land in their lives.

And Mandelfish took Jack directly to Fishman Island.

He wasn't sure where Haku was, so he took Jack to Rusaka's house, during which they passed by Geelongcord Square, where a woman was giving a speech.

She is Otohime, the princess of Fishman Island, an idealist whose dream is that all mermen and murlocs can live on the ground equally with humans.

She speaks very hard, but not many people are willing to listen to her words, what she says is too advanced for the residents of Fishman Island.

"Brother Mandelfish, is it difficult for murlocs to live on land?"

Jack, who was passing by, heard Otohime's speech. He didn't understand this issue very well. After all, he had always lived on land and had never been discriminated against.

"It's not easy, Governor Kaido and Lord Arceus have protected you from this problem. In fact, the outside world is much more complicated than you think. Let's go, Rusaka's home is coming soon."
noVELUsB.com

Mandelfish pulled Jack away from here. He wasn't interested in that speech, but he didn't notice that, Ottoji's gaze turned to them. mood.

She used this ability to see how many people were willing to recognize her. Although there was no result, she unexpectedly felt some thoughts of Mandelfish and Jack.

Chapter 388 Jack: You value **** over friends!

Otoshi can read minds, which is different from the ability that Anilu has acquired by combining the fruit ability. Her ability is innate, but she does not have the habit of browsing other people's inner thoughts at will.

If foreign voices keep entering her mind, it will drive people crazy, and it is not her style to read other people's hearts at will. She is a very naive idealist.

When giving a speech, she only senses whether the other person has an emotion of approval, which is similar to distinguishing between good and evil, but that kind of identification is rare, and it may not be encountered by hundreds of people.

Mandelfish and Jack both agreed with her words to a certain extent. One of them wanted to marry a mermaid, and the other was very happy with humans, so they agreed to part of her equality.

Otsuki did not chase after her, but spoke more vigorously. Every sense of recognition was a motivation for her.

In fact, her ability is far more than that. She is very knowledgeable and weak at the same time.

Strong enough to influence the minds and thoughts of others and resonate strongly, and even change their values and ideology.

Musgarud's sudden change of mind a few years later was not just a life-saving grace, but Otohime helped a lot here.

But at the same time, she is also very weak. Her constitution is so fragile that slapping others in the face will break her own bones. With this constitution, there is no need to mention cultivation, and her perception, which can affect the minds of others, is also different from the normal perception.

That is not the conventional domineering that can be trained to predict the future realm, but the same innate ability as the overlord. Her influence is not an instant brainwashing, but a subtle and slow influence.

Dragon people are highly polarized, and some of them are undoubtedly at the bottom of the world in their mental resistance.

That's it, she has to work hard to influence her. As long as she is stronger, she is basically powerless. Otherwise, she doesn't need to do anything else, she can go out and rule the world.

Crossing Geloncord Plaza, Mandelfish returned to Coral Hill again, and on the way Jack also saw all kinds of mermen and murlocs.

Whether it is sea fish or freshwater fish, even some non-fish marine creatures appear here from time to time. Although Jack looks more like a human, his big size and Mandelfish with him have saved him a lot of trouble.

"Brother Mandelfish, didn't you say that the woman was a princess?"

"Yeah, what's the problem?" *novelUs&.cOm*

"The princess' words, then what she said should be similar to that of Mr. Arceus and Mr. Kaido, and it should have the same effect."

"Er Jack, although.. maybe um.. that's almost what you mean, but your metaphor is very inappropriate. Do you want to be taught by the big sister?"

"No, I just want to say, why is the princess's words, but no one listens to them as subordinates? Many of those passing by are like this, and what they do is completely different from the request of the princess."

In Jack's view, the citizens treat the king the same as the ordinary pirates of the beasts treat the captain. If Kaido said this, it would not be a speech, but an order.

"Because Governor Kaido and Lord Arceus are strong enough, Jack, this is a cruel world, without strength everything is nonsense, if she has absolute strength, then these will be implemented quickly, but she does not.

Although I agree with some of her words, it is a pity that she is destined to fail to realize her ideal. "

"why?"

"Peace is not something that can be said with your mouth. It is a very sad thing to pin your hope for peace on the ideas of others. Your fist is big enough to spread your ideas to others.

Otherwise, if you persuaded him today, it would be rubbish. That blank piece of paper cannot restrain this world of force. "

The pirates' territory, the status of the allied countries, these are all defended with strength, even the world government. Without the support of force, those Tianlong people would have died a long time ago.

"Strength.. Is it important?"

"Of course it's important, it's almost here, don't talk nonsense for a while."

Rushaka's house is getting closer, and Mandelfish once again emphasizes Jack's attention.

