

Arceus 391

Chapter 391 The brutal takeaway you ordered has arrived

The light of evolution opened the way for Mandelfish to evolve, but he has never evolved because he lacked an opportunity. The evolution of the carp king requires not only the level, but also the belief that it will turn around.

Most carp kings evolve only when there are huge emotional fluctuations at the right level, such as extreme anger, or pushing themselves to the limit. Many carp kings will go over waterfalls in order to evolve, which is forcing their own bodies. .

And now Mandelfish has found his chance, and his body is full of majestic power.

"Is this evolution. Rusaka, wait for me, I'll be right there."

Feeling the power in his body, he felt that he could beat himself 10 times before. After rushing out of the bubble wrap, he directly turned into a tyrannical carp dragon, and his streamlined body rushed towards the surface of the water.

Although it is not as big as Kaido's blue dragon body, his beast form has also reached the shape of a small sea beast.

The ten-meter-long body was accelerating like this.

On the sea, the two murlocs packed Rusaka in a sack and handed it over to a World Government ship. They also learned of the plan from the hired pirates, so they did not attack the two murlocs. , but plan to wait until the goal is completed.

After they lead out the target mermaid, they will be caught together. Although the main target is the escaped slave, if you catch a few more, you will definitely get more rewards.

They didn't plan to let the two murlocs on board, but looked at their struggling pockets and talked.

"Does that guy have a wife?"

"Who knows, how can anyone like ugly things like murlocs, and they smell fishy like monsters."

said that, he reached out and grabbed the opening of the pocket. After opening the pocket, it was the bound Rusaka inside.

"Yo, that guy has a good eye. This is a high-end item, and the auction alone is more than one or two hundred million."

"Almost, the price of merman has been getting higher and higher in recent years. It's all the work of that idiot with Whitebeard, who, as a human, went to shelter that island."

The way they looked at Rusaka was all about looking at the goods. They were members of the World Government, and logically they had the meaning of protecting the members of the member countries, but for them, the Dragon Palace Kingdom was not a member country at all.
novEℓusb.cOm

If it weren't for the direct influence, the World Government would probably have a special team to go directly to Fishman Island to capture slaves instead of waiting for other slave capture teams.

"Hey, be honest, you kid, it's for the Tianlong people, don't relax too much, the guy must have his own ability to escape, don't be careless."

The people headed by shouted to stop the movements of several subordinates, and ordered them to start vigilance.

"Strange, Captain, the two murlocs in the water don't know when they disappeared."

An agent in a suit at the side of the ship noticed something, but it didn't catch their attention.

"Murlocs, it's normal to be able to swim. It doesn't matter if those two guys really run away. As long as they can lead the escaped slave, the value of this merman is enough."

They didn't shy away from Rusaka. When she heard that these humans captured her in order to draw out Mandelfish, her eyes were full of disbelief. At the same time, she also remembered that the man who was too close to her would be killed. to cursed rumors.

I thought that Mandelfish had been fine for three years, and that curse was a piece of paper. I didn't expect such a thing to happen today, but now she can't do anything.

She is just an ordinary mermaid and has no fighting power at all.

The people on the boat were planning to ambush Mandelfish, and Mandelfish had already arrived. At this time, he was holding a murloc in each of his hands, which was why the people on the boat found that the two murlocs were missing.

The change of the animal-type ability will affect the body shape. The animal shape is basically based on the size of the animal, while the human-beast shape will expand slightly according to the size of the human. The basic principle is to only grow bigger and not smaller.

The ability to shrink the body due to the transformation of the animal system has basically never appeared. The shape of the carp king makes Mandelfish's body change little, but the tyrannosaur is different.

At this time, not only did he have an extra tail, it turned blue, but he was also much taller than before, and he was almost three meters taller than Jack.

"I said, you answer, if you dare to say one more word, I will kill you, understand?"

Feeling the pressure on their necks, the two murlocs nodded quickly to indicate that they understood.

"Which ship is Rusaka on?"

There is more than one ship docked here, so he has to determine the target first, and he can't judge the specific target underwater.

And the two murlocs also pointed to a ship cooperatively. After getting the answer they wanted, Mandelfish didn't kill them. It wasn't that he didn't want to, but that he couldn't now.

When they died, the corpses would float up, which might arouse the vigilance of the other party. His sanity was not lost due to evolution, but the anger in his heart disappeared a lot after evolution.

"roll."

temporarily let go of the two murlocs, and then Mandelfish took out a piece of coral, blew out a bubble space, and took out his phone bug.

"It's me, Mandelfish. There's a World Government ship here at the outer pier, trying to get their attention. No matter what method you use, be quick."

That is the contact information of the Beasts and Fruits branch in Shambord. He is now the highest officer in the area of Beasts, who can mobilize the people at the entrance of the Shambord Islands and the New World.

At Manderfish's request, the people of Beast Fruits came up with a random promotion. Under his shameless shouting, it could be regarded as attracting the attention of some World Government agents. At this time, Mander Fei Xu also moved.

After the evolution, he did not lose the ability to splash water. Using the sea water under his feet as the power point, Mandelfish burst out. Although he already had the ability to fly after evolving into a tyrannosaur, his flying speed Relatively slow, far less than this way of moving at close range.

The moment he jumped into the air, he locked Rusaka's position.

Although this moving method is fast enough, the disadvantage is that the sound is relatively loud, especially the sound of Mandelfish who uses the air as a pedal to almost step on the sound of a sonic boom.

The person next to Rusaka had just heard the sound, and when he turned around, he only saw a blue claw that was getting bigger and bigger, and he couldn't even use the iron block, and he was twisted by Mandelfish. neck.

"Don't be afraid, I'm here."

Holding Rusaka in his arms, Mandelfish wanted to take her to jump into the sea. He was here to save people, and it was his goal to give priority to protecting Rusaka.

But a scythe thwarted Mandelfish's idea.

Chapter 392 The raging tyrannical carp dragon

And after that, several agents soon surrounded the two Mandelfish.

"Who are you?! This is the ship of the World Government!"

Mandelfish can be said to have changed a lot after evolution. Although his basic appearance has not changed, these World Government agents who are not familiar with him may not recognize him.

The blue figure was also different from their goal, and they didn't think about it at all.

And for some reason, facing Mandelfish, they felt a strange aura that weighed on their hearts and made them breathless.

"Overlord? No, it can't be overlord, what the **** is this guy?"

Captain had a bad feeling in his heart, and it seemed that this matter was not as simple as he thought.

The claws cut the rope on Rusaka's body, and then Mandelfesh rolled up Rusaka with his tail and protected him behind him.

"It's me, Mandelfish, don't be afraid, I'll take you out of here."

He was worried that his big change would make Rusaka unable to recognize him. Although he said back then that he might change color, the time of this change was much later than he expected, and the change was much bigger.

"I know, Mandelfish, hurry up, their goal is you! Leave me alone!"

Although they didn't get along day and night, they had been dating for a long time. Even if they became like this, she still recognized each other.

"Don't be silly, I'm here, I'll definitely take you away, don't worry, I'm very strong."

After the evolution of , his original shirt and shirt were torn. At this time, Mandelfish had his upper body bare, and on his left shoulder covered with blue scales, there was a dark number 3.

