

## Arceus 41

### Chapter 41 Die Together

Provocation, making the opponent angry, and the opponent can only use moves that deal damage for a period of time.

The provocation at this time left a hint in emotion and psychology.

Compared to those powerful skills, provocation such rules-based skills are sometimes more powerful and incomprehensible.

In the game, even green caterpillars and carp kings can cause damage to divine beasts, but not in reality. The power of skills can be improved through training, and sparks can also produce the power of large-character flaming explosions.

But this kind of rule-based skill is called a magical skill. After the provocative effect was exerted, John felt a surge of anger in his heart.

Originally, he wanted to use the ability of the door door fruit to leave here, and then changed the terrain so that the lake was flooded again, so that those who peeped at his treasure would die here.

And no one knows that John left here alive, and all the confidants who knew he was able will die here, so that he can live a whole new life with treasure.

But after the provocation took effect, he no longer wanted to do it, and the anger in his heart told him that only by killing these people head-on could quell his anger.

And Arceus' provocation was not released to John alone, but to everyone except the beasts.

"Captain, what do you mean by what you just said? What do you mean everyone will die here?"

This is a question from John's subordinates. John's speech just now does not mean to take them away together, but intends to bury them together here and monopolize the treasure.

Under the influence of "provocation", the crew's anger welled up in their hearts, and the eyes they looked at their captain became unkind.

A man who wants to swallow the treasure and kill them here is no longer their captain.

If it were normal, John would try to appease these subordinates, but at this moment, under the influence of provocation, his inner tyrannical side was completely activated.

"What do you mean? All the treasures belong to Lao Tzu alone, you guys, just die here honestly!"

The effect of provocation varies from person to person. Ordinary people will only give up escaping and start fighting. If used properly, it can also be used as a stimulant to stimulate people's fighting spirit.

But for people with dark hearts, deep hidden emotions, and lack of self-control, provocation will drive them into madness.

John is that type of person, and he's completely red-eyed now.

"The door panel fell from the rock!"

There is no weak on Rox's ship, because it is common to kill each other on that ship. The weak will be destroyed by their own people, let alone encounter other enemies.

Being able to be a cadre on Locks' ship, John's strength is obviously easy to see. He has developed it to the point of awakening after eating the fruit for a few years. Now the entire treasure space is affected by his ability, even if there is no contact, He can also activate abilities. *NovELuSb.com*

The door door fruit opened the door, but the door panel was also a part of the door. Under his control, the rock formation above his head cracked to form huge door panels and smashed down, starting an indiscriminate attack.

The pirates who had started fighting infighting because of Arceus' ability suffered heavy casualties under the influence of the falling boulder, and the rest of the sober people turned their attention to John.

Although I don't know why he became like this, but if we don't solve this madman, everyone will die in this pothole.

The volume of the pothole under the inland lake in the middle of the donut island is also very large. It is in the shape of an hourglass as a whole, and the volume of the space below is larger than that above.

The interval between is composed of thick rocks. If it is not for the fruit of the door, entering through the secret passage is the only way.

But under the influence of John's ability, the passage has completely collapsed. The duration of the big ebb is three days, and the top of the lake will be filled up again by the inverted lake in three days. If they penetrate the rock wall at that time, they will be in the water. There is no chance of survival under the impact.

It is impossible for ordinary people to break through the passage in three days, but they are different. These new world monsters have the power to make a gap, but this crazy John must be dealt with first.

Although the Silver Axe was stabbed in the waist, his strength was not affected too much. He and Wang Zhi looked at each other, and the two attacked John at the same time.

At the same time, the officers of both sides were also involved. Even John's subordinates had already abandoned the captain in the face of this situation.

Countless attacks were directed at John, including the two CPOs. The treasure had already appeared, and John had no meaning to continue to exist.

And the appearance of Kaido also allows them to see a new balance, as long as John dies here, they, John's subordinates, will inevitably be temporarily ignored.

John only needs to deal enough damage to Silver Axe or Wang Zhi, and Kaido in the sky can form a new confrontation situation with them. When you make use of it a little, these pirates will all be destroyed here.

The treasure of Rox and the fall of the four great pirates are an indescribable feat for them.

In the face of the siege of many powerhouses, John was quickly defeated, and was finally nailed to the ground by Wang Zhi's great sword, which was almost divided into two sections. It was only at this time that the influence of Arceus' provocation completely disappeared.

Silver Axe was also seriously injured. Compared to the prosperous Wang Zhi, John's attack was more aimed at Silver Axe. Although there were many people who attacked him, they didn't cooperate, and even accidental injuries occurred.

And under the influence of provocation, a larger-scale infighting broke out, and there are not many people who are still standing.

"John, do you have any last words?"

"Last words? Do you know that people who talk too much will eventually die?"

Hearing this, Wang Zhi had a bad premonition, but it was too late, and the earth shook. He did not expect that John in this state would still have the ability to activate the fruit power.

"I don't want anyone to take away Laozi's treasure, it can only be mine! The earth lift gate!"

John regarded the entire lake as a door, and manipulated the terrain to descend, which meant that the central area that was originally higher than the surrounding terrain had become a depression, and the surrounding seawater would begin to roll back.

And this area has cracks due to the previous battle, and the seawater from the periphery has begun to seep in!

"You bastard!"

Wang Zhi succeeded John, but the sea water was still infiltrating. Although the death of the capable person meant that the ability would be invalid, the indirectly destroyed terrain would not be restored.

John's ability has already caused the collapse of the terrain, and killing him can't stop what has happened.

They were about to do something when John's body changed, and several delicate treasure chests fell out of his body.

## Chapter 42 Slate, 418

This is his use of the door door fruit. The door door fruit not only represents a door, but also the space that appears after opening the door. He transformed his body with the fruit power and formed a unique space in the body. Treasures are placed in the space within his body.

Including the treasures that Lockes took on the ship and disappeared after the battle in the Valley of the Gods.

"Thundering gossip!"

Wang drew his sword straight behind him, and the collision of the giant sword and the mace sparked a new spark.

"Finally can't stand it, apprentice? I thought you were going to hide there forever!"

Kaido's presence was very low from the beginning, and he didn't even get involved in the battle between John and them.

Both he and Silver Axe noticed Kaido peeping from above, but they still regarded John as their primary enemy. Compared with this apprentice, John was more threatening to them.

They didn't think that the trainee would attack them. John had just been angry. If Kaido helped John, he would be the enemy of all the pirates present.

But he only realized the problem when he and Kaido fought for the first time. The power was a bit too much, and even he was knocked back a certain distance before he could stabilize his body.

It's not that Kaido didn't do anything during this time. He has been performing sword dances and superimposed them to the limit.

The power of thunder and gossip after the three sword dances was superimposed had reached the extreme. Because of his contempt for Kaido, Wang Zhi was directly knocked out by this stick.

"Don't underestimate people, senior bastard, why do you think you are fighting infighting? Since there is no advantage in numbers, of course you have to use your brains. John's skills are not bad, but now it's your turn."

Compared to them who were exhausted in the melee, the members of the beasts in the sky maintained their prosperous state. Compared with these pirates who had just fought hard, Jin and the others could exert stronger power.

