

Arceus 491

Chapter 491 Don't ruin Lao Tzu's reputation!

Although he couldn't beat Shaina, Jhin, or Zeraora, and the moment when the buffs were fully stacked in the explosion state, he was not enough, not to mention Kaido and Arceus, but he didn't believe that he couldn't beat Jia rule.

After all, the beatings over the years are not in vain, but you have to find a way to resist. In order not to be beaten too badly, and to have more time to breathe during Kaido's training, Quinn has made unimaginable efforts. .

"Quinn? Why are you **** here? Wasn't the lesson taught to you enough?"

"Lessons? Stop talking big, Gage, your war is doomed to fail. For the sake of old acquaintances, how about you surrender now and I only let you dig mines for fifty years?"

Their relationship is not friendly. Even if they were members of MADS, they often look down on each other. Jiazhi applies the technology of bloodline factor to equipment, while Quinn applies it to himself. This is their biggest difference, and it is also a difference in research. .

They are also considered geniuses in their respective fields, and naturally look down on each other's technology, and no one can convince each other, and because of trivial matters, their conflicts are gradually accumulating, and mutual confrontation is a normal state.

"Just a pirate, where did you get the confidence to stop me? And when did you start to be keen on peace?"

While talking to Quinn, Gage also gestured to the soldiers beside him, indicating that they prepare some anti-air weapons. As the commander-in-chief of Germa 66, Gage is the most powerful person in the entire Germa 66. .

But he didn't mean to take action. Among all the MADS people at the time, Vega Punk and Caesar Courant were temporarily attached to the scientific force of the World Government. Quinn joined the Beast Pirates, and there were people on them who could order them. .

But Gage was different. After returning to Beihai, he picked up the foundation of the Vinsmoke family and ruled Germa 66 as the king of the Kingdom of Germa. He was not only the commander-in-chief, but also the king, and the king was Not going to be easy.

"Care for peace? If you hadn't attacked here, do you think Lao Tzu would be here?! Do you know how long it took Lao Tzu to travel!"

Quinn's sudden roar confused Gage, and he still didn't understand what his attack on a non-joined country had to do with him.

This is the result of Quinn's selective amnesia. If he didn't read the address and took the mission, he wouldn't have to go through it, but he wouldn't admit that it was his mistake in front of Gage. , so he threw the pot directly to the other party.

After that, Quinn didn't continue to say anything. A brief scolding was regarded as saying hello to Jiazhi. He knew very well that Jiazhi would not choose to retreat because of his own three or two words, so a large number of plant bullets were shot at him by him. .

Although the seed machine gun is not the strongest in the skill group, it is Quinn's most comfortable to use, and he also habitually uses this trick to clean up trash.

"Wall."

In the face of Quinn's attack, Gage did not dodge, but spit out a word, he is not a capable person, this so-called wall is actually a human wall.

Several tall Jemal soldiers immediately stood in a row in front of him. If you look closely, you will find that these people look exactly the same. This is what Gage is used for clone soldiers.

Compared to dodging at a low price, he chose to use the lives of these androids to form a barrier.

The penetrating power of the seed machine gun is not strong, and the human body is the strongest barrier in the pirate world. Those bullets did not penetrate them, but they also harvested the lives of a group of transformed people.

"What do you think about the lives of your subordinates?!"

This kind of thing is nothing to Quinn. He knows that those are clones. Even if they are not clones, he will not care. Although he has restrained a lot now, he still does not care about the lives of ordinary people. There will be indiscriminate attacks.

But Yamato is different. Although she has seen the cruelty of Frevans and the humanity of the Chambord Islands, this is the first time she has seen people who ignore the safety of their younger brothers and use them as human shields.

"Quinn, is that your work? It's not a good thing to have too much emotion. Sure enough, you are a waste. What you don't care about makes your work care?"

Yamato is now standing on Quinn's back, and with Gage's understanding of Quinn, he will not accept such a thing.

Although I don't know what kind of transformation Quinn has done to himself so that he has the ability to fly, it is not in his character to have people trampled under his feet, unless that is also his work.

Although everyone's technologies are developed in different directions, they are all from the same source. It is not surprising that Quinn made a transformed warrior.

And Yamato is a mystery to the outside world. Before this incident, the outside world did not know that Kaido had such a daughter, she was well hidden, so Gaji had this misunderstanding.

Jage's answer made Quinn's forehead sweat a little more, and he quickly retorted: "Don't talk nonsense, I'm not someone who ignores the life of my subordinates, only a scum like you would do such a thing!"

He has the future heir of the beasts standing on his back, so he knows what will happen if the future boss doesn't like it.

Sasaki is an example. Although Arceus doesn't care about him, and Kaido is the person he looks up to, he doesn't dislike him, but he offends a lot of other officials, otherwise he won't be wearing small shoes.

At least Yamato isn't disgusted with his senses yet, and it would be troublesome if Gage were to destroy him.

But what happened next proved that Quinn was thinking too much. Their goal was to "beat Gaji", and Gaji's behavior made Yamato's sense of him plummet, so she just wanted to beat Gaji now. .

Before Quinn had landed, she had already jumped down with her Jian.

"Thundering gossip!"

This height is not dangerous to her. Although there is no technological component in her body, she is also an alternative "transformed person", a "superman" specially transformed with the power of Arceus.

With the monster physique inherited from Kaido, she is much stronger than the perfect creations in Gage's heart.

Leveraging the power of his whereabouts, Lei Ming Bagua aimed at Jiazhi's head and hit him. Looking at the approaching figure, Jiazhi felt a serious sense of crisis in his heart, and his boots hurriedly spurted out a powerful airflow and retreated.

Although this blow did not hit Gage, it also left a big hole on the ground, but then Yamato found a group of transformed soldiers surrounded him.

"Is such a guy worth your life for him?!"

But there are no clone troopers to take care of her. The biggest difference between these clone troopers and robots is that they are more likely to die. They have no emotions at all.

Chapter 492 "Smart" Quinn

No matter what Gage does, these clone troopers will still obey his orders, which is why the Vinsmoke family is strong in the North Sea. They are more like a manor than a country.

In addition to scientific research technicians and some doctors, cooks, maids and the like are human, other citizens are such clones.

As long as the plundered wealth is enough, they will have a steady stream of soldiers to produce from the factory.

Yamato, who was trying to attack the commander-in-chief of Gage, was naturally their enemy. Even without Gage's order, the guards rushed forward one after another.**novelusb.Com**

Looking at the big hole on the ground that Yamato smashed out, Gage's expression became ugly.

No matter which child is incomparable to the other, the highly poisonous powder, spark red, electric shock blue, winch green, invisible black are different battle suits developed by him through the bloodline factor.

His wife is dissatisfied with Jiaji for turning the child into an "emotionless machine" and taking drugs that affect bloodline factors during pregnancy, resulting in Sanji being a normal person, so the invisible black has no users now.

And none of the remaining children could.

Yongji, as the owner of the winch green, has been transformed to be almost like a robot, his body is almost mechanized, he can change the shape of his limbs and has powerful strange power, even if his head is smashed, he can come back with a hydraulic hammer, but he can't.

