

Armipotent 1291

Chapter 1291 Father

Tang Shaoyang was pulled to the elevator, "What's wrong?" He asked as the elevator went up. He was at ease that the God Rank had not come yet, but their actions made him worried. The four girls did not say anything until they arrived at their destination, the 25th floor. That was his room, and he wondered why they were bringing him here.

"Can you tell me already?" He asked again as he stepped out of the elevator. But then he noticed all the girls were there as he stepped out of the elevator. They brightened at his return, but none of them came to him for a hug as if they were making a path for him to go through.

Li Na immediately pulled him again toward his room where the door was opened. The other girls followed him into the room, and he was led to the bedroom. Then he realized why they brought him in a hurry as he saw the woman on the bed.

Ava was on the bed, and there were three women in nurse uniforms. The timing could not be more perfect as his firstborn was about to be born. The girls pushed him next to the bed where Ava could see him. She tried to reach him, and he grabbed her hands. Her hands were sweating, and he held her hands tightly. All of a sudden he felt nervous, panicking.

Ava smiled and caressed his hand. That put him at ease for a moment until she could not do it anymore. She was in pain, her face scrunched, and he panicked again. His mind blanked for a moment, 'What should I do?' He could not utter that word in his panic.

The only voice that entered his ears was Ava's pained groan. He could not hear anything else but her voice. The nervousness intensified as Ava groaned louder. He thought of reducing the pain, but he did not know how. He did not want to do anything recklessly either in case he would harm the baby. In his panic attack, he just looked at Ava's face.

He felt like it lasted longer than the battle against the bonus wave during his Demi-God Rank's trial. He did not know how long it had been, but then he stopped hearing Ava's voice. The first thing he did was to check on her and was relieved that she was fine. Then he heard a cry, a baby cry.

Tang Shaoyang subconsciously turned toward the cry. One of the nurses was cleaning the baby, and his eyes locked on the baby. The baby cried, and the nurse smiled until one of them approached him.

"Congratulations, Your Majesty~ It's a girl!" The nurse showed the baby to him. The baby cried, and she had her eyes opened. From what he knew, a baby was born with their eyes closed.

"Isn't she supposed to have her eyes closed?" Tang Shaoyang asked nervously, thinking there was something weird with his baby.

"If it was before The Game then yes. That's a normal condition, but not after The Game. I have delivered hundreds of babies, and most of them have their eyes open. It's normal, and the baby is healthy, Your Majesty," The nurse explained with a smile, "Do you want to carry her, Your Majesty?"

"Uh... Ah... Ah, yes... yes," It showed how nervous he was. He tried to copy the nurse's hand, but he was too nervous to do it properly until one of the nurses helped him.

Tang Shaoyang received the baby and his body was stiff from the nervousness. He was nervous that he might crush her. To his surprise, she stopped crying when she was in his hand. She had her eyes opened, looking toward his face. She inherited his purple eyes, and her eyes were a little bit pointy which inherited her mother's trait. He tried to touch her plump cheek, and to his surprise, she caught her index finger and smiled. It seemed his little girl recognized him for some reason.

"It seems I have a magical baby," It was a surprise that his little girl was born with her eyes open already. He was even more surprised that she caught her finger.

"Can I see her?" Ava said weakly.

Tang Shaoyang nodded his head and slowly and carefully brought the baby to the bed. He sat next to her and let her see her mother. The baby looked toward the new face, and the baby showed her toothless mouth, happy to see her mother. That got even weirder than the baby he knew about.

"Is this normal?" Tang Shaoyang could not help but ask Ava. Ava had given birth to three children. She had more experience than him, and he wondered if her children also acted like this when they were born.

"What are you talking about? Of course, our baby is normal," Ava just shook her head, smiling happily, and looked at the baby, "Have you thought of a name for our daughter?"

Tang Shaoyang froze for a moment before shaking his head. He was too busy leveling up, killing monsters and people. He never thought of a name, especially when he did not know if it was a girl or a boy, "Do you trust my naming skill? I name my first companion Pride and my second companion Greed. Then I named my dragon Wrath. Do you trust my naming sense?" He let out a chuckle in the end.

"You are her father, so of course, you should name your daughter. However, think slowly, you don't need to be in a hurry. Remember, your daughter will resent you later on if you give her a bad name," Ava smiled at the end, "Get a good name if you don't want your daughter to hate you."

Tang Shaoyang felt like a bigger burden on his chest after another burden disappeared. It was a relief that her daughter was born safely, but now he had to think of a good name if he did not want her daughter to hate him for a weird name. The atmosphere in the room was good with the baby's presence. The other girls came closer to look at the baby.

The girls were busy introducing themselves, telling his daughter what she should call them, and so on. It was a good fifteen minutes until the baby was tired and they let the baby rest next to her mother while everyone left the room.

The good atmosphere disappeared as soon as he came out of the room. He felt tight in his chest as he realized the stake of the battle was more than just his life. Now he had a daughter as well, and her fate was clear if he died. Either she became an experiment subject for his bloodline or got killed. The former was the worst, and he had to ensure that nothing above happened to his newborn, "I want to go check the split!"

Tang Shaoyang thought he had Karoen, and The Void Knight might help him to predict where the God Rank came down. After checking the split, he had to fulfill his other promise.

"Don't you want to take a rest for a moment?" Zhang Mengyao asked in a concerned tone. The other girls also cast a concerned gaze on him.

"I will take my rest after ensuring when they will come," He shook his head and headed toward the elevator, "I will leave alone for now. I will send you a message later if I can confirm their arrival." He went up to the rooftop and summoned Karoen.

Karoen did not ask Tang Shaoyang why he was summoned as he immediately flew up and looked up at the rupture, "This is my first time seeing the rupture, and it will take a while to find out anything about it."

Tang Shaoyang then summoned Vandir the Death King, "It's time to fulfill our promise." The promise he thought about was a promise to Vandir about his body.

"How are you going to die? As your spirit, I can't kill you," Vandir wondered.

Tang Shaoyang did not say anything, taking out the sword, he cut his own neck. He did not feel any pain as his vision blurred. The other spirits could not react to what he did, and everyone gasped at the last moment.

Tang Shaoyang returned to the familiar void with a message in front of his eyes.

[Do you want to activate Seven Souls? Yes/No?]

He did not need to wait like before as he immediately activated Seven Souls. A portal formed in front of him, and he came out of the void. He came out stark naked, with nothing on his body. He then looked to the side and saw his dead body. It was weird for sure to look at his own dead body.

Tang Shaoyang immediately stored the body in inventory before the others could see. He already heard Zara and Avyn, screaming at him in his head for slicing his own head. He summoned Karoen for the second time as Karoen was automatically getting recalled after using Seven Souls.

"I know what I do. Look at my stats!" Tang Shaoyang opened his window status and all his attributes were increased by ten percent.

Chapter 1292 Goddess of Death

Tang Shaoyang had his stats increased by ten percent, excluding Divine Power which already maxed out from the beginning. He prioritized the Divine Power since all his skills relied on the Heavenly Energy. It was not like it mattered which he should max out first with his Attribute Shift skill.

The attribute bonus was just the bonus from the promise, what mattered to him was that Vandir could help him fight the God Rank. Especially if The God Rank brought another army with them. Vandir told him that he was Lich Emperor, and had control of thirty-two Lichs. These thirty-two Lichs had control over many skeletons, and he had seen one of them have a skeletal dragon. Vandir himself was an army. It was worth using one of the lives of Seven Souls to form a contract with Vandir. On top of that, he had the Lich Emperor join the Tang Empire after Vandir was resurrected. He did not regret making the contract despite being scolded by the other spirits.

[You do really have a resurrection skill!?!] Vandir was not bothered by Avyn and Zara's relentless rant as he was surprised by the resurrection. He made the contract but did not fully trust Tang Shaoyang about the resurrection skill until he witnessed it by himself.

Tang Shaoyang just shrugged, re-summoning Karoen. The Void Knight did not immediately check on the rupture as he stared at Tang Shaoyang in shock. It seemed the suicide really got into Karoen as he had not gotten out of his shock yet.

"What are you doing? You have to be quick, Karoen. I am relying on you to find out when and where the rupture will open!" Hearing his voice, Karoen snapped out of his trance and nodded. The Void Knight turned around and flew closer to the rupture.

Meanwhile, Tang Shaoyang checked on his Spirit Energy, and he had over five hundred thousand Spirit Energy in total. From the previous resurrection, he knew that he needed a hundred thousand Spirit Energy to resurrect a spirit. That meant he could resurrect five spirits now, and it was time to fulfill his promise to the other spirits.

