

Arceus 741

Chapter 741 It is common sense that there are random venues for "Pokémon" battles

"Hey, after a year, everyone has come to this arena again. First of all, let us thank Lord Arceus for providing the venue!"

Compared to the shyness when she first appeared on the stage, at this time she has adapted to such a grand environment.

The phantom fruit was used more and more proficiently in An's hands, and the giant projection launched a comprehensive introduction. Everyone was very satisfied with the new host, except for one person-Quinne.

Originally, this was all his stage, but with the rise of An, he was only responsible for hosting after the battle started.

On the surrounding rock pillars, the audience has also arrived at the predetermined position, and with the rise of the rock pillars, the navy's surveillance ship has also lost control of the internal situation.

As for spies, it is not so easy for beasts to sneak in these days. Those who come here are either veterans or cadres in the number. Any new face will be interrogated several times while checking the ID card.

As for why he did this, don't ask, the question is that Quinn doesn't want to be stabbed in the back, even if he came out with Arceus and Kaido, he puts his own safety first, unless it is an extremely special case, don't let it He left base camp alone.

No one insists on sending intelligence personnel here at this time. These cadres will be active in various sea areas on weekdays.

I want to investigate them. I usually have plenty of time. Now the pirates gathered here have a total bounty of more than 10 billion, which is an extremely difficult force to deal with. There is no need to come to trouble now.

If Kaido, who is in high spirits, is disturbed, there will be no friendly development in the future.

"Everyone knows the rules of the transposition battle. Simply repeat Master Kaido's request. As long as you can't be beaten to death, fight to the death! Now, the game begins! After the end of the division, you can choose the one you want to challenge. Goal!"

Then Ann crushed a small ball of light, which was given to her by Arceus in advance. It is a special venue controller. The hosting has been handed over to Ann and Quinn. He and Kaido are just spectators. .

In addition to the highest auditorium around, the middle field has undergone a huge change again.

"The mighty power from Lord Arceus, first of all the sea!"

A site collapsed, filled with sea water, only a few platforms were exposed, and finally formed a special water site.

"Mountains and Rivers!"

There are many mountains and mountains, and a small mountain range is formed under the raised rocks. The weathered rocks fill the site in the form of sand and dust.

"Rainforest!"

A large number of plants grow in the cracks of the rock, forming a small tropical rainforest in an instant. The dense canopy blocks the surrounding sunlight, giving the site the unique mystery of the rainforest.

"Plain!"

The change is the smallest, except for an extra piece of grass under the feet, there is nothing else, and the field of vision has become very wide.

"Night!"

The light in an area was taken out of thin air, darkness shrouded it, and night appeared in day out of thin air.

Besides, deserts, cities, and ship decks, the island was divided into eight areas in the blink of an eye, and each area has its own fighting style.

Numbers symbolize the combat power of beasts. They are not mascots, but warriors rushing to the front line, facing various war environments.

In addition to abilities and one's own strength, the surrounding environment will also affect a person's combat effectiveness, such as Crocodile in Alabasta and Moria in the Devil's Triangle Sea Area.

In that environment, they can maximize their strengths.

The same is true for the abilities of Pokémon. The ocean field is more suitable for water-type Pokémon to play. The big-mouthed bat can show its unique advantages in the dark field. Because of this problem, Arceus added more to this competition. combat environment.

However, it is not the challenger that decides the venue, but the challenged one. Most of the Beasts nowadays are engaged in external battles, and they rarely experience home court advantage. If they want to gain a higher status, they must be able to overcome the environment adverse effects.

"Ah~ Is it finally dark?"

Wearing a large sleeping bag on the bear's back, Perona crawled out of it. Her night owl personality has improved, from turning upside down every day to occasionally staying up late, which is not a small improvement.

Just now, their position happened to be in the dark field, and she thought it was already dark.

"But why is it so noisy, is the game still going on after dark?"

"It's just the beginning, Perona, watch out for Meowna and Worf, don't let these two brats fool you like Bepo."

"sorry"

Perona, who had just woken up, hadn't figured out what happened when Beppo's apology sounded in her ears, and then her arms sank, and the two children were thrown over.

Although Ling, Wanda, Bebo, Hatch and other fur tribes are all here, they all have a strong interest in this transposition battle. When he got here, he was also kidnapped.

Just became a qualified child-watching member in Setsuna's eyes.

"Before I come back, don't let the two of them run around, I believe you can do it, and then I will buy you that limited-edition dress, and I will go first."

As she said that, she went to her garrison area - the rainforest, which is her favorite fighting environment.

As soon as she left, Miaona and Wolf became active again, and began to plan how to fool this sister, but Perona was not as innocent as Beppo. The next moment, the two of them were hugged by a bear wearing a bear, one left and one right, There are also two passive ghosts watching them.

"Be good, wait for Setsuna's mother to come back honestly, you can decide which area you want to watch the game."

Perona asked Beppo about what happened when she fell asleep, and then shifted the task to wearing a bear. Compared with her strength, wearing a bear can keep them in check.

In different venues, the position change battle has already started. Compared with the battles of previous years, the change of position order is not particularly obvious. The reason is one aspect of strength, and at that time, it is difficult to gather such a team at once. many people.

The most obvious changes are Jack, Maria and other new-generation cadres. They have been gradually climbing up their positions. At this time, most of them already have the ability to challenge single-digit numbers.*novelUSb.com*

For example, Jack, as he told Mandelfish earlier, his goal this time is NO.2.

In the past qualifying battles, his rank has been constantly rising, and this time he chose to reach the position directly in one step.

After a brief discussion, he has gone to the venue chosen by Elizabeth.

Chapter 742 Jack and Elizabeth, the battle of two extremes

Urban site, a large number of buildings fill up the area, leaving only some wide streets for people to pass through.

The level of realism of the buildings is not particularly high. Arceus' ability is not applied to the buildings, and he doesn't know how to build a wooden city. These houses are just a little bit like a house, which can be used as a bunker, but it is enough for a arena. .

This is the area Elizabeth chose. Although it has the ability of water-type Pokémon, and the main body is also a basilisk lizard that can run on the water, she did not choose the ocean site, but chose this urban area.

Sniper, assassin, this is her own position. As Olga's partner, she has been active under Olga's phantom, becoming the most terrifying knife in the shadows. Frontal combat is not what she is good at. .

In the sky, several Chinese Valentine's Day bluebirds flew over, and the sky above the city venue became extremely clear. They acted as the weather hand of this competition area, adding more unstable factors to this competition.

At the same time, Quinn also flew over with a microphone. Ann had finished her task, and it was Quinn's turn to be the host.

Under Kaido's request to beat him to death as long as he can't kill him, both the audience and the host have certain risks, and Encore can't do this dangerous job.