Although there is a gap in age, as their father and maker, Gage knows where their upper limit is, even if they reach Yamato's age, they can't surpass him.

In his opinion, Yamato is not a pure person, but Quinn's work. This is something he can't accept. He can't accept that he is defeated by Quinn in his field of expertise.

These scientists all have a paranoia, if they can't surpass it, they will destroy it.

"Attack with all members and destroy that horned man!"

He found that Yamato seemed to pity those clones. In that case, let the clones consume the opponent's physical strength well. Anyway, the next batch of soldiers has been trained almost, and he will not feel that all these soldiers are left here. pity.

So under Gage's order, the clone troopers around him attacked Yamato in groups with a sea of tactics.

"asshole."

These clones are not much trouble to her, just a matter of one person and one stick, but these people are entangled in her footsteps.

After several unsuccessful communications, she also understood the special nature of these clones, none of them have the emotions that human beings should have, so she was going to use the overlord color to clear the scene.

In order to train her, Kaido used the domineering arrogance as a wake-up alarm clock. Although the current Yamato cannot accurately lock the domineering on a person, it can be freely retracted and cleaned up.

But just as she was about to start, a large number of vines erupted from the surrounding ground, binding all the Jemal clone soldiers.

"Go, Miss Yamato, leave these soldiers to me."

Those parasitic seeds were fired by Quinn in the seed machine gun before. His original plan was to use his air superiority to cover the firepower, but it doesn't matter now, anyway, Yamato didn't plan to come as planned.

On the way here, he has been trying to figure out what Arceus said. At this time, he has already figured out one thing. Five Genesects are more than enough to handle the battle situation of a small kingdom. Although Yamato is young, he is also a powerful fighting force. .

And he didn't believe that Yamato didn't have Arceus' backhand. The current battle situation basically guaranteed the security of the kingdom. In this case, the main target should be changed.

As long as Yamato is happy, then this problem is solved perfectly.

The current situation is that she is unhappy with Jiaji, so let Yamato deal with Jiaji, while he is lazy, no, it is to help Yamato clean up the characters that interfere with her, this time it is a win-win situation.

He has more than a dozen ways to eliminate these clone soldiers, but now Yamato doesn't seem to want to eliminate them, so he chose a gentler method, parasitic seeds plus the natural grace of paralyzing toxins.

Among the cadres of the Beast Pirates, he is indeed not ranked in the heads-up, but in such a large-scale army battle, he is the master of the battlefield.

The tail, the modified weapons in the braid are pouring their own firepower, Quinn directly helped Yamato open up a path to Jage.

"Thank you Uncle Quinn!"

On the way of running, Yamato's body gradually entered the form of a big mouth real **** and human beast. The dragon tail behind her is the biggest difference between her and the original version. The mace is wrapped in domineering and smashing at Jiazhi.

Zizzy~!

Gage also had a long spear in his hand, and the tip of the spear was wrapped with lightning. Apart from the transformed superhuman physique, 90% of his force was on his equipment.

Any equipment on him can be said to be Germa's highest achievement.

"Don't underestimate people, kid, you didn't know where Germa was when he traversed the North Sea. Do you think you could defeat me?! Electromagnetic thrusts!"

The lightning on the spear was compressed and pierced toward Yamato. The dazzling electric light almost made others unable to open their eyes. However, a thin layer of lenses appeared on the gaps in the eyes of Gaji's helmet. not affected by this.

"If the leaders of Germa are all people like you who ignore life, then this organization should disappear!"

Yamato slightly changed the posture of holding the stick and the pace of his feet. Although the strong light made people a little hard to open their eyes, Jiaji's speed was much worse than Kaido's. She was raided by Kaido every day. The way.

Gage still rotated the handle of the gun and stabbed forward. The information from his eyes to his brain told him that he had stabbed the target, but the touch from the previous section was completely wrong. What he stabbed was just an afterimage.

"God Foot White Snake Drive."

Through the acceleration brought about by the instant explosion, Yamato has come to Jiazhi's side, A fitness also has a layer of frost, and smashed towards Jiazhi's chest.

Jage's spear has been pierced, and it is impossible to immediately retract the spear blade at this distance. One inch long is one inch strong, and one inch short is one inch dangerous. When a long weapon is approached, it is inevitable to face this embarrassment.

He could only choose to smash Yamato with the handle of the gun, and at the same time, the cloak behind him was wrapped around his upper body as if it had been absorbed.

Although it looks like a tights, Germa 66's battle suit is actually made of special shape memory armor, which is very sturdy. The cloak is also a special shield made of the same material. With double protection, he thinks he can block this attack. .

But when the mace hit his chest, he realized how wrong his judgment was.

Chapter 493 Mecha is the right way?

The effect of the double defense of the battle suit and the cloak is not obvious. Who made Kaido's weapon in the same vein as the mace, the blunt weapon's armor-piercing effect is far more powerful than the sword.

Even if the characteristics of the battle suit allowed him to temporarily avoid Yamato's cold air, the strange force still hit his body through his defense. Judging from the body's feedback, his ribs were definitely broken.

But at the same time he was hit by Yamato, the barrel of his gun also fell on Yamato's shoulder, but the touch here was also wrong. He seemed to hit an iron bump this time.

Click

A cracking sound came into Gaji's ears, and Yamato's body began to crack from the shoulders, and cracks spread all over the body, and finally it shattered like ice crystals.

"Jingshan"

This is her ice armor made of her own ice, and the all-round defense allows her to resist most attacks.

Feeling the pain coming from his chest, Gage's combat boots spit air to bring him to a high altitude. From the performance just now, it is not difficult to see that Yamato does not seem to have the ability to fly, while Germa's combat boots are equipped with suspension devices and Accelerator.

Relying on these two devices, they could fly freely. Gaji, who was temporarily safe, pressed the button of his battle suit, and the battle suit at the injured position automatically locked and fixed the broken bone. At the same time, a painkiller was also injected into the body.

"Skilled. Miss, it seems that you are not a work, I knew that Quinn couldn't make such a perfect work."

Quinn's name for Yamato combined with her expressiveness made him overthrow his previous thoughts, which made him feel a lot more at ease, at least it showed that he did not lose to Quinn technically.

In the sky, he was thinking about what to do next, but suddenly there was a burst of air in his ears, and then a chelicerae slashed at him.*novelusb.Com*

Although he blocked the attack, the force from his hand also made him feel a little numb in his palm, and the huge number of GT-8 also appeared in his field of vision.

The scarlet eyes flashed with red light, and the cannon behind him looked very dangerous. If it weren't for the fact that Genesect's body was enlarged, the light cannon behind him couldn't attack the current Gage, he would have to. Experience the feeling of a cannon riding a face.

If Yamato's identity was a misunderstanding, then the artificial aura on Genesect was too obvious, and he also recognized that this was the monster that disturbed his legion before.

When he looked at the distant battlefield, Germa's army had turned from an attack to a stalemate. With Genesect as the head, the defenders of the Kingdom of Corgia had launched a counterattack.

The position of GT-8 is the weak point of Germa's offense. After he judged that there is no longer a need for it, he turned to Yamato.