The five spirits on the waiting list were; Malki the Fire Ant Emperor, Feera the Chimera, Yowe the Undead Master Lancer, Bronson the Executioner, and Aerelion the Infernal Wyvern. Rumru the Black Dragon was on the list ahead of these fives, however, Rumru's spirit was still sealed. He still needed to return to Rumru's world to unlock the seal.

[Don't you still need us to fight the God Rank, Master?] Yowe asked. From the spirits' perspective, it would be better for them to stay as a spirit so they could not die. If they were resurrected, they might die again in the fight against the God Rank.

"But this might be my only chance to fulfill my promise to you guys. I might die, die eternally, and you will return to the void. Are you sure you want to remain as a spirit? This might be your only chance to get resurrected," Tang Shaoyang explained, "And don't worry. I will not ask you to fight for me after you get resurrected. You don't have to join my fight, and you can even submit to the Federation of Allurion and The Giteron Dynasty if I lose my fight. Think about it carefully, five of you. Your time is limited because I will not resurrect you guys once the God Rank comes."

[I will stay as a spirit and will fight against the God Rank and their cronies!] An instant answer came from Bronson the Executioner. [However, I still want to reserve my spot after the battle. I want my resurrection after we win this battle, and can you also reserve a spot for me in your army, Master?]

[Me too! Let me fight in my spirit form, and reserve my resurrection after the fight instead.] Aerelion the Infernal Wyvern followed up.

To his surprise, not a single of his spirits wanted to be resurrected right now. They gave him the same answer, albeit, Yowe gave his answer hesitantly. The other spirits in the waiting line after the five spirits also gave the same answer. At that point, Tang Shaoyang realized that the other spirits were reluctant to be resurrected after the five declined the offer.

"Alright, if that's your decision," Tang Shaoyang was not going to refuse the help no matter how little their help was. The next thing was to check his Window Status and check on his Spirit Blessing. It was a skill that could be used to rank up a spirit.

He checked how many blessings he had. His blessing increased each time he ranked up, and he did not really touch it because he had Zara who was already at Grade SSS Spirit. Zara alone was enough for his integration, that was why he did not want to use it. Adjusting to a new spirit integration also would take time, so he left the blessing alone. It was now the time to use it as the spirit would fight individually.

[Spirit Blessing: 61]

"Can I use Spirit Blessing on Archaic Spirit?" Tang Shaoyang wondered what an Archaic Spirit would become if he used Spirit Blessing on them. He did not wait for the answer from his spirits as he used the skill on Avyn. He was also curious about the rank above the Archaic Spirit.

[You can't use Spirit Blessing on Archaic Spirit!]

The answer was to be expected because the Archaic Spirit's actual rank was the same as that of God Rank. Even Karoen was already at God Rank as a Mythical Spirit. It was unknown what differentiated them.

"What about the Mythical Spirit?" Tang Shaoyang assumed that Archaic Spirit was the highest rank so he could not use Spirit Blessing. But the Mythical Spirit was below the Archaic Spirit, and there was a chance he could rank up the Mythical Spirit to the Archaic Spirit.

[Do you want to use 20 blessings on Karoen the Void Knight? Yes/No?] He could use Spirit Blessing on Karoen, meaning he could have another Archaic Spirit. However, he chose no without a second thought. That was just an experiment, and he did not really want to rank Karoen to the Archaic Spirit.

Tang Shaoyang then chose Zara as his target for the Spirit Blessing. If he wanted to rank up any spirit to Archaic Spirit, it was Zara. Not just because he was biased, but because he was more comfortable using Spirit Integration with Zara.

[Do you want to use 6 blessings on Zara The Angel of Death? Yes/No?] He did not hesitate to tap yes.

[Zara The Angel of Death has successfully ascended to the Heroic Spirit!]

[Zara The Angel of Death gained a new title, Archangel of Death!]

Tang Shaoyang could not see the live changes, and he did not get the notifications about her, including if she learned any new skills, "Can you tell the change, Zara? Do you need more time to adjust to your new upgrade?"

[I have mastered Void. There are a lot of new things, and I can share them immediately if we use Spirit Integration. Also, I have a new element, a weird one, Death.]

That was indeed weird as how a Death could be considered an element by the System. But he also learned something new that there was another rank below the Mythical Rank, the Heroic Rank. That meant there were three more ranks above Rank SSS.

"I want to do that, but I want to finish your evolution first." Tang Shaoyang did not have an intention to stop using Spirit Blessing on Zara.

[Do you want to use 12 blessings on Zara the Archangel of Death? Yes/No?]

[Zara The Archangel of Death has successfully ascended to Mythical Spirit!]

[Zara The Archangel of Death gained a new title Quasi Goddess of Death!]

Tang Shaoyang was about to rank up Zara to the Mythical Spirit, but she stopped him. [Wait! Wait! Wait!] She called him three times.

[Can you still use Spirit Integration with me if you rank me up to Archaic Spirit? You end up dying when you use Spirit Integration with Avyn!]

"I don't think that's a problem. I couldn't integrate with Avyn at that time because I am still Ancient Rank, but now I am Demi-God Rank. My body should be strong enough to use Spirit Integration with any Archaic Spirit." Tang Shaoyang was confident that his body was strong enough for that, "And I have a new bloodline that strengthens my body further. I am ready to integrate with an Archaic Spirit."

[That's right. Your body should be strong enough right now, and you have to integrate with an Archaic Spirit so I can use my full power as well. During the trial, my power was still restricted, around seventy percent I would say. However, if you reach the power of that God Rank, I can fight with my full strength, then I can really help you fight the God Rank.] Vandir the Death King supported Tang Shaoyang's decision to rank up Zara if she was Tang Shaoyang's choice.

[Do you want to use 20 blessings on Zara the Quasi Goddess of Death? Yes/No?]

[Zara the Quasi Goddess of Death has successfully ascended to the Archaic Spirit!]

[Zara the Quasi Goddess of Death gained a new title, Goddess of Death!]

Tang Shaoyang used more than half of his blessings, 38 Spirit Blessings in total for Zara to ascend to the Archaic Spirit. She was no longer an angel, but Goddess. With that, he still had 23 Spirit Blessings and two Mythical Spirits that he could upgrade to Archaic Spirit, it was between Afi the Primordial Urosa and Karoen the Void Knight.

It took him some time, but he made the decision. He chose to use twenty Spirit Blessings on Afi the Primordial Urosa.

[Afi the Primordial Urosa has successfully ascended to the Archaic Spirit!]

Afi retained the same title, but the title didn't really matter as long as Afi got stronger. Of course, there was a reason why he chose Afi instead of Karoen even though he made a contract with Karoen first. Afi's contract mentioned that he would be part of the Tang Empire even after he was resurrected, and Karoen did not make the same promise. The choice was simple: he would make his own people stronger.

"Coming! Coming! They are coming!" At this moment, Karoen rushed back to the rooftop as he warned Tang Shaoyang the incoming enemy.

As the Void Knight said, the rupture slowly opened and from the gap of the rupture, light shone. Tang Shaoyang walked closer to the edge and looked up. He could see figures beyond the blinding light, not just one, but many of them. The God Ranks had arrived on Earth.

Chapter 1293 God Rank Yet Not God Rank

Tang Shaoyang let out a bitter chuckle, "I don't even have time to think of my daughter's name, hah?"

The rupture slowly opened and what awaited him behind the rupture was another army. The ones who came were not just the God Ranks, but also an army behind them. The open rupture was filled

with people, and it was unknown how many there were. The giant rupture was filled with humanoid figures, and it might be millions as there might be more people behind.

Tang Shaoyang used his Dragon Transformation, and this was the first time he used Dragon Transformation after his bloodline upgraded to the Wicked Dragon. The first thing he noticed from the appearance was that the dark scale was even darker, his tail grew longer as he could sense the change on his tail around three meters long, and he had three pairs of dragon wings. The first concern was whether he had three heads or not, and fortunately, he still had one head instead of three. Another change was his horn, he had two pairs of horns. A pair grew above his eyes, and another pair above the first pair.

"I am taller, I guess," He noticed that he was a meter taller compared to the previous Dragon Transformation. The previous transformation pushed his height to three meters, and now he has grown up to a little over four meters. This was a preparation for the Spirit Integration with Zara who had now an Archaic Spirit. Just in case, his normal body could not bear the burden of the Spirit Integration with an Archaic Spirit.

Tang Shaoyang did not immediately use Spirit Integration. He wanted to check his attributes first, and he was surprised that all his attributes were maxed out. With just a single transformation, without even activating Wrath of Slayer and also Spirit Integration. He realized that breaking through to God Rank's attributes was possible even though he was just Demi-God Rank. A Demi-God Rank with God Rank's attribute.