He was thinking about how to take Rusaka out of here safely. He was no stranger to the scythe just now. It was the wind blade attack kicked by Lan's feet. For this kind of move, the Beast Pirates highlighted it at the cadre meeting. Pass.

Even among the top powerhouses, some people use the skills derived from the Six Forms. It is necessary to understand such skills.

The skill just now was aimed at Rusaka, so I forced him back.

It is not difficult for his body to withstand this attack, but he is not 100% sure to protect Rusaka, and he is not a turtle that can directly retract into its shell.

His protection has dead ends. If he exposes his back to the enemy, accidents are likely to occur where he is not aware of it.

"Rushaka, I'll take you underwater for a while, and then you'll run back to the fish-man island home at full speed. I've asked my friends to wait for you there."

Those murlocs were able to catch Rusaka because there was no water in the Mermaid Bay at that time, and the legless mermen were inconvenient to find opportunities.

This kind of thing is impossible in the ocean, because the swimming speed of mermen ranks first in this world, even murlocs cannot.

The captain was waiting for his subordinate to take his place. Looking at the subordinate whose neck was broken by Mandelfell, he felt that this opponent was not so easy to deal with.

There are some formations in their training, and the main target is the enemy that is slightly stronger than themselves.

And Mandelfish was looking for an opportunity to send Rusaka away. After explaining to Rusaka what to do, his mouth began to gather energy quietly.

Before the formation of the World Government personnel was completed, a scorching flame was spit out by him.

Tyrannosaurus has many unexpected skills, such as spraying flames. Although he has not evolved due to lack of opportunity, the level is constantly accumulating. After evolution breaks the limit, there are many more in his mind. About the usage of abilities.

For example, the flames at this time, the flames temporarily forced the opponent back, and then Mandelfish took the opportunity to send Rusaka into the water. *0Vebusb.com*

"Walk!"

The response of those World Government personnel was not slow. Several languid feet came one after another. The mermaid swimming speed was indeed fast, but this speed was based on the premise of ordinary human beings. At least her swimming speed was not as fast as Lanjiao.

So Mandelfish stopped all their attacks with his own body.

And the high-temperature flames were continuously spit out by him, blocking those people trying to interfere with Rusaka's escape.

Watching Rusaka go away, Mandelfish showed a satisfied smile. This time it was the greatest help for him. If he didn't run when he should run, it would cause trouble for the other party.

Rushaka understood this, so he swam into the water without looking back.

And the agents of the World Government suddenly had a strange feeling.

"The blue dragon can breathe fire. Captain, isn't this guy Kaido?"

"What nonsense are you talking about! There's no way the Navy Headquarters didn't know that that monster left the station!"

Of course, he has a more intuitive reason. If the other party is really Kaido, then they may have been killed long ago.

"Catch him, this guy must have a big secret!"

They didn't notice that Mandelfish ran out of the water, and even thought that he didn't go into the water because he was afraid of water, so a few agents harassed Mandelfish under the cover of Lan's feet, and the rest started dash forward.

Most of these people only know two or three styles, and the proportion of proficient in all six styles is not high among agents and navy, and in the next few minutes, they will understand why the alias of the tyrannical carp dragon will be the big ferocious.

After Rusaka left, he had no worries, so of course what he had to do was to take revenge on those who dared to touch his future wife.

"Point the gun!"

An agent waved his arm at Mandelfish, but Mandelfish's behavior exceeded his expectations. Instead of dodging or blocking, he bit his arm.

"Iron .. ah!"

Sensing that something was wrong, he tried to block the opponent's attack with an iron block, but he underestimated the bite force of the Tyrannosaurus Carposaurus, his arm was forcibly bitten by his teeth.

"Bah, does other people's blood taste like this?"

It is not uncommon for animal-type abilities to bite. Others looked at Mandelfish, whose face was covered in blood, and his scales were almost dyed red again, and a sense of fear began to spread in the crowd.

But they are not rabble pirates, they are still under the command to attack Mandelfish after training.

There are no elites like cp9 among these agents. The intuitive effect of their ground attack is that Mandelfish has more and more blood belonging to the enemy.

"what!"

"It hurts, save me! Save"

Bitten off his throat and shredded his body, Mandelfish fights wildly and raw, killing his foes with the most ferocity.

was originally just catching a murloc, they didn't care about it at all, and the people dispatched under the layers of outsourcing were naturally not elites, they couldn't even break the scales of Mandelfish.

Boom!

Standing in midair, Mandelfish spit out a flame towards the deck. The powerful flame split the deck in half, and the ship's ammunition depot was also ignited by the flames. Standing on the wreck of the sinking ship, Mandelfish caught it in his hands. with the last surviving agent.

"Who the **** are you guys?! There can't be a monster like you among the murlocs! Why do you have the power of Kaido?!"

"It doesn't matter who I am, but you touch someone you shouldn't touch."

Then the palm continued to exert force, and the captain's head was directly crushed by Mandelfish like a watermelon.

Chapter 393 What kind of experience is it to offend Kaido and Whitebeard at the same time

"This is the power of evolution. Sure enough, Lao Tzu's luck has always been good."

Among the many divine benefactors, his own ability was originally relatively weak, especially in the transposition battle that year, he and Babanuki fought for two days and two nights, and only then did he find the opportunity to give him a shot when he cut the gun. He knocked down the ring.

But now it seems that his power is just showing.

The sea breeze is mixed with a strong smell of blood, and I am afraid that it will not be long before the sharks in the sea will be attracted.

"What are you looking at? Have you ever seen a dead person!"

There is no shortage of people watching the fun everywhere. Ordinary people in Chambord ran away because of this battle, but there are still a lot of pirates here.

On the wreckage of the ship, the flag of the world government ignited and disappeared into the world along with the gradually sinking wreckage.

Mandelfish was splashed with a lot of blood, and there were broken corpses floating on the surrounding sea, and some were swept to the shore as the waves washed away. Originally this was a very terrifying scene, but I saw those Pirates are boiling hot.

"So cool"

"Hey! This big brother, can I join you?!"

What's more, they directly applied to Mandelfish, but Mandelfish didn't care about these people at all. Chambord not only has pirates, but also the navy. Although the battle was not long, the ships of the World Government. When attacked, they came very fast.

Controlling the new body, Mandelfish flew into the clouds. After flying for a certain distance, he re-entered the water in the no-man's land, and swam towards Fishman Island again. While flying, he also called Jack by the way. He called and told him that there was no problem. .

As for whether those people on Chambord Island would have a big conflict with the navy later, that was not something he had to think about.

In the deep sea, Rusaka had just returned to his home in Coral Hill. As Mandelfish said, Haku with Jack was waiting for her here.

"Rushaka, you're back!"

"Fish Mandelfish is still fighting, there is no danger here, Haku, go and help him."

"Brother Mandelfish asked us to protect you, don't worry, he is very strong."

Jack answered. Mandelfish contacted him by phone bug before he left. He explained that what Jack had to do was to take Haku to protect Rusaka, and nothing else.

And Jack has also confirmed a truth in the past two days. Although Haku is much stronger than Mandelfish in murloc karate, he is not Mandelfish's opponent, and even if he goes, he can't help much.

But Rusaka was worried about Mandelfish, but fortunately, Mandelfish's phone had already called at this time.

In the chaos of Mermaid Bay, the Royal Army of Fishman Island was able to control the situation.**NoVelusB.COM**

"New, Boss Jinbei, they are friends of Mandelfish, and it has nothing to do with this riot. It was done by the Danmada gang."