Then GT-8 temporarily broke away from the battle with Gage and came to Yamato and turned into a flying saucer.

"Sir Guuji, please come up and I'll be your mount."

"Oh, please!"

Yamato jumped directly to the back of GT-8 and flew towards Gage, and the light cannon behind GT-8 began to store energy, and Gage re-entered its shooting range after pulling away.

In the sky, the spear blade in Gage's hand slashed towards Genesect's body, but the spear blade made of special alloy only left a shallow trace under the premise of being attached to high-temperature lightning.

Facing Arceus Steel, Gage, who completely relied on weapons, failed to gain an advantage.

Looking at the opponent's deformable "battle armor", and looking at the solid alloy shell that could not leave a trace of his own gun blade, Gage suddenly felt that something was not right.

In the end, he was still crushed by Quinn's technology?

After this thought appeared in his mind, it became out of control, and even some of the previous news from Quinn also appeared in his mind.

Just like when he was sure that Yamato was not an artificial human, he felt very happy. Compared with being overwhelmed by strength and technology, he was more accepting of the former.

He didn't continue to think about it. In the current situation, he had no time to continue thinking about this issue. Now he not only lost air superiority, but even fell into a numerical disadvantage.

He attacked Genesect in order to make Yamato lose the ability to fight in the air. The drawbacks of Yamato's lack of flight ability have long been reflected in the battle.

But he couldn't do anything about it, Yamato not only used Genesect for aerial combat, but they even cooperated.

After Yamato jumps up with the help of Genesect, Genesect will release her shape-shifting stance to participate in the battle, and when her airborne time is about to reach the limit, it will re-turn into a flight pedal, and There are also very powerful and strange artillery.

The Genesects from GT-6 to GT10 are, to put it bluntly, weakened products. Their light cannons do not have the ability to switch attributes, but their power is equally good, but they are less targeted.

Although Gage was unwilling to admit defeat, the thought that the mecha was the correct one inevitably appeared in his mind.

Whether it is his battle or the battle of the clone troopers, he is already at a disadvantage, and Gaji has no intention of continuing to fight, after all, he has already obtained the data he wants.

Now he can't beat the opponent again. He feels that he has touched the threshold of some technology, and he wants to wait for the technology to break through before studying other things.

After gave the clone corps an order to end it through a special method, several of his sons also began to retreat back to Germa's fleet, and Gage also began to think about how to get out.

Those clone troopers were killed by suicide attacks, the only way they could delay Genesect.

Although the casualties were heavy, Yamato was not stupid enough to let the allies stop attacking because of pity for the enemy. In her opinion, the Genesect created by Arceus was also life, and much more important than the enemy.

She despised Jiazhi and ignored the lives of his subordinates. This is not contradictory. War will inevitably lead to death. She has already understood this truth, and the best way to reduce casualties is to use the fastest speed to defeat the enemy's main general.

Those clone troopers can't fly, and their weapons can't lock Genesect, but at this time someone helped Gage, and a few CPOs in white suits suddenly appeared here.

Their target is not Gage. At this time, the Kingdom of Germa is still a member of the Allied Nations. They have no reason to do anything. Their target is Quinn.

As the main suspect of the World Government, the World Government did not miss this opportunity. This team was originally carrying out other **** missions nearby, but they temporarily received information and handed over the original **** mission to CP9, and turned to execute it. New capture plan.

Chapter 494 Quinn Capture Plan

There are naval surveillance ships in the outer waters of Wano Kingdom, but due to the special currents of Wano Kingdom, those surveillance ships are at a certain distance from Wano Kingdom. There are many people who can fly within the Beast Pirates, so They have many ways to avoid surveillance ships.

Plus the ammonites have infiltrated that CP0 team's phone bugs like a sieve, and they've been reverse-monitored.

Quinn's whereabouts were discovered not long ago, and the reason for the discovery was because of the king of the Corgia Kingdom who stabbed Quinn's identity.

Although they are non-affiliated countries, they have the contact information of the world government, because there is a creature in this world called licking dogs, and many non-affiliated countries live like licking dogs.

The world government disdains them, cares nothing about their safety, and will not send someone to protect them, but these non-joined countries just want to be favored by the world government, so as to get the opportunity to join the world government.

Although it is sad, it is indeed the best way for a country to exist in this deformed world. Find an umbrella.

Collect protection fees to protect the security of the country, whether it is the world government or some pirates do this, Kaido, Whitebeard, Charlotte Lingling and other pirates are still pirates in name, but their In essence, it is already a warlord of the separatist side.

But they are named thieves after all. Unless it is a pirate country from the beginning, most people still choose to believe in the navy and the world government. Although the gold in the sky is very high, and there are stains in the navy, it is still better than most pirates. much more.

Believe in Quinn, they will have to pay a huge price after Quinn defeats Germa, and when they think of Quinn's onlyalive bounty, they have a new idea, and maybe they can take this opportunity to successfully become an allied country.

So the royal family of this country simply sold Quinn neatly, which also led to the current situation.

As the most trusted executioners of the world government, CP0 knows a lot of secret information. For example, Quinn's bounty has soared because of his scientific research ability, so is his own strength.

Of course, Quinn himself knew very well that 800 million of his 1 billion bounties were estimated to be pots. As the king of beast pots, he was also helpless about this.

In fact, these people have already arrived, but they have been observing each other secretly. Quinn's external strength is too mysterious, and they want to know more about Quinn's strength.

"Gui Ma, is it really okay for us to give up our original mission?"

"This is the command above, just execute it. For them, there is no need to think about the reason for the task, all they have to do is complete the task."

led CP0 indifferently.

Guima is not his name, but his code name. CP0 has many teams, and each team has its own unique code name. Then he continued to instruct his subordinates:

"Germa seems to be dying. That Quinn seems to have incredible skills. Jiao Xing, Xiang Cha, you go to deal with that little girl. He seems to care about each other. You can deal with Quinn with me."

Guima quickly made arrangements, and his subordinates followed their orders and acted separately.

The Genesect below Yamato made him pay more attention to each other. From his previous observations, those machines seemed to be very complicated.

Originally, Quinn was wanton bullying those ordinary Jemal clone soldiers. Under the absolute firepower suppression, those guys couldn't get close to Quinn even if they wanted to commit suicide attacks.

With the arrival of GT-8, Quinn became more relaxed. He knew exactly what the level of Jage was. In the MADS Institute, not counting Vega Punk and his research objects, he was Quinn. the strongest.

Caesar is a scumbag. Although he has the ability of the natural system, he is very weak. As long as he can be armed, most people can deal with him. Jiage is stronger than him, but most of his strength lies in his weapons and equipment.

Only he, Quinn, still exercised his body when he was transforming his body. After joining the beasts, he has sufficient physical strength and two-color domineering. It is not because of his extraordinary talent, but in the living environment of the beasts, anyone can exercise it. .

However, the appearance of CP0 disrupted Quinn's rhythm.

Kakugyo and Xiangcha appeared next to Yamato first, interrupting her plan to continue chasing Jiaji. Seeing that CP0 Jiaji, who appeared here, did not stop, but left here with Germa directly.