Then he used Spirit Integration with Zara. The obvious change was the wing. Zara did not get more wings, instead, her wings were reduced to three pairs, and each wing had a similar size to his dragon wings. And her wing was no longer black and white anymore, but just black wing. Another new thing was that his wing released a dark aura, and that aura was Death.

The first thing that Zara reminded him of was to control Death's Aura as it could harm his people as well, and she immediately guided him on how to control the aura through his mind. It took him a full minute before he could control it, making sure it did not leak through his weak. That was it, as usual, his Dragon Transformation dominated the change in his outer appearance just like before.

Tang Shaoyang checked his Window Status, and sure enough, his attributes broke through to the God Rank. Even though it was still at the entry-level, flat 15 Stars for all attributes except for Divine Power reached 40 stars. He could feel the overwhelming Heavenly Energy inside, the drastic change inside his body was too easy to notice.

"Then how high can I push all my attributes?" Tang Shaoyang still had one more skill that could increase his attributes, Wrath of Slayer. He did not hesitate to activate the skill. It was different from the beforehand fight where he would gradually increase his attributes, he used everything from the start. This was the deciding battle, the battle that would decide his fate. And he was surprised at how much Wrath of Slayer boosted his attributes.

Wrath of Slayer boosted his four attributes up to 85-Stars God Rank, and it pushed his Divine Power up to 110-Stars God Rank. He was surprised that his Divine Power passed 99-Stars which was usually the cap. He then realized there might not be a limit for the God Rank.

[This is insane! How could this be possible? This is not fair! I can only push my two attributes to reach God Ranks, and yet, you have the God Rank attribute while still in the Demi-God Rank. How

could this be fair?] That came from Vandir who was shocked to see his window status. There was a resentment in the Death King's voice for some reason.

"Does this make you feel good to form a contract with me?" Tang Shaoyang grinned. He did not care if it was fair or not. It was not like he cheated to get all of this. He stood at the edge, and he noticed that the Tarriors had come out of the building. It seemed everyone already noticed the incoming enemy. The rupture was so bright it lit up the night. It was impossible not to notice the rupture was open.

Bam!

Someone opened the door behind him, and Zhang Mengyao rushed out of the building. But then she stopped in front of the door at the sight of the figure who stood at the edge of the building. This was her first time seeing Tang Shaoyang's new form, but she recognized him. She could feel his aura that was much stronger compared to the time when they climbed up the tower.

"Please lead the Tarrior once more for me, Supreme Commander Zhang!" Tang Shaoyang turned around and smiled, "Only bring Epic Rank and above to the battlefield. For the Tarrior below Epic Rank, tell them to protect the ordinary people. Escort them out of the Capital. Origin! Show me our map!"

Origin projected the holographic map and showed him the developed territory under the Tang Empire, and also the map outside The Tang Empire. The reason he wanted Epic Rank and above to join the battle was that the army might be the main force of the Federation of Allurion and the Divine Church. Bringing Tarrior below Epic Rank was pointless as it was the same as bringing a cannon fodder. It must be Epic Rank and above to fight the main force.

"I will lure them out of our territory to the East of Russia. Get Tarrior ready to follow me there," Tang Shaoyang wanted to minimize the damage on his territory, so he chose the less populated area which was not his territory.

Zhang Mengyao was about to ask how he was going to lure the enemy until she sensed a familiar, but stronger aura. Her eyes widened as she looked at the figure in front of her. She fell on her knees, bowing toward the figure in front of him. It was not on her will, but her body moved on its own. This happened once, and she could not say anything even if she wanted to.

Tang Shaoyang did not notice Zhang Mengyao's posture because his Spirit Eyes focused on the Rupture. He just released the aura that he usually hid. Not only did he release it, but he made sure his aura grew stronger so the people in the rupture noticed him. That was how he was going to lure them to him. If they sensed the strong aura, they would come for him instead of coming to his Capital. From what he knew, they did not know the exact location of the Tang Empire's Capital yet.

The six pairs of wings opened and his figure blurred as he moved toward the East of Russia. It was a short flight for the current Tang Shaoyang. He made sure that he was out of China before stopping, and it just took him a few minutes.

Tang Shaoyang floated in the air, looking up at the rupture. He brought no one, including his beast companions, alone, waiting until the rupture fully opened. The rupture fully opened a few minutes later, and sure enough, his aura attracted the figures from the rupture.

The people in the ruptures came down toward him, proving his little trick work. That meant he could avoid the battle from away from his territory. That was a good start.

The army slowly descended from the rupture, and the rupture immediately closed up as the army descended. The portal only opened for a certain amount of time. Seven figures led the army, and he noticed that the army was protected by the barrier.

"Anyone good and quick in counting? Can you tell me how many people they bring for me?" Tang Shaoyang asked his spirits. He did not sound nervous, in fact, he sounded cheerful. He was not scared of the incoming army, and in fact, he was excited. There was nervousness in him, but he was more excited to fight the God Rank and their army.

[Who cares about their numbers? Just get me out already. I am ready for the battle!] Doombringer the Calamity Behemoth replied. It was not just him who was excited, the behemoth was also excited for the upcoming battle. [I hope you are strong enough so I don't get restricted like before!]

"That's true. Who cares about their numbers," Tang Shaoyang grinned ear to ear, "But I am not going to wait for them to slowly descend like that."

The army's descending speed was quite slow in Tang Shaoyang, and he was not going to let them land safely. Seven figures led the army, and he assumed seven of them were the God Ranks. He could not use Detection because they were out of range. Tang Shaoyang only had five God Rank Spirits, and six included him who integrated with Zara. It was six against seven if the army was not included.

"Let's make it fair, six against six!"

He formed a thick javelin with Slayer Energy, taking three steps back, then he ran a few meters ahead before throwing the javelin toward one of the God Ranks.

Swoosh!

Chapter 1294 True Slayer

Swoosh!

The javelin went through to the air, accelerating toward one of the God Ranks.

The God Rank had his hands forward. It seemed they were the ones who maintained the barrier and brought the army down. He noticed the incoming javelin, and he used one of his hands to receive the javelin. It looked like the God Rank did not take the javelin seriously. He used one of his hands, directing toward the incoming javelin while the other hand was maintaining the barrier. It showed that he could not split well between the two, defending himself and maintaining the main barrier as the barrier that protected the army and himself shook.

Two golden barriers formed in front of him, but the barrier burst out because Tang Shaoyang also used an Energy Destruction Touch. The Slayer Energy did not do anything to the barrier, because the mana was shattered by Energy Destruction Touch. The javelin passed through the barrier and went through to the main barrier which was also destroyed by the combination of Energy Destruction Touch and Slayer Energy.

The God Rank reacted late, but it was fortunate that he managed to avoid getting impaled on his chest. The result was that he lost his entire right arm and half of his shoulder. The main barrier crumbled as half of the army free-falling.

Tang Shaoyang wasted no time, forming hundreds of black fireballs. He directed the fireball towards the other sides, the six God Ranks so they could not help the falling armies. Then he summoned Avyn The Last Kankara'Xeo, Afi the Primordial Urosa, Vandir the Death King, Radiance the Frostbringer, and Karoen the Void Knight. He did not immediately summon The Calamity Behemoth, and there was a reason for that. He wanted to keep Doombringer for a surprise.

[ME TOO! SUMMON ME TOO! LET ME FIGHT!]

"You will have your time, later!" After saying that, he ignored the complaint from The Calamity Behemoth.

Half of the army behind the wounded God Rank still could fly, and they stood around the God Rank, forming more barriers as they slowly descended. The other God Ranks took the fireball seriously even though it was less lethal compared to the javelin. They learned their lesson not to underestimate his attack.

"Are you guys not going to fight?" Tang Shaoyang realized that his spirits stayed next to him instead of heading toward where the army would fall. He summoned them to finish them off, but none of them were moving.

"I think they will die falling from such altitude. You can send Radiance, Aerelion, Bronson, and Galeon to finish them off instead," Afi responded to Tang Shaoyang, "I opponent of the same rank." need to get used to this old body. It's been a long time since I have fought an opponent of the same rank."

The spirits Afi mentioned were the Rank SSS and Rank SS Spirits. Tang Shaoyang shrugged and summoned them, sending them off to finish the falling army. Aerelion, The Infernal Wyvern, shot up to the sky, heading toward the falling army. His wings were covered in black flame as he went through the armies. From the armor they wore, it must be the force from the Divine Church.

Meanwhile, the black fireball hit the barrier and exploded. Just like fireworks but it was black flame. The barrier was engulfed with the dark flame.