A blue fat man led the army of the Dragon Kingdom to come here, this blue fat man is Jinping who is only 30 years old.

was originally a gangster in Fishman Street, and became his successor after Fisher Tiger went on an adventure.

Later, Jinbei left Fishman Street to join the Neptune army of the Dragon Palace Kingdom, and became an elite member, and now he has become the boss of the kingdom army.

The current Jinpei also has no friendly attitude towards humans, even similar to Aaron, but he is wiser than him. Hearing what Xiaoha said, he took people to other places.

The Royal Army is not a useless waste, at least they have stabilized the ordinary people, and the panic here has ended ahead of schedule.

"What will they do with the situation here?"

"New will try to catch the troublemakers, but if they run away, they usually can't catch them, and even the murlocs can't find all the boats in the sea"

"What a terrible management style."

Hearing Hachi's answer, Kojiro didn't know what to say. As a murloc, even if he couldn't beat them on the island, it was something he couldn't understand that he could let those ships take the slaves to the sea.

Hachi didn't refute Kojiro's complaints, because he didn't understand this kind of thing either.

"Pearman, do you remember the identity of the pirates?"

"I have an impression of the flag, so it shouldn't be difficult to find it."

"That's good, Mandelfish's anger should not be over yet, but some of these people have suffered. I always hear you say that Paradise is stunned, and I seem to understand now."

Looking at the flag of Whitebeard flying over Fishman Island, Kojiro observed a moment of silence for those pirates. He had never seen Whitebeard, but he had seen Kaido's battle.

Since those people were also called the emperors of the sea, even if there was a gap, they were all monsters of the same level, and they offended such two monsters at the same time, he could not imagine how these people would survive in the new world.

This is Whitebeard's sheltered territory, and they have offended Whitebeard since they made trouble here.

This is also the reason why the people from the World Government contacted Supernova in the first half. No one dared to pick up the old pirates who lived in the new world, only the newcomers who were not afraid these days dared.

As for Kaido, Hundred Beasts really won't be angry for any of the members, but Mandelfish is a veteran for many years, or a veteran cadre who has shown his talent. In this case, the other party is naturally on the Beast's blacklist.

Kojiro's guess was correct. After returning to Fishman Island, Mandelfish went to find Rusaka first, and then began to contact the members of the new world by phone. It was intolerable for him to let the group escape. , If you can't find the pirates, then his name will be written upside down.

He still has the right to . This is almost the situation under the command of the big pirates. The cadres have the right to deal with many things, including dealing with such ignorant newcomers.

"Where's Danmada's group?"

This turmoil is basically over, but the Mandelfish affair is not over yet, and the group of human pirates escaped temporarily.

At that time, he was busy saving Rusaka, and the Mermaid Bay was in a mess. Kojiro and the others were not easy to deal with this group of people, but there were still the murlocs under their noses.

"New, was taken away by Boss Jinbei, and even the few left don't know where they went."

This kind of behavior is also a crime on Fishman Island, but Fishman Island is generally only sentenced to life imprisonment for this situation.

"New, Brother Mandelfish, there is the prison of Fishman Island, you can't go there and kill people!"

"Fei Xu, forget it, they've already been arrested"

Under the persuasion of Hachi and Rusaka, Mandelfish didn't do it, but it didn't mean that he gave up this method. It's not good to go directly to the prison to kill people, but if they escaped, the result would be different.

Chapter 394 After our analysis, the mastermind behind the scenes is Quinn!

Mandfish had made up his mind to send them all away, but it was a few days later, and it was a little inappropriate to do it now.

And Mandelfish also began to think about the rhetoric. I am afraid that his identity will not be able to hide after such a move. After a few days, the newspapers and wanted notices of the World Government will definitely come here.

Due to the frequent boat traffic, it is not difficult to see the wanted notices and newspapers in the fish-man island. Although he has a headache, Rusaka has no doubts about the changed Mandelfish. took a lot of effort.

Fortunately, he grows vertically. If he grows horizontally like Jack, I am afraid that Rusaka will really have to dismantle the door.

Everything was stable on the fish-man island, but it was not like that outside. The scene of Manderfish's massacre was photographed, and those photos were also sent back to the intelligence department of the World Government.

Based on this information, a special intelligence analysis meeting began.

"Everyone, today's meeting is very important. Our intelligence work has made new breakthroughs. You should be familiar with these people."

On the blackboard behind him, Kaido, Arceus, and Quinn's bounties were hung on it.

"The Governor of the Beasts Pirates - Kaido of the Beasts, the suspected vice-captain Arceus, and their scientist - Quinn. According to the existing information, we know that the Beasts have a power similar to the ability to create "phantom beasts" .

According to the information we got from the people we infiltrated, they internally called it a "gift" ritual, in which Arceus was the giver of the ability.

At the same time, some people think that this is a smoke bomb released by the beasts. The truth is that Quinn has cracked the secret of the bloodline factor. "

The agent headed by roughly summed up the situation, which has always been a matter of debate.

"But today, our intelligence has made a new breakthrough, please take a look!"

On the projection screen on the side, the photo of Mandelfish appeared on it. Since he was mainly doing scout work, and he had been impersonating a fishman on Fishman Island during this time, there were not many photos of Mandelfish recently, and he was wanted. The commander also looked like he was useless.

Then he blew flames on the World Government ship, and photos of the torn World Government agents were posted.

"After analysis and comparison, it can be determined that these two people are the same person, then look here again!"

Kaido's dragon-man form and Mandelfish's human-beast form are put together, one is using heat and the other is using jet flame.

Although Mandelfish has a longer neck and there are certain differences in the photos, such as the shape of the dragon horns, the similarity can be said to be very high.

"This is the last news from a small team of the World Government before the destruction, and some photos captured by the surrounding reporters. The ability to deprive other abilities has also appeared in history, but as you all know, there is nothing like the same in this world. Those who can.

Before the previous generation's ability dies, there will never be a second ability person, even if it is deprived, the deprived will die.

Kaido is alive and well at the moment, but the abilities of the two are too similar. "

Flying, spitting fire, similar comparison photos were released one by one.

"Is it possible that there are only similar fruits? There are no such fruits."

There are a lot of similar fruit abilities, such as ton pressed fruit and light and heavy fruit, the abilities are very similar, but the intensity is different. *NovelUsb.com*

"This possibility is not ruled out, but with the same animal ability, if there are two such similar phantom beasts, they can fall into the same pirate group at the same time. This possibility is too small, and this is a hundred Analysis of the past situation of the beast."

said that some of the able-bodied people who were about to enter the Beast were brought up.

Scoch, Holdem who had been rotated with Scoch, and even Zeraora and Setsuna, Jhin and Shaina and other big cadres.

"There are many abilities of beasts, and the known abilities are basically related to fire, lightning, and flying. The abilities of those two fur tribes are somewhat beyond the scope."

Then I took out the photo of King Yanwu

"And this giant fire pig weapon, their abilities are somewhat related to Kaido's abilities.

In the end, we came to the conclusion that although this capable person named Arceus is powerful, he does not have that exaggerated ability. This is just a smoke bomb, and Plague Quinn is the real mastermind behind the scenes!