Flame, leaves, rocks, all kinds of abilities appear here.

"You really found an incredible group of subordinates. With so many phantom beasts, I'm afraid you got a lot of Rox's treasure."

Shaina, Quinn, Jin, Kaido, their appearance changes and the ability to manipulate elements are only one possibility in Wang Zhi's view, an phantom species, and there is more than one fruit of an phantom species.

Eudemons species that are even rarer than the natural system appeared in Kaido's hands. Except for the unknown treasure in Rox's hands, he couldn't think of where to find so many eudemons.

"This has nothing to do with you, King Kong · Dysprosium!" The swordsman can make flying slashes, and he can also strike a column-shaped stick.

Kaido didn't want to explain anything to Wang Zhi at all. He thought it was better. Only a few people knew about Arceus' abilities. Too many people who knew it would attract unnecessary prying eyes.

Lox's treasure is just a good reason, and those old monsters who can threaten him can use this reason to perfunctory.

"It really has nothing to do with me, after all, the fruit has been eaten by you, but this is under that lake, John's \*\*\*\* doesn't know what he did, but I guess it is all water.

At this time, you choose to fight with me. When the water rises, do you want to drown all of you! Those who are capable can't swim! "

After five years of absence, Kaido's strength seems to have undergone a qualitative change. This is beyond his imagination. He doesn't want to entangle with Kaido in such a place. At least he has to go outside first, so that he can join forces with Silver Axe. can.

Thinking of this, he suddenly found that the silver axe was silent.

Although John's counterattack had caused him a lot of injuries, it wasn't enough to kill him.

At this time, a strong sense of drowsiness flooded into his heart, Wang Zhi actually felt his eyelids were a little heavy, and when he looked again, the surrounding environment had become extremely dim, as if shrouded in a dark space.

Dark Black Hole, depending on the version, the enemies within the range will fall into a doze or sleep state. Originally, it was Darkrai's exclusive skill, but Arceus who found the evil-faced slate can also use this skill.

Sleep and drowsiness are two different states. Sleep will be completely lethargic, while drowsiness is only occasionally slumbering. Silver Axe has already entered the slumber state due to the injury and is unable to resist. Wang Zhi is only in a drowsy state because he is in good condition.**noVelusB.cOm**

But in this state, he ushered in Kaido's head-on blow. This is not a heads-up, but a team battle. Kaido, who has not yet grown to his peak, will not be stupid enough to have a heads-up with the opponent.

Arceus pulled the entire underground space into the sphere of influence of the dark black hole. Under his control, of course his own people would not be affected.

Wang Zhi naturally realized that Arceus was the root of all this. This strange black space was released by the unknown creature. He wanted to solve Arceus, but Kaido didn't give him this chance at all.

"Where do you want to go! Thunder gossip!"

锵!

"I understand, the inexplicable anger before was also because of that guy, right? You have so many capable people."

Arceus is also regarded as a power user of the phantom beast species. Although he is in the form of a quadruped beast, there are also those who like to use the power of the beast form.

Anger and drowsiness, two strange states appeared inexplicably on him, if he couldn't react any longer, he wouldn't be worthy of hanging out in the new world.

Kaido didn't say a word, but started a series of fights close to him. Now he is not proficient in sword dance, Wang Zhi won't give him more than ten seconds to dance sword dance. reason.

But at this time, a few spots that were just water seepage suddenly exploded, and a large amount of seawater began to pour into the cave. Just when Quinn saw the seawater, he was shocked when he realized that the seawater seemed to be under the control of someone, completely circumventing it. Open a few of them.

Kaido remembered correctly, there was indeed a slate in Rox's treasure, and it was also taken away by John.

After he got the fruit ability, those heavy treasures were hidden in another space in the body by him with the door door fruit, which is the reason why Arceus has not sensed the position of the slate.

John's ability was released after his death, and the treasure fell out of that space, so he was naturally summoned by Arceus.

The dark black hole covered the entire field, and taking advantage of this gap, he also absorbed his fourth slate, the water drop slate of the water system.

In this water-dominated world, there is no doubt that the water drop slate is a great enhancement to combat power. After getting the water drop slate, he naturally has the power to manipulate water, and due to John's previous behavior, the sea has begun to seep in, Arceus But take advantage of this.

Chapter 43 Quinn's luck is always a little off

"Have you found what you were looking for?"

Wang Zhi was suppressed by the turbulent torrent and then suffered a blow from Kaido. The shoulder armor and the shoulders below were smashed to pieces. The thunder and gossip under the blessing of Sword Dance made Kaido's attack far beyond Wang Zhi's endurance.

Every time a new slate is acquired, Arceus will have all kinds of strange powers, the sea of fire released during the research, the strange ability to interfere with emotions before, and the control of water now, Kaido has also discovered this. .

After seeing that the sea was under the control of Arceus, he knew that Arceus had almost succeeded.

"Yeah, this guy actually created a space in his body, no wonder he couldn't find it before."

"Then it's time to deal with other things, let's get rid of the people here first."**noVelusB.cOm**

"Solution? I thought you were going to recruit these people as subordinates. They are all pirates from the New World. They should be much stronger than the pirates from the Four Seas and Paradise."

Although Kaido said that he wanted to recruit his subordinates, the Beast Pirates were still the basics during this time. Quinn protested every day, demanding to recruit people quickly.

However, they were all rejected by Kaido on the grounds that there was nothing to admire. In their opinion, the courage of those people was not comparable to that of the trainee Olga.

Now that John's subordinates are almost dead, the rest of Wang Zhi and Silver Axe are still unmoved.

"No, it's good that we know what's going on here. There are too many treasures, and we can't take them with us. If the news leaks out, it's too troublesome.

Besides, these people are their confidants, and it is not so easy to conquer them. Although it is a pity, we can only talk about it next time. ember! Quinn! Shaina! Ready to withdraw! "

Saying that, Kaido once again transformed into the body of a huge blue dragon, and looked at the rock wall above.

"If I blow it open, you should be able to control the water flowing down, right?"

Kaido doesn't want to let the water submerge after he made the passage by himself. Although he has horns, he does not have the blood of fighting fish.

"Don't worry, it's just sea water, it's not a whole sea, but are these people just letting them fend for themselves?"

"It makes sense, the vitality of these guys can't be ignored."

At this time, Shaina and the others have also gotten rid of their opponents, and the animal-type abilities have already defeated some opponents who are already exhausted in terms of physical fitness.

"The biggest round of thunder!"

The seawater pouring in from the outside combined with the thunder and lightning released by Kaido, and the entire underground cave was flooded with lightning. The armor on Wang Zhi and Yin Axe was originally an armor to increase their defense, but in this environment, it became a burden. .

Especially the silver axe, which was seriously injured, had just been submerged by the current, and under the influence of Kaido thunderbolt, it was completely merged with the armor. It would be very difficult to take it off.

"Stop. Stop. Big Brother Kai."

After Kaido's thunder was over, the enemies in the cave generally had no ability to resist, but along with them, they also had an innocent victim - Quinn.

The seawater that poured in later was indeed controlled by Arceus, but the previous one was not. Shaina and Jin could rely on the power of manipulating flames to evaporate the water on their bodies and keep them dry, but Quinn did not have this ability.