"Why don't you try to snipe him again? Reducing their number to six seems ideal for us," Vandir proposed.

"Do you think it will work for the second time? I think they will be prepared for the same attack," Even though Tang Shaoyang said so, he still formed the javelin with his Slayer Energy. He added Energy Destruction Touch into it, trying to look at one of the God Ranks.

"No, not the others, but the first one. I think you can kill him," Vandir pointed at the bunch of Holy Knights that had transformed into their angel form, forming a barrier around the God Rank, "You have a higher chance of killing him than the others, no?"

There was no second thought as Tang Shaoyang threw the second javelin, "I don't think it will work. He could easily avoid it from this distance." He aimed at the Holy Knights.

"You are overestimating these fanatics. They are proud of themselves, and they will not try to dodge your javelin. Thinking they can block it if they are more prepared," Vandir shook his head.

As The Death King predicted, the Holy Knights did not try to dodge the javelin. They formed more barriers. In a split second, almost a hundred barriers formed, but it was futile in front of the

combination of Slayer Energy and Energy Destruction Touch. The defensive barriers crumbled easily, not even slowing down the javelin. It pierced through at least over twenty Holy Knights, and the God Rank realized his knights could not protect him while he was recovering. He did not try to block the incoming javelin as he flew upward, but the javelin still hit his right knee.

There was no scream from the God Rank even though he lost his entire left arm and his right foot. However, that angered the God Rank. He expected this to be an easy trip and fight to conquer the new world. He did not expect that he would be battered the moment he stepped into this new world.

"AAAARRRRRRGGHHHH!" He screamed in fury as six pairs of wings burst out from his back. Then his body turned into light completely, from the hair to the bottom. He even regenerated his missing part with the light. It brightened the night, "You have angered a God, MORTAL!" The God Rank left his people and dove toward Tang Shaoyang with the speed of light.

Boom!

The ground cracked as he landed right in front of Tang Shaoyang, "This is the Authority God that you don't have!" His right hand shone even further as he tried to deliver a punch toward Tang Shaoyang. He was so consumed by his anger that he did not realize he was surrounded by four God Ranks.

"Tch, you still have a long way to go to be a God!" Afi the Primordial Urosa slammed his paw toward the Light God Rank from behind. His paw was covered in lava, it dropped from his paw as he slammed the God Rank flat to the ground.

Bam!

Even though his body was completely made of light, he still coughed up blood. To Tang Shaoyang's surprise, the blood was not red, but gold, shining gold. It did not stop there as Afi slammed the Light God Rank again.

Bam! Bam! Bam! Bam!

Just like that, one of the God Ranks lay down on the ground, dying. Afi did not finish him off, he gave the kill to Tang Shaoyang, "You will get the level from killing him, a lot."

"You are part of me right now. Your kill is my kill, so it's the same. I will still get the level even if you kill him," Tang Shaoyang reminded Afi that he was part of him now.

"Alright then," Afi's right paw melted into lava and he slammed it toward the Light God Rank's head, melting the head as the Light God Rank died without making any sound.

[You have killed God Rank, ???]

[You have leveled up!]

[You have reached level 14213!]

[You have fulfilled the condition for Slayer advancement!]

[You have advanced to Archaic Slayer (True Slayer) from God Slayer!]

[You gained 1.000.000 Slayer Energy!]

[Your Slayer Energy has become more pure!]

The level already shocked him, but he did not expect the class advancement in the middle of the fight, right after killing the God Rank. He then realized what triggered the advancement of the Slayer Class. He had killed every rank, from the non-rank to the God Rank. That was what triggered the advancement. He was not sure what it meant that his Slayer Energy had become even more pure, but he assumed it was a good thing that strengthened his Slayer Energy. One million Slayer Energy was welcomed as he had limited the Slayer Energy compared to his Heavenly Energy. In the middle of fighting, he rolled up his attribute points, allocating everything he just got.

"Yo, I know you got a lot of levels, but you have to focus on the fight right now. They are coming down!" Vandir of the Death King reminded Tang Shaoyang who was busy, looking at this window status.

"My bad, but I have you guys to protect me, and one of my classes just advanced. I have become an Archaic Slayer or True Slayer? Or maybe both. I am not sure," Tang Shaoyang looked up and the God Ranks and their armies were a hundred meters above the ground. The remaining six God Ranks already transformed, three of them had their bodies transformed into light just like the one they killed, and the other three had different transformations, fire, wind, and lightning. It was easy to identify which God Ranks they were part of. The Light God Rank was from the Divine Church, and the other three were from the Federation of Allurion. They were ready for the real battle.

Chapter 1295 Start The Battle With A Style

"Foolish Xaphan! This is why I don't like bringing a newbie with us. Instead of gaining experience, he instead died!" One of the Light God Rank voiced his displeasure, and his voice was loud enough for Tang Shaoyang to hear clearly. Even though he could probably hear even if he said it in a low voice with the distance between them and how sharp his hearing was.

Xaphan was the God Rank who just died, killed by Afi. Xaphan was one of the new God Ranks from the Divine Church. A few years was nothing for the God Rank.

"We can't blame Xaphan for what happened. We get tricked or our people are incompetent to gather information. How could they never tell us anything about the God Rank and the Demi-God Rank?" The God Rank that transformed into crimson flame spoke, scanning the group in front of him. From Tang Shaoyang, Karoen, Afi, Vandir, and Avyn. His last gaze was on Avyn which he recognized to be the strongest among the five figures.

Tang Shaoyang let them speak among themselves, letting them land without any further attack from him. He officially identified six God Ranks and forty-one Demi-God Ranks. He did not bother to check the remaining people's rank.

"I thought this is a lower world, how could possibly this world have God Ranks, more than one on top of that? How is this possible?" Another question came from the Wind God Rank.

"It's because of that person!" The Light God Rank who spoke earlier, pointing his finger at Tang Shaoyang, "He is the person with Spirit Contract Class. Those God Ranks are spirits, and from what I know, these God Ranks are an Archaic Spirit. You have to be careful fighting against them even though we had the numbers."

The Nirvana Alliance had fought several Spirit Contractors, and they knew a lot more than the others who were not aware of the class. They were aware of the rank of the spirit and could tell that the four spirits were Archaic Spirits. They came to Earth with the mind of easy work, and they were

surprised by Tang Shaoyang's appearance. Not only he had reached the Demi-God Rank in such a short amount of time, but he also had four Archaic Spirits which The Nirvana and the other six God Alliances were afraid of.

"But Gungnir has killed him!?! How can he still be alive? We saw his body crumble into dust at the last moment!" Another Light God Rank was puzzled to find Tang Shaoyang was still alive. Nirvana, the God Alliance behind The Divine Church had sent three God Ranks to kill Tang Shaoyang earlier in the Dimensional Tower. Tang Shaoyang almost made an escape because of the Divine Thunder from the System, but Tang Shaoyang ended up dying because his body could no longer bear the burden of the Spirit Integration.

"How long are they going to chat by themselves?" Afi asked loudly, and the enemy then focused on the bear. The Primordial Urosa did not stay still as he raised his right paw which was covered in lava. He slammed the paw to the ground.

Boom!

The ground cracked, and the crack moved toward the army. The crack passed through the God Ranks and reached the army behind them. The God Ranks moved away slightly from the crack even though it did not pose a threat to them. They were being cautious after what happened to Xaphan.

While the God Rank could make a distance from the crack, not for the army behind them. They were grouped up, in a formation, lining up for the battle. The crack was around forty centimeters wide, the soldiers could move slightly so they did not fall to the crack. However, the army could not avoid what came for them.

Boom!

The crack closed up in the blink of an eye and lava burst out from the crack before it closed up. The shot went up into the air, up to fifty meters as if it created a wall of lava before the lava splashed to the sides. Just like a flood, the lava swept the army. The Primordial Rank, The Legend Rank, and The Demi-God Rank managed to survive the surprise from Afi, but it was unfortunate for the Myth Rank and lower-rank army. They got swept into the lava and melted.

The Wind God Rank was quick with his reaction, using his wind to isolate the lava with his wind and protect the army from the lava flood.

While the God Ranks were distracted by the lava, Tang Shaoyang formed another javelin made of Slayer Energy. This was the test of his new advancement. He aimed at the Wind God Rank who was currently distracted by the lava. His throw created a shock wave as the javelin moved with the speed of sound. With such a distance between them, it was as if the javelin was teleported. In the blink of an eye, the javelin was right in front of the Wind God Rank.

Of course, killing the second God Rank would not be easy with just one strike. One of the Light God Ranks and Flame God Rank reacted in time. Both arrived in front of the Wind God Rank, and both formed the shield. The Flame Barrier and Light Barrier formed, manipulating their element authority to create the strongest barrier.