Mandelfish's ability is exactly what he got after cracking the Kaido lineage factor. Judging from the results, they have already achieved good results. "

People's cognition will affect their speculation about things. These people who live in this world instinctively use the inherent cognition of the world to understand those incredible things.

Under all kinds of coincidences, this is the final conclusion they came to.

"I remember there was a finished Kaido lineage factor in Punk Hazard."

"Vegapunk insisted that it was a failure and could not be replicated, and it would be of great help to future research. Can anyone of you refute him?"

Because of Vegapunk's authority, they couldn't refute each other at all in terms of technology.

"That thing is not the subject of this meeting. Combined with the existing information, do you have any different opinions on this matter?"

Originally believed that Arceus was not a smoke bomb, or that he had empowered other people with the fact that they lacked key evidence to refute the other party, and their intelligence personnel were just mixed in on the periphery.

In the face of this mountain of "irregular evidence", they had no choice but to agree with this idea.

"Therefore, the above requests to increase the research on the bloodline factor. Although we missed the excellent person Quinn, it is impossible for Vega Punk to be inferior to him. With that Caesar Courant, our research may not fail."

This is a theme adopted by the conference, to increase research on similar aspects, and strive to solve the problem of lineage factors as soon as possible.

"Also, try to bring Quinn back, we need what's in his head, so be sure to catch him alive."

"That Mandelfish."

"Similarly, increase the reward and plan a new plan, but this person has the ability to fly, and the strength shown is not weak, I am afraid it is not so easy to capture, the higher priority is still Quinn."

"clear."

For the above reasons, they created a new bounty order, and due to Quinn's particularity, they are not good at creating too exaggerated bounties, nor can they describe the reasons in detail.

Preliminary deciphering and complete control are completely different, and they themselves do not know exactly how far Quinn's research on bloodline factors has reached.

In short, when the reward order was spread, the impact was like this.

In Onishima's room, Quinn looked innocently at his new bounty.

【Pandemic - Quinn, bounty 1 billion Bailey, onlyalive】

Chapter 395 "Kaido II" and the Seed of Miracles

Quinn became the third high bounty criminal with a bounty of one billion within the Beast Pirates, and became the person with the highest bounty on the big board.

is also the only person who doubled his reward without even leaving Wano.

"That's right, Quinn, you're already the cadre with the highest bounty, and you just need to catch it alive, interesting, really interesting."

Shaina didn't have a single dirty word, but the tone made Quinn very proud.

"Are those people sick! What are they thinking about? These people shouldn't be in the intelligence department, they should go to work in Morgens' newspaper office!"

As a pirate, he is not afraid of his high bounty. If he really does something that causes the bounty to rise, then he will not be happy.

But he didn't slaughter the city and destroy the country, and he didn't attack the navy, but he honestly did research on Ghost Island, taught others, had to go through Kaido's training, and was occasionally beaten and dissed.

But even if he didn't do anything, the bounty went up like crazy with a rocket.

Although he knew that he had the function of being a smoke bomb, the brain-boosting ability of those brain-boosting monsters made him a little scared.

In case they feel that they are threatening the safety of the world one day.

Thinking of that terrible situation, Quinn's forehead started to sweat

In fact, he didn't know, if he didn't do anything and was worried that he was too exaggerated to attract the attention of other careerists, then his reward would only be higher.

If the current Kaido had enough deterrent power, and the terrain of Wano country was too special, then the advance team would have set off.

"It should be Mandelfish who did something, this guy lived up to the expectations of the holy beast, and finally evolved."

ignored Quinn, but Shaina looked at Mandelfish's reward.

"By the way, stop talking nonsense, you bastard, where's the information on the ammonite beast? I'm here to get this."

"Wait, I'll deliver it myself in a while, I think this world is a bit dangerous, I ask for stronger protection"

Quinn didn't pay attention to Mandelfish's bounty, so he picked up the things and went to the ghost island. He needed stronger power to ensure the safety of his life.

At the same time, Yamato and the others are also reading newspapers in Onishima. Reading newspapers every day is a way of understanding the world's major events.

"Uncle Quinn's bounty has gone up again. It's 10,000 billion? Is Uncle Quinn that strong?"

Looking at Quinn's inflated reward order, Yamato was very puzzled. After all, in her opinion, Quinn was the weakest among the senior cadres, and Jin and Shaina were very rude to him.

"The reward is not necessarily based on strength, Mr. Arceus didn't say it."

Robin kept her eyes on the newspaper, she was far more concerned about the outside world than Yamato and the others.

"Robin, does II mean son?"

"It depends on the situation. Sometimes it can refer to the son, and sometimes it is just the descendant heir. How do you ask this?"

"Because of this reward, foster father, is Mandelfish the illegitimate son of his father?"

Looking at the reward order that was brought in front of him, Arceus understood why Yamato asked such a question.

【Kaido II - Mandefish, a bounty of 200 million Baileys】

"Kaido II, these guys really dare to say that Mandelfish has nothing to do with your father, it's just an exaggerated name."

"Is that so?"

"Of course, but if your father really has any illegitimate children outside, he may have been a pirate long ago when I met him. Okay, the lunch break is over, and the training continues."

A group of people was pulled to the training ground again, and at the physical training ground on the side, Ulti worked very hard. She also knows one thing now, the two fruits are Kaido and Arceus deliberately gave her and her. Peggy Wan's.

Although the training is very hard, at least the beasts are not bad for their sisters and brothers. As the children of pirates, she has seen other people beat their heads and blood for a fruit.

Originally thought it was stolen by himself, but in the end everything was the other party's laissez-faire.

She doesn't like giving alms, so she has to prove that she and Peggy Wan are worthy of those two fruits.

And at this time, Kaido appeared here, he came to check the results of the training.

"Are you practicing for these little guys today? Where's Shaina?"

"Go to Quinn to deal with the information."

As he was talking, Quinn and Shaina appeared here one after another. As soon as he saw Kaido and Arceus, Quinn gave up his integrity and ran in front of the two.

"Big Brother Kai, Big Brother Arceus, help!"

Holding his reward order, Quinn looked tragic.

"Help, two adults, look at those **** in the world government, they want my life!"

"Ugh, isn't it written that you can only be caught alive? Quinn, you're thinking too much. Take your guts, what does this look like."

Kaido didn't pay attention to Quinn's words, after all, it was clearly written that he wanted to live.

"No, Big Brother Kai, those guys in the World Government are just making up their minds. If I'm really caught, and I can't get what they want, I'll be treated as a stubborn stubborn by them in the end."

There is a saying that life is better than death, Quinn made up all kinds of terrible things in his brain, and the paranoia of being persecuted is about to come out.

"Master Arceus, you see that my stand-in is so good, should I give me more life-saving abilities? This way I can better attract firepower, otherwise you won't have to go to the stage?"

On this day, the new generation of the Beast Pirates saw how good Quinn's mouth can speak. He clarified his importance like a cross talk. In the end, under his argument, Arceus strengthened his wish. hit him.

For example, in terms of skills, he helped him perfect the special skill group of parasitic seeds + defending + doubles, a rather disgusting enemy tactic.

Most of the animal abilities are blood bull-like characters. This skill group is very suitable for Quinn. Even if the enemy is stronger than him, you can try to grind the opponent to death.

At the same time, he gave Quinn another seed.

"Master Arceus, what is this? Do you want to cultivate it?"