So the braids on the back of his head were wet, although they had just withdrawn under Kaido's body and were not in the main range of the lightning attack, Quinn was still affected.

The resistance provided by the modified human and animal system made him no big deal, but he also became the most injured one in this operation, from the accidental injury of his teammates.

"I think this is much more pleasing to the eye." Shaina crouched next to Quinn and poked the blackened Quinn, as if to see if he was complete.

"You woman. You said that it wasn't my decision, don't put it all on me, I also know a few members of MASD, or I'll tell you their locations, and you can go to them to settle accounts. How about it."

Quinne needs to solve this problem. In his opinion, shifting the conflict is the best way. Since Shaina hates the people at the original research institute so much, let her go to other people's troubles.

Like Vinsmoke Gage, he's been looking at that guy for a long time.

But at this time, another voice sounded.

"You bastards." In the sea water filled with electricity, Wang Zhi stood up with a sword in one hand. His long beard had turned into a fried octopus. His broken shoulder armor and \*\*\*\* face made him look miserable. .

After being blessed by the sword dance, Kaido smashed his head with two sticks in succession. Before he died, his vitality was tenacious.

"It's really tenacious life force, bastard-senpai, but please die here."

Kaido likes to recruit powerful combat power, but not everyone wants it. Everyone on the Rocks ship has their own ambitions, and these people will not be willing to live under others.

So he has no interest in Wang Zhi at all.

"Just a mere apprentice, don't think that you can do whatever you want with powerful abilities! Broken Tooth Attack!" The giant sword was wrapped in domineering, and the sword edge cut through the surrounding sea water, and the entire underground cave was attacked by Wang Zhi's attack. spread.

"But in terms of domineering, you are still not my opponent, Shenglong-Flame gossip!"

The flaming dragon head wrapped around a stronger domineering arrogance and slammed into Wang Zhi. Wang Zhi's last blow did not stop Kaido, but instead sank into the rising sea water in a violent explosion.

Wang Zhi's last words, he agrees very much, he has never relaxed in his domineering practice, although this thing requires hard work, but talent is equally important, some people may be able to reach a state in a few hours that others can't do in their entire lives.

"Get ready to rush out."

"Wait, Big Brother Kai, so much treasure, if you let the sea come in, it will be wasted."

Looking at the mountains of treasures, Quinn was a little bit hard to give up. He didn't know how expensive it was when he was not a home. As the current part-time treasurer of the Hundred Beast Pirates, his private treasury had long since been exhausted. No matter which aspect, he was in urgent need of assets. Replenish.

"It's just mere treasures. Let them stay here for now and come back later. As for now, just take some high-value ones first."

They don't have the power of John's space. Now only they know the location of the treasure here. This is a natural treasure trove.

These people were here to hunt for treasures, and they brought many sturdy bags with them. Quinn prepared two large bags of treasures and prepared to evacuate.

Then Arceus blasted away the rock formations above, and the water flowed into the cave below under the influence of gravity.

#### Chapter 44 A braver person appeared

Treasures, slates, and Kaido also settled some of the grievances of the year. This operation can be said to be a great harvest.

Under the power of the water drop slate, a channel was opened in the middle of the influx of water, and Kaido rolled up a cloud of flames and left here with everyone.

He can also take away a lot of treasure with his ability, but a dragon flying in the sky with treasure is too conspicuous, so he didn't do it.

"Is it all day? It looks like we spent a lot of time."

Everyone who returned to the ground looked at the morning sun that had just risen. It was midnight when it went down, and now the sun has enveloped the sky again.

"After all, we are pirates from the New World, and our strength is still not enough." Jin looked at the scar on his shoulder and was still a little dissatisfied. Such strength is not enough, a pirate can cause such damage to him.

If that's all, he doesn't deserve to talk about revenge.

Although it doesn't seem to be seriously injured, it is the result of the self-healing of the powerful resilience generated by the triple combination of animal, Lunaria, and Pokémon abilities.

Shaina is fine, the opponents are random, the ones she encountered were a lot weaker and couldn't hurt her at all.

The two CP0 members that met at the end were quite good, but when they first started fighting, Arceus found his slate and used the ocean current to solve them.

Those two were not as strong as Wang Zhi, and they also became part of the Treasure Cave under the dual effects of currents and lightning.

"Enough is enough for the two of you, this uncle is the one who was hurt the most!"

"Ah? But didn't you accidentally hurt yourself, this guy can really hold you back." This time it wasn't Shaina. Under Quinn's policy of selling teammates, Shaina decided to stop flogging him for the time being.

But this move is effective for Shaina, but not for Jhin, so he ushered in the backstab again.

"Brother Kai, Lord Arceus, can you think about your own people next time?" Quinn complained weakly while lying on the flame cloud, the world was a little unfriendly to him, why was he the only one who was electrocuted.

Arceus didn't speak, it was Kaido not him, but Kaido's thinking was obviously different from what Quinn thought.

"Well, Quinn, you are still too weak. If you notice your own situation and block the current with domineering in advance, it will not be affected. I will train you well after the sailing, and you will be with you. Jhin and the others, let's practice together."

"No need, Big Brother Kai"

Kaido's training is a training in the real sense. Being beaten can be said to be a necessary training process for domineering. Even those domineering self-awakenings will inevitably be beaten in the follow-up training.

Kaido's training is indeed beneficial to practice, but the pain is also real.

"You're welcome, you are Lao Tzu's crew."

Kaido's decision will not be easily changed, so Quinn was also pulled into the domineering crash class.

Quinn was lying on the flame cloud reluctantly, looking at the lake and thinking about life.

The lake caused a large amount of water to flow in due to the gap below, forming a huge vortex on the lake. John's ability to awaken destroyed the surrounding terrain, causing the surrounding seawater to keep pouring into it, but the water level did not drop.

Unless some murloc digs here, no one will be able to discover the secrets below. After all, all the insiders are either on Kaido's flame cloud or below.

The previous actions of John caused a small earthquake and tsunami, but the refuge boats were all tied to the ground, so they were not affected.

But now that the situation has changed, the time it takes for the tide to go back may be extended.

At this time, Quinn seemed to see something, rubbed his eyes, and took out a telescope.

"Hey, look over there, isn't that the basilisk lizard with the head of the kid?"

In Quinn's sight, a green lizard was running on the sea, and a hole was cut in its stomach. As it ran, the blood kept dripping on the water.

seems to have seen Kaido's silhouette in the sky, and is constantly roaring here.

This is the strangest part, Elizabeth is inseparable from Olga most of the time except trying to stay beside Arceus.

Before they moved, Olga and Assie were both arranged in the hotel, where the previous small-scale tsunami did not reach there at all, and it was wrong to be injured here.

Jin jumped from the flame cloud and returned to the flame cloud with the injured Elizabeth. Although Elizabeth could understand their words, only Arceus could understand what Elizabeth was saying.

"Yah, ah, ah, ah, ah!"

"Don't move around, this guy, I haven't treated the lizard, so I'll endure the pain. If this wound is not sutured, it will die."

Quinn was forced to act as a veterinarian. He did not treat beasts, but also the basilisk lizard, a race that has long been extinct in the outside world.