However, they once more underestimated Tang Shaoyang's Slayer Energy. The javelin tore apart the barrier, and the javelin showed a sign of being slowed down. That gave the Light God Rank a chance to grab and pull the Wind God Rank. The javelin missed the intended target, but it was unlucky for whoever was behind the Wind God Rank.

The javelin went through to the body of the Demi-God Rank, and it was not stopping. The javelin kept going until it disappeared from Tang Shaoyang's Spirit Eyes. He killed hundreds of the army with just a single throw, and The Wind God Rank lost control over his wind. The contained lava burst out, flooding out in all directions.

"Don't try to block that red spear again! Dodge if he ever uses that! That must be Slayer Energy!" The Light God Rank shouted, reminding the three God Ranks from the Federation of Allurion. Nirvana had the information about Tang Shaoyang's first two classes. Those two classes were the reason why The Nirvana did not hesitate sending out three God Ranks when Tang Shaoyang was still just an Ancient Rank. That was the worst combination possible, and they thought of eliminating the threat before Tang Shaoyang could reach his potential.

The Six God Ranks clearly lacked coordination with how they fought. As they focused on Tang Shaoyang, they forgot about the four Archaic Spirits. Avyn was missing from the group, and she was behind them, floating above the lava and the flying Demi-God Ranks who ran into the air when the lava flooded out.

"I don't like hot temperatures," Avyn muttered while releasing the frost aura. That was just aura, but the lava froze, and whoever was touched by the frost aura, immediately froze up. The seething lava instantly froze, and it spread out, freezing the army in a wide radius.

The third God Rank of the Federation of Allurion, The Lightning God Rank sensed the freezing temperature behind him, "Watch your back!" He called out as he moved to the side. He did not think of saving his freezing subordinates as he moved to the side at lightning speed. The Flame God Rank turned around and immediately followed his friend. Meanwhile, the three Light God Rank and The Wind God Rank moved to the opposite side. They were splitting up with the frozen area in between.

Just like a glass, the freezing people broke into pieces. Tang Shaoyang heard the buzzing of notifications in his head. He just put away the notifications and summoned Rank A+ Spirit up to Rank SS Spirit, all of them. He signaled his spirits to clean up the army that had been reduced almost to half. Afi and Avyn went crazy with their first strike. The spirits rushed forward, walking through the freezing lava. The frost aura did not hurt them. That showed how perfect Avyn's control over her elemental.

Afi took a deep breath at the sight of his freezing lava. He was aware that Avyn was stronger than him, but he did not expect the gap between them to be too big like this.

"I will take care of the Flame and The Lightning. Don't come closer to where I fight. It might be dangerous for you guys because I will use Death and Void Domain. I am afraid you will get hurt if you accidentally enter my domain." Tang Shaoyang chose his opponent and reminded the others. He did not mean for one against two because he still had his hidden card, Doombringer the Calamity Behemoth. He dashed to the right, leaving the other Archaic Spirits.

Avyn glanced toward Tang Shaoyang's side with a concerned gaze. She wanted to be the one who fought with Tang Shaoyang instead of letting him fight together with The Calamity Behemoth who hardly listened to Tang Shaoyang's order. However, The Last Kankara'Xeo chose to trust Tang Shaoyang's decision and did her part.

'I will kill my prey quickly and help him!' That was what in Avyn's thought as she searched for her prey.

*** **

"Hah! I can't believe you dare to come at us alone," The Flame God Rank could not believe that the Demi-God Rank came at them alone. The four God Rank spirits were chasing their comrades, "We just need to kill him, and the God Rank Spirits will be gone as well with him."

"Don't underestimate him, Artaya! He killed one of us already!" The Lightning God Rank became more cautious that Tang Shaoyang dared to approach them alone.

Tang Shaoyang had a sword in his right hand, and Nightfall was still in the sheath, "If you don't come, then I will come to you!"

Fifth Heavenly Gate: Heavenly Sword - Heavenly Revoke!

Chapter 1296 Calamity, As Its Name

Fifth Heavenly Gate: Heavenly Sword - Heavenly Revoke!

The Flame God Rank's eyes widened in surprise as he was not expecting Tang Shaoyang to be this fast. He thought of blocking the sword with his flame, but then he remembered about the javelin. However, his hand was midway to block the sword. That was his unconscious reaction when Tang Shaoyang appeared right in front of him.

"Don't try to block that sword, idiot!" The cautious Lightning God Rank came to the rescue. He was prepared to be surprised, and he arrived in time before Tang Shaoyang fully sheathed out the sword. He pulled the Flame God Rank back, bringing the Flame God Rank down to the ground.

Tang Shaoyang's eyeballs followed the two figures to the ground, and he whispered in a low voice, "Void Domain!"

The surrounding space cracked, twisted, and opened. Tang Shaoyang controlled the cracked void, opening a connection between two cracks. One in front of him and another one right above the two God Ranks. As he slashed the sword forward, his sword went through a void crack and appeared from the void crack above the two God Ranks.

"We are fucked!" The Lightning God Rank said when he noticed the void crack right above him.

"We are not!" The Flame God Rank's body got brighter and brighter, and when the sword was a few centimeters away from their chest, The Flame God Rank exploded. It was one of his skills, Supernova. The surrounding area was surrounded by a massive explosion of fire, and Tang Shaoyang was blown away by the explosion. That saved both God Ranks from getting cut by the sword.

The explosion reached the other side of the battlefield, causing the others to run from it. However, the explosion might be fatal for the others, but not for Tang Shaoyang who was invulnerable to fire. The explosion pushed him twenty meters away from the two God Ranks.

"I told you not to underestimate him. Your Supernova is just a joke to him, did nothing even though he was so close with you, Irnus!" The Lightning God Rank saw what Tang Shaoyang did. Not only did the Supernova not hurt Tang Shaoyang, but Tang Shaoyang also minimized the Supernova by sending the fire to the void.

Meanwhile, Tang Shaoyang got a headache because of The Calamity Behemoth. Doombringer kept calling him out, loudly in his head to summon him out. That was not his plan, he planned to get an

easy kill with a surprise summon. His surprise attack failed even though he felt like he almost got them, but now Doombringer kept nagging him.

"We will talk after we kill them, Doombringer." He had no choice but to summon his ace card. Not because he abandoned his plan but because Doombringer wanted to fight the God Rank head-on instead of launching a sneak attack and killing one.

[I will not attack even if you summon me later. I will fight them head-on without using a dirty trick!] That was what Doombringer said. The surprise attack was useless if Doombringer did not cooperate with him.

'I need to teach this beast a lesson,' Tang Shaoyang made a mental note as he summoned Doombringer.

"Finally!" Doombringer let out a roar, observing the two God Ranks, "You have become so strong that I managed to regain my full strength. This is going to be fun!" The Calamity Behemoth rushed forward after he said that he ran toward the Flame God Rank, and Tang Shaoyang noticed that. He could tell Doombringer purposely chose Irnus so he fought the tougher enemy. It would be easier for Tang Shaoyang to fight Irnus because he also had a fire element.

That made Tang Shaoyang angry. He was annoyed that Doombringer wouldn't listen to him, and now Doombringer tried to mess him up by isolating him and the Lightning God Rank. Before Doombringer could reach the Flame God Rank, Tang Shaoyang recalled him back. The Calamity Behemoth disappeared midair as the flame wall rose to the sky. Irnus did not expect that The Calamity Behemoth would disappear like that.

At the same time, the two God Ranks rushed backward, making a distance from The Calamity Behemoth. While both did not recognize Doombringer as Calamity Behemoth, they knew Doombringer was a behemoth, the dangerous monster at the same level as the dragon.

[What's the meaning of this!? Why are you calling me back!?] Doombringer did not sound happy, but then he sensed Tang Shaoyang's fury. They could feel each other's feelings, and Tang Shaoyang knew that Doombringer was not as upset as Doombringer sounded.

"I can tolerate you because we just made a contract, and you don't listen to my plan. I can tolerate that because you are God Rank with pride, but now you try to mess with me, Doombringer! I am willing to bear the consequence of breaking our contract, and I will sacrifice you instead!" Tang Shaoyang had his Spirit Eyes locked on Irnus and the Lightning God Rank while he had a conversation with Doombringer.

He thought everything would go smoothly after he killed the first God Rank, and he had Doombringer as well, the beast that was feared even by the God Rank. He was being serious about sacrificing Doombringer. If The Calamity Behemoth did not want to listen to him. The next was to hold two God Ranks himself while waiting for Avyn and the others killed the other God Ranks.