"No, this is a special item. You can carry it with you in the future. Don't you always make strange transformations on yourself? Let it stay in your body forever."

"Special item. Resurrection grass?!" *nOveLusB.com*

At first, Arceus gave them a prop for sit-ups, but no one has used it yet.

"No, but almost, it makes you slightly stronger."

Carrying props - Miracle Seeds, can enhance the power of Quinn's grass skills.

Arceus said that Kaido felt that he should do something as a captain, so he decided to prepare a special training for Quinn himself.

Chapter 396 The Lonely Brave

"Special training?!"

Hearing Kaido say this, Quinn was not very happy. The reason why he came to Arceus was that he hoped that the other party could strengthen himself in terms of ability, after all, it would not require too much work.

The result is also very good, got a few skills, got a booster.

Kaido's training was not so happy.

"Yeah, it's time for you to take special training. No matter how useful your abilities and skills are, you have to be strong. The stronger you are, the stronger your skills will be.

The new people are rising up one by one recently. You can't relax anymore. Let go of the unimportant things. Tomorrow. No, start today, and train you well in the future. "

Said that Kaido took out his eight fasts from somewhere, flipped it twice in his hand, and then walked towards Quinn.

"Wait! Brother Kai, I don't think you need to worry."

"Huh? You look down on Lao Tzu's special training?"

"No, that's not what I meant."

"Then what do you mean, just let me check the results of your domineering practice, and let these little guys take a look, let them know that their current training is just playing around, it's not time to get serious." *novELusB.com*

He picked up his mace and rushed over. After a while, even though Quinn had a domineering arrogance and a strengthened body, he still started screaming under Kaido's special training.

"Sister, this is our future training?"

When met Kaido before, the massacre outside was basically over, so they didn't see Kaido's shot much.

Although Quinn was only screaming, the broken ground and the sunken walls indicated that this was not a fake.

If this was their future training, he felt like he might die here.

"elder sister?"

Pejiwan didn't wait for Ulti's answer, because Ulti was already sluggish at this time.

"Don't be afraid, father is still measured, he won't use so much force against us."

Yamato tried to comfort Ulti and Pejiwan, but it seemed to have no effect. Quinn, who was ravaged on the training ground, made her realize the horror of Kaido.

"Quinn, you've seen it too, even if Arceus gave you skills, you're still not strong enough. You've obviously relaxed during this time, cheer up Laozi!"

"Wait! Brother Kai, is there a possibility that it's not that I'm getting weaker, but that you're getting stronger?"

"Stop talking nonsense. If you still have the strength to answer, it means that you still have the energy to spare. I will increase my efforts!"

Quinn also wanted to call for help, but it was meaningless. Yamato's cry for help was occasionally answered, but Quinn's help was ignored.

While Quinn was being unilaterally abused, Shaina also came to Arceus.

"Master Holy Beast, this is a message from Kojiro. He thinks that the development of Fishman Island is very impressive, and Tezzolo has the same opinion. In addition, Mandelfish has used some of his people to hunt down a man who has just entered the New World Sea. Band of thieves.

is this year's supernova, and it's still a bit powerful. "

"Aren't Mandelfish and Pearman on Fishman Island?"

They are on Fishman Island, and the beasts must be guarded by cadres. If you send random individuals, they may not be Supernova's opponents.

"It's Scourge. He was just patrolling the area after he was transferred back there, so he went to help Mandelfish, and this man, Lord Holy Beast, I admire his courage."

Although he said that, Arceus heard Shaina's smile.

"What's wrong?"

"Look at this, Morgans calls him a warrior, and even the underground casino in the New World has already opened this man's plate."

Shaina took out a new newspaper, the reward was for today's morning paper, and this one was a special issue printed.

【The lone hero who provoked three sea emperors at the same time】

This is exactly the person Mandelfish wants to kill. Since the Whitebeard Pirates began to shelter Fishman Island, even if there are pirates, it is a petty theft, and it is very rare to cause a riot.

So the Whitebeard Pirates took it as a model, not only asking their pirates to catch it, but even sending the 8th Division Captain Namur to hunt him down, because Namur was originally a murloc. So it was handed over to him.

At the same time, the group of people also did a very heroic thing. They escaped from the fish-man island in a hurry. Although they escaped the first wave of hunted by the beasts, the materials on the ship were almost lost and needed to be replenished urgently. supplies.

It happened that they encountered a transport ship full of fruit. They thought it was lucky, but in fact it was the beginning of misfortune, because it was the transport ship of the BIG·MOM pirates.

The desserts on the ship were obtained from an island in the West Sea, which was considered a specialty of the West Sea. Perospero strengthened the protection of the key materials produced by the beasts, but ignored these consumables in the outer seas.

In the end, several younger brothers and sisters failed to get some things in time. This was not a big deal. After all, Charlotte Lingling's eating disorder did not occur, but it happened to trigger another situation, that is, Charlotte Lingling. Maternal love for children under 10.

This is something that is triggered periodically. Once triggered, Charlotte Lingling will become a gentle and loving mother. The younger brothers and sisters are sad, and his eldest son will naturally be scolded.

Now the fifth son of the Charlotte family, Charlotte Opera is also leading people to hunt them down.

In comparison, the chasing and killing of the beasts is the lightest.

After they were called the Emperor of the Sea, this was the first time someone had offended three pirates at the same time. Although Morgans didn't know why the beasts were chasing them, it was no longer important.

In addition to serious events, such lace news is also what he focuses on. He naturally has to promote this kind of lucky warrior.

Because of this, the bet of the underground casino opened his bet. As for the content of the gamble, which pirate group will he die under, as for escape, it seems impossible to them.

Unless he also has the potential to become the emperor of the sea, it is impossible to escape this disaster.

They are almost helpless in the new world, and no one dares to invest in a newcomer at the risk of offending the beasts, Whitebeard, and BIG·MOM at the same time, so Morgans calls them the solitary brave.

Similarly, as the news spread, news about Mandelfish also spread to Fishman Island. With the newspaper and the wanted notice in his hand, Mandelfish was thinking about how to showdown with Rusaka.

His previous information has been exposed. As long as Rusaka sees the newspaper, he will understand everything. It's just that the paper is not stored well in Fishman Island, and the new newspaper can still be seen.

Chapter 397 The reason for the exposure is too dull

"Brother Mandelfish, haven't you figured out what to do?"

Jack looked at the worried Mandelfish and asked him, since the end of the day's battle, this kind of thing has happened from time to time.

Although he is still learning murloc karate and murloc judo with Haku, he is full of energy. The hard training in Haku's eyes is as easy as a vacation in Jack's eyes.

No matter what kind of combat skills it is, physical fitness is the top priority, and Jack's physical fitness has long been tempered by Kaido.

And he had a little bit of what Yamato enjoyed when he was a child, although his ration was slightly different from the unlimited supply of Yamato.

Such a tempered physique and the blessing of the king's bronze elephant on the body are similar to those with animal abilities. Even if they do not enter the transformation state, the ability also has a certain blessing on the body.

Jack's physical fitness is stronger than that of some adult murlocs, so he can directly cut into the theme, but because of his living environment, he is now experiencing the flow of water, so that he can gradually learn to use the flow of water.

"Jack, this is an adult business, you don't understand, but you probably don't understand this trouble when you grew up among girls."

The evolved Mandelfish got rid of the embarrassing situation that his younger brother was much taller than himself, but it was not too embarrassing. Many things within the Beast Pirates were polarized.