"I see, don't worry Big Mandelfish."

"Well, by the way, smile, don't be so rigid. Forget it, you better stop smiling and keep that expression just now."

Looking at the fangs, Mandelfish thought it better not to make him laugh.

"Rushaka, are you at home? I'm back!"

Familiar place, familiar words, familiar way of knocking on the door, the difference is the opening time, unlike the last time he waited for a long time, this time he just knocked on the door when there was movement inside.

"Mandfish, you're back.. who is he?"

Looking at the big man behind Mandelfish, Rusaka was obviously stunned for a moment.

"The person above ordered me to take this kid to learn some murloc karate and murloc judo. Have you seen Haku recently?"

"No, but are you sure it's a child?"

Even in the murlocs, Jack is a rare big man, but this problem did not last long, and during this time, Jack also saw the situation in Rusaka's room, and many things were in pairs.

If, according to Mandelfish, Rusaka has been single all this time, it means that there has been a lot of progress between them.

Finally, Jack watched Mandelfish happily walk into the house, while he was waiting at the door alone.

It's not that Rusaka didn't let him in, but that he couldn't. This is not a ghost island. According to Kaido's body shape, even the giants can come and go freely.

Rushaka has been living alone because of the cursed reputation, so the house is naturally built according to his body shape, even if Mandelfish, who is about two meters tall, has to bow his head and turn sideways when entering the house.

So unless the door is demolished, Jack can't get in. In this case, he chose to let Jack wait for him at the door, and arrange him after he has dealt with the matter at hand.

Then there was a strange sight of a young and strong man sitting alone at the door.

"Is he okay?"

"It's okay, he's often alone, he's used to it."

Jack outside the door didn't hear this, otherwise he would definitely refute Mandelfish that he was just used to a man staying alone among women, not a man.

At the same time, on the sea outside, Kojiro was still waiting for the coating, and on the other side of the red earth continent, on the Chambord Islands, a group of pirates received a mission.

"Looking for this murloc?"

"He is a runaway slave. Your goal is to capture him. Of course, we will buy other mermaids or murlocs at the price of the auction house."

Chapter 389 The middleman who made money

Not long ago, a slave of a Draco escaped when he was out, and the slave who escaped was Fisher Tiger.

The dragon man is not Musgarud. Although he likes murloc slaves, he is not the only one who has murloc slaves. Compared with ordinary humans, the murloc's physique can bear a greater weight. language, which means they have a more secure seat when they go out.

It is almost impossible for ordinary slaves to escape from the hands of the Tianlong people. The power of the explosion collar is not something that the slaves can bear.

But Fisher Tiger deliberately overturned the dragon man on his back, tricked other people into coming over at the cost of a few shots, and took the key while he was not prepared.

They underestimated the vitality of the murlocs, and they also looked at the marksmanship of the Tianlong people. A few pistol bullets could not kill Tiger.

Then came a classic case of economics.

For the Tianlong people, letting the slaves escape is a very shameful thing. If this matter is spread out, it will become a laughing stock among the Tianlong people.

And there were too many people who saw Tiger escape, including the kings of the alliance countries and officials of the world government, it was not realistic to silence them all.

So he gave a confidant 500 million Bailey, let him go and get Tiger back, it would be better to catch some new slaves.

Since Whitebeard began to shelter the fishman island, there are still some effects. The most direct manifestation is that the number of fishermen and mermaid slaves is reduced and the price is higher.

Although 500 million has exceeded the value of a murloc, it is nothing compared to saving his face.

Then this confidant took out 300 million of 500 million Baileys, and bribed an official of the World Government to let him deal with this matter.

Then the World Government official took out 200 million Baileys and arranged for his subordinates to take care of this matter.

The murlocs and mermaids on the island were once classified as "fish" by humans and were discriminated against by humans.

However, after Ryugu Kingdom became a member of the World Government 200 years ago, the relationship between the two sides eased a little, and the King of Fishman Island was also allowed to participate in the World Conference.

This makes it difficult for the people of the World Government to do such things blatantly, and the deep sea is too dangerous.

And the ability of the slave team to operate in the deep sea is very poor, so they used 120 million to buy a group of pirates with decent strength, let them do it, and wait on it to reap the profits.

As for extra murlocs or mermen, if the quality is good enough, the Draconians are probably still willing to pay extra.

It was two days after Mandelfish returned to Fishman Island.

This group of pirates' boats have been coated for a long time, and after making preparations, they have come to the water. They took out 60 million Baileys and bought some gangsters in Fishman Street again.