These CP0s are all killing machines that have been trained for many years, and they have no intention of talking at all when the goal is clear.no17ELuSB.COM

He is a capable person in this team, and can release powerful hypnotic toxins, which is very convenient when performing covert tasks, but these sleep powders have not affected Yamato at all, because the genesect under her suddenly emits a powerful suction.

All those powders with hypnotic effect are inhaled by it.

"Master Guiji, be careful, this powder is poisonous, and it may cause unknown effects if inhaled."

As a steel-type Pokémon, and most of its body is a special machine structure, the toxin has no effect on Genesect, it can act as a mobile air filter.

When Kakuro and Xiangcha attacked Yamato, Quinn had also discovered them, which was also Guima's plan. He hoped to use Yamato's attack to distract Quinn.

It turned out that he succeeded, these people who suddenly appeared here to attack Yamato really distracted Quinn, and he would have a hard time if Yamato had an accident.

Don't worry about Gage because he knows Gage enough, but it's different now.

When he wanted to support Yamato, Guima used Shaved to instantly appear in front of Quinn.

"Chance."

's thighs were raised high, a flash of purple light flashed on Guima's body, and then he stepped directly on Quinn's head.

Boom!

Quinn's head that turned into a tropical dragon slammed heavily on the ground, and several cracks spread along the ground to all sides.

"Captain, it was solved so easily?"

Looking at Quinn who was almost unresponsive, the speeding car came out in disbelief. He couldn't believe that a pirate with a bounty of one billion was knocked down by one blow.

Then, without waiting for Guima to answer, he and Guima used the moon step to dodge upward at the same time, and as soon as they dodged, a laser shot out from Quinn's tail, leaving a charred ravine in the original position.

Then Quinn pulled his head out of the soil, shook it, and looked into the sky disdainfully.

"Do you think this attack can defeat Uncle Quinn? Your attack is far worse than those perverts!"

This time, he hit him with a sudden attack that made him not react. After all, it was a crushing round before.

Seeing and seeing also requires physical strength, and he is not blind, so there is no need to cover his body with seeing and hearing all the time, so that CPO successfully hit him.

But hit and miss, whether it has an effect is another matter, compared to Kaido's stick, this one is simply scratching the itch.

shook his head, Quinn looked around at the situation, Gage had already retreated with the Germa army, and the remaining clone army was running out. Genesect was cleaning up the battlefield.

In addition to the CPO in front of him, there are also two CPO members on Yamato's side. Although the masks are different, this group of people is the only one in the sea who will wear uniform white suits.

Jage's reinforcements? No, how did these guys get here?

It's not surprising that CPO attacked him. After all, he knew that he had too many pots on his back. For those mysterious technologies, it was not surprising that the World Government would act, but what was strange to him was how he was discovered.

There must be no news from the nearby CPO, otherwise the ammonite beast should have warned a long time ago. Since it was transformed, it has evolved into a social ***, and the anti-eavesdropping function of the white phone bug basically cannot take effect on it.

On the way , he and Yamato hadn't left Genesect's back very much. They were always on the high-altitude platform. Only when they reached the East China Sea could they be discovered.

Encountered a spy on the way..or did the king do? But the reaction was too fast...

cursed a few words in his heart, Quinn ignored the question for the time being, how they got here is not very important, after dealing with this problem first, he has time to ponder slowly.*novelUsb.com*

It's a big problem if you can't handle the problem at hand. If there is a problem with Yamato, he will end up badly. It is estimated that it will not end well if it falls into the hands of the world, so leaving here safely with Yamato is his only choice. .

It's nothing to be injured a little bit. After all, according to the statistics, the most serious injury on Yamato's body was caused by Kaido.

The goal of has been changed, to protect Miss Yamato as the highest priority task, and all restrictions have been lifted.

In front of Guima and Feiqi, Quinn said something they couldn't understand, but the other four Genesects on the battlefield in the distance all moved.

GT-0 to GT-5 are full Genosects, they are stronger overall and are more complete creatures at the same time.

The GT-6 to GT-10 that followed Quinn and the others had more man-made parts. Although the overall strength is not as good as the complete Genesect, it also has its own advantages.

To command full Genesects, at least they have to hear themselves, but these semi-mechanized Genesects are different.

They have special signal receivers implanted in their replaceable bodies, and Quinn, who is also a transformed person, can directly issue commands within the signal range.

As for the so-called release of restrictions, it actually refers to self-destruction. The life part of them is all in the head, and the body can be replaced arbitrarily. In this case, the function of self-destruction is naturally added to it.

However, the manufacture of their bodies is also a big project, and they will not self-explode unless absolutely necessary. Although the source of Arceus steel is infinite, it also has a very high value.

...

Quinn's permission is just in case. He knows that Arceus definitely has a backhand, but he doesn't know what the backhand is. At the same time, he also knows another thing. As long as Yamato is fine, even if these machines are all destroyed here It doesn't matter, the big deal is to go back and re-manufacture.

Genesect, who received the new mission, changed his attack target instantly, and Quinn also picked up the two machetes hanging from his waist.

Come on, let you know how powerful Uncle Quinn is, you will regret doing this mission.

He didn't want to waste time. To be able to come with such a group of people means that his position has been exposed. Who knows if there are other reinforcements behind.

He doesn't know much about swordsmanship, and the weapon in his hand is more like swinging around, but with the addition of

The weapons modified all over the body and the ability of the tropical dragon itself, the intensive firepower pressed the two CP0s out of breath for a while.

...

Boom!

Another blast of energy from the tail bombarded the ground, the blackened ground exuded heat, and the white suits on Guima and Fei Che were not as neat as before, and even became a little tattered.

Do you guys just hide?! Where did the thing just go?!

Quinn's wings recovered, and a large number of flying blade knives flew towards the two of them. The sharp blades covered the land in front of them like rain. The density of this attack even exceeded their paper-painted dodge limit. Dodge towards other locations.

As for the iron block resistance, Guima's suit is so rotten, if it weren't for the speeding car to help him clear the siege, I'm afraid he would die under Quinn's firepower suppression.

At this time, the sun in the sky was very hot. It was a sunny day that Quinn actively released. In this kind of weather, he could quickly recover his stamina through photosynthesis.

In this case, the bullets converted by his own physical strength are endless for Quinn, and it becomes extremely difficult to escape once he is restrained by his attack.

Xiangche and Jiaoxing also have no advantages. Originally, hypnotizing powder was the most common trick used by this team to capture the enemy, but the modified Genesect completely ignored this ability, and under the siege of six machines and Yamato , they can't take advantage of it at all.

team leader! The corner line can't stand it anymore!

I know, let's solve this Quinn first, there is a problem with the intelligence, this guy's strength is not that simple!

Said that Guima actually stopped in place and began to return life to adjust the power in the body. Quinn naturally did not miss this opportunity, and all kinds of attacks suddenly shot towards this side, but in the end it was empty.

When he locked on the opponent's target again, he had already come to him.

Land Feet · Earth Dragon Flash!

Lan's script should be a flying slash kicked from the air, but the hanging horse gave up the attack distance of Lan's feet, and integrated stronger power into the kicking technique.

With a flash of white light, a heavy object fell to the ground, and Quinn's eyes became sluggish as a result, and the speeding car, who was looking for an opportunity, punched him in the head.