The same is true in terms of height. Led by Kaido, Jin and others are taller than ordinary people, and there are also slightly shorter members led by Zeraora and Olga.

The genes of this world are very strange, so unless there are special occasions, no one cares about height, Jack never thought about it, and he didn't think it was a happy thing to grow up among girls.

Almost no one could understand how he felt when he saw Peggy Wan.

"Huh, alright Jack, wait for me here, life and death are destiny, wealth and honor are in heaven."

said and scratched Jack's head, then knocked on the door and leaned into the room. He thought that Jack had a unique relationship with women, and planned to borrow some of his luck to talk about it.

"Kaido II?"

In the room, looking at the newspaper from where did Mandelfish come from, Rusaka looked at his title in a puzzled way.

"Is Kaido your father?"

She doesn't care much about the news from the outside world, so she's not familiar with the specific situation of human beings. Many murlocs and mermaids are like this. Although they are not as isolated from the world as Zou, the frequency of contact with the outside world is still very low.

Many children do not know what land is and what is human, so their cognition of human depends on what they see with their own eyes, which is why many people are resistant to human beings.

Otsuhime's daily speeches are meant to teach the children of the murloc people science about humans and land conditions.

"No, I don't know how those people in the world government got such a title. Kaido is the governor of my pirate group, oh, it's the captain."

He had already told the other party that he was a pirate, and because of the Whitebeard Pirates, Fishman Island's attitude towards pirates was not that contradictory.

"Captain.. Is he the same as Uncle Whitebeard?"

"Well, but the Governor is definitely stronger than Whitebeard, and he must be the Pirate King."

In view of Whitebeard's current status in Fishman Island, he didn't say anything else, but firmly believed that Kaido would not lose to Whitebeard.

There is such a cult of personality in today's imperial regiments, or most pirates have a belief in their captain. The title of One Piece is the initial target of many pirates to go out to sea.

However, it is not certain whether the smell has changed during the voyage.

Halfway through speaking, Mandelfish suddenly stopped, which made Rusaka feel a little strange. In the past, his chatterbox could not be closed at all. This kind of silence can be said to be very abnormal.

After a moment of silence, Mandelfish finally decided to go straight to the point. **NoVeℓusB.COM**

"Forget it, Rusaka, sorry, I've been lying to you about something."

After saying that, Mandelfish turned the page of the newspaper, and there was a comparison between his human appearance and that of a capable person.

"Actually I am a human being"

said that the blue scales on the outside of the body gradually faded, and the size of the body gradually shrank, and finally became his original appearance.

But Rusaka's reaction was completely different from what he thought. She didn't get angry or anything, but just laughed.

"Hahaha, did you finally say it?"

"You already knew?!"

"I don't know, I just feel something is wrong. You told me that you were from the Fishman Street, and you became a pirate a few years later, right?"

"That's right."

"But you don't have any common sense of murlocs. Although I'm not familiar with the murlocs, it's possible that the murlocs who grew up there don't understand at all."

In the beginning, Mandelfish only met each other when passing through Fishman Island, and he always brought some novelty on land, so there was no problem.

But as Mandelfey stayed on Fishman Island for a long time, the two got along for longer and longer, and some flaws appeared.

"I thought you were not a murloc at that time, but I also felt your thoughts at that time. I just wanted to see when you told me the truth."

Rusaka's sentence is also a bit false. The truth is that she has already hinted at the other party. If the other party is a murloc, even a piece of wood should understand her meaning, but Mandelfish just can't understand it. .

This is similar to the fact that humans don't understand Kaluquiu of the fur tribe. Zeraora learned the habits of the fur tribe from Setsuna bit by bit.

At that time, the moment was very small, and the fur tribe was more naive, so I didn't find any problems.

But Rusaka was different. In a sense, Mandelfish, who didn't know how to speak, delayed his life for a while.

"I you."

"Aren't you very good at talking before, why can't you speak now, didn't I tell you when you asked about my views on human beings?"

Although I don't like it very much, I don't really like it, but I don't really like it, but... you're in a state of being able, right? Why can you swim? "

This is also the reason why Rusaka did not mention it. She suspected that Mandelfish was not a murloc, but she was not sure. The root cause was his ability.

The news on Fishman Island has not been blocked to the point where people like Wano don't even know what an ability person is, and there are even many people who eat the fruit and don't even know they are an ability person.

So the fact that Mandelfish was able to swim shattered Rusaka's inherent cognition.

"This, that is the great power of that lord, let me tell you."

At the same time that Mandelfish began to preach the religion of Arceus, Jack outside the door witnessed the passage of time, this Mandelfish said very quickly and it was not the same at all.

Just as he was bored waiting, a queue of royals appeared outside.

Chapter 398: Kojiro Chamber of Commerce Branch in Fishman Island

The speed at which the royal family receives the news is destined to be faster than that of ordinary people, so the news of Mandelfish was naturally seen by the royal family. Unlike Rusaka who knows nothing about the information from the outside world, Neptune is the king of the Dragon Palace Kingdom. , still understand the situation at sea.

He and Whitebeard are friends, and there are many murlocs under Whitebeard, so Whitebeard lent the flag to Fishman Island.

And Mandelfish's identity is the cadre of the Beast Pirates, he is not an ordinary pirate at all.

But this is not the reason why the royal team of the Ryugu Kingdom came here, not to mention that Mandelfish did nothing, even if he did, Neptune would not be able to react to it.

At that time, the contradiction has risen to the contradiction between the two big pirate groups of Hundred Beasts and Whitebeard. With the background of the Dragon Palace Kingdom, they can only choose to wait for the result.

The person who came here is Ottohime, not for official business, but to see what the state of this human and mermaid is.

Because only a very small number of people on Fishman Island agree with her point of view, if a human and a mermaid come together, it means she sees more hope.

At this time, Mandelfish was also discussing a problem with Rusaka.

"Rushaka, come with me."

"Walk?"

"You have also seen this today. Leng Touqing from Paradise, and some scum from Fishman Street. The island I'm in charge of is very close to Fishman Island. Come and live there with me, where I can be better. protect you."

Even if the beasts plan to set up a mining branch on Fishman Island, Mandelfish is not too worried about Rusaka staying here alone. If this happens again while he is away, he doesn't know what to do. it is good.

It would be different if you changed to another island. Although you would encounter enemies occasionally, there would be no internal problems, and the level of security would definitely be higher than that of Fishman Island.

". Let's talk about it next year."

"Next year? Why wait for next year?"

"Next year I will be thirty years old."

Thirty years old is a very special age for female mermaids, not because of rushing three or aging, but because female mermaids after the age of 30 will acquire a new ability to transform fish tails into legs. ability.

The mermaid of that age will not be able to move with the help of bubble coral in an anhydrous environment like it is now.

Cocolo in the Seven Waters is an example. Although Luffy called him the monster mother-in-law, she was also a great beauty when she was young.

Merman Mandelfish knew that a merman's tail could turn into legs at the age of thirty.

Otohime outside the door wanted to see what the two of them looked like, but at the last moment she stopped herself.

"What's the matter, Princess? Don't you want to come and see?"

"There is no need for this, so it's better not to disturb them."

Her natural sense of seeing and hearing sensed the two very happy auras. At this time, she did not intend to interfere with each other.