The Calamity Behemoth could tell that Tang Shaoyang was serious with his words. He could feel Tang Shaoyang was holding the fury while speaking to him. And he could also tell what Tang Shaoyang planned if he did not listen to Tang Shaoyang. Sacrificing him was not as easy as it sounded because of the process that Tang Shaoyang had to beat him in a battle to sacrifice him. If it was just Tang Shaoyang himself, he was confident that Tang Shaoyang would not be able to win,

but not the case with the other five God Rank spirits. His losing the battle was ninety percent, and he did not think he could win, not when he was still in spirit form.

[What are you talking about?] Doombringer toned down, pretending to not know what Tang Shaoyang fussed about.

"Are you still pretending you don't know what you did? You are aware that I am at an advantage if I fight The Fire God Rank, and you tried to isolate me against the Lightning God Rank instead? Do you think I am a joke to you? I don't care if I die a few times, but I will make sure to kill you after I kill them all if you don't listen to me!" Tang Shaoyang usually would not resort to a threat to resolve the issue. But he did not have that time for a conversation with the Calamity Behemoth. The quickest way to resolve the issue was with a threat, and it worked even with a fearsome beast.

"This is humiliating! How can you get distracted when you fight against us!" The Lightning God Rank went through the firewall. He could hear from the other side that Tang Shaoyang was talking to someone. He took the chance to strike. He was holding a spear and thrust it forward to the chest.

Of course, Tang Shaoyang saw Lightning God Rank's movement through his Spirit Eyes. He used the seventh Heavenly Gate, The Heavenly Tortoise. A black tortoiseshell formed and the spear struck the shell. The spark of lightning burst out, as the lightning raged on. However, the lightning failed to break the shell, and the impact pushed him backward as his feet skidded on the ground, pushing him twenty meters backward.

"You can't hide forever in your shell!" The Lightning God Rank rushed toward him once more.

Tang Shaoyang saw the Lightning God Rank come toward him, and he could easily counter the movement. However, he chose to block the spear with the Heavenly Tortoise Shell because that was a show for Doombringer to see. A show that he could hold down on his own until the others finished their fight. That was not a bluff that he could hold on his own without Doombringer.

"This is the last time I will ask you, Doombringer! Will you listen to me, or will you keep doing whatever you want? Make your choice, 07:06

and if you don't answer me right now. I will take that as a no!"

[I will listen to you!] As Doombringer gave his answer, Tang Shaoyang used [Blink]. He easily avoided the second strike and appeared behind the Lightning God Rank. He then summoned Doombringer out for the second time, "This is your last chance! I will never give anyone a third chance!" The threat worked well as The Calamity Behemoth immediately faced off against The Lightning God Rank.

"Don't you dare to ignore me, Mortal!" Irnus was right in front of Tang Shaoyang with his flaming fist. The flame fist was three times bigger than Tang Shaoyang himself.

Instead of dodging or blocking the attack, Tang Shaoyang decided to meet the fist with a fist.

Fourth Heavenly Gate: Heavenly Force - Heavenly Crushing Strike.

The first met in the air and exploded. The crimson fire and Heavenly Energy clashed, forming a massive explosion.

Chapter 1297 Against Irnus

Tang Shaoyang and Irnus flew backward from the impact. He landed on his feet and to his surprise, he felt the burning pain in his right hand. He glanced at his right hand, which was charred by the fire. It was a surprise that the fire could hurt him.

"Are you surprised? You are underestimating me just because my fire couldn't hurt you earlier. I will make you know the difference between God and a mere mortal like you!" The ground was shaking and soon cracked as fire came out of the crack. The fire burst out of the crack, and it quickly spread out, "This is the True Flame. Something you will never get unless you become a God!" The fire burst out of the crack as the temperature had a sudden increase.

Tang Shaoyang could tell that Irnus activated his domain. It was similar when he used his Realm of Fire, and this made him curious. Domain was used to strengthen the fire and also provide more fire in the fight. The domain also weakened the other elements that were used in the domain. What if he also used his domain? He never fought someone when they activated their domains, which was weird to him because he had a lot of domain skills.

The Void Domain was still active, and the space cracks could be seen in the air. Then he used his new domain, Wicked Domain. He never used this domain, but he understood what it did. The black gas spread out of his dragon wing, and that was the Dark Poison. One of the Wicked Dragon's elements. Then the ground shook once more as the black fire went through Irnus' True Flame, burst out, and fought the crimson fire. That was right, the fires did not coexist as they were trying to extinguish each other. Then the dark lightning spread out on the ground at the ankle level.

"So what if you master more than one element!? You can never beat my True Flame!" The golden-crimson flame burst out from Irnus's ground, forming a wave as he stood on top of the flame wave. Ten-meter wave formed with a figure on top, flooding toward Tang Shaoyang. The dark poison was burnt, the dark lightning and the dark flame were engulfed by Irnus' golden-crimson flame. It showed Irnus' domain was stronger than Tang Shaoyang even though it was a domain that came from his Wicked Dragon bloodline.

'I haven't tried it, but let's see if I can do it,' Tang Shaoyang opened the crack to the void, matching the size of the flame wave. It was a dangerous thing to do because there was a backlash if he failed to control everything properly. Karoen had reminded him and also Zara to be careful of using Void. If he opened too big or too long, there was a high chance that a void creature could flock into his dimension. Karoen reminded him many times that the Void Creatures were much scarier than the beasts or monsters.

Tang Shaoyang succeeded in his attempt to open a big void gate, but of course, Irnus would not enter such an obvious and big void crack. He jumped over the crack while he let his flame wave enter the void. Then the man in the fire flashed toward Tang Shaoyang, leaving a trail of fire.

"Oh, fuck," Tang Shaoyang muttered before his face was hit by a fist made of fire. His figure flung backward, rolling on the cracked ground. He raised a wall to stop his momentum from the ground and used the wind to reduce his momentum. His back hit the wall, but he was on his feet. The first thing he did was to touch his nose. Blood trickled down his nose from the punch, and he grinned to see his weird blood. It was dark red, but there was a golden shine reflected on it.

Irnus did not give Tang Shaoyang a chance to recover because he was already right above Tang Shaoyang. This time he came with a sword made of fire instead of a fist covered in fire. He slashed down the one-and-a-half-meter swords. The fire blazed out as it descended toward Tang Shaoyang.

Even though Tang Shaoyang was rolling on the ground, his Spirit Eyes locked on Irnus. He saw Irnus coming for him far from before. The Abyssal Bone appeared in his right hand as the dark lightning gathered at the battle-ax. He swung the battle ax upward, and it pulled out all the dark lightning on the ground, clashing against the sword made of fire.

The dark lightning burst out along the golden-crimson fire also spread out. Tang Shaoyang blocked the attack for the first time. Then he took Nightfall out of his inventory. The Nightfall had lost its sheath from an earlier attempt on a surprise attack on Irnus. The black flame swirled around Nightfall as Tang Shaoyang swung the sword upward, forming a torrent of black flame.

Irnus kicked down the air, pushing himself away from the sword range in time as the black flame pillar formed along with the strike. He did not retreat without countering Tang Shaoyang as twelve giant fireballs formed above him and shot down toward Tang Shaoyang.

Boom! Boom! Boom!

The fireball landed and exploded, engulfing Tang Shaoyang in fire. The explosion formed an explosion sphere with Tang Shaoyang in it. However, the explosion did not last long as a void crack formed and absorbed the fire, and Tang Shaoyang was unhurt from the fireball. He handled Irnus' True Flame pretty well after he first got burned. He realized that his Heavenly Energy was not enough to face the True Flame, and the only way to face the True Flame was with Slayer Energy. He formed a barrier with Slayer Energy, and the True Flame could not break the barrier. However, there was a limit to his Slayer Energy compared to his Heavenly Energy.

Third Heavenly Gate: Heavenly Steps - Heavenly Ethereal Shift.

His figure moved so fast and arrived right in front of Irnus. With his battle-ax that remained covered in black lightning, he swung the battle-ax upward toward Irnus's chest. Irnus however was not surprised by Tang Shaoyang's speed because he was prepared. A wing made of golden crimson fire burst out from Irnus' back and locked Tang Shaoyang inside it as he backed away. The fire wing formed into the sphere cage with Tang Shaoyang inside.

Pung!

A muffled explosion came out of the caged fire with Tang Shaoyang inside and soon the black smoke puffed out as a figure fell down. Tang Shaoyang fell to the ground, and a five-meter circle in diameter made of fire formed with Tang Shaoyang at the center. The golden crimson fire rose to the sky, swirling very fast.