So that even the audience has to have a certain ability to protect themselves, or their relatives and friends have a certain ability to protect themselves.

So those who can come here to watch the battle are either the core members or the family members of the core members. The most risky ones are those pirates who come to see the world with the captain of the affiliated pirate group.

It's just that before they arrived, they had already passed Quinn's very careful review.

Since the arena has risen, the navy's surveillance ships know that the routine activities of beasts are going on here, but they don't know what's going on above.

If someone could get in here, those surveillance ships wouldn't have to risk their lives nervously watching the surrounding area.

"Mhahaha, the familiar Lord Quinn is back, now let me see the battle situation, Miss Olga's partner Elizabeth and our brother Jack are ready for a duel, let us hey! Be careful, don't accidentally injure Referee be careful, I will rule you out!"

Passing by above the arena, Quinn explained the battle situation everywhere, and at the same time avoided all kinds of inexplicable attacks. He suspected that some of the attacks were aimed at him.

At this time, the battle between Jack and Elizabeth had already begun, but it was not very intense. Compared with the heat of other arenas, it was extremely quiet here. The moment the battle started, Elizabeth had already disappeared from Jack's vision.

Armed color and knowledge color are not exclusive to human beings. As long as there is enough talent and opportunity, any creature has the possibility to develop arrogance. Jack's knowledge color is not his strong point, and he didn't perceive Elizabeth's position at this time.

The game of knowledge and knowledge is not that I predict you, and then I predict your prediction, so as to carry out unlimited matryoshka. In that case, the way of fighting will become two people standing still and staring at each other. *.Nov&Els&b.cOm*

Knowledge color can not only perceive others, but also can be used to avoid other people's perception. When two people with similar levels of knowledge color fight, it means that everyone has no knowledge color. At this time, the fighting depends on the instinct of the body.

Jack, who was transformed into a bronze elephant of the king, looked at the surrounding environment. Suddenly, a powerful water cannon shot out from the window of a house, but under Jack's defense, he only took a few steps back.

His armed color is far stronger than his knowledge color, and the defensive power provided by the king's bronze elephant did not cause any impact, but when he attacked in the direction of the attack, he found nothing except empty buildings.

At the same time, from another direction, Elizabeth's attack hit the bull's-eye again, but the effect was still not obvious.

After several trials, black lines appeared on the brows of both sides, and the opponent's fighting style was not liked by them.

Elizabeth is used to guerrilla warfare, using her stealth and high maneuverability to seek one-hit kills on the battlefield. Facing Jack, a high-defense heavy fighter, her attacks are difficult to be effective, which severely limits own efficiency.

At the beginning, she used this method to defeat Babanuki. No matter how powerful your attack power is, it is useless as long as you can't hit it. Although the damage she caused is not high, it can slowly grind the opponent to death. It's just a waste of time. .

Bass!

There was a crisp sound from the back of Jack's neck, and the powerful defense bounced off Elizabeth's tail blade. When Jack turned his head, the flexible trunk swung back, but in the end it just missed.

He likes to fight head-to-head with people, and he is also upset by this kind of flexible opponent. For a while, the two sides entered a stage where no one can do anything to the other.

"These buildings are .. too much trouble."

After a few attacks, Jack changed his thinking, no longer chasing Elizabeth hard, but entered the beast form, and began to destroy the arena little by little.

Buildings were reduced to ruins under his trample. He chose to use this method of clearing the fields to compress Elizabeth's battle space. As long as he could force the opponent to fight him head-on in the open area, he would still be at an advantage.

"Hey hehehe, Jack is quite smart, but I'm afraid it won't be clear for a while."

In the sky, Kaido observed the battle below, and gave some comments of his own from time to time.

"But if you continue to fight like this, the ring you prepared may have to be rebuilt."

"It doesn't matter, it doesn't take much effort anyway."

No one minds destroying the arena. In a sense, this is the "God's Arena" created by Arceus. After the battle, a few breaths are enough to repair it.

Then Kaido changed positions. Jack and Elizabeth may have to fight for a day or two to decide the outcome. The area of the ring is not so easy to destroy, and Elizabeth is also taking the opportunity to consume Jack's blood.

Just as Kaido moved, he discovered a strange thing. Yamato, who was also watching the battle from the sidelines, would inevitably adjust his position when he moved, ensuring that Arceus was separated from him.

"Yamato, what are you doing?"

"Huh? I'm watching the game. It seems that it's Maria's turn. Father, do you think Maria can win?"

While changing the topic, Yamato adjusted her position again. This is the experience she has accumulated in previous battles. In order to prevent Kaido from looking at her itchy hands, she should try her best to keep herself in a safe environment.

The safest situation is that there is an Arceus in the middle.

Chapter 743 The Two Sides of Luck, The History of Transformation of Social Animals

Yamato has gradually mastered the way to deal with Kaido, but Jiang is still old and spicy. As long as Kaido doesn't choose to act recklessly, Yamato may not be able to compare with him in this life.

She got temporary safety, but she still couldn't cure her.

From Kaido's eyes, it can be seen that he has thought of a new way.

On the other hand, compared to Jack and Elizabeth, the anti-war and sniper-assassin tug-of-war, the battle between Babanuki and Maria in the mountains and rivers battlefield is much more normal.

Although she does not have the blood of the murlocs and did not inherit Kaido's talent, she is a member of the same period as Yamato and Jack, and she is still the oldest. Strong strength is not her ideal, but it is indispensable in the process of realizing her ideal. part.

She wants to be by Kaido's side, but there is no place for the weak around Kaido. Whether it is flattery or begging, Kaido will not pay attention to it. Only strength can make Kaido look higher.

For this reason, Maria is also walking on a path of assiduous practice, and is currently testing the results.

The mountain and river site is Babanuki's chosen home field. At this time, the Rabbit Bowl mining site has been handed over to the Pokémon guards left there. Unless there are extremely special circumstances, there will definitely be no problems.

Even if something happens, they don't have to be afraid. The unsound beasts faced a relatively complete Wano country, and they were able to occupy it in the end.

At this time, the Beasts have become stronger, but Wano Country has long since lost its strongest force. If someone really wants to take the opportunity to provoke trouble, it will be an opportunity for a big cleansing.

"The spider is really troublesome."

Due to the stiffness problem, Babanuki canceled his transformation again. This is his weakness. The characteristic of the king of leave is not so easy to overcome. This characteristic is the root of their ability to use the strange power, and only a very few individuals can break it this limitation.

In the early days, the power of the Leave King was very strong, and most of the people who defeated him took advantage of this weakness, but now Maria is even more difficult to deal with.

Babanuki now consumes a lot of strength every step he takes. The mountains and rivers were originally his home field, and the rocks on the ground can be his means of attack, but now, Maria has transformed this place.

