

# ARCEUS' PIRATE JOURNEY

## Chapter 8: Try with Fossil Pterodactyl

### Chapter 8 Trying with Fossil Pterosaurs

The unspecified variety, some similar to dragon fruit, seemed to be covered with bat-wing-like branches and leaves, and stopped at the feet of Arceus.

"Is this a Devil Fruit?"

The grotesque texture made Arceus bewildered. This was the first time he had seen such a thing in a real sense. It is reasonable to say that this is a devil fruit, but the way it appeared made him incomprehensible.

Known as the secret treasure of the sea, its market value is estimated to be at least 100 million baileys in the future. Even the current bailey is an astronomical figure. If the ability of this fruit is known, it will only be more expensive according to its ability. .

One second before Kaido was talking about something rare, the next second he rolled over by himself. This scene was so magical that he was a little unsure.

Beside the two of them, Quinn looked confused when he saw the fruit that rolled over. After being completely crushed by Shaina, he was a little unhappy, but he had nothing to say, so he used the things on the roadside to vent his anger.

There just happened to be a box of apples placed next to him, and an ordinary wooden box could not hold it with one foot, and the apple that rolled out had such a fruit.

Kaido bent over to pick up the fruit. He felt that he had not woken up from the wine. The way this fruit appeared was indeed a bit magical, but it didn't matter. There was no reason to not want a devil fruit.

As for why Arceus didn't pick it up, now he doesn't even have a hand, and he can't use his mind power. He refuses to pick it up with his mouth. According to his expectation, he can solve this problem after he has a few more slates. .

If        really doesn't work, he'll have to look for Renren Fruit along the way.

"Well, it's really good luck, what are you talking about, but I don't know what kind of it is."

"I've seen the Devil Fruit Illustration in the research institute. This pattern. It should be dragon dragon fruit - ancient species - toothless pterosaur form."

Quinn recalled for a moment, and then took out a rubbing from somewhere to compare it. Devil fruit will not have the same ability. Only when the previous generation of ability dies, will one randomly appear in a certain corner of the world. the same fruit.

Many fruits of the abilities that have appeared in the past are recorded in the illustrated book. The things that MADS researched at the beginning also included Devil Fruits. MADS members come from all over the world, and there are many people with extensive knowledge. Naturally, there is such an illustrated book inside. , which is a rubbing drawn by Quinn.

"Is it an ancient species, or a type that can fly. It's quite rare, Mahhahaha, kicked out a devil fruit, as expected of me."

No one knows exactly how many        Devil Fruits there are, but the animal department has the most subordinate classifications. It is said to be rarer than the natural beast species, and the ancient species that are rare in the world are all rare types.

Among these fruits, those with the ability to fly are even rarer. Not all strong people can fly. Even if there is a special skill such as Six Forms-Moon Walk, only a few people can.

The sea occupies most of the area in this world, and mastering the ability to fly almost means occupying the advantage of the venue. In the sea, destroying the opponent's ship is enough to make many capable people devastated.

Therefore, in naval battles, the main goal of some capable players is to protect their ships.

Just now Arceus said he needed a devil fruit, so he turned his head and the devil fruit came, Kaido looked at Arceus beside him.

"Now that the fruit is available, what do you want to do?"

"Of course it's a transformation, an ancient species of pterosaur, right? Just try my idea."

This time, it is no longer a single slate, but two slates. The power of attributes is not used, but the power of creation contained in the slate.

Shaina's flaming chicken is the result of his evolution by controlling his own power after making a choice, and now he wants to try, if he does not guide and apply attributes, just simply mutagenize, what will happen.

In this fruit, he even sensed a special will, but he quickly chose to surrender in the face of the pressure of Arceus, and in Kaido's vision, the Devil Fruit in his hand really changed, a grayish white Overlaid on the original fruit.

【This is much more labor-saving, indefinite variation is indeed more labor-saving than stable variation, but the type of such variation seems to be determined according to the type of fruit itself, the parameters are not enough, and there are still many things to try. 】

Thinking like this, he said to Kaido: "Successful, but I still have some attempts to do, one fruit is not enough. Abel, eat this fruit."

Shaina already has abilities. Quinn and Kaido are capable users themselves. The original characteristics of the Devil Fruit he transformed still exist. You can only eat one. .

However, for the Lunaria who can fly, it doesn't matter whether they can swim or not.

"Do you want to eat it? This thing is very unpalatable. The taste will be unforgettable in your life. It is even more unpalatable than stool."

Quin whispered in Jhin's ear, and after Jhin ate the fruit, he might be able to beat him, so he could only take advantage of it verbally, but Shaina didn't satisfy him.

"Really? So you've eaten that thing, haven't you?"

"Ah, what are you talking about? I am an ability person, didn't you see it?"

"No, I mean, you've eaten poop, so you know it's worse than poop?"

".Legend! This is a legend on the sea! Don't you know anything! You bastard!" Quinn didn't know who said it, and how the comparison was made, but there are rumors about Devil Fruit Always like this.

He couldn't let Shaina put the pot on her head.

"Mr. Kaido is also a capable person, why didn't he say such a thing, you really tried it."

". Incompetent and furious, this word can perfectly describe Kui's state at the time, but it can't be beaten. Due to the experience of the research institute, Shaina has a sense of hatred for everyone in the research institute.

This kind of thing can't be offset by a beating, and Arceus is also not good at judging whether Shaina has the poisonous tongue attribute or is specifically targeting Quinn.

However, the actions of the two did not affect Jhin's actions. He took the fruit and ate it without hesitation, and he ate the whole thing.

"You are really a ruthless person, one bite of this thing is enough, only the person who takes the first bite will gain power, and the rest is just trash."

Jin ignored Quinn. Instead, his body changed dramatically, his skin turned grayish-white, and his entire body became a huge pterosaur. Although it was still a pterosaur, Quinn was sure that it was not a toothless pterosaur, and its mouth was sharp. The teeth and stone-like texture of the skin are different from those of Pterosaurs.

At this time, Jhin's ability is called Fossil Pterosaur.