But it is not crying for pain, but for help.

"It said that Olga was taken away by a man, and that Asiere was now alive and dead in the hotel, just before the moon disappeared and the sun was about to rise. It also said that it had remembered the smell of that man. Now, let's hurry up and save Olga." *novEPlusB.com*

"Human traffickers? Dare to kidnap people in the central hotel of Natho Kingdom, aren't they afraid of becoming the public enemy of the gray world?"

The Kingdom of Natho allows all kinds of gray transactions, but absolutely no behavior that endangers the safety of guests is allowed in the central hotel, which is one of the reasons why it can become a center for gray transactions.

"Quinn, you go back to treat Assie first, and then sail to the place we agreed upon. Really, the rare good mood is gone."

Kaido's originally raised mouth completely collapsed. His subordinates can fail, they can make mistakes, and it's okay to have a little personality, but the trainee he likes has been kidnapped, which is a huge insult to him.

"Shaina, you should go with Quinn, try to save Assie." Arceus then asked Shaina to go with him, but he still remembered the possibility that Quinn said, Assie. Top materials scientists are not easy to find.

Due to the previous great ebb tide and John's Fruit, the surrounding sea water was pouring into the central area, and it was impossible to leave the boat before dawn. The person who took Olga away has not gone far .

Kaido needs to let him know that not everyone can touch it casually.

Chapter 45 Olga's Wrath

In the Central Hotel of the Kingdom of Natho, a large hole was blasted out of Kaido's room wall, and there was Assie lying on the ground next to it. As Elizabeth said, there was also a blood hole on Assie's chest. , there is also a huge slash-like scar on the abdomen.

And he was surrounded by the hotel's security staff and the hotel's doctor.

"Hemostatic forceps! Bandages! Where are the blood packs?! He is S-type blood, why hasn't it been delivered yet! No one is allowed to die in the hotel, this is His Majesty's order! Quick!"

Several doctors were busy dealing with the wounds on Asier's body. Originally, the hotel staff's focus was on the sudden tsunami.

This central hotel is second only to the Royal Palace in the Kingdom of Natho. In order to allow the people who come to trade here to live with peace of mind, the Kingdom of Natho has invested a lot of energy here.

Although the check-in price is not low, after check-in, all the consumption in the hotel is a gift, and it also has many auxiliary functions such as entertainment, identification, medical treatment and so on.

After the accident in Kaido's room, the hotel's security guards quickly surrounded it, but they didn't see anything except Asie, who was seriously injured and fell to the ground, and the smashed window.

Immediately afterwards, the emergency medical treatment of Assié was launched, and the security personnel of the hotel also started martial law.

So when Quinn and Shaina returned here, the wounds on Assière's body had already undergone a simple treatment. When they saw Shaina's house key, the hotel records immediately knew that they knew each other. Take them to Asier.

"Guest, this incident is an accident. The Royal Army is arresting the perpetrator in the hotel. We will come up with a result that will satisfy you."

"How is he?"

Shaina didn't care what this person said, Arceus and Kaido went to solve this matter, if it still made him run away, it would be hell.

Arceus' request was to ask Quinn to rescue Assie, and she is more concerned about Assie's condition now.

"After our rescue, the injured are not life-threatening for the time being. The main wounds are puncture wounds in the chest, stab wounds in the abdomen, as well as the impact of the head fall and a large amount of blood loss.

I also want him to be fat. The fat in the chest and abdomen protects the organs in the body, but you still have to be careful about infection. Hey, guests, please don't move around, he is still very dangerous! "

Watching Quinn walk to Asier's side and take out an unknown syringe, the doctor in this hotel was startled, and he managed to save the person. If something else happens, it will be a big trouble.

"You don't need to take care of the rest. The emergency treatment is not bad. Then it's up to me. Get me more blood of the same blood type as him. He still needs to continue blood transfusion."

"Guest, are you a doctor? That's fine, but can I trouble you to check out the room? We will refund all the fees this time."

It is best that there are doctors among Assie's partners. As long as they leave voluntarily, the rest will have nothing to do with them.

Then they left here with the unconscious Assie, and came to the boat that Quinn had previously bought.

But Quinn seemed a little smug when he settled in Assie.

"Look, Lao Tzu said that being a little fat is good. If he hadn't been fat, I'm afraid he'd be more fortunate this time."

"You said before that you were full of muscles. Can he be saved?"

"What are you joking, this kind of injury is nothing to this uncle. He was cut into two pieces. As long as there is still one breath left, I can save him."

said and injected the medicine he made into Asier's body.

"The doctors here are pretty good. Asiee has nothing to do with it. Go and put down the sails. I can't steer this boat alone."

Quinn and Shaina steered the new boat towards the previously agreed place.

On the edge of the island, Fleet and Olga were planning to leave the island. He didn't know what happened to those CP0s, but this matter had nothing to do with him. Olga's body about Arkai Mimi's business is what he cares about.

He thought it would be easy to take a child away, but when he acted, he found that he was wrong. Olga is very different from ordinary children. After being exercised by Kaido for a few months, her physical strength has been greatly improved. Great improvement.

This completely failed his abduction method, and was also discovered by Asier.

Asie, a person who lacks exercise is naturally not his CP9 opponent. He was knocked to the ground in just two blows, and the same is true for the lizard monster in the corner that tried to attack him.

But he knew that this kind of behavior was considered a taboo in the Natho Kingdom, and I am afraid that the kingdom is now hunting him down.

It's easy to solve this matter as his CP9, but he doesn't want to reveal his identity as a CP9 at all. As long as the Kingdom of Natho stabs this matter, then Olga's identity will never be hidden, so he The idea of monopolizing this feat was completely lost.

So he had to knock Olga out and quietly left the Natho Kingdom. As long as he returned to Mary Joa and sent people up, his exploits were enough.

But first of all he has to determine one thing, and that is what the specific connection between this kid and Alkemi is.

If he told the Tianlong people that he had found the news, but finally found out that the news was false, he would not be able to afford the crime of teasing the Tianlong people.

In the safe house he had prepared in advance, Foley released Olga in a bag and woke her up.

But she just woke up and grabbed Foley in the face.

"You bastard! You killed Daddy and Elizabeth, I won't let you go! I want to kill you, I must kill you!"

One is his father who has just opened his heart after a long absence, and the other is Elizabeth, who has been with her for more than a hundred years. When she saw the two of them collapse in front of her, she was in despair.

Now he wants to know other news from his own mouth? All she could say was that Fleet was dreaming.  
*novEℓusB.com*

"Father? Is that guy actually your father?" The overweight Assie and Olga had nothing in common except for their hair color.

Knowing that that person might also be related to Alkemi, he stopped doing it, but this emotion was not reflected in the change in his expression, instead he looked at Olga with a smile.

#### Chapter 46 You dare to touch Lao Tzu's trainee! (seeking follow-up)

"I didn't kill them, we just played a game. Uncle didn't use any weapons. How could anyone pierce through the door with their hands, right? This is what my uncle and your father discussed.

I'll take you away and they'll come back for you, as long as they can't find you we win. "

Unlike Assie, who is overweight, Olga, who lives only on fruit, is somewhat malnourished. In addition, girls grow faster than boys when they are young, so Follett mistook it for a five or six. year old child.