A large amount of spider silk condenses on the ground, and there are also some small transparent spider threads between the rocks. A single spider thread is not terrible, but when thousands of spider threads are attached together, they will exert unimaginable power.

A large amount of spider silk flew out from Maria's hands. Taking advantage of the gap in Babanuki's ability, she planned to increase her offensive.

Boom!

There was a thunderbolt in the sky, and the weather that was still very clear just now was covered by dark clouds.

Not long after, heavy rain poured down, and the viscosity on Maria's spider silk was gradually reduced under the influence of rain and sand, and the binding force on Babanuki was also gradually reduced.

"Hahaha, Maria, your luck doesn't seem to be very good."

The rain fell on his body, and Babanuki's cool-down period was over, his muscles began to swell, and his body surface was covered with fur again. With the help of the King of Leave, he broke free from a large number of spider threads.

After the viscosity dropped, the process became much easier for him.

"Not necessarily, Uncle Babanuki, it may be you who are unlucky."

Electric spiders are similar to crypt spiders. Their powerful webs have always been a good helper for them to hunt. The most important thing is that their webs can be electrified.

This is the luck brought about by the uncertainty of the venue. The heavy rain greatly weakened the stickiness of the spider silk, giving Babanuki more room to move, but it also gave Thunder a chance to play better.

"Maria Thunderstorm!"

A large amount of electric current was emitted from Maria's body, and the dazzling light of lightning almost covered the entire field, and the lightning from the clouds also began to concentrate on the field. On a rainy day, Babanuki was instantly submerged by lightning.

Under the cover of thunder and lightning, Maria began to approach Babanuki. The thunder and lightning alone could not knock him down. She planned to use this opportunity to complete the final blow. Purple venom was secreted from the top of her fingernails, and finally formed two fists. Venom armed.

"Cross Shiver!"

Compared to Babanuki, she has a bigger advantage-body size. Her impressive height brings a longer wingspan. When there is no absolute difference in strength, her size can bring more advantages in strength.

Facing a powerful opponent like Babanuki, Maria's own size can be of great help.

Thunder and lightning were released under his feet, and he kept waving the cross poison blade with both hands, but Babanuki also made his own reaction. Before his physical strength was exhausted, he released the long-awaited double return.

The accumulated damage caused decent damage, but under the thunderstorm, Babanuki was finally defeated, and came to the nearby medical center with Maria. *ηOvelusB.com*

Here, they didn't see that the opponent was going to win, so they simply chose the option of admitting defeat. They perfectly practiced Kaido's philosophy, and turned into water ghosts one after another, trying to drag the opponent down together.

But that was just to vent my emotions. During the transposition battle, the treatment methods in the medical center were all quick-acting treatments.

Arceus' life water droplet has already been prepared, but if it is not dead, it will take some time to recover, which is why they dare to be ruthless.

After a brief treatment, they will return to the ring again to defend or claim their new positions.

Except that the battle between Jack and Elizabeth took a long time, and many battles had already been decided. Babanuki even saw Mandelfish appear here, but he was just seeing off the wounded.

"Babanuki? You lost?"

"Ah, luck is not very good, but these young people are getting stronger and stronger."

"Isn't this a good thing, it's getting closer and closer to my retirement."

"Brother Mandelfish, if I remember correctly, you were saying this when you first joined Hundred Beasts, but you are now a senior cadre."

"Yeah, speaking of it, I kind of miss the old days."

In the beginning, he was just an ordinary pirate who chose to go to sea under the pressure of the general environment. Maybe he was lucky and became the first group of people recruited by Kaido.

At that time, his goal was very simple. After learning about the beast system, he hoped to work hard for a few years and then live in peace and stability.

Then luck was good, he acquired skills and abilities successively, and became a small cadre. He was very satisfied at the beginning, and because of luck, he found a stone slab.

Originally he had the opportunity to change to a more leisurely position, and many pirates who survived the same period made this choice.

It was only at that time that he had already met Rusaka, and he heard that the retirement benefits of senior cadres were better, and that family members could enjoy additional benefits, so he started a new round of struggle

Chapter 745 The injured mind, from Quinn's spiritual attack

Unfortunately, in the transposition battle, there is no rule of illegal elimination. As long as it is something that the enemy may use, it can be used here. Even if Quinn uses his own plague bomb here, it is completely compliant.

Because the host and commentator were pulled into the arena, the commentary from Quinn also disappeared temporarily, but the audience didn't have any objections, and few people could understand his commentary anyway.

Ordinary combat waveguide arrows are enough, there is no need to use special arrows.

Seeing that Shusu took out the Hailoushi arrow, Quinn suspected that she had planned for a long time.

Fortunately, after undergoing a large-scale transformation in the body, Quinn finally grabbed the curved arrow with mechanical pliers. *novelusb.com*

Looking at Setsuna's quiver with a special arrow, his expression became even more distorted.

"Are you going to play for real?"

"How is it possible? Isn't it useless for Moon Lion? It's just a matter of moving your body."

Grab three arrows from the quiver, use the electromagnetic force to fly in the air, and shoot at the vital points of Quinn's body, but Quinn himself is not polite. Among the rumors of beasts, he is almost the weakest disaster, I just took this opportunity to prove myself.

There was a mechanical sound from the joints of the body, and Quinn also entered the state of full firepower.

"Don't say I'm a bully in the future! I'm not made of paper either!"

Laser guns, flame guns, seed bombs, poison powder, over the years he has been even more crazy about his transformation, and has been gradually simplified into an aerial fortress.

"You're definitely not made of paper, but you missed it!"

The moment at the original position has turned into an afterimage. At this time, she is beside Quinn, and her bow is also used as a melee tool by her. This is why Speed uses the bow as a saber.

Each of these archers counts as one, and they are all melee monsters. Even if the buff of unlimited ammunition is activated in the moment, the melee link is indispensable in the battle.

But after the blow, she actually saw Quinn's head and neck flying out.

"This guy isn't so careless."

That shot was only a three-point force. She wanted to see what was more on Quinn's body, but she didn't expect to be "beaten to death" by him. When she hesitated for a moment, Quinn's body suddenly shot a shot. The missile was fired, and Quinn's wanton laughter also came from the sky.

"Mhahaha! Unexpectedly, this is my new breakthrough, the brachiosaurus launcher!"

The ability of Quinn Tropicosaurus was modified from Brachiosaurus, and in order to manipulate its huge body, Brachiosaurus had a special ability-"second brain".

The central nervous system of Brachiosaurus enlarged and swelled at the waist, forming a ganglion that took care of the internal organs and limbs for the brain.

Quinn took advantage of this ability to carry out this wonderful transformation.