They are not sure whether the other party has returned to Fishman Island, but this is where all the fishmen live, so they sent people to check it out. The other slaves were captured to make it easier for them to cross if they couldn't find Tiger.

As for their goal, the answer is just a red murloc who came to Fishman Island recently. As for the name, Tianlong people won't remember the slave's name. The same goes for everyone else. The number on the collar is the miserable life of a slave. .

If it is stated that their target is Tiger, then no one in Fishman Street will do this work. Fisher Tiger's status in Fishman Street is equivalent to that of Binggoro in Flower City. *Novelusb.com*

Although he is not an official, but his huge reputation can make a lot of calls, but he has been away for a long time, and no one has seen Tiger come back recently, so he took over this black job under the temptation of money.

There are many factions in Murloc Street where Tiger is not there.

But the wall has ears, so their secret discussion was overheard by Hachi.

"New? The red murloc who just returned?!"

He temporarily placed the takoyaki machine with his friends in the Fishman Island. This time he came back to catch some octopus as material, but he didn't expect to hear such an exaggerated news.

The octopus cage in his hand was thrown directly to the ground by him, and then he hurriedly left here.

"New! Big Brother Aaron! No good New! Those **** in the north block teamed up with humans to attack Big Brother Mandelfish!"

In a room on Fishman Street, Aaron and his gang were drinking the juice of some kind of underwater plant. It was very similar to alcohol, but the density was higher than that of water, so it could satisfy them even in the water-filled Fishman Street. need.

"Don't worry about Xiaoba, how can those guys be Mandelfish's opponents, you underestimate him, sit down and have a drink? Newly picked."

Aaron didn't take that matter to heart at all. In his opinion, the mere humans would not be Mandelfish's opponents. After all, he was not even Mandelfish's opponents.

But Xiao Ba was not so relieved. Seeing that Aaron did not intend to intervene, he went to Fishman Island to report to Mandelfish.

On Fishman Island, Mandelfish and Rusaka were hanging out in Mermaid Bay. Recently, he has successfully found Haku and handed Jack to Haku.

Looking at the past friendship, Haku agreed to teach each other murloc karate and murloc jiu-jitsu, and let Jack live in his own house temporarily. The murloc's house is generally much more spacious than the merman's, and his home is not far from Rusaka's house. Not too far for Mandelfish to run on both ends.

And the reward is a big bag of pancake rolls. Although it is a murloc, Haku has a love for this kind of food.

"The red murloc should be him, right?"

"Isn't he the only murloc who came here recently. He was so close to the woman Rusaka, and he took us a lot of territory in the murloc street. Now someone is calling for him, isn't that just right?"

Mandelfish also became famous in Fishman Street. When they heard the human pirates describe this incident, they actually had the same idea as Hachi.

"But. Can we beat him?"

"I can't beat it, but those humans can. Isn't that person the so-called supernova this year? I should be able to deal with him. I have a plan to use that mermaid as bait to trick this guy into the sea. Then those humans will naturally have way to deal with him."

Although the murlocs can live on land, the murlocs on land can't perform as well as underwater. If the murlocs are put on a boat or on land, their strength will naturally be greatly reduced.

"Good idea, so how are you going to separate the two?"

All the premise of this plan is that Mandelfish and Rusaka are separated, and now they have no possibility of separation at all, but just when they had a headache, Mandelfish's phone rang.

Kojiro's boat has been coated and is waiting for him at the entrance. Since the boat is full of humans, he chose to let Rusaka wait here.

Chapter 390 At that moment, Mandelfish turned into light

Rushaka's attitude towards humans is fairly friendly, but after all, that boat is his subordinate, and there are many secret things to communicate when they meet, so he didn't take Rusaka with him.

Although Fishman Island is not particularly safe, the reason why there are more mermaids in Mermaid Bay is not only because of the beautiful environment here, but also because it is a relatively safe place in Fishman Island.

He just went to pick up Kojiro and the others. It didn't take long, and he would also leave Fishman Island in normal times. Rusaka was not a three-year-old child, and there was no problem in living alone, so he was careless.

Seeing Mandelfish suddenly leave, the murlocs understood that it was time to act.

"This is what you brought?"

"Well, considering the special environment here, I think this kind of product should be more popular."

"That's it, I'll find a place for you first, and then I have some personal matters, when I'm done.."

Mandelfish and Kojiro talked about this issue in a few words, and then outside the entrance of Fishman Island, Hachi's voice came over.

"New, Brother Mandelfish, Brother Mandelfish! Someone's going to attack you! New! I heard it all over Fishman Street!"

Looking at Kojiro beside Mandelfish, Hachi didn't say anything. He knew that Mandelfish had a good relationship with some humans, so he talked about what he heard in Fishman Street without waiting for Mandelfish to ask. .