But this time he didn't move, his slender neck was as strong as a pillar.

Did you know... those three bananas are not fully ripe yet! !

Quinn felt her jaw empty, her anger reaching its peak at this moment.

-

to view

Chapter 496 Not everyone can withstand the power of kryptonite

Banana ripens three times a year. For better breeding, he does not eat much, so every time before the banana ripens is the moment he looks forward to the most.

Although bananas can be picked and ripened in advance, the taste of bananas that are naturally ripened to perfection is completely different from that of bananas that have been picked and ripened in advance for transportation and storage.

The bananas that were cut off obviously couldn't be taken back, which meant that the time he had been looking forward to the most for months was ruined by the other party.

For some reason, Guima and Fei Che sensed an unusually terrifying aura on Quinn, who was completely different from the one just now.

"I'm really angry! QUEEN!" *Novelus8.com*

lost the weapon in his left hand, the manipulator mounted on his left arm suddenly stretched out, and the pliers at the front gripped Guima's waist tightly. The huge grip made him unable to break free.

"This is Germa's."

Germa's abilities are not a secret. After all, people have drawn them into comics. As long as you know that the prototype of the villain in the warriors of the sea and the sky is Germa 66, you can know what Germa's abilities are, let alone them. Or the government's intelligence agency.

"What is Germa's? This is Lao Tzu's technique. There are some things that Gage can't do alone."

After the bananas were cut off, they committed Quinn's second taboo, which was to introduce Germa's technology in front of him. He and Gage had been in conflict with each other since they were in MADS. Quinn developed these technologies. It is to prove that one's own ability is never weaker than the other party's.

The technology that Gage put on the battle suit was completely transformed into his body, and then the extended manipulator began to recover, and Guima also noticed another huge suction.

Unlike the robotic arm that controlled him, he felt his physical strength was constantly draining.

"You have to pay the price for what you have done, try the ultimate absorption!"

Drain, Super Drain, Ultimate Drain, Grass-type Pokémon's series of skills, the effect is the same, take the enemy's physical strength to restore your own physical strength, but the more powerful it is.

Since the banana was destroyed, Quinn activated his ultimate drain based on the power of draining the opponent.

The huge power of the winch developed by the bloodline factor made him unable to break free, not to mention that the ultimate suction was still plundering his physical strength. When the existing physical strength was exhausted, the continuous use of the ultimate suction would be plundering life force.

"team leader!"

The speeder next to wanted to come and help, but Quinn had already prepared something to deal with him.

"You kid, show me the feast of explosions!"

Before Quinn finished speaking, seeds like bouncing mines suddenly floated on the ground. These were seed bombs, and their source was just fired by Quinn using the seed machine gun.

Every seed was a terrifying bomb at this time. As for the number, he didn't know how many bullets had been fired in the previous firepower. .

Even in version 1.0 where the power of the bombs has not been upgraded yet, this continuous seed bomb is not something that the opponent can bear. He does not have the area of Shenwei Space that can evade the explosive attack in minutes.

Time is passing slowly, the speeding car in the explosion has stopped moving, and the resistance of the Guima in Quinn's hands is getting smaller and smaller. After he almost turned into a mummified state, Quinn cut him into two pieces with one knife. Half.

And Yamato doesn't seem to need his help either. The battle there has already ended, but both GT-9 and GT-10 have only one head left, and they are using a fire-breathing device to levitate in the air.

These Genesects deal with problems in a more mechanized way. Based on their analysis of the battle situation, they chose the quickest way to fight.

The priority of Yamato is the highest, and the cost is not important. As for Yamato's combat power and who is stronger than the two CP0s, they are not considered by them.

So in the battle, they chose to disintegrate on their own, restraining each other at the expense of two bodies, and then let the other Genesects conduct a focused fire attack, and at the same time activated the self-destruction program.

The price paid is not small, but the results are also obvious.

"You really don't feel pain?"

Looking at the two Genosects with only their heads left, Yamato's voice was a little distressed.

"No, Guiji-sama, our body is just a machine. We can replace it with a new one when we return. This is the most efficient way to fight, please don't worry."

At this time, Quinn also came here, looked at the devastated battlefield and said to Yamato: "Miss Yamato, we should leave, this place is not very safe."

If it was himself, he wouldn't worry about anything. These CP0s should have been destroyed, and he didn't see them sending news, but it's better to be careful now.

Corkia's remuneration has also been received. Although the king notified the World Government, they still paid for the goods first. His idea was to wait for the people of the World Government to defeat Quinn and then take the money back, but it seems that Obviously there is no chance.

As for revenge, now they can't figure out where these CP0s came from, and they didn't leave a living mouth for torture. He plans to study this issue after he leaves here.

Even if it was really done by the Corgia Kingdom, they couldn't escape. Not everyone could drag a country away like Oz.

"Okay, shall we go to Beihai next?"

According to the original itinerary, they still have a mission in the North Sea, but now Quinn is not sure whether they should continue to carry out this matter.

So he chose to contact Onishima. Just in case, the contact made by Rotom was still used, and the phone bug was still at risk of being eavesdropped, but there is currently no known creature or machine that can eavesdrop on Rotom's information.

"Lord Arceus, we encountered a little trouble, but it has been resolved, see you next"

Quin briefly explained what happened here to Arceus, and began to ask about the next plan.

"Continue as planned before departure, don't worry too much."

Neither Zekrom nor Lexiram was activated, which meant that the other party was safe, and then Quinn was taken away by Yamato.

The main topic is the Genesect problem.

"Don't worry, their bodies will be made soon, just let No. 7 bring them back first."

Hearing Arceus' promise, Yamato followed Quinn and continued his actions with confidence, but on the battlefield of Corgia Kingdom, Guima, who was sucked into a mummified corpse and then cut in half, actually got up again.

Two updates today..

Chapter 497 Germa is about to change his painting style

The shriveled eyelids opened again, and the zombie-like palms struggled to support his body and crawled up.

"Quinn. This guy."

Guima's voice was extremely hoarse. Both the war machines and Quinn's abilities far exceeded their expectations, although in previous battles, Quinn had already shown that his abilities were not ordinary Brachiosaurus.

But this ability to plunder life force was far beyond his expectation. If he wasn't a capable person, he might have to be wiped out with the team.

There were scattered footsteps not far away. They were the observers sent by the Kokia Kingdom after seeing the end of the fighting opportunity here, but in the next moment, their chests were pierced by unknown attacks.

"It just happened to come"

It was Guima's fingers that pierced through them, and his body stretched out inexplicably like an indescribable object.

Animal type · insect fruit · earthworm form, this fruit doesn't give him a big boost in battle, and after the transformation, it is so ugly that it is hard to describe, so Guima rarely uses him in battle.

What he used the most was the life-saving ability brought by earthworms. Strictly speaking, earthworms are not insects, but because of their shape, they were still put into the insect fruit.

Earthworms will not die after being cut in two, but can generate two brand new earthworms, provided that the cut is not vertical. *novelusB.cOm*

The ability of the earthworm has not been fully engraved on him, at least he will not become two guimas, but will grow new limbs from the upper body. Through this ability, he has also achieved severe limbs in the past few missions. Rebirth.