At this time, his neck and tail formed a single body, and there was even a pair of tropical dragon wings behind him, flying in a higher sky in a strange and slightly comical manner.

"You bastard."

At first, she was really just idle and uncomfortable, so La Quin came down to play a dozen, but she didn't expect him to prepare such a big stimulus for herself.

"Very well, I understand, your life is hard enough."

The power of waveguide once again condensed the bowstring. A seemingly ordinary waveguide arrow was placed on the bowstring, but when the arrow was shot by her, hundreds of arrows split in the sky.

"You like transformation, don't you! You scare me! I'll let you experience what it's like to be a hedgehog!"

She anticipated what kind of weird attack Quinn might use, but she didn't expect that this guy had a mental attack, and her soul was really traumatized a little.

The power of the waveguide surged, and it entered the Mega state in an instant. A pair of stabbing blades composed of waveguides appeared in both hands. After wrapping domineering and thunderbolt, they struck towards the body left by Quinn below.

Even though Quinn has made many wonderful transformations to himself, he still can't abandon this body. Under the sudden onslaught, he returned to his body and started the battle with the attitude of a "normal person".

In the night field next door, the Batman just defeated the armadillo who challenged him. The sound wave positioning of the big-mouthed bat gave him a great advantage in the dark night, even if the armadillo used the ability of the mountain mouse to get into the ground, he could not. The position has been locked by the opponent's ultrasonic waves.

The mountain mouse's defense is very high, but under the fangs and blood-sucking ability of the big-mouthed bat, it was finally exhausted. At this time, the bat-man looked at the bow and arrow in his hand, and compared the collision between Quinn and Setsuna, he felt like I was holding a toy in my hand.

Obviously they are all archers, and they can only shoot accurately with one arrow at a time, but the opponent is just like opening up, and launched a fire suppression by himself.

Time passed, except for Jack and Elizabeth, most of the other people's games have ended.

The strength of these adults has mostly been finalized, and the changes in positions are not particularly large. Those who feel that they have reached their limit have not continued to challenge upwards.

In the ongoing battle, most of them are challenging single-digit newcomers, as well as former single-digit numbers who have repositioned themselves.

In this exchange battle, a few young people suddenly emerged, such as Iska, who just turned 18, and two siblings, Ulti and Peggy Wan.

The long study period is over, and the three of them are also starting to pursue smaller numbers. They all have their own dreams, and if they want to realize this, this is the fastest way to advance.

Quinn successfully defended his position, but Moon Lion was useless for a moment, and he also kept a certain hole card. The two seemed to fight fiercely, but they were actually the most measured group.

Refers to the fight after Quinn's outrageous behavior.

At this time, after a short rest, Quinn has returned to the commentary position.

"Oh, nice little girl, she has achieved six consecutive victories and continues to challenge her opponents! Let's see where she can go!"

At this time, the number of combat personnel has decreased a lot, and the images on the projection screens around Rotom are more concentrated.

"No way, who is this girl, is she so strong at such a young age?"

"Small? There are two younger ones over there. She was also a child brought back by the big cadres. She wasn't very talented at first, but she found a stone slab with Lord Drake some time ago. Since then, she has been chasing after her." up."

People are born with a gap in talent, which cannot be caught up only by hard work. If you want to surpass the opponent, you have to work harder, but Arceus can make people have stronger power, thereby reducing the gap.

You can succeed with hard work, and it has become the classic bible of the Arceus religion.

The venue where she fights is very classic, the sea deck, which is also the most common environment for pirates to fight. The two pairs of insect wings behind Iska vibrate at high speed, and steam comes out of her body from time to time.

Chapter 746 "Steam Overload", age gap

The huge disadvantage of the giant pincer mantis in combat is its own heat dissipation. Due to the problem of heat dissipation, the giant pincer mantis is not suitable for protracted battles, and its body has been evolving towards the road of quick battles.

After the New World Central Fighting Conference, both Iska and Drake got what they wanted, and she also got her own Mega power, and gradually mastered this power.

After Mega, a black cross star appeared on her forehead, her body became more angular, and her two tongs became more ferocious.

However, if you look carefully, you can see the palm wrapped in the carapace from the opening and closing joints of the pliers. This is the biggest difference between the human-beast form and the beast form.

Pokémon capable users will inherit some characteristics of Pokémon, and some weaknesses are inevitable, but not insurmountable. Babanuki completed an alternative gun cut by means of form conversion to overcome the stiffness of the body.

In this respect, Iska is even better. She took advantage of the fact that the body temperature of the giant pincer mantis rises too fast, and developed her own overload mode.

As the body temperature rises, the blood flow in her body will also speed up, allowing her to burst out with stronger strength and speed in a short period of time. Wang Lufei next door called him an expert, and her opponent is also very special, not old. The numberer, but Foz Fowler.

He is known as a genius on a par with Rob Lucci in CP9. This is not a separate bragging, but a recognition of his strength and talent. Judging from the performance of the original timeline, he is under three disasters, flying six first in the cell.

He is very special, because he is the only non-benefactor who got to this position only by his saber-toothed tiger ability and a few skills bestowed by Arceus.

The reason for his incompetence is very simple. Since joining, he has not made any great achievements. He is just an ordinary defector.

Just looking at Iska in front of him, his expression is not relaxed. The 31-year-old has experienced special training organized by CP since he was a child, and has been fighting on the front line ever since.

But the little girl in front of him was only 18 years old. Although she worked hard, he had 13 years more than her. With these 13 years, he still couldn't crush this young man.

If they are the same age, then he may not be Iska's opponent, and the root cause of all this is the difference in abilities given by Arceus. *novelUsb.com*

The ability of the complete giant pincer mantis plus Mega evolution is much stronger than a few skills.

"Admit defeat, your body is almost at its limit, even if it can be cured, there is no need to suffer this crime, is there?"

Thirteen years of hard work have not been in vain. In the eyes of Foz Foz, Iska has reached his limit, and his condition is much better than the opponent. The outcome of this battle is already clear.

"It's not over yet."

Iska made a slightly strange behavior. She stopped waving the worm wings behind her, which meant that she turned off her radiator.

With unabated speed, she swung the tongs in her hands and dodged in front of Foz Foz, but his body was like paper, avoiding Iska's attack through strange folding.

Six Styles-Jihui, as a defected member of CP9, Foz Fu is proficient in Six Styles. Zhihui does not have the motivation to predict the opponent's movements through knowledge and color, but through the perception of airflow, the body makes evasion in the form of muscle response.

Can be passed down in the world government and the navy, these skills naturally have their own significance, but Foz Foz found that Iska's movements were gradually accelerating, and his body began to emit bursts of heat.

The double pliers were wrapped in white light. Under the blessing of the continuous slash, Iska's attacks hit Foz Foz one after another. The pair of giant pliers are not good at pinching, but hitting people.