"When did this happen?"

"New, not long ago, I went to Big Brother Aaron first. He said that if you can handle it alone, you won't come. They should be faster than me."

"Oops!"

An ominous feeling appeared in Mandelfish's heart. If according to what Xiaoba said, those people had already acted in front of him, and the target was really him.

At this time, there seemed to be some disturbances in the direction of Mandelfish.

"Hey, don't run, what happened over there?"

"There are pirates with human beings doing damage, I don't know what's going on, in short, it's a mess"

stopped a merman, and Mandelfish asked what was going on.

In addition to the pirates and murlocs, they also had people from the world government waiting to receive the goods, so they quickly made a plan after Mandelfish left.

The riots of those human pirates on Murloc Island attracted attention. They mixed in the crowd and started a riot, causing the nearby mermen and murlocs to riot, and then took advantage of the chaos to catch Rusaka.

Later, he will reveal some information to Mandelfell and lead him to the hands of those who are ready to receive the goods on the sea.

The reason why those human pirates are allowed to do it is because they have to continue to live on the fish-man island, and it's okay to do small things.

Newborn calves are not afraid of tigers. As this year's supernova, they failed to stop them in the first half of the Great Route, so their hearts were very swollen, and they were not afraid even in the face of the white-bearded flag, and agreed to the demands of the murlocs.

Anyway, plundering the fish-man island itself is also their purpose.

"New, Brother Mandelphish! Where are you going?!"

"I'm going to find Rusaka, those are my friends, please help me take care of them!"

"New? Wait, where are you going?"

Watching Kojiro and the others chasing directly in the direction of Mandefish, Little Bayi didn't know what to do for a while, so he had to follow behind.

"Is this guy running so fast even an ordinary cadre?" *novelUs&.com*

Kojiro just couldn't catch up with Mandefish. He thought that after three years of training by Binggoro, he was no longer weak, but he didn't expect that he couldn't catch up with Mandefish, which made him feel more and more that his decision was correct.

He didn't know that the current Mandefish was launching a water splash with all his strength, and every time he could use his explosive power to jump out a long distance.

"Rushaka! Rushaka! Where are you?!"

Returning to the place where the two were separated, Rusaka was nowhere to be seen.

"Mandfish! Calm down, you can't find her like this!"

Kojiro finally caught up. Mandefish was not only in the form of ability all the time, but also in the form of enhanced ability because of his disguised identity as a murloc. When Kojiro transformed into a commander of slashing, only with the blessing of ability. Barely caught up.

"I can't calm down.."

"Don't panic, I have informed the New World that they should still be on Fishman Island. Even if they leave here, there are only two ways. If they dare to go to the New World, they will definitely be stopped by our people.

And that little eight is telling the truth, those people's goal is you, even if they capture Rusakana, they are looking for you, as long as you are still there, she will have no problem. "

The bystander is clear, but Kojiro, who was out of the way, could see the situation more clearly. He wanted to inquire about the situation from the people around him, but those mermaids or murlocs didn't stop at all when they saw that he was a human, and instead ran faster.

At this time, there was a murloc who did the opposite and took the initiative to reveal that he had seen the news of Rusaka.

"Where is she?!"

"Brother Mandefish! That's him, New, and he's with those guys too!"

Before that person could speak, Xiao Ba's voice suddenly came over, disrupting their plans.

Hearing this sentence, Mandefish's eyes instantly turned red, and in his rage, he didn't give the opponent a chance to escape, and pressed him to the ground.

"Speak! Where is she!"

His strength has long surpassed this murloc, and even he can't break free from Mandefish's restraint, and his face gradually turns blue.

"Mandfish! Let go, he's dying!"

Kojiro grabbed Mandelfish's arm by the side, but it didn't work, so he had no choice but to kick it, which made Mandelfish let go.

"Say!"

It's not that he didn't want to say it, but he was just choked by Mandelfish and couldn't speak at all.

"Ahem. I didn't know they were supposed to be on the water near the shampoo field."

"New, Brother Mandelfish, it's too dangerous there, or else"

Mandelfish didn't speak. After he had a destination, he rushed towards the bubble film above. Water splashing was no longer a skill that could only be danced on the water after his day-to-day training. It has spawned an alternative moon step.

"New, Brother Mandelfish. Why is he shining, is he going to become light?"

They couldn't stop Mandelfish, but Mandelfish's body shape changed dramatically as he rushed towards the bubble film above.

A tail stretched out from behind him wrapped in white light, his neck became slightly longer, and his limbs became thicker and had bone spur-like structures. When the white light dissipated, his whole body had turned blue.
