

ARCEUS' PIRATE JOURNEY

Chapter 4: Kaido is so excited

Chapter 4 Kaido's heart exploded

"A deal that can't be refused? You seem to have just hatched, so what can you use to trade? I admit that your power is good, but this power is a little worse for trading, and this is the same as joining me. What is the difference?"

Let's join Lao Tzu's subordinates, so what if you are wanted, just stay behind me, I will not hand you over to anyone! "

In Kaido's view, the opponent's strength is what he can do, which is also what he appreciates, but he prefers to bring the opponent under his command.

He likes animals with abilities, and he has this idea at this time, otherwise he will not have the idea of building a zoological army in the future.

Although Arceus is not a person with animal abilities, rounded up, animals with great strength and wisdom are also his target.

Kaido was waiting for Arceus' answer, and at this time, the guards who came to support came to the vicinity again, which made Kaido feel irritated.

A powerful momentum was released from his body, and the overlord's domineering arrogance swept the audience, and the guards who rushed over fell to the ground like reaping wheat.

He is showing his qualifications. If he wants to recruit excellent men, he must also have this qualification. Kaido's main goal is those guards, but this momentum also affects Arceus and the others. The next moment, a more majestic momentum rose into the sky, pressing Kaido's overlord color back.

Arceus, who was born from the egg of Chaos, created the whole world, and he started at the end that some people can't reach.

It's just that the lost slate has drained a lot of his power. For him, the missing slate means that he cannot be immune to attacks of some attributes, and the speed of energy recovery will slow down, but the aura belonging to the God of Creation will not disappear. .

As for his own strength, he also had a rough guess.

According to the worst and most unstyled situation, the physical resistance to meteorites will cause Arceus to be injured. That size should not be said to be a meteorite, but an asteroid.

And at that time, instead of breaking it, Arceus completely neutralized it
Fujitora can summon meteorites, which is a big move for him.

According to the strange theory of relativity, it can be seen that at least the general level can cause such damage to Arceus. This is the worst case to infer. If Arceus was wiser at that time and dealt with it in other ways, the effect should be better.

Although he was just born and lacked a lot of slates, Kaido was not at his peak. Not long after he left the Rocks Pirates, the prototype of the Beasts Pirates had not yet been established.

Although Kaido can become stronger, Arceus believes that he can also become stronger.

The confrontation between the two people's breaths did not determine the winner, and everyone withdrew their breaths at the same time.

After the imposing confrontation ended, the corners of Kaido's mouth gradually rose, and then he began to laugh wildly

"Well, it's funny, it's so interesting, this kind of future is interesting!"

Arceus's aura does not belong to an overlord. He can still tell whether he is domineering or not, but a person who can possess such an aura will never be a generalist.

But the stronger the opponent is, the more he wants to recruit him. If Kaido was excited just now, then it is a direct explosion.

If the other party is the enemy, then he will lock the other party and solve it slowly, but the relationship between the two parties is still friendly due to the Lunaria clan. In this case, it is better to proceed step by step, first trade with the other party, and then slowly Recruit each other.

Although he still doesn't know the content of the transaction, but with this strength and courage, the content of the transaction doesn't matter.

It's just that he has to leave here first. In his perception, more and more people are approaching here.

"Let's leave here first, other things can be discussed slowly."

Kaido's body began to swell, and then a blue dragon burst through the roof and spit out a breath of heat towards those who were surrounding him.

"Master Holy Beast, let's get out of here too, can you fly?"

Shaina and Abel spread their wings and plan to leave here, but looking at Arceus who had no wings and had short legs, Shaina asked this question weakly.

If they can't, they can only take him out of here, but Kaido has always been good to his own people. Looking at the situation below, a large cloud of flames appeared from below, dragging Arceus and others into the sky. .

Kaido, who was flying in the air, spit out a breath of heat from time to time, turning the place into a sea of fire, and then planned to fly away from here, but Arceus stopped him.

"Wait a minute."

"Huh? What are you going to do?"

"Recover a little interest for the Lunaria clan first, they have taken care of them too much this time, so let's start from here."

The ring around his waist turned crimson, a slate appeared behind him, and a ball of light above his head began to condense.

"Sanctioned Glitter!"

Sanctioning Guangli, Arceus' exclusive skill, is also the strongest skill he has at this time. At this time, he and Kaido are showing each other's skills. Kaido wants to recruit him, and he wants to be with Kaido. more dominant position in the transaction.

The energy ball flew into the air and exploded when it reached the top of the building complex below. The world-destroying bolide, countless fireballs smashed from above, completely razing the building complex below to the ground.

Some of the guards who chased after the people who were fighting fires and rescuing materials even gave up running when they saw the changes in the sky.

Man-made disasters can still be avoided, but how to escape the natural disasters that destroy the world...

...

Kaido's heat turned the bottom into a sea of fire, and Arceus' fire-type sanctioned gravel directly turned it into ruins.

"Can the power of two slates only reach this point..." Arceus didn't keep his hand, he also wanted to see how far his attack could go, but he was not very satisfied with the power.

consumes a lot of money. He can only use this kind of full-strength strike three times, but Sanction Guangli is a large-scale group attack skill. If the power is concentrated, the power will be greater.

"You are really strong, this power is comparable to the Demon Slaughter Order, it's really exciting firepower!"

Exploding lights is no longer enough to describe Kaido's mood, this is a fascinating power, one person is comparable to the power of an army

"Where are you going?"

"Go to a place that has been negotiated with someone, it's not far away."

Kaido flew into the clouds, spared a long circle, then circled back, and then came to an island not far from the red soil continent.

From here, you can also see the aftermath of the previous destruction by the two.

Sometimes the most dangerous place is the safest place, and the escaped test items are right under their noses, which many people can't think of.

It can be seen from the buildings on the island that it should be an island with a heavy commercial atmosphere. Many people are looking at the black smoke rising in the distance and discussing what happened.