"Crazy."

He doesn't quite understand that it's just an internal qualifying competition, why go to this point, even if there is a difference in the treatment of the top ten, it is limited, and there is no need to work hard when one's own ability is limited.

Although he didn't understand Iska's behavior, his movements didn't stop. There was a low growl in his throat, and the piercing sound of metal rubbing came from Foz Foz's mouth.

Metallic sound, a steel-type skill, interferes with the opponent's special defense through the piercing sound. Under the influence of the sound wave, Iska's movements stagnated for a moment, and Foz Foz also took the opportunity to distance himself.

"Tooth gun!"

An alternative and advanced version of the finger gun, the senior CP agent can fire the finger gun from a long distance, using the finger gun as a special attack method, but Foz Ferrer's attack method uses teeth.

The sharp-toothed blade flew towards Iska. Foz Foz's attack was extremely powerful. Even with a metal shell, the giant pincer mantis is not a type that is good at defense. It really can't stand it if it suffers too much .

The flying blade pierced the deck under her feet. The biggest difference between this site and the ocean site is the difference in foothold. The ocean site is rocks, but this is a deck imitating a ship.

After the foothold was destroyed, Foz Foz kicked two haze feet, and then made a prostrate posture.

"Iron Block · Tooth Flash!"

Use iron blocks to increase your hardness, and use your teeth as sharp blades to launch a special attack method with the whole body as a weapon.

Except for a small number of people, when the others used the iron block, they couldn't move at all, and Foz Fu's attack method was just the result of a trick.

Bang!

The result was different from what Foz Fu thought, because Iska's two pliers actually forcibly grabbed his teeth, thus entering a state of wrestling.

Brute force is not Iska's strong point. In the previous battles, Iska did not use this method. At this time, he didn't understand what she wanted to do until he saw the light brewing in the pair of clamps, but he When I wanted to retreat, it was too late.

Boom!

The destructive death light is released close to the face, and the explosion includes both of them. She has reached the limit state, and this is her final blow. After the explosion, her body has passively released the transformation state, exhausted Physical strength fell into a coma.

"Ahem."

In the smoke, Fuzi Fu stood up again. He won, but he was not very happy. He knew very well that he could win only because he was older. The 18-year-old him was definitely not the opponent of the 18-year-old Iska .

In the medical station, Foz Foyer and Iska were receiving treatment at the same time, and had already recovered their original consciousness.

"You are young, what are you working so hard for?"

"Higher status, stronger power, and the ability to practice one's own "justice" capital."

"It's a good joke, I can actually hear the word "justice" from a pirate's mouth."

Listening to Iska's answer, Foz Foz froze for a moment. Before he defected, he would occasionally believe that word.

CP members will experience brainwashing, and what the instructor said the most is that they are the guardians in the dark, representing the justice of the dark in the world.

But after failing the mission, being put in prison, and seeing the jailer disappear mysteriously because he mentioned a word, he no longer believes in the word.

"Pirates are not justice, but Lord Arceus can do it. I want a higher position, and then get more power from Lord Arceus. When Lord Arceus finds his own strength, the world will welcome it. Purify.

No one will be burned in this world again. "

Speaking of this, Foz Foz also noticed that Iska had a scar on his hand, which seemed to be caused by the flames.

Chapter 747 As we all know, being beaten can make you stronger

Listening to Iska's words, Foz Foz hesitated for a moment, his faith was easily shaken, and he was also a pragmatist.

While in prison, he actually prayed to Nika because he had heard the legend of Nika, but that was of no use. Just to survive.

No matter what the reason for his defection is, he is a stain in the CP organization, but he has found a suitable umbrella, and the outdated information in his mind is not worth the world government sending people for him.

In this regard, Foz Foz is not as valuable as Quinn, so he is not so restrained, and after finding a backer, he can move freely outside.

But this does not mean that the world government will let him go and will not send people on purpose, but when there is a chance, they will still choose to eliminate him along the way.

That's why Foz Fu also pursues strength. After all, this is the best way to save his life. No matter how strong the backing is, it is not as important as his own strength.

An ordinary jailer can have an impact on Foz Fu's beliefs under the right circumstances, let alone professionals in Wano Country.

Under the influence of Missu, Foz Foz was also baptized by faith, and saw the pragmatism of the Arceus religion.

Although they are not fanatics, they also desire more status. After all, high-level cadres not only get rewards from Arceus more easily, but also have more rights.

It was Iska who challenged him before, and now it was his turn to challenge others.

He doesn't want to take the positions of NO.0 and NO.1. Although that position is not a disaster-level force, but in the full-fire mode, their combat effectiveness is not inferior to the current disasters.

So his thinking is completely different from Jack's, he just wants to climb up little by little.

Iska has basically reached her limit. Even though her injury has recovered a lot, she didn't continue to challenge upwards, but just waited for someone who might challenge her.

Foz Foz found his new opponent-Sasaki.

He is simply a fanatic of Kaido, only Kaido. Although the people of Arceus don't like him very much, they didn't target him later. They have everything they should have and give them everything they want. over him.

It's just that at present, his working area is still the Rabbit Bowl Quarry. It's not that someone restricts him, but he voluntarily applied to stay there and hone his strength through the Pokémon in the mine.

After so many years, he even developed a relationship with Boss Kedora, from a simple training object to a good brother relationship.

In the confrontation with those large-tonnage Pokémon, Sasaki also continued to improve his strength.

As we all know, in the Beasts Pirates, being beaten is an important way to become stronger. The current big cadres look glamorous, but they all experienced "training" by different people when they were young.

Sasagi finally embarked on this path of no return after joining Hundred Beasts.

Finally, relying on the ability of the moat dragon, he came to the single digit position.

The chosen venue is also the mountains and rivers, but Foz Fu experienced a completely different fighting style.

The previous Iska did not take his attack forcefully except for the last move that almost killed them all.

Thinking about it now, Iska's desperate way is a bit unacceptable to him. If this is not a ring, the best result of her move is to hurt the enemy by a thousand and hurt herself by eight hundred.

In the state of high temperature and overload, her steel shell had already become relatively fragile, and the destructive death beam was detonated at close range, and her two hands temporarily lost their fighting power.

It's good that that move can defeat the enemy, but if the enemy still has the ability to move, then it will be a big trouble.

Foz Foz doesn't like this kind of play that can only be played on the field, because he won't put himself in it for the purpose of the mission.

It's just that now, if he encounters that situation again, he will have to fight, because he has no way out.

Knowing that secret, and then falling into the hands of the world government, he will have no good end.

Both black and white are offended, and it is difficult to survive in this sea. As for living in seclusion, he does not want to live a poor life as a part-time job. Although the life of an agent is hard, there is usually no lack of material. Already used to that kind of life.