And this rebirth consumes physical strength. If he is only missing an arm, he can supplement his consumption by eating a lot of food and returning life, but not now.

Quinn had sucked him dry, and his body had been cut in half. He didn't have the time to recover slowly, so he could only supplement his own needs by plundering the lives of others.

Quinn was already careful enough. After sucking the adult, he even made up the knife. The only mistake was that he didn't cut off the head. Earthworms are not immortal, as long as the cutting position is accurate enough, they can kill the opponent.

Whether beheading or chopping vertically can do this perfectly, but Quinn did not expect that the other party is a person with abilities. After all, it is rare for people to die without using abilities.

And this is also Gui Ma's judgment. Even if he uses his ability, he may not be the opponent of the opponent. Rather than fighting Quinn desperately, it is far better to save his life honestly. Facts have proved that he is still betting right.

The shriveled body is slowly recovering, and the price is the death of several other soldiers. Then the first thing he does is to take off a pair of pants. He is not the kind of natural and phantom beast who can enter the state of ability with clothes people.

The original suit pants had been blown to pieces, and the newborn limbs were bare. Naturally, he had to find something to cover him, and then he continued to search on the battlefield, but what he was looking for was not the corpse of his companion.

When they were still alive, these people were his subordinates, but if they were dead, they were dead, and there was no point in finding the corpses. What he was looking for were the fragments after the explosion of Genesect.

Finally, he left here with some metal fragments. CP0 has hidden supply stations all over the world, and he is going to report the situation here. Judging from the current performance, they seem to have underestimated Quinn's own strength.

While Guima withdrew to the safe house, Gage also led the Kingdom of Germa to retreat towards the Red Earth Continent. This war undoubtedly failed, and they failed to capture the Kingdom of Kokia.

But they also have their own gains. First of all, the clone troopers are undoubtedly successful.

After retreating to a safe place, he gathered all the scientific researchers in Germa together.

This team is one of the foundations of Germa. They are not clones, but geniuses recruited by Gage in various fields. At the same time, he himself is the leader of this team.

At this time, he has proposed a new idea, bloodline factor armor.

Germa's combat uniform is made of special materials. This material can make clothing harder than steel, and it naturally has other uses.

Under the leadership of Gaji, a mecha plan that can only be controlled by Germa super fighters was proposed, and according to biology, purely humanoid mechas are not suitable for combat, and in various battles, the size of beasts is also larger than that of humans. Much more convenient.

But it is difficult to simulate the driver. Referring to Genesect's transformation ability, he thinks that the mecha should be able to transform between human and beast.

"Commander, there is no problem with this idea in theory, but...we don't have the kind of metal material that can deform. If we want to achieve deformation and high-strength combat, the materials we have can't realize this problem."

"You don't have to worry about this problem. I also know a little about the research on memory metals. It won't take much time."

This is the benefit they got when they worked with Vegapunk, Gage, Quinn, and Caesar Courant. They may have bad personalities and different talents, but their scientific research capabilities are top in this world.

Positive research may not be possible, but reverse derivation is still no problem. Vegapunk has also been involved in the subject of memory metals. Even Germa's battle suit has certain shadows similar to memory alloys, but not too many. .

Although there are some defects in the Wabo alloy produced by the lack of Valbo's ability, it can barely be used.

Now that Gage has brought up a new topic, he naturally has a way to study that area, and the mechanical aspect is also his main area of attack.

Now the children are starting to be normal, and the clone soldiers have no problems, so they just started new research.

After being confirmed by Jia Zhi, these people also began to diverge their thinking to study the so-called mechs, and some even suggested that for greater power, they could consider combining them.

On the other side, Quinn and Yamato are on their way to the North Sea. At this time, there are only two Genesects left beside them, and the remaining one has returned ahead of schedule with two self-destructed Genesects. Wano country.

Quinn looked very sad, but he was only feeling sorry for his bananas, even if he killed all those people, he would not be relieved, for him, those people were not as important as his own bananas.

As for offering rewards, he doesn't care anymore. He doesn't care much about his debts, and it doesn't matter if there are a few more pots. It can also be confirmed from the ammonite beast's eavesdropping. There has always been a high suspicion of him, not affirmation of him.

The navy is not a fool. Although it is often stupid, the beasts have not kept secrets about Arceus' abilities. investigation.

Chapter 498 The real dangers of second-hand smoke

Although the number of Genesects has decreased, Quinn has become more at ease. Arceus' location in the previous communication was undoubtedly Ghost Island. He heard the screams of Ulti and Peggy Wan sounded.

This made him more convinced that Arceus definitely had a backhand. Although he didn't know what that backhand was, it must be much stronger than him.

The upper limit of Arceus' strength is also a mystery within the Beasts Pirates. He rarely makes a move, and the few times he makes a move are all devastating battles.

The highest known record so far is defeating the admiral of the Navy headquarters. Coupled with the many miracles, Quinn knows very well that Arceus may only have one trick to solve him.

Since this is the case, he can act more recklessly.

"Damn CP0, if it wasn't for those guys"

The hatred of destroying bananas is irreconcilable, and now all creatures with CP in their names have become his sworn enemies.*nOVeℓuSB.cOm*

However, unlike Quinn who was full of resentment, Yamato at this time was very excited and full of expectations for the future itinerary.

"Uncle Quinn, where is the transaction place?"

"Beast Island in the North Sea, it will take a while to get there. Don't worry about Ms. Yamato, it's just a simple transaction. There shouldn't be any accidents this time."

"I'm not worried, I just feel very happy. This can be regarded as doing something for foster father and father."

This is the reason why she is very excited. In the past, she was followed by someone on the voyage. Although it was for the protection of safety, she was more like a tester, completing the tasks assigned by others.

But this time is different, although there is a Quinn next to him, but Quinn did not provide much force support, and before the unexpected factor of CP0 appeared, Genesect did not intervene much.

The next task is to replace the Beasts Pirates to trade two devil fruits. This is something that cadres like Olga would do in the past, which makes Yamato feel like he has grown up.

Now she can do things for others, instead of a child who can only watch and learn.

Going from the East China Sea to the North Sea needs to cross the Red Earth Continent, but they did not go directly to the trading location, but landed after crossing the Red Earth Continent.

Quinn and Yamato are still humans. They need to eat and rest normally. Being able to persist in battle for a few days and nights does not mean that they will be like this in normal times. For these people with monster physiques, eating and resting on weekdays are very important.

It is the large amount of energy stored in leisure time that allows them to last longer in sudden battles, and Genesect also needs to be recharged.

This is the difference between the modified version and the full version. The six complete Genesects from GT-0 to GT-5 are no different from Pokémon. They can recover their physical strength after eating and resting, but the modified version is different.

They don't need much rest, because the mechanically modified bodies don't get tired at all, and they can't replenish energy by eating, and can only absorb energy such as electricity and fuel like machines.

But this is a world of black technology. Coke can be used as energy to develop a special engine. As a member of MADS, Quinn naturally has some black technology inventions.