Tang Shaoyang got back on his feet with black smoke coming out of his body. He was burned by Irnus' fire, and it caught him off guard, thinking that his speed would catch Irnus off guard. It was he who underestimated the God Rank now. He looked up to the sky, realizing there was no escape because the fire reached space and even further. He could not fly past the fire around him.

The fire circle got smaller, and it was now four meters in diameter. He could sense how dangerous this swirling fire was. His instinct told him not to brute it with his body, and he trusted his instinct, "What about the Void?"

He formed a void crack the size of a door, and to his surprise, the void crack broke apart when it touched the swirling fire. He tried again, and the result was the same, and the circle got smaller now. Three meters away before his body touched this dangerous fire.

"Fall into despair, Your Mortal! This is the price for defying the Federation of Allurion!" Irnus's voice came from outside the circle. However, little did he know that Tang Shaoyang was far from despair.

Eighth Heavenly Gate: Heavenly Tortoise - Sentinel of Heaven!

The Heavenly Tortoise formed around Tang Shaoyang as he went through the golden-crimson fire circle. He just walked through with the Heavenly Tortoise protection. He went through without getting hurt, but the Sentinel of Heaven broke apart as well.

"I know you can get free from my first Sacred Ring, but I have prepared more than one ring for you! Let's see how many times you can use your skill, Mortal!" The smugness in Irnus' voice was obvious. He thought he got Tang Shaoyang into the loop of despair. The second ring was just two meters away from the first ring.

Tang Shaoyang used the same technique and went through the second ring. The Sentinel of Heaven broke apart, but he got free from the second ring. There was a third ring, and he did not hear Irnus' voice this time as he faced the third ring.

'Let's see if Slayer Energy works well against his True Flame,' Tang Shaoyang gathered his Slayer Energy in his sword, right at the blade. Then he cut through the fire, and he managed to cut the fire. He got out of the Sacred Ring. No matter how fatal the Sacred Ring was, it was useless if it did not belong to him. The same with his few attacks earlier. He also failed to hit Irnus, even for a single time.

"Fight me like a God if you are a God, Irnus!" Tang Shaoyang's figure accelerated toward the sky, accelerating toward Irnus. Irnus tried the same trick as a fire wing burst out of his back, but Tang Shaoyang would not fall for the same trap twice. He used [Blink], avoiding the trap, appearing above Irnus. He swung down the Abyssal Bone that was covered in black lightning.

Irnus was caught off guard this time, not expecting the Blink. He raised his sword of fire, putting it horizontally to block the battle-ax.

Bang!

The golden-crimson fire and black lightning burst out, but Tang Shaoyang had the momentum. He brought Irnus down to the ground with him.

Boom!

Chapter 1298 God Domain

Irnus's feet entered the ground, around his ankle level from the impact. His sword blocked the battle-ax. He tried to push away the battle-ax, but he realized that the pressure on him was stronger than he expected. Deep inside, he was surprised that the Demi-God Rank in front of him had a higher attribute than his God Rank. This alerted Irnus, making him realize that he could not continue playing with Tang Shaoyang. He must kill this man or else this man would become their disaster in the future.

For God Ranks, attributes rarely mattered because most of them were supposed to have similar attributes. It rarely mattered in the fight, but it was different when his opponent was just a Demi-God Rank. He was supposed to have superior attributes, and yet, he was getting suppressed by the raw Strength.

Irnus lowered his sword to the right, causing the battle-ax to slide down. Then he spun, hitting Tang Shaoyang's belly with a spinning kick. He did not use a skill, but just a pure raw strength in the kick. He was testing something, checking the man's attributes. The kick just sent Tang Shaoyang a few meters back, and his kick had no effect aside from a force that pushed the man backward. If his kick did not hurt Tang Shaoyang, at all, that meant Tang Shaoyang also had a high Vitality and might be higher than himself.

'He's also fast,' Tang Shaoyang was right in front of him, swinging the sword toward his neck. That also surpassed the speed and reaction of the God Rank. On the same level as him, at the least. He raised his fire sword, blocking the sword. Then Tang Shaoyang raised his battle-ax, swinging it down.

Irnus noticed the deep red energy covering the battle-ax' blade, Slayer Energy. The God Ranks of Nirvana told him about how dangerous Slayer Energy was. He was not going to try to block the Slayer Energy when he was advised to dodge it. He leaped backward as the battle-ax hit the flaming ground. The golden-crimson fire burst out, but he realized that Tang Shaoyang had found a way to fight against his True Flame.

Tang Shaoyang went through the True Flame and rushed toward him. From skills exchange, they got to the close combat. This was Irnus' first time, fighting someone with a battle-ax and also a sword. There was no pattern in the attack with each strike, but he noticed how smooth Tang Shaoyang was with the sword. From a few exchanges, he could tell that Tang Shaoyang was more proficient with the sword than the battle-ax.

Tang Shaoyang launched a flurry of attacks while Irnus was in a defensive position. Irnus blocked and avoided the attack flawlessly, and Tang Shaoyang could not find an opening.

Boom!

His battle-ax once more hit the empty ground as the True Flame burst out of the ground. His fire and other elements did not work on Irnus, and Irnus easily avoided his fast attack. That was why he chose close combat, but it did not work either. He had Slayer Energy that could hurt and kill the God Rank, but it was useless if he could not land the hit. The fire sword was a real sword, an artifact, not a sword made of fire because Energy Destruction Touch and Slayer Energy could not destroy it.

Tang Shaoyang should be happy about the outcome because he was one rank lower than Irnus. The fact he could fight against Irnus tow in tow was amazing already. However, he did not feel happy, at all. That just made him frustrated. If he could not kill one, then how was he supposed to kill the other five God Ranks?

Irnus also did not attack, standing twenty meters away from him. He also contemplated how he ended the battle because he realized that his skills did not work on Tang Shaoyang. The fight in the close combat made him realize that Tang Shaoyang was superior to him. He felt that way because he was not given a chance to counterattack. All he had been doing was to block and dodge, nothing else.

Third Heavenly Gate: Heavenly Steps - Heavenly Illusionary

Tang Shaoyang left behind an illusion as his figure moved so fast toward Irnus. Again, Heavenly Illusionary failed to trick Irnus. Irnus noticed his movement, and he raised the battle-ax in the air.

He covered the battle-ax with the Slayer Energy and used [Thousand Blasts]. He expected Irnus to block his battle-ax just like what Irnus had done before, and it worked as he planned.

Boom! Boom! Boom!

Before it reached the thousand blasts, the Abyssal Bone broke apart. The blade was broken, and the following blast broke the shaft. That showed that Irnus had a superior weapon than him. He tossed away the broken weapon, tossing the sword to his right as he used Nine Heavenly Gate consecutively.

Ninth Heavenly Gate: Heavenly Beast - Heavenly Azure Dragon!

Fifth Heavenly Gate: Heavenly Swords - Severing the Heaven!

He was borrowing the Heavenly Energy of the Heavenly Azure Dragon, making his Heavenly Energy purer before using The Heavenly Swords. He slashed the sword forward as the Azure Dragon appeared behind him.

Roar!

Irnus responded with a swing as well, but then he realized that was more than just a mere slash. The sight of the Azure Dragon told him it was more than just a normal slash. He imbued more energy in his sword at the last moment as the sword met in the air. The result was obvious as his sword flung into the air as Nightfall reached his chest.

However, that was still not enough to kill Irnus. The sword slashed his chest, cut his chest open as his figure flung backward from the impact. That was the first wound Tang Shaoyang inflicted on Irnus, but the Flame God Rank returned to his feet immediately after receiving such a strike.

Tang Shaoyang thought that was enough to kill Irnus when the fire sword went into the air, but that was not enough. The slash left a deep cut on Irnus' chest and his blood flowed out from his elemental body. The blood evaporated immediately because of his flame, but the wound did not close up despite having a high regeneration body as a God Rank.

This made Tang Shaoyang realize the gap between him and the God Rank. The gap could not be closed even though he had the attributes of the God Rank. Afi killed one of the God Ranks easily, but his sword failed to kill one, and the strongest strike failed to kill Irnus. The frustrating part was that he could not use his Slayer Energy when he used the Nine Heavenly Gate. When he performed the Nine Heavenly Gates technique, he must use the Heavenly Energy.

"This is embarrassing. I almost die to a Demi-God Rank? This is the most humiliating moment in my life that I almost die to a Demi-God Rank!" Irnus said that to himself, looking at the wound. The throbbing pain kept reminding him of the humiliation. He thought the same when he lost his grip on his sword. He thought his body would be sliced into two by the sword too, but the technique was not strong enough to kill him in one strike. However, if he got hit by the same strike repeatedly, he might die.