In his opinion, such a child is easy to fool.

He just thought that the other party had something to do with Al Kemi, he didn't think that she was the daughter of a pure gold maker, let alone a little girl who had lived for more than a hundred years.

As for using this method just for suspicion and not caring about the lives of others, this kind of thing is not surprising to the members of CP9. As long as they can complete the task, the life and death of ordinary people will not be taken into their hearts.

But for Fleet's words, Olga showed a disdainful smile on her face. If he was a real kid, he would have fooled him, but she was different. Not to mention punching through the door with her hands, even crushing stones with her bare hands would not be enough. what a strange thing.

After several months of corrections by Shaina, she has corrected the problem of speaking in her heart, and she just stared at Fleet viciously.

"You? Nice guy?"

"Yeah, my uncle is a good guy, but I work in the world government, how can someone who can work there be a bad guy, only those pirates in the ocean are bad guys."

There is nothing wrong with the sentence , except for those children born in the pirate family, for ordinary people, pirates are bad people.

It's just that it's very strange that Fleet said this sentence, and Asiere also told Olga not to disclose information about Alkemi and pure gold to anyone, whether it is pirates, navy or The governments of the world are all the same.

At present, the people of the beasts are not bad for them. He does not dare to gamble on the hearts of people with the possible future. He is very clear about the temptation of pure gold, and he himself has some doubts about the world government.

As for Shaina, she has an inextricable feud with the World Government. Under the influence of her and Assie, Olga has little trust in the people of the World Government.

Not to mention that she saw what Fleet had done, she was not a fool, neither the tone of Asier's voice nor Elizabeth's screams when she fell to the ground seemed to be fake.

"Bah! If you are a good person, there will be no pirates in the sea!"

"Don't be so sure. Uncle is also from Al Kemi Island. If you don't believe me, look at this. Now you believe it."

He pointed to the pattern on Olga's skirt and read out the meaning of the text. He wanted to gain Olga's trust in this way.

But he didn't know that Alkemi had been in the belly of the lanternfish for more than 100 years, and there were no other living people on the island. His behavior convinced Olga that this was what Acière coveted. Pure gold man.

But when she turned her eyes, she had a new idea.

"Uncle, are you really from Alkemi? Are you just joking with Dad?"

"Of course, I never lie. If I lie, I'll swallow a thousand needles and burn my heart with fire, but it's been a long time since I left Al Kemi. You weren't born at that time. When you go back, everyone It's gone, can you tell my uncle where everyone went?"

"Okay, but it's a secret, I can only tell you quietly." Hearing that, Fleet put his ear close to Olga. Of course, it would be more meritorious to bring pure gold directly back than to bring news to the Tianlong people.

But the next moment, Olga bit his ear.

"It hurts."

Olga clutched her teeth and fell to the side. She felt that she had bitten on an iron block, and even one of her teeth had been shattered.

"You brat is really bad, but it doesn't matter, you really have something to do with Alkemi."

Seeing that he couldn't be fooled, Foley put away his smiling face. Olga's reaction was much worse than his.

As for why Olga has a toothache, the sixth form - iron block.

Proficient in Six Forms is a basic requirement for a regular member of CP9, although the iron block skill is basically unlucky, except for the creator himself, who chooses to use the iron block to hard attack without a good end.*noVeℓUsb.com*

But in the face of a child, she will not overturn the car, if she is not so hard, she will not directly collapse a tooth.

Ordinary children don't have such vigilance, it's so hard to fool, even if it has nothing to do with Alkemi, she must have a lot of secrets about her.

"I didn't want to be too impersonal, but if you are so clueless, don't blame me for using some tricks."

Interrogating information from the enemy's mouth is a compulsory course for them, and even an adult male may not be able to withstand those means. He believes that within a few minutes, he will be able to get Olga to speak.

But before he could make a move, there was a loud noise from the top of the safe house, and a huge blue-blue claw broke through the wall and pressed him directly below.

"What kind of tactics do you want to use against Lao Tzu's apprentices? You're nothing more than a running dog of the World Government. A dog must understand its own status!"

Then Elizabeth slid down Kaido's arm, and the wound that was temporarily stitched was even bleeding to the outside, but it still rubbed against Olga's side.

"Elizabeth?! You're still alive!"

"If you don't let go, it will really die." Arceus, who also walked down the hole, said to Olga.

She was almost hanging on Elizabeth, so if it didn't work, the line would be opened.

"Master Holy Beast! Captain Kaido Kaido! How did you find them here?" Hearing that Olga let go of Elizabeth, and this was the first time she called Kaido the captain, at this moment she suddenly felt that the pirate's There's nothing wrong with identity.

"It was Elizabeth who brought us here, and we wouldn't have been so fast without it."

Compared to Olga's awakening, Foley's brain was buzzing, why is Kaido here?

The purpose of such a person appearing here should be John's treasure.

"Kaido, why are you here?"

"Huh? Didn't you hear the name of this kid? Lao Tzu is her captain, dare to take away the trainee I like, who do you think you are?"

Kaido's dragon claws caught Fletcher in front of him, and then a fierce flame ignited on his claws. Under the double damage of the strange force and the flame, Fletcher let out a burst of screams.

In the face of ordinary pirates, he can still show off his strength, but in the face of monsters like Kaido, he has no qualifications to resist.

He was then thrown back to Olga by Kaido with only one breath left.

"Kill him, kid, let me see if you are conscious today!"

## Chapter 47 Goal, New World

Kaido's goal is not to create a family adventure team, the life of a pirate is cruel, and fighting is just the most basic of them.

When Olga hadn't made up her mind before, Kaido was just exercising her body, but when she called out the word captain, it meant that everything was different.

Recognizing the identity of a pirate, you must have the consciousness of becoming a pirate.

If she doesn't dare, nothing will happen, but she will get more love from Kaido teacher in the future until she can adapt to this cruel pirate society.

However, the antique knife on Olga's body has been thrown somewhere, although it is a child, but Foley did not relax too much, and removed the lethal weapon on the opponent's body.

Fleet was made unable to resist by Kaido, but it was still too difficult for Olga to kill him with his bare hands.

"Are there no weapons?"

"Weapons? Kid, there is no time for you to find weapons on the battlefield, stones, wooden boards, these foreign objects, teeth, nails, these will all be your weapons, even if you bite them, you can't show mercy to the enemy, otherwise You will be the one who will die."

However, there are broken objects everywhere, and it can't be so primitive. Olga pulled out a broken table leg from the side and slammed it down on Foley's head.

This also made Fleet suffer for quite a while. If it was Kaido, it would be easy to kill him, but with Olga, it would be different.

Although Kaido severely injured him, his physical strength was placed there, and the body trained by practicing the six-style has a very tenacious vitality.

Olga's attack, let alone death, couldn't even make him lose consciousness in an instant. He slammed a hammer on his head, but it became a kind of torture.

Kaido crushed almost all the bones in his body with that one blow, so that now he can only watch the wooden stick in Olga's hand smashing down one after another.

Like a punishment, Foley's life was not over until Olga's hands broke the legs of the table.