"You bastard. Do you look down on me?!"

bump!

There was a loud noise, and Sasaki, who was in the moat dragon state, raised his forelegs high and stepped towards Foz Fau. During the battle, the opponent was actually distracted, which obviously looked down on him.

The ground was cracked inch by inch, and Foz Fow, who came back to his senses, still dodged the opponent's attack.

"Murloc guys, are they all so straightforward?"

Sasagi's fighting style is now similar to Jack's, relying on his strong defense and brute force to fight, but he is not as strong as Jack, and his defense is not as good as Jack's.

Quinn's Tropical Dragon also has the original "second brain", so he can complete a series of outrageous self-transformations of Brachiosaurus launcher and Brachiosaurus Snake.

But Arceus only reserved the horns of the Triceratops period for the moat dragon, allowing him to have more attack methods, and the pelvis that originally protected the neck is no longer there.

Without that pelvis, he couldn't do the strange operations of Helicatops.

Foz Fau has some prejudices against the murlocs. CP agents are selected from young children, and people at this stage can be better shaped.

In the education he received in the past, the history of the murlocs can be called the history of slaves.

In his heart, murlocs are slightly inferior, and he also looked down on the Jinbei race in the original timeline's Onijima War.

Originally, he wanted to describe Sasaki's behavior as brainless, but after thinking about it, he still held back the words.

Jack, Sasaki, Rusaka, Mandelfish's daughter, there are quite a few murlocs and mermaids who joined the beasts or were related to the beasts. Mandelfish has already lived like a murloc. .

It's okay in front of the enemy, but if he said that in front of his own people, he might have nothing good to eat in the future.

"Is it enough to be useful? If you have the ability, don't hide! The horned dragon stomps!"

Most animal-type ability users are accustomed to using the human-beast form. Sasaki is different. He prefers fighting in the animal form. After stomping on the air, his body glows with a metallic luster, which further strengthens his defense with an iron wall. .

Then the dragon horn on his forehead was covered by domineering, and the razor-like blade aimed at Foz Foz and rammed him. The opponent just now was still a nimble warrior, but at this moment he became a bull with extremely high defensive power. ox.

Seeing that his tooth gun was blocked by the opponent with a shield-like body, Foz Fu pulled out the weapon at his waist, he had to change his fighting style

Chapter 748 The Final Trap - Super Giant Sniper Marksmanship

As an agent, Foz Foz also has some strange hobbies, such as the pink scabbard of the saber on his body, which is full of girlish heart.

The strange thing is more than that, when Foz Ferrer pulled out the knife, Sasaki's charge was slowed down a bit.

"Are you joking?"

Foz Foz is more than three meters tall, the standard height of a general, and the scabbard looks close to two meters, but when he pulls out the knife, the exposed blade is shorter than the handle.

He didn't have much contact with Foz Fau, and he didn't fight side by side. Seeing that he was holding the long knife all the time, he thought it was some kind of hidden means, but it turned out to be like a toy.

"Don't you know if you try it? Swords and guns!"

The six-style is just the most basic skill. People who are proficient in the six-style will develop their own extended skills based on the six-style. Foz Fu is very good at pointing guns. Whether it is the fangs of a saber-toothed tiger or the dagger in his hand, they can all be integrated into the finger gun. among.

The dagger that looks like a miniature swings a flying slash, draws a half-arc in the sky, and slashes towards Sasaki's back.

The head is the weakness of most creatures, but the moat dragon is not included in this list. It is not that the moat dragon has no brain, but the defense of the moat dragon head is too strong.

The iron wall as strong as a city wall is the origin of the name of the moat dragon. It is not an easy task to break it.

Foz Ford was born as an agent. He doesn't want to be reckless unless necessary. The city wall cannot be broken, so find a way to bypass it.

The penetrating power of the knife gun is not as good as his tooth gun, but it is more flexible. Sasaki is not only similar to Jack in advantages, but also in disadvantages.

But he also has a way to deal with it. Since he lacked flexibility, he simply stopped dodging. After another fight, Sasaki stood up and turned into a steel dragon man, with a new weapon in his palm.

Like Foz Foz, his weapon is also specially made, but it is not a short dagger like Foz Foz, but a delicate mechanism spiral knife.

With the help of the mechanism on the knife, Foz Fu's weapon was lifted, and the battle returned to the original melee state. The battle situation is very similar to the battle between Jack and Elizabeth. The fighting styles of these two groups of players are similar, and there is no big difference difference.

Only in terms of viewing, they are not as good as over there, but there are still a group of people watching their battle with great interest.

Like Rabbit Bowl Quarry.

Even people who stay in Wano country can watch the situation there through the Rotom signal. Not only the pirates who stay on the island, but also some prisoners in the quarry have the right to watch the program.

For these prisoners, no matter what the program is, relaxing is better than working.

This is also the spirit of the beasts to deter these people. Through the battle of the cadres, let them know what opponent they are facing and how ridiculous their behavior is.

At this time, the TV screen here is showing the battle between Sasaki and Foz Fu. As for why it is not someone else's battle, you have to ask Boscodora holding the remote control. nOVεLUslb.cOm

Babanuki and Davego are both out to participate in the ranking battle at this time. The boss of the Rabbit Bowl mining farm is temporarily handed over to Boscodora. Looking at Sasaki and Foz Fu on the screen, his face shows A very humane expression of relief.

It seems that the little brother who practiced against him every day has finally grown up, and his efforts for so many years have not been wasted.

Zi~!

A metal friction sound sounded like scratching glass. Under the interference of the metal sound, Foz Fu's tiger claws also lit up with a metallic luster. Apart from the solid carapace on the outside, the body here is relatively soft.

His steel claws also had a better effect, but in the face of Sasaki's blood bar, his blow did not achieve much effect. Sasaki endured the pain and directly pressed down, but his Taishan pressure was only on the ground There was a deep hole in it.

Although he hit empty again, Sasaki was not discouraged. Foz Fu consumed more than him. In terms of physique, he had already won.

In the end, Foz Fu did not win, but Sasaki won the war of attrition, but Foz Fu was not very convinced.

In terms of combat skills and experience, he is richer than Sasaki. In terms of the number of hits, he is also much higher than Sasaki. The level of domineering is almost the same, but the biggest gap between them is ability.

If he also has the ability of a phantom beast, then he will definitely not lose to Sasaki in this battle. At this point, Foz Fu also has a greater obsession with obtaining the power given by Arceus.

The war of attrition between the two of them is over, but the battle between Jack and Elizabeth is still going on. At this time, the urban battlefield has been turned into ruins, and a large number of buildings have been razed to the ground under Jack's trampling. Elizabeth has not much to do. of space.