"And we seem to have new guests."

Not far away, Kojiro and Pierman appeared here, and the things he brought have been sold out. At this time, his business sense told him that Fishman Island is a very good market.

The deep sea environment makes communication with the outside world very little. Whether it is a murloc or a mermaid, including the Dragon Palace Kingdom, they do not have the ability to buy on land on a large scale.

Most of the pirates do not carry goods. Occasionally, some merchants pass by, but facing the kind of high risk, these merchants charge very high prices for their goods.

The things that Kojiro sells at the market price outside are quickly sold out, which already shows the purchasing power here, so he wants to talk to the master of Fishman Island.

Originally, he came to discuss some matters with Mandelfish, but he didn't expect that Ottoji, who happened to meet him, had the attitude of giving it a try.

"Wait! Don't come any closer!"

Looking at Kojiro who was approaching, the soldiers around him became nervous. They also knew that Ottohime's fragile body was very dangerous for a human being with a weapon.

"It's okay, don't be nervous, I didn't notice his maliciousness, so this human friend, do you have anything to say?"

"It's not a big deal, but I want to open a department store and supermarket on Fishman Island. In addition, there are some big businesses. This is a business related to the entire fishman family. Interested?"

Yiji is of course interested in this matter. Although Whitebeard sheltered here, he only sheltered here. His own income was invested in the construction of his hometown, and he had no extra spare money to develop deep-sea fish. island of people.

And the Whitebeard Pirates didn't have that channel and technology either. A human being wanted to trade with Fishman Island, which was something Ottoji couldn't ask for, so at Ottohime's invitation, Kojiro followed them to the Ryugu Kingdom.

At the same time that Kojiro went to the Ryugu Kingdom, a red fishman appeared near Fishman Island. He was Fisher Tiger, and he was the fishman that those people wanted to capture earlier.

Although he is a fish-man adventurer, he was caught as a slave three years ago. Those people from the World Government acted too fast, even faster than Fisher Tiger himself.

Finally returned to his hometown, Fisher Tiger's face finally showed joy, and he swam in the direction of Fishman Street.

At the same time, the head of the intelligence analysis department of the World Government was angering several of his subordinates.

"Why didn't you find information about this creature before!"

Several pieces of information were thrown at their faces. It was the analysis report of some biologists on the Tyrannosaurus Carposaurus. After several days of delay, they discovered some of the similarities.

"Sir, according to the regulations, in order to prevent information leakage, several branches of the intelligence department cannot exchange information without the permission of the department leaders."

"so what?"

"So.. we are in charge of pirates, and marine life is not our scope."n**0VELusB.cOm**

"Then why was it reported today?!"

"Because the leaders of the marine biology department discovered the common ground of this matter during the information exchange, the news was sent over after a second analysis."

Listening to his subordinate's explanation of the regulations of this department, the leader of the pirate intelligence department had blue veins on his forehead.

"Then you don't know that you need to collect all relevant information when investigating intelligence! The rule is that dead people are alive, won't you ask me! Why did you enter the intelligence department! Give it to me."

Just as he was covering his face and scolding again, his confidant suddenly pulled him.

"Sir, this is the one arranged by Spandaine."

"You give me a good rest for a few days, and I will arrange a leisurely job for you."

Chapter 399 The Tyrannosaurus that was researched, the returning Tiger

The words of his confidant made him take back the next swear words. Spandain's backstage was a bit big, and that guy couldn't afford to offend him. Seeing this relationship in front of him, he had to endure this time.

and decided to find him a place to eat and die from now on.

What he hates the most is this kind of related households. He has to get credit for it. If something goes wrong, he will definitely not be able to find such a person.

"Isn't it a big deal?"

"Not much. To be precise, it was discovered by the scientific team, and it was passed on to us after that."

"Where is Vega Punk?"

"That's right."

"Okay, I understand, you can go on with your own business, and hand over everything in the hands of that kid as soon as possible. If this delays the big event, it will be over. Remember, don't arrange this kind of thing in the future, no Know where this nerd came from."

After all these people were dealt with and the new information was collected, he took out a small phone bug.

"My lord, it's me, do you remember me? I have a little problem here."

To be able to achieve his position, he must have a little ability, but he is a commander, not a front-line agent, so in addition to ability, obedience and interpersonal relationships are also very important.

Spandain can push his waste son to the position of the CP9 commander. In the final analysis, Spandain and Spandam both listened to the above words and fulfilled all the tasks mentioned above.

Although the Tyrannosaurus is not everywhere like the Carp King, it has also caused a certain impact. Originally, they only thought that it was an ordinary sea beast, but now it seems that it is a special modified creature.

Now, in the file of the Tyrannosaurus Carposaurus, the label suspected of being a Quinn experiment has been added. It is not uncommon to put modified creatures into the sea, even Vega Punk has done this kind of thing.

At this time, outside a certain research institute in the new world, a cargo ship was escorting two water tanks, and inside it was the sleeping tyrannosaurus dragon. They lost a lot of strength and paid a certain amount of casualties to capture them.

"Why are we going to catch this monster?"

"Don't ask if you shouldn't, this kind of thing has nothing to do with us."

There are two reasons for to capture the Tyrannosaurus Carp Dragon. One is that Vega Punk wants to see if Quinn, a former teammate, is really such a genius to actually be able to do such a thing.

On the other hand, he recently had an idea for a mechanical sea beast army.

Vegapunk has a lot of ideas in his mind, and he often thinks about it. Although it is currently controlled by the world government, there are also reasons for wanting to use their funds. After all, scientific research is a huge expenditure.

Quinn, Acier, and Nechen spend a fortune every year on research on similar projects.

Because he felt that he didn't have enough time, Vega Punk even created his own clone and let several himself conduct research together.

His mechanical sea beast army has limited achievements, and he naturally has enough interest in the magical creature like the tyrannical carp dragon.

And about the relationship between the typhoon dragon and the carp king, these people still have no conclusion. Few people have seen the evolution of the carp king, and even those who have seen it have not left any evidence because of shock.

If you have to find a person with the most research on evolution, it should be Nicole Robin at this time. Only those who belong to the beasts have the opportunity to have close contact with evolution at this time, but even if they do, they cannot understand this. What exactly does this power come from?

No one could have imagined that the humble carp king would become like that after evolution.

When Tiger returned to Fishman Island, it was not peaceful in Fishman Street.

Unlike Rusaka's own speculation, and the shock of Mandelfish's friends, some people simply cannot accept Mandelfish's identity, such as Aaron.**nOVELusB.coM**

He didn't say anything after being knocked down by a murloc, Tiger, Jinbei, many murlocs can do this, but he was defeated by a human underwater, which took a blow to his self-esteem.

"Why can humans breathe underwater! How can humans do that?! It's impossible!"

"Brother Aaron, stop! What are you going to do?!"

Seeing that Aaron suddenly picked up his weapon and wanted to leave here, several younger brothers hurriedly hugged him.

"Let go, don't stop me!"

"No way, Brother Aaron, you are not his opponent!"

Hearing this, Aaron's anger seemed to be even greater, but at this time a voice calmed him down.

"Aaron, what are you doing? Why are you so irritable after so many years."

"Big Brother?!"

Tiger has a detached position in Murloc Street, and most murlocs from Murloc Street respect him very much, and Tiger is basically the only one who can absolutely command Aaron.