"It's too weak, it seems that it will take a lot of time for you to grow up. But sticks are not suitable for you, you have no talent in this area at all."

Kaido's proficiency in club weapons is full. From the state of Olga's swing, it can be seen that she is not suitable for this weapon at all.

After all the dust settled, Kaido, who transformed into a blue dragon, took everyone to the agreed place. Compared with the previous patrol ship, this ship was much larger.

This is a steam outer ship, which is less manpower to operate than a traditional sailing ship.

"Dad! You're fine too, great!"

"It hurts... it hurts, Olga, you go down first."

He was injured more than Elizabeth, and the self-healing ability of humans was much worse than that of the Basilisk Lizard.

He is not an animal-type capable person, so it is not bad to be able to move around at this time.

A lot of things have come to an end, Arceus temporarily lost the news about the new slate, the world is very big, and based on his current perception range, it is almost impossible to search aimlessly for the slate.

According to the known information, the world government may have it, but as the actual ruler of the sea, the great route, the red earth continent, the four seas, the huge scope makes it impossible to start.  
**0VeLusB.coM**

Shaina and Jin can only roughly estimate where the island where the stone slab was lost is based on the conversations of the clan members, and there is still no news.

So the focus is on the search engine that Quinn mentioned for the time being.

"I probably know the production process. Some details still need to be tested. It is impossible for me alone, and the simple equipment on the ship is not enough. At least a research institute is needed."

He needs more equipment. Although many things on him are DIYed by his bare hands, this does not mean that he can replace machines with his bare hands. Whether it is experiments or anything, more manpower is required.

Previously, Kaido's actions were all on the way to find the slate, and then he needed to turn to the expansion area and manpower.

Kaido has no plans to stay in Paradise for a long time, his goal is the new world.

Silver Axe, Wang Zhi, John, these are all big pirates with a fixed territory in the New World, and now their deaths mean that a lot of areas have been vacant.

Pirates can be divided into two types, one is the pirates who go around and rob houses. Such pirates are also the level of miscellaneous fish in the pirate group.

And the big pirates in the new world are no longer pirates in the ordinary sense, they are more like separatist warlords.

In addition to their own strong strength and the cadres directly under the pirate group, they also have many pirate groups under their jurisdiction, with tens of thousands of troops, controlling a wide range of territorial waters.

At this point, looting is already the least efficient method.

They are based on Gunnar to maintain the operation of the Great Pirates.

Some businesses in their territorial waters need to pay "taxes". As outside the jurisdiction of the world government, fists have become the only rules here.

From serious jobs such as trade in goods, berthing in harbors, catering, entertainment, etc., to underground places such as casinos, bodyguard work in all facilities, and smuggling of weapons, black, white, gray, and various industries have their participation.

All economic activities in the territorial waters are inextricably linked with the actual controller here.

If nothing else, just the cost of flying the flag is extremely valuable, and it takes hundreds of millions of baileys to exchange for this flag.

If you don't have enough self-protection ability, borrowing the flag is the best way.

However, this cost is generally worth it. In the chaotic New World, new pirates enter here every year, every day, and even every moment. Compared with the pirates who have been in the New World for a while, the residents of the New World They are even more afraid of these newcomers.

These people who do not know what a strong person is, often do irrational behaviors.

But not all pirates are stunned, and there are not a few pirates who join the command of a certain pirate to seek shelter after entering the new world.

Kaido is not a rookie anymore. Naturally, unlike those pirates who have just set out to sea, they plan to go down step by step.

Taking over the original territory of John and the others is the best idea now. Rather than grabbing territory with those pirates in the new world, occupying this borderless land to develop troops is a better choice.

"This is a chart. John and the three of them are not adjacent to each other's territory. We can only occupy one piece first in our current situation."

"Just John, if I remember correctly, that island seems to be called the Island of Industry." Looking at the map that Kaido took out, Quinn made his own suggestion.

This is the advantage of this new ship that Quinn has chosen. The steam engine and the dual power of the outer wheel can enter a short-term unmanned state as long as the furnace pressure and direction are well controlled.

It is not a secret who the territory of the new world belongs to. This is almost a well-known thing. It is easy to find the distribution map of their forces in the underground world.

This is especially true in the kingdom of Natho, known as the Grey Kingdom, where intelligence officers in the underworld can sometimes even receive news before the world government.

It is even easier to figure out the territory of the big pirates. Compared with the Four Emperors era many years later, the current situation in the new world is completely different. Five years ago, the Rocks Pirates were undoubtedly the strongest force.

Today after the disappearance of the Rocks Pirates, the captain of the Flying Sky Pirates and the Admiral of the Golden Lion Pirates "Flying Pirates" - Golden Lion Shiki controls the largest group of forces in the New World.

The ability of Piao Piao Fruit gave Golden Lion's fleet a huge advantage in naval battles, but he was only the largest, and in terms of strength, he was a little worse than Whitebeard. At this time, his captains hadn't grown up.

But Whitebeard was not troubled by injuries, and the Whitebeard Pirates were also a top force in the New World.

After , there was no fixed territory, and the Roger Pirates sailed around to find the final place. These three gangs can be said to be the three strongest pirates in the New World today.

Charlotte Lingling, John, and Silver Axe, the remnants of Rocks, together form the second echelon of the new world. Now there is such a big vacancy in power, when the news spreads, there will be countless pirates who smell it. Bloody sharks swarmed up like that.

But at the location where John and the others died, it may take a lot of time for the news to ferment, and this is the chance for Kaido and the others.

"Then here it is, but there is one more thing to do before we leave."

Kaido looked at the sails on the mast. Although the ship was a steam outer ship, it still retained the two main masts and sails. Now it was blank and there was no flag belonging to Kaido.

Pirates have always attached great importance to their own flags, destroying the flag means declaring war, and pirates also rely on the flag to show their territory.

The previous small boats and navy patrol boats are also ignored. At this time, this boat is a boat that belongs to the beasts in the true sense, and the vacant flags need to be painted.

Then, a new problem arose.

"Are any of you good at drawing?" Kaido worked hard in the Kingdom's army when he was ten years old. Although the Kingdom's army taught people to read at that time, painting all depended on talent, and it was a little embarrassing for him to draw a neat pirate flag.

Arceus is also not good at this kind of thing. After four slates, his overall strength has been greatly improved, not just using attribute skills alone.

After absorbing the four slates, the power of Qian Zhou's wrist is also fully activated, and he can manipulate a single element, such as water or fire, through the power of the slate.

Invisible water can replace the arm in his hand, and it is far more convenient than the arm.

He is not a Tutu dog. Some things can't be drawn just by thinking. Otherwise, there won't be so many people driven crazy in the world.

As for Shaina and Jhin. Both of them have only one purpose in what they have learned from birth to now - to survive, so this crew is almost all painting black holes.

They had seen Olga's graffiti level, so they didn't even need to ask. As for Asie, it was too embarrassing for him to draw the pirate flag.

So in the end, it was on Quinn's head again.

"Recruiting, Boss Kaido, we need to recruit people, even if they are cannon fodder, at least let them do chores!" Quinn, who was holding a paint bucket, issued his own accusation.