"Now, you have no place to continue dodging."

Jack left a lot of scars on his body, but they were all just superficial injuries. Elizabeth's attack seemed a little weak against Jack's defense. Even if the battlefield environment kept consuming the opponent, Jack was still in a good state.

Elizabeth is not only shifting her sniper position, but also leaving a lot of traps behind. Jack can be said to have rushed out of the traps all the way.

Crack, crack, crack.

There was applause in Jack's eyes, and it was Elizabeth who was applauding.

"Not bad, very good, you have dealt with all my traps, and if you can solve the last one, then you win."

Elizabeth in front of Jack's eyes suddenly turned into a puddle of water. She has been fighting with Olga for a long time, and Elizabeth also has a better understanding of disguise and deception.

And her main body, at this time, has been transferred to the other end of the arena, and her body has undergone tremendous changes.

The tail behind her became extremely thick, and after spiraling up, it became a sniper platform, and the water flow formed the appearance of a liquid sniper rifle under her compression.

Thousand Faces Avoidance - Gigamax state.

In this state, her sniper's range and power will be greatly improved, and the water droplets will gather at the muzzle of the gun, and then aim at Jack in the distance.

"Super giant sniper marksmanship."

Before the words fell, the bullet had already been fired, the water flow pierced the air, accompanied by a huge sonic boom, and finally hit Jack's body.

The compressed water blasted in an instant, and the huge waves produced by the explosion covered Jack. This was the strongest blow Elizabeth could deliver. Since she found that Jack's defense was difficult to break through, all her actions were for this final attack. One click to lay the groundwork.

If even this trick fails to break the defense, then she will be convinced to lose.

Chapter 749 Ultimate Steel - Iron Hoof Light

Since Jack wanted to destroy this field, she let Jack destroy it. By going through traps and sneak attacks, she constantly used up the opponent's physical strength in order to prepare for the final blow. Her physical strength could not maintain this state for a long time, and the opportunity to attack Not much.

Besides, Gigamax will cause her body to be too large. It is not very wise for a sniper and assassin to be exposed to the public in this way. This means that she has become a target herself, so she only has one chance to attack.

The super giant sniper marksmanship almost set off a small-scale tsunami, and the water flowing to other arenas even changed some of the battle situation. For example, the armadillo man who was digging a hole was forcefully forced out.

As for why the scope of sniping is so large, this is actually a very reasonable thing.

The definition of sniper is single shot, long range and powerful.

According to the analysis of weapons, individual missiles can also be used as sniper rifles, but the range is a bit wider, but it is not unacceptable. After all, some rocket launchers have a range error of 1,700 kilometers.

In the waves, Jack stood up again, but there were a lot of slightly hideous cracks on his body. Even the Man of Steel couldn't withstand the strongest blow.

The super giant sniper attack successfully broke Jack's defense, but failed to make him lose his fighting power.

Murloc identity helped him a lot. If it wasn't for being able to breathe underwater, the burst of water just now would have suffocated him unconsciously, and the practice of murloc jujitsu also helped him defuse part of the force of the attack.

This is already the limit of his practice. It is impossible for normal people to throw back the super giant sniper marksman.

But now, the steel on Jack's body has almost entered a state of melting, and is gradually condensing towards the front of his trunk.

"I found you now."

This melting is not the influence of Elizabeth, but Jack's own choice.

In the previous battle, Jack was not consumed unilaterally, and Elizabeth was the same. Originally, she could delay for a while, but if she continued, she would not have the strength to launch the final blow.

Before Jack didn't think that those were traps, he was just being reckless. At this time, although he was caught in the trap, he still decided to be reckless to the end.

The steel on his body is the source of his proud defensive power, and this blow is the strongest long-distance attack he can make, a powerful move obtained by sacrificing his own defense.

"Iron hoof.. light!"

Iron hoof light is one of the most powerful moves among the steel attributes, but it hurts one thousand enemies and eight hundred self-damages. NovelUs8.com

The user will integrate their own steel into the light to exert the greatest power, but steel is a part of the steel-type Pokémon's body, which will cause great damage to itself, and it takes a long time to recuperate after the battle .

Elizabeth's Gigamax exposed her position, which also gave Jack a chance. He is no stranger to Elizabeth. In terms of Elizabeth's limit, she should be able to shoot three times.

If he doesn't launch a counterattack now, he won't be able to bear it if Elizabeth strikes again. His fighting style is reckless. If he wants to be reckless, he should be reckless to the end.

Elizabeth's state is not very good. After this attack, either Elizabeth will fall or he will fall.

Elizabeth after Gigamax is no longer difficult to capture. She chose Gigamax after careful consideration. If she doesn't do this, she will slowly consume her stamina. Simply fighting to consume her is definitely not Jack's opponent, so she can only choose in the Find a chance to give him a fatal blow.

Unfortunately, Jack has grown up, and a torrent of steel composed of iron hoof light swept past, and the longest match finally came to an end.

"Well, let me congratulate Brother Jack, he successfully defeated NO.2! This is also the number one in the top three, the first time he was defeated! But I don't want to cheer for him!"

At the end, Quinn showed a very disgusted expression, and then reached out and pulled a piece of iron from his body.

Jack successfully completed his goal and temporarily stayed in the medical station after his injury was treated, but Elizabeth also did not leave.

"Aren't you going to grab other positions?"

"It's not necessary, anyway, the difference is not big, I spend most of my time with Olga, this number doesn't mean much."

Elizabeth took over the numbers left by Jack, and did not continue to challenge others.

Except for Setsuna and Mandelfish, the single-digit numberers have almost ushered in a big change, and many people's rankings have dropped, except for one person - Drake, her ranking in this battle, Instead, it moved upwards.

Now she is facing Sasaki's challenge.

"Monsters, these guys... are scarier than they were back then."

The City of Flowers, the General's Palace, and the images relayed by Rotom, the remnants of Kozuki's vassals have serious expressions on their faces. They not only saw Kaido growing stronger, but even saw the development history of beasts with their own eyes.

They don't know the external environment of Beasts, but they can see some problems just by looking at Wano Country.

"Aju, that woman seems to have always been interested in you, right?"

Looking at Drake on the screen, Denjiro suddenly looked at Akiku beside him.

"Ah, maybe so."

"Maybe you should cooperate with her? Maybe you can get some more news this way."

"This is not good."

Kikunojo's character is also too gentle. Knowing that Kanjuro is an undercover agent, he still can't bear to kill him. Faced with Drake's various molestation and some special care given in life, the small convenience during investigation, he was a little hesitant.

"That's right, it's still too early, so don't do unnecessary things."

Denjiro misunderstood what Kikunojo meant, thinking that he was referring to the inappropriate time, and Kikunojo didn't deliberately mention this matter, so the topic was temporarily put on hold, and they continued to look at the battle situation.