"Ah, how have you been all these years? Where's Jinpei?"

"Fortunately, Jinpei has become the leader of the kingdom's army. Where have you been this year, big brother? Why is there no news at all?"

"It's a bit of a personal matter, so I guess I got a taste of the world."

He didn't want to mention the life of a slave at all, and if possible, he wouldn't mention those years in his life.

"Why are you still so irritable, what happened?"

"Big Brother, it's like this."

Looking at the newspaper in his hand and Aaron's description, Tiger seemed to understand something.

"You mean he was red before?"

"Yeah, you're a bit like Big Brother."

"I see, Aaron, let's just forget about it"

He knew better than anyone why the World Government's ships appeared here. It can be said that Mandelphish took the blame for him, and although he hated the dragon people, he did not extend that sentiment to the entire human beings.

"Okay, since Big Brother you said so, then forget it."

Aaron didn't even ask why, to be honest, his feelings for Mandelfish were also very strange. His behavior in the past few years can be said to have helped a lot of murlocs, so it was only when he knew the identity of the other party. Can not accept

With Tiger's request, he just agreed.

"Okay, you are free, I'm going to see King Neptune."

"I know eldest brother, I will inform others that it is a big event that you are back."

In Ryugu Castle, Neptune was watching the deal proposed by Kojiro. He didn't care about his desire to open a department store on Fishman Island, and agreed directly when Kojiro proposed it.

But in the face of Kojiro's proposal for mining and an arms order, he hesitated.

"What's the matter, King Neptune, you are the king of a country, then you should know the importance of weapons. With all due respect, the quality of weapons on Fishman Island is too poor. If you change clothes, you can at least improve your ability to protect your citizens. ."

Chapter 400 Mining and Yamato's Voyage Prelude

Unlike other long-term transactions, a single large-scale transaction is more profitable for arms. The deep sea environment of Fishman Island has higher requirements for weapons, and old-fashioned muskets may not be able to fire at all due to the return of gunpowder.

Although Fishman Island is not a place for beasts, they always only look at each other's money when they sell arms.

He can come here to estimate the commercial value of Fishman Island because he has this ability, which is his talent in business.

In the case of excluding hostility, the beasts generally have three attitudes towards the island.

The first is the basic board similar to Wano. This is the main station of the pirates, not only occupying, but also vigorously developing.

The second is a shelter similar to an empty island, providing flags to ensure the safety here, and at the same time collecting the island-specific assets in return every year.

In addition to this, there is a third type, that is, only doing business, not providing flag protection, at most, free shipping, such as the island of Kraigana where the original kingdom of Sikear was located.

Fishman Island is the third situation. There are no special products on the island. Although the location is very important, it is in the deep sea. It is too much investment to occupy this place, and it is not worth it now.

And the most worthy of use is the power of the murlocs, there is no need to occupy this place at all, he just wants to hire some murlocs.

And this is also related to the general policy he got before leaving Onishima.

Now if you occupy Fishman Island, you will start a war with Whitebeard. Although it doesn't matter if you start a war, it is not in the best interest. Even if Whitebeard is solved, it will be difficult to digest such a large territory. At the same time, you have to face the backstab of the World Government. .

Coupled with the relationship between Whitebeard and Neptune, there will be a major change in Fishman Island.

You don't have to do anything. After Whitebeard dies, Fishman Island will take the initiative to find a new shelter. The meaning of taking the initiative to find someone and asking for someone else is completely different.

"Arms."

"We are not interested in arms, how about talking about your mining plan?"

Otome is not interested in this business. Fishman Island is not without weapons, but the quality of weapons is much lower than that of the beasts.

But in Otohime's view, these are enough for Fishman Island.

"Well, since the princess is not interested, then forget it."

Anyway, Fishman Island is not his own territory, and the problem of thinking and personnel strength is more serious than weapons.

In Kojiro's opinion, Fishman Island's behavior is stupid, but he has no reason to interfere, and he is not the royal family here.

"Then let's talk about the mining issue. In a nutshell, we have two options.

The first fish-man island provides labor, finds suitable things for us in the deep sea, informs us when we find them, and works as miners, we will pay the personnel for labor.

The second one is that after you finish mining, give us the ore, and we will buy the ore at a suitable price. "nOVElusB.coM

"Does that make any difference?"

"Of course there is, one is calculating working hours, the other is calculating products, the latter your income will be higher, but the former is easier for you to integrate into the human community. By the way, this transaction has nothing to do with the pirates, but a serious business. Behavior.

This is our business license, which can be circulated even in Mary Joa. "

Hundred Beast Fruits is a serious company. Although those people have long known the truth about its skinning, they still chose to turn a blind eye in the face of huge profits.

"This is a plan, the two of you can think about it slowly. I will stay here for a while to study things like department stores."

Those things made him not necessarily understand it for a few days, so he just left the plan and left here. Next, he has to find out the spending power of Fishman Island through the department store, so as to formulate a salary system suitable for the place.

Although there are many dangers in deep sea mining, such as lack of suitable equipment, dangerous sea beasts, but that is not a problem he has to think about, which aspects will be handled by Pokémon, all he has to do is negotiate.

Looking at the plan, Otohime was a little moved. The meaning of being close to a pirate group and being close to a serious company is completely different.

The Ryugu Kingdom is a member country on the bright side, and it can't rely on the relationship with the Whitebeard Pirates if it really wants to enter the public eye.

Although the people under the protection of Whitebeard think that Whitebeard is a good leader, for most people in the world, especially ordinary people who can only get all information from the world government, pirates are still uncompromising. evil party.

In addition to the admiration of some young people, the hatred of the navy, and the greed of bounty hunters, the big pirates in the four seas also have the fear of ordinary people.

"Nipton, I think this is an opportunity, a chance to have friendly contact with people on land"

"Otomi."

"Your Majesty Neptune, Fisher Taiga has returned, and he has already left the Dragon Palace."

A murloc soldier reported the specific situation, and Ottohime and Neptune also paused the conversation and let Tiger enter here.

He is an outstanding adventurer and traveler who has traveled around the world. He is deeply trusted and respected by the Dragon Palace. He brought back some information about the land of Fishman Island, but this time his news is Otoji and Nip. Dun also looked at it.

"I want to save Mary Joa's slaves."

After telling some things, Fisher Tiger said a very shocking topic.

Outside the residence of Rusaka, the hill of coral, Xiaoba or six arms are operating the takoyaki machine. At this time, he is already skilled in making takoyaki. In addition, there are Haku and a few Manders. Fisher's murloc brother.

"Brother Mandelfish, they still can't accept your human identity and have already left."

This thing is also expected, not everyone can accept this kind of thing.

"Boss, they also have difficulties, your identity."

"I know, I don't blame them, but it's a pity, I still like these guys." Those murlocs had also been with him for a while, and they had always taken good care of their little brother Mandelphish.

"Xiao Ba, Big Brother Tiger is back, won't you go see him?"

"New, it's too late, I heard that he went to Ryugu Castle, and just brought him some takoyaki."

And in the ghost island, a new voyage is also being prepared, 12-year-old Jack started his maiden voyage, and the same age is the same, and there are also Maria and Robin who are older than her.

At this time, she was studying the atlas, and she was still discussing with Maria and the others which island to use as the destination for this voyage.

The purpose of this time is not to explore or play, but a real trial