Although Kaido has always said that he wants to expand his troops, the people he met during this time either thought it was too weak or felt inappropriate, so that he, Quinn, is still the bottom of the ship.

Olga and Asienne couldn't do the heavy lifting at once, and it would take hours for them to do something for a few minutes.

Instructed by Kaido's sketch, a ghost-horned skeleton appeared on their flag.

The ship continued to sail in the direction of the new world. Kaido and Quinn began to count the treasures. The things that John kept close to him were real treasures. In addition to the seemingly valuable handicrafts, there were also a few boxes.

"This thing seems to be the necklace that the Tianlong people lost back then? I remember that things were quite a big deal at the time." Quinn held a magnifying glass to observe the object in his hand, and also remembered the \*\*\*\* storm a few years ago. matter.

"It's not surprising that there are more than one Tianlong people who fell into Lockes' hands. It seems that they couldn't retrieve everything from Lockes' hands. That guy John is still the virtuous one, specializing in collecting these valuable things."

Kaido wasn't very interested in the necklace, so he opened another box instead, this time his expression was much happier, and a devil fruit was lying in it like this.

"Quinn, where's your picture book? Look what kind of fruit this is?"

"This is um, it should be a dog fruit, but I don't know what kind it is. Brother Kai, this is just a rubbing, and the original version does not record all kinds. There is only half a page about this fruit."

"It doesn't matter, it's just an animal type. It seems that the kid also has his own abilities."

At the same time, Arceus is trying a new transformation, but the object of transformation is not Olga, but Elizabeth.

Following the empowerment of Shaina, the transformation of Jhin's fruit, and the non-directional mutation of Quinn's ability, Arceus decided to make a fourth attempt to transform animals other than humans.

There are many strange creatures in this world, and those creatures with enough wisdom are equally powerful, such as the baboons on Eagle Eye Island and the Kung Fu manatee in Alabasta.

Elizabeth's intelligence is similar to that of a human child. Judging from her previous performance of giving her life to pass messages, it's nothing to change it.

"The Basilisk Lizard... That's it." The power of the water drop slate enveloped Elizabeth, and in a burst of white light, her arms began to extend, her spine began to stand upright, and her skin color changed from green to blue.

"Well, transforming animals is much less labor-intensive than transforming humans, is it because of the different body structures?"

Transforming animals is more labor-saving than simply transforming Devil Fruits. If you cancel its ability to switch forms, it will require less power, which gives Arceus some new ideas.

However, species with sufficient intelligence and small size like Elizabeth are rare.[novelusb.com](http://novelusb.com)

And Elizabeth seemed a little vague, constantly switching between the original form and the new form, as if she was feeling the changes in her body, and this also stunned Olga.

"Master Holy Beast, Elizabeth is this"

"A new power, its race should now be called - the Thousand Faced Servant."

#### Chapter 49 People who get nauseated when they see fruit

Elizabeth switches between the two forms, which is the biggest difference between the transformed animals and humans. They only have two forms, the main body and the Pokémon form, and there is no mixed animal form.

This is probably the reason why the consumption is smaller. In addition, the consumption of permanent transformation will be smaller. On the contrary, the consumption of creating out of thin air is larger.

Thousand-faced escort, secret agent Pokémon, three families of the water system in the Galar region.

Water-type Pokémon's water generally comes from the outside world. Water-type Pokémon have their own unique water storage organs and transformation methods.

In an anhydrous environment, water molecules in the air can also be converted into water in a special way, including their own physical strength, but except for individual cases, the living area of water-type Pokémon will not be far from the water.

The most common way is to store and utilize the water from the outside world. It is also a problem of consumption. It is much easier to control the existing waves outside than to generate a huge wave by yourself.

And PYROBROIN particles exist in all corners of this world, so even if the water-type Pokémon that appears here is the water generated by itself, this particle will have a certain restraint on the fruit ability.

Arceus is the only exception. He can create special pure water without PYROBROIN particles through the water drop slate. In this kind of water, even those with ability can re-experience the feeling of swimming.

Thousand Faced Servant's eyes have a special membrane, which has extremely special abilities and can help Thousand-faced Defender to find the opponent's weakness.

It has a special wing membrane on its back, which allows the Thousand Faced Servant to glide for a short time. There is also a special blade-like structure hidden in the tail behind it. Of course, its main ability is its own sniper talent.

Theoretically, the Thousand Faces Defender can shoot the water stored in the body from the fingers at a speed of Mach 3, but Elizabeth's situation may not be able to reach this speed, but the high-speed water bomb is deadly enough for most people.

Even if he is an ability person, if his own ability cannot freeze or evaporate the sea water, he will be very weak against Elizabeth. Water-type Pokémon has almost a natural advantage over ability people.

However, the most important point is that the animal intelligence of Pokemon will be significantly improved, and the Thousand Faced Servant is also a kind of high IQ in Pokemon. At this time, Elizabeth can be said to have a completely different development direction.

"Olga, you can try to teach it to speak later."

"Teach it to speak. In fact, I tried it more than a hundred years ago." It was very boring in the belly of a sea king. Of course Olga tried it, but although Elizabeth could understand her, she couldn't speak at all. out of human speech.

"It's different now."

Team Rocket's Meow was just an ordinary Meow at the beginning, but the magic of love forced him to learn to walk upright and human language. possible.

Excluding divine beasts and phantom beasts, Rotom with a special shape, and the long-lived ghost of Maiden Gorge can also speak human language, so learning human language is not an exception, and you can probably learn it by teaching more.

Looking at the fingers that are very similar to humans in the new form, Elizabeth began to study her own abilities and try her own sniper ability.*novel.usB.com*

However, the effect is not satisfactory, the water bomb it emits is still a long way from the recorded speed of Mach 3.

And a newly born "sniper" Elizabeth can't control this ability very well. When the basilisk lizard, its hands are more like auxiliary tools, and the main muscle groups are grown in the lower body.

Now it is difficult to control the recoil generated by "sniper", so when shooting at the sea, it accidentally hits crooked.

"Gollum."

Quinn, who had just walked up the stairs next to him, swallowed and looked at the water bomb hitting the handrail next to him. He felt a chill in his crotch.

Because of her height, the armrest hit by Elizabeth was almost flush with Quinn's waist, and if it was a little further to the left, Quinn could consider a prosthetic transformation for herself.

"Murder! Are you trying to murder! What is this blue lizard?"

If Arceus hadn't happened to be here, he might have rushed up and grabbed Olga's collar to ask this question, but Arceus still kept him restrained.

"Quin, get in the way." Kaido pushed Quinn from behind, and water marks could be seen on his shoulders. It seems that the water bomb hit him later, but the current power can't hurt his body.

The transformed Elizabeth naturally appeared in his eyes. Although the shape changed a lot, he still saw the saddle behind Elizabeth.

"That lizard? Your abilities are really wide-ranging."

Kaido found that he still underestimated Arceus' abilities, and the application of his abilities seemed to be wider than he thought.

"There are so many things to try, why are you all here?"

"I found something interesting." He threw the fruit in his hand to Olga.

"Fixed the kid." A white fruit crossed an arc in the sky and fell into Olga's hands accurately.

"Ah?" Looking at the white cantaloupe in her hand, Olga still didn't understand what was going on.