The energy reserves of these Genesects are mixed, charging, fuel, and even burning stones directly. Now the two Genesects are "eating" stones to supplement the needs of the body.

If it weren't for what he was reluctant to eat, he might have developed a wonderful machine that uses rice cake and red bean soup as energy.

While GT-6 and GT-7 were digging and eating rocks, Quinn and Yamato were enjoying local specialties in the town. Among all the cadres of Hundred Beasts, Quinn's hedonism was the highest.

He would never choose to sleep in the open if he could live a more nourishing life. The pig cart in Wano's country is a feature. He can fly by himself much faster than let the wild boar pull the cart, but for the sake of showing off, he always sits on his own wild boar when he goes out. The car swaggered across the border.

At this time, he was sitting in a restaurant. Although he was tall, he was not too eye-catching. Ordinary people would not care about reward orders.

Although there are many pirates in this world, most people's lives have nothing to do with pirates, especially in the countries that have joined the world.

Quinn is very famous in the pirate and navy circles, but not among civilians. The only pirate who is so popular that he is known to the whole world is Gol D. Roger.

Taking a step back, even if they are discovered, a large number of people choose to turn a blind eye. Just notifying the navy will not get much reward, and they have no ability to catch the other party directly.

Otherwise, fighting will not benefit you at all, and it may even cause you to burn yourself.

Alabasta is an example. Ace walks inside with a white bearded flag on his back. Except for those bounty hunters, ordinary people have no interest in reporting.

If the pirate escapes, no one can tell whether he will be retaliated afterwards.

While waiting for the food, Quinn was also looking around for something to have some fun, but Yamato inadvertently stabbed him in the back again, because she didn't know when she picked up the cigar that Quinn had left on the table, are even cut out.

"Miss Yamato, this is not something you should touch."

He was a little thankful that Yamato's ability was ice instead of fire, otherwise the cigar would have been lit.

"Can't you? I think Aunt Lizi likes to smoke a pipe, and you are always smoking a cigar along the way."

This age is the age when curiosity is at its peak, and cigarettes are the most harmful to people of this age. Because they don't know what cigarettes are, curiosity arises, and they become addicted after trying. This is how many people's addiction to smoking arises.

If no one in the family or around them smokes, the chances of this will be much lower. Among the cadres of the Beasts Pirates, only Quinn has a serious addiction to cigarettes, smoking cigars almost every day.

In terms of the physique of these monsters, the harm of second-hand smoke is not much, but if Arceus knows that Yamato came out with him, he will learn to smoke.

Maybe the next day he will be a target on the training ground, but Setsuna didn't take his photo off the shooting range until the day of his engagement.

"Miss Yamato, believe me, Lord Arceus won't like you smoking, and for the safety of my life, please don't touch it, please."

Being raised since childhood, some of her personality has been fixed, and Arceus has never rejected her for most things, but what was strictly prohibited last time was tattoos. After listening to Quinn's solemn request, she gave up this idea.

"Uncle Quinn, how about we go to the movies? Do you think that is Brother Tezolo and Sister Stella?"

Looking in the direction of Yamato's finger, a movie poster is hanging at the entrance of the theater.

Chapter 499 The Mermaid Movie Released

Naturally, there is no way to show movies on some Taikoo islands, but here is the four seas, not the great route. Most of the changeable solar terms and exotic islands are distributed in the great route and the windless belt.

Although there are differences in the development of the islands in the four seas, they are generally at the same level. There will be no gap between the Stone Age and the Electric Age. As long as they are richer countries and islands, the entertainment measures are very complete.

Quinn stopped to rest just for enjoyment, so he would naturally choose an island with better development, and cinemas are not uncommon in this place.

"Tezolo? Is it really him? Has that movie been released yet?"

Before he and Yamato left Ghost Island, similar news came from Tezolo. This was the movie shot on Fishman Island. The shooting time was not very long, but the post-editing and clearing up the relationship took a lot of time. more time.

The world government is the world government after all. Although movies can be circulated without their approval, if you want to play them in all member countries, you have to get the approval number of the world government.
novelusb.com

Even so, some countries will still prohibit the broadcast of some films, because such films will violate their local customs, and those protagonists may be heresy in the local area.

As for Yamato's address, he had already given up resisting, but he added a comfort to himself. Yamato called other people Big Brother and Big Sister, but he only called himself Uncle, which means that he is a generation older than them.

He didn't refuse Yamato's proposal to watch a movie, it only took two hours at most, but he seemed to feel the discrimination against him by the movie theater.

"What? Can't I sit in the first row? Ah! Isn't this money, don't you look down on me?!"

"No, this guest, but if you sit in the first row."

Looking at Quinn's size, the conductor showed a embarrassed look. I'm afraid others don't need to see Quinn sitting in the first row. This size may even block the projection port of the projector.

If Yamato didn't like to be more lively, Quinn would definitely choose to book the room directly, but in the end he could only choose the VIP room on the second floor, because he couldn't get in the ordinary seats at all.

The beginning of the movie is very simple. As the heir to the king, Tezzolo encountered a storm at sea and unfortunately fell into the water. After that, he was rescued by a mermaid named Stella.

At the beginning, he was also afraid of mermaids and murlocs, because according to the rumors in his country, mermaids and murlocs are evil ghosts that eat people, and they carry a deadly virus on their bodies, and they will transmit fish plague to humans as long as they come into contact with them.

This is not his fiction, but many places really have this kind of misunderstanding of murlocs.

But after getting along, they found that it was all the prejudice of the world, and then they fell in love smoothly.

But as a prince, the king did not agree with this matter, and even bought a group of pirates to abduct the famous mermaid.

He thinks that his son should marry the princess of a country and live with a powerful kingdom.

But the ambition of the pirates was more than that. They also kidnapped the king and extorted a huge ransom. In the end, the mermaid led the king to escape from the claws regardless of the past.

During this process, the queen quietly found Tezolo and let him know what happened.

Then at the last moment, the male protagonist appeared and defeated those people, and everyone lived happily together.

There are a lot of private goods in it. For example, the king and queen dote on their son very much, and even invited him the best vocal teacher in the country.

That is Tezolo's dissatisfaction with his life. He longs for a pair of parents who can support him, but the reality has disillusioned his ideals, and he can only fabricate such a fact in the movie.

The purpose of the film is to promote that mermaids and murlocs are equal to human beings. Parents and children need more communication. They don't pursue any artistry that ordinary people can't understand. He didn't make this film to win awards, so that ordinary people would like to watch it. Going down is the most important thing.

Although the plot is not so superior, it is above the average. With the free grand special effects and lifelike fighting, the response of this movie is not bad.

But Yamato was not able to substitute it in, because most of the actors in it were people she knew, and it always seemed that there was something out of the play.

When other people look at scenes that are a little moved, she will always substitute some funny pictures. It is the same effect as when watching *The Shining* and discovering that everyone has Zhang Wei's average face, and she can't be moved at all.

The filming of Murloc Island attracted her instead, which was much more real than the postcard Jack brought back.

So Murloc Island was also included in her future voyage goals.

Quinn plans to ask Tezolo for the contact information of several supporting actors later, and he has two more favorite actresses.