Although they are enemies, they have to understand the situation of the enemy.

"You guys are really tough enough."

Flicking his wrist, Derek seemed to know how Elizabeth and Foz felt. Facing such high-defense opponents, it was really not very pleasant to fight.

"In order to get one step closer to Brother Kaito, this is essential, sorry for the inconvenience."

Planned twice above the ground, Sasaki was ready to charge again. Drake's attack power was stronger than Foz Fu's, but there was no fatal threat to him yet.

"I have no objection if it can be done, but you also know that if the rankings are different, the salary gap is huge."

Derek reached into his skirt and took out a gemstone hanging from his necklace, and then began to make a slightly strange posture

Chapter 750 The Ultimate Volt Thunderbolt of the Gathering Dance

She and Iska discovered the slate. After following her for so long, of course she won't let her do it in vain. Shopping cards and things about Kikunojo can only be regarded as additional options, and strength is a fundamental issue.

That gemstone is the source of her power, just like the super power and Mega power, this is also one of the important ways to improve the ability of Pokémon.

This is not the world of Pokémon, and Pokémon users don't need to rely on trainers. People like Shaina, whose power has been integrated into their blood, can achieve Mega evolution only by their own will.

Gyarados Queen Nereus has a certain difference. The power is not fully integrated into the body, but resides in the Mega Stone on the crown of the head.

It mainly depends on talent. Only those with enough talent can fully incorporate that power into the body. If it is slightly worse, they still have to pass through external objects. Drake is in such a state.

A yellow crystal hangs on the necklace on the chest, and there are lightning-like marks inside.

This thing is called Z pure crystal, which also stores powerful power. With the energy provided by Z pure crystal, the user can use powerful Z moves.

Although it will lose some additional effects, such as restricting the speed of the opponent, the Z-movement of the offensive move category has great power compared with ordinary moves. Opposite death.

There are two types of Z-moves. The first is the universal Z-moves brought by attributes. Any Pokémon with suitable attributes can learn them. The other is the exclusive moves of some Pokémon. Drake is former.

The power of this move is much stronger than that of Pokémon, but it causes a great burden to the user, so it can only be used once in a short period of time. *nOvELUsB.COM*

"One thing to say, you are really tough enough. You can still stand up after carrying so many attacks. The physique of the murlocs is really amazing."

During the battle with Sasagi, Drake fell into a situation similar to Elizabeth's, but Sasagi's defense was not that strong. Although the damage was not obvious, it could still cause considerable effects.

It's just that it's too late to fight like this, and she wants to change to a faster method.

"What are you doing?"

Sasaki saw too many strange things in this battle, and he couldn't figure out Drake's movements at this time. He saw her left hand was up and her right hand was down, pointing obliquely to the sky and the ground.

The body is still shaking slightly. Humans usually call this behavior a dance, but in this case...it's very reasonable.

Sword dance is the most commonly used buff skill for ordinary members, and there are many ordinary members who have learned sword dance, and those people can form a small dance troupe.

If it is other forces, dancing on the battlefield may just be a mental attack, the purpose is to attract attention, but in Hundred Beasts, this means the sublimation of strength.

Looking at Drake who started to dance, Sasaki did not continue to stand stupidly, but launched his own offensive, the force of the slam was integrated into his body, and the moat dragon slammed into Drake like a locomotive.

"I'm really impatient. In fact, I don't really want to use this trick. This preparation is quite shameful."

Although the Z move consumes a lot, its power is worthy of this consumption. The only disadvantage is that it needs to dance before it is released.

The special posture is the way to arouse the power of Z pure crystal. Drake's movement is what the electric attribute Z moves need, and the degree of shame is already considered low.

With the end of her movement, a powerful lightning force erupted from the necklace, and Roentgen Cat's body was already wrapped in electric current, and then a large amount of lightning gathered towards her right arm.

Zila Zila

The thunder and lightning chirped like a flock of crazy birds, and the dazzling lightning blinded Sasaki, but he didn't stop, but aimed at the light source, and rushed towards the most dazzling place.

He lacks the means of long-distance attack, so he wants to interrupt Drake's attack before the end of his charge, but no matter how fast he sprints, it is much worse than the gathered thunder and lightning.

"Ultimate Volt Thunderbolt!"

The thunder and lightning finally converged on the right fist. Amidst the roar, a beam of light composed of lightning shot out from Drake's right arm. The beam of light like a grating cannon was powerful, and the ground was instantly dry and cracked under the roasting of high-voltage lightning. , and then a large amount of earth and rock were rolled up one after another.

The Ultimate Volt Thunder that condenses all of Drake's lightning has blasted out, and metallic rays of light constantly appear on the face of the moat dragon. During the slamming process, Sasaki is also constantly strengthening his own defense.

It is impossible to dodge, if you try to dodge now, you will only get beaten in vain, so it is better to put all your eggs in one basket and fight one last time to see if your shield is stronger or the opponent's attack is stronger.

Boom!

With Sasagi as the center, the smoke from the thunder and lightning explosion rose into the sky. The law of smoke without injury has expired at this time. After the gunpowder smoke cleared, Sasagi's originally huge body fell to the ground.

Different reinforcement methods have their own advantages and disadvantages. In terms of a single-target burst, the Z-movement that will almost exhaust all stamina is far more powerful than Mega or Gigantic, especially when dealing with cumbersome enemies.

"Done."

Drek flicked his wrist, slightly relieving the soreness on his muscles. The power of the Z move is not fixed. Its essence is a powerful blow transformed from the original skill of the same attribute through Z pure crystal.

When trying it before, Drake only used some low-power skills, and it was the most powerful blow in the battle just now.

Not long after, a little change took place in the medical center. The ranking battle is not indefinite, and it is now coming to an end. Many people who have confirmed their positions are waiting here.

There is even a feeling of a semi-retired meeting of veteran cadres.

"Elizabeth, don't you really want to challenge again? The position of 16 is too low."

"It doesn't matter, Olga doesn't care about this, and don't you think it would be a terrible thing for a person to find that 16 is better than 11?"

"You really learned a lot of Olga's bad tastes, but it seems that there are not many people left in front of you? If you don't count Shusu and Mandelfisch, it's really a big change of blood, Scotch estimates Can't win either."

"Well, although Xiao Pei is young, he is too restrained."

Several people were talking about the results of the battle, but the appearance of Drake broke the previous topic.

"Hey, Derek, as the climber among us old people, are you thinking of having a guest or something?"

Hooking Derek's shoulders, Emmaline had the urge to nibble on the rich, but she forgot one very important thing.

"A treat? No problem, today's consumption is all mine, but which one of you will lend me some money first?"