"The secret treasure of the sea, the Devil Fruit, you should know what it is, right? There are quite a lot of people on this ship. This is a dog fruit, but we don't know the specific type. You can bet on what kind of ability it is.

But there is nothing to worry about, after all, there is Lord Arceus, no matter how bad it is, it is comparable to the ability of the phantom beasts. "

Quin explained the type of fruit, the unknown type of devil fruit is indeed a challenge, although the future of the fruit depends on the degree of development.

But the fruit is divided into strong and weak. If an ordinary ability can be developed to the extreme strength, then if you change to a more powerful ability, the upper limit will naturally be higher.

Before the appearance of Arceus, the common animal system had the lowest status in Devil Fruits, and the increase in the body of beastization in the early stage was completely incomparable to the abilities of the superhuman system and the natural system. to cause qualitative change.

But with Arceus, it's different. Arceus doesn't mean to transform directly. If an unknown animal type is an Eudemons, ordinary transformation is not suitable, so you have to prepare well.

"Why, you seem a little hesitant, aren't you interested in capable people?"

"No, I just heard that this thing is very unpalatable, and I have eaten fruit for more than 100 years. To be honest, I feel sick when I see the fruit now"

Chapter 50 Priert carried a cauldron

But after a while, she pinched her nose and bit down, with a livid face, a fluffy fox tail grew out of her back.

It has a pointed mouth and round ears, and its limbs are slightly shorter. After being fully animalized, it is not very big, and it looks a little cute.

"Is this an arctic fox?"

This world also has North and South poles, whether the South Pole is colder or the North Pole is colder, this is a topic that can make the two four emperors fight each other.

The classification of Dog Dog Fruit includes foxes, dogs, and wolves. It is not surprising that foxes have the ability to appear.

However, this arctic fox is obviously in the form of winter, with white fur all over the body.

Olga felt a strong nausea at this time. The taste of devil fruit could not be described in words, and she already hated fruit, and she felt that something wanted to pull her stomach out of her stomach.

After calming down this feeling, she, like Elizabeth just now, became familiar with the power of the fruit.

The first thing that appeared was the ability of beastization. The change of the Thousand Faces Servant did not change much, but the perspective of Olga changed greatly after the beastization.

Looking at Kaido on the side, she didn't even know where she had the courage to hijack him.

Of course, after this, she heard words that made her furry.

"Even though it's a fox, Katie should be more resistant now."

"That. Why do you want to resist beatings?" Olga had a bad premonition when she changed from a fox to a human again. She thought that the process of becoming stronger was constant training.

This process may be very hard, but she is ready, but this is not the same as being beaten.

Before Kaido's physical training has reached the peak of the human body every time, she has no extra physical strength to care about other things.

She is not afraid of hardship, but she is afraid of pain, and the potential that was stimulated during the previous injection made Quinn look at her.

"Don't be afraid, you are still a long way from being beaten. At least you need to exercise your physical fitness first, but you can watch how others train first."

Quinn put pressure on Olga on the side, but the pressure soon returned to himself.

"That's right, let's start with you in a moment."

Kaido's voice reached Quinn's ears, which made Quinn shudder.

"That.. Big Brother Kai, I want to sail, it's not very convenient for training now."

"Isn't the course already determined?"

"That's right."

"The pressure of steam is also very stable, isn't it?"

"That's it"

"Then don't worry, I will pay attention and leave you some physical strength to monitor the situation of the boat."

Quinn thought that he was the only one in control of the ship situation, Kaido would not let him train now, but the truth told him that he was wrong.

Olga still needs physical training, but Quinn is different. Although he is round, his physical training is almost done. The development of fruit ability depends on him, and the rest is domineering.

And being beaten is always the most important part of domineering cultivation. Whether it is the defense of the armed color or the perception of the knowledgeable color, it can be gradually strengthened in the process of "being beaten".

The purpose of practice is not to be beaten. As long as Kaido's requirements are met, the knowledgeable can evade the attack, and the armed can withstand the attack, then you will not be beaten.

But it is obviously impossible to achieve that level directly.

After Olga has the ability, Kaido will definitely adjust her training intensity, otherwise it will waste the huge recovery ability of the animal system.

But even if the training is not now, the next link is the ability transformation link that everyone likes to hear.

Although Olga ate the fruit first and then made the transformation, this time Arceus did not choose the non-directional mutation like Quinn, but used the power of the evil face slate.

With this type of slate, directional guidance is better than non-directional mutation.

There is an uncertain point in the non-directional mutation, that is, the ability of the fruit is not necessarily the final form, and the special morphological changes such as mega evolution and gigantic transformation can also be developed according to the awakening of the fruit.

But the fruit is not a Pokémon, it is impossible to achieve evolution by yourself, in that case, a second transformation is required, which is why his transformation ability is the final form.

With the arctic fox as the main body, a new change is appearing in Olga's body, and an upright demon fox appears in front of everyone.

Monster Fox Pokémon - Zoroark.

The arctic fox's white fur in winter has turned into gray-black in summer, but her blond hair has been preserved, and the red mane on Zoroark's back has turned golden.

Compared to the abilities of Flaming Chicken, Tropical Dragon, Fossil Pterosaur, and Thousand Faces, Zoroark's abilities are not so obvious.

Even Kaido and Quinn couldn't see what Olga's ability was until Zoroark's figure became blurred and then turned into another Quinn.

After that, she thinned herself in front of Quinn, and Olga also took out the mirror on her body and took a look at it. *OneLusb.com*

"Uncle Quinn, the way you lose weight doesn't seem to be very good."

"Bastard! Change me back! You are slandering this uncle, I'm not like this when I lose weight!"

The power to disguise himself as someone else with phantoms is a unique ability of the Zoroark race.

Not only people, Zoroark can also transform the appearance of other Pokémon, but this requires enough understanding, Olga does not understand these, so he can only imitate the appearance of other people.

Then Olga continued to master her abilities. Zoroark's ability was not just to transform others, it was just one of the most basic abilities.

The pirate ship continued to sail, Olga's life was very tight, and she learned cultural lessons and various knowledge with Asier and Quinn. Teacher Kaido personally guided physical training, and Shaina helped her develop her fruit ability. Also teach Elizabeth to speak.

After about a month, the newsbird came with a content they couldn't understand.

**【Death Drama-Priorite, Bounty 500 million Bailey, ONLYLIVE】**

"This guy is dead, how can the bounty still go up? Are those navies just trash?"

Looking at today's newspaper, Kaido is a little confused, and his bounty has also risen to 1.5 billion.

However, this has nothing to do with the affairs of the Natho Kingdom. It is entirely the reason why he escaped from the research institute. Jin and Shaina are still not rewarded, which is enough to show that the previous matter is very secret.

But why did Priert's bounty increase, and he also gave special conditions that he must be captured alive to receive the reward.

He didn't know that it was all due to Spandaine, Spandam to be exact.

Previously, he caused a small fire in Spandain's office due to his unhappiness, and in this fire. The loss of Priert's life card, coupled with the missing Fleet and CP0, sent more men to the kingdom of Natho.

Also because of Spandain's erroneous information, a series of misjudgments appeared.