For ordinary people, this movie has a certain scientific nature. At the request of Otohime, Tezoro gave Murloc Island a two-minute narration to popularize their legitimacy. He also mentioned in the ending Merfolk and murlocs are people not fish bill.

But in other places, the response to this movie is completely different, especially in Murloc Island. Watching this movie, Otohime was already moved to tears.

The plot is only part of it. The most important thing is that she felt some long-lost good emotions among the movie-watching crowd.

Some came from murlocs and merfolk, and some were humans who stayed on murloc island, which was a very good start for her.

There is no dedicated movie theater in Murloc Island, but for this movie, she specially asked the Beast Fruit Mining Division to get a projection machine, and it was screened for free at Jid Kaolong Square.

Encouraged by Otohime, many people chose to watch this movie, and some people came to watch the movie for free with the idea of whoring. Movies are a rare commodity in Murloc Island, and it is the first time for many people in their lives. Hear the word.

So during the screening, Gidekolon Square was overcrowded, and Neptune even dispatched the Neptune Army to maintain order here.

Tezzolo did not abandon the reality. He used Rusaka's words to mention one thing many times in the film, that is, the land is very dangerous for mermaids, and young mermaids should not get close to it. He does not want to appear because of a movie. There are more unexpected mermaids.

He hated the status of slave very much. In the original timeline, he had completely lost his light because of Stella's death and the life of a slave, so he chose to use money to enslave more people.

But it is different now. He is a senior member of the Anti-Slavery Association on the Red Earth Continent. The goal of this association is to get the World Government to ban slavery, but it is completely useless. At most, it can only help some people in distress in the dark.

Chapter 500 Dover brings elephants like a family

Sometimes just a little help can completely change a person's fate. Tezolo has a deep understanding of this. If he hadn't met Yamato, he couldn't have imagined what would happen.

So he will help some people as much as he can.

The response to Murloc Island was good, and Murloc Mining also had a group of new employees, but Neptune also understood that this movie brought not only opportunities, but also crises.

The movie is showing the beautiful side of Murloc Island, which can bring friends with good intentions, as well as enemies with malicious intentions.

One thing he didn't tell Otohime, that is, there was an arms order sent along with the movie tape, maybe we really need to think about this thing.

On the other side, the Sun Pirates, they also received a similar film, but some people didn't want to watch it at all during the screening, but because of Tiger's influence, Jinbe, whose attitude towards human beings gradually changed, watched it with gusto.

"Hey, Aaron, don't you really want to watch it? I seem to have seen Xia Qi just now."

"Cut, I'm not interested. Human beings make movies about murlocs. They don't even know what murlocs are."

But in the end he was taken there, after all, there were not only humans but also murlocs and mermaids there, but the reason he watched the movie was to criticize the other party's wrong behavior.

On the back of the elephant master, as foreign things are continuously imported into Zou, movie playback equipment has also been popularized here. At this time, several fur tribes are debating whether the term "fish fur" should be used.

They saw the scene under the sea for the first time from the film.

On a passenger ship in the East China Sea, Sanji, who had finished helping the cook, also saw the movie shown in the restaurant from the window. He was inevitably a little stunned when he saw the mermaid lady under the sea.

Not all places are showing this film. For example, the Goa Kingdom in the East China Sea regards this film as a prohibited film. In their opinion, there is nothing more stupid than promoting that kind of alien race.

The movie has slightly changed the world's perception of Murloc Island, but it doesn't fundamentally affect anything.

The influence of culture is a subtle process. After many years, those who have seen the film and arrived at the Fishman Island may change their minds and do some different things.

After a short break, Yamato and Quinn continued to move towards the trading island, and the time for trading was getting close.

In Punk Hazard's research institute, the metal residue brought back by Guima has appeared on the experimental bench here. At this time, a slightly fat man with the appearance of a robot like a clockwork key on his head is studying it.

The 04 on his chest shows his identity. This is a clone of Vegapunk. In order to have more research time, Vegapunk conducted magical research on himself, and finally gave birth to many himself.

The number one Sakyamuni representing "integrity"

represents the "evil" No. 2 Lilith

Edison No. 3 represents "thought"

Pythagoras No. 4 representing "wisdom"

Atlas No. 5 representing "Frenzy"

Number Six York representing "Desire"

There is a wonderful connection between these six clones. Only the sixth York can eat and drink alone, and the other clones can maintain a full state.

"Quinn made this?"

"I'm not sure, it's just a suspicion of Quinn. These are some battle scenes recorded by CP0. Please have a look."

The assistant next to him turned on the screen on the side, which was the scene of Genesect leading Yamato and Gaji fighting secretly recorded by CP0 before the action.

Looking at the deformed Genesect, Pythagoras' eyes showed strong interest. He has studied the subject of memory metal, but it has not been perfected. Even what Gage said before is just crossing the river by feeling the stones Barely usable material obtained.

But judging from Genesect's performance, this is obviously a more perfect technique.

Complicated instruments began to analyze those metal fragments, but in the end they found nothing, which was not any existing metal, and the failure of the instruments only lifted Pythagoras' spirits.

"Interesting, interesting, Guy Quinn has already touched this field? Get out, don't bother me, I don't have time to deal with you."

Vegapunk's avatar almost turned his face and refused to recognize anyone. After driving the assistant out, he picked up a brand new device and started his own research.

While Vegapunk was studying how the material Arceus Steel appeared, Yamato and Quinn also arrived near Beast Island.

This island is called Beast Island not because there are many beasts on it, but because of the unique trees here. These trees grow completely irregularly, and each of them looks like a wood carving of a beast.

The top of the mountain in the center of the island looks like the head of an unknown beast from a distance, so it is named Beast Island.

And in the center of the island, the Don Quixote family has been waiting for two days.

This kind of long-distance transaction has no way to accurately time, and can only plan a rough range, but the current Doflamingo feels very wrong.

"Torrebol, when was the last time you were chased by that old woman?"

"Three months, Dover, she hasn't tracked us for three months." nOvElusE.com

Doflamingo tapped his fingers on the armrest of the chair lightly, but his expression was ugly. The crane stuck to him like a plaster during the previous period, and he couldn't get rid of it no matter what, even if he changed his base, within half a month, the other party will come to your door.

Someone is deliberately leaking his whereabouts, but he doesn't know who this person is.

"I said Dover, Corazon just left three months ago."

"I hope he didn't make Virgo speed up. He'd better climb to a high enough position as soon as possible, and then figure out who this person is."

"I see, but Dover, are those two fruits really going to be given to them for free? This one is fine, that one is an ancient species."

Seeing that Doflamingo didn't want to say more about the traitor, Torrebol quickly changed the subject.

Pointing to the two fruits on the table, Torrebol was a little bit reluctant. They were the goods they used to trade with the Beast Pirates, the animal department, the elephant fruit, the elephant form and the animal department, the elephant fruit. Ancient species · mammoth form.

Ordinary elephant fruit is nothing, but that ancient species is still very important to them.

"Oh, Torrebol, don't be so petty, they are beasts, whether in the new world or the underground world, they are the same existence as the overlord, as long as we establish contact with them, what we get will only be better many.

It's just a small effort, as long as it succeeds, it's all worth it. "