"The playtime is over," Irnus raised his head slowly and met with Tang Shaoyang's eyes, "I will show you the despair. I will show you why you can't kill a God Rank!" The fire on his body burst out and flared up to the sky.

Then Irnus and Tang Shaoyang disappeared from Earth, or to be more exact, Irnus brought Tang Shaoyang to another dimension.

"Welcome to the God Domain!"

Tang Shaoyang felt like he was using the teleportation gate. The feeling was similar when he used a teleportation gate. Then he felt the increasing heat around him. He stood in the middle of a flat island, an island surrounded by the sea. It was not just the normal sea but a sea of fire. Then he heard Irnus' voice in his head. That was right, he felt like Irnus talked directly into his head just like the spirits.

"This is my God Domain, a separate realm. Here, I am a God, and I can do anything I want here. For example this."

The island where Tang Shaoyang stood suddenly disappeared and below him was the sea of flame. Those might be the True Flame, and Tang Shaoyang immediately stabilized himself from falling by suddenly losing his ground.

"And also like this."

Hundreds of fireballs appeared around Tang Shaoyang, giving him no space to escape. What happened next was obvious, the fireballs moved toward Tang Shaoyang, squashing Tang Shaoyang instead of exploding. But when all the fireballs gathered in that same spot, it exploded. The raging flame filled the space where Tang Shaoyang was until the fire subsided. Tang Shaoyang was fine as he managed to block all the fire with his two barriers, The Heavenly Tortoise Protection and the barrier made of Slayer Energy.

It seemed Irnus also expected that his fire would not be able to hurt Tang Shaoyang. Irnus was trying to intimidate Tang Shaoyang.

"Or I can also do this."

The sky above Tang Shaoyang was replaced by another sea of fire. Above and below was fire, and they slowly came toward Tang Shaoyang, getting sandwiched by the sea of fire. Soon, Tang Shaoyang was drowned in the fire for a few minutes. After a few minutes, the fire disappeared.

The realm returned to the state when he first arrived. He stood on the same flat island, and Irnus was now in front of him, "It's embarrassing to use my God Domain. This is a disgrace for a God Rank like me to use my God Domain to kill you. But you should be proud that you force me to use my God Domain."

"I will be proud when I kill you and your five friends. I will be proud when I destroy the Federation of Allurion and the Divine Church."

Chapter 1299 Dragon Vs God

"Buahahahaha..." Irnus released a hefty laughter when he heard what Tang Shaoyang said. He was not angry because he was confident that Tang Shaoyang would not be able to kill him. He still had one more thing he had not used yet aside from God Domain.

"I don't really want to use this, but might as well show you since I have used God Domain. I want you to feel despair in your last moments. I will make you regret messing up with us!" Irnus grinned as he used God Ascension.

Irnus's fire turned into pure gold fire was merely the outer appearance change. The skill turned Irnus into a divine being, transforming his mana into Divine Energy, also boosted his attributes, and all his skills got twice stronger as well. The wound on his chest disappeared along with the ascension.

Tang Shaoyang could tell the change in aura was drastic. He felt the pressure on him just by his presence, but again, that did not deter Tang Shaoyang a little bit. He remained calm, staring at Irnus with his crimson eyes.

Irnus' figure disappeared, and for the first time, Tang Shaoyang's spirit eyes failed to pick up Irnus' movement. Then his eyes widened, and he swung his sword to the back. Irnus caught the sword by the blade with his hand. Nightfall's blade could not hurt Irnus.

"I am surprised that you catch on," Irnus smiled as he sent his left fist toward Tang Shaoyang's face.

Tang Shaoyang did not back down as he used the Heavenly Crushing Strike. With the borrowed Heavenly Azure Dragon's pure energy, his fist met with seemingly Irnus' normal punch.

Bang!

The clash created a loud noise as the shock wave spread out, and Tang Shaoyang was blown backward. He was rolled on the dirt. He tried to use Elemental Manipulation to create an earth wall to stop the momentum. But he quickly realized it did not work. He could not manipulate the ground to form a wall.

Before he could think of something else, Irnus was right above him. Irnus landed the kick on his back, pinning him down to the ground.

"Urghhh!" Tang Shaoyang grunted as he felt an overwhelming pressure on his back.

"Is this considering you kneeling to me? Unfortunately, even kneeling will not save you or your empire," Irnus raised his fire sword, "I would like to play more with you, but I don't have that much time to play with you. My friends might die because of your spirits. You have strong spirits, yet you choose to fight separately, what a dumb decision."

Irnus was about to pierce Tang Shaoyang's head, but then hundreds of Slayer Blades formed around them with all the blades pointed toward Irnus. He sensed how dangerous the blade was. He retracted his swords as his figure disappeared. That was right, he just disappeared, the same when Tang Shaoyang used to blink. Just like how he could create and move things in his domain, he could teleport his body as long as the God Domain was active. However, he could only teleport or move things that belonged to him. The Slayer Blades did not belong to him, so he could not teleport the blades away.

Tang Shaoyang got back on his feet, touching his back where Irnus stepped him. That hurt a lot more than he thought. He realized that Irnus had become far stronger than him. From the two attacks, he realized he was losing in every aspect, including the attributes even though he was at an advantage before. However, he was not at the dead end yet because he had one more trump card, True Dragon. He used True Dragon and transformed into the Wicked Dragon.

He rarely used True Dragon transformation because of how weird it felt, and he was in the new form which made it weirder than before, 'huh?' He was looking in one direction, but he had to see it from three different angles. That was weird, but then he realized through his Spirit Eyes that he was

a three-headed black dragon. The three-point views made him uncomfortable, and he regretted immediately that he had not tried the True Dragon transformation before.

Tang Shaoyang thought it would be hard to control his new dragon body, but then it was not as hard as he thought. His right head turned toward the middle head, and the right head bit the middle head's neck. He subconsciously roared from the pain. It was more painful than he thought, but he felt like he had good control and understanding of his new body. He moved his three heads perfectly after the first bite. The right head could breathe out dark poison, the middle head could breathe out dark flame, and the left head could breathe out dark lightning.

The big difference in his appearance from the previous transformation was the three pairs of wings, the three tails, and the different shapes of horns. He was still a black dragon with more spikes on his back and tails. He was still in Spirit Integration, but he no longer had Zara's wings. It was the pure form of a dragon.

Irnu teleported a hundred meters away, and when he regained his sight after the short teleportation, he was surprised to find the massive three-headed dragon. He used Detection and realized the gargantuan beast was Tang Shaoyang, not his spirit.

"Damn it! I don't know if he got his bloodline through ritual," There was a clear difference when someone got a bloodline through the blood essence and bloodline inheritance ritual. The difference was attribute gain, the skill inherited from the bloodline, and also the second transformation, which was the True Transformation, "No wonder this man is actually stronger than his actual rank. Not just because of his class, but also because of his pure bloodline."

Then Irnu made eye contact with the middle head, and Tang Shaoyang opened his mouth, sending the dark fire toward Irnu. The fire traveled through the air so fast that it took one second to reach Irnu. The Flame God Rank did not want to risk blocking the fire. He learned his lesson after witnessing one of his comrades from Nirvana die.

Irnu teleported himself to the air, a hundred meters above the air. But then he could not find the giant dragon again. He realized that a huge shadow loomed over him. Despite his size, Tang Shaoyang had become much faster than before. He used his paw, slamming down Irnu. The latter could not react in time and was hit.

Boom!

Irnu was sent to the ground. Then each head gathered their perspective element and shot everything toward Irnu.

The Flame God Rank took a quick reaction. The island disappeared as he allowed his body to fall into the sea of fire. The dark lightning, the dark flame, and the dark poison clashed into the sea of fire. Instead of getting engulfed by Irnu's True Flame, the three elements clashed equally, spreading out on the surface of the sea of fire.

But then the sea of fire folded up, folding up into a sphere, surrounding the massive dragon with the fire. The sphere was suppressed into a smaller size as Irnu intended to squash Tang Shaoyang with his True Flame while Irnu was hiding.

Tang Shaoyang did not panic as he re-activated the Wicked Domain. His element should be stronger than before because he had become a dragon. The dark lightning, dark poison, and the dark flame burst

out from his body. The three dark elements burst out of the fire sphere as the three dark elements spread out in the God Domain.

However, Irnus had predicted Tang Shaoyang could break free from his fire sphere as he prepared a twenty-meter fire sword right above. As soon as the fire sphere burst out, the sword went down. The tip of the sword hit Tang Shaoyang's back, bringing him down from the air. However, the sword failed to break the dragon scale. The sword pushed the three-headed dragon into the sea of fire.

Meanwhile, Tang Shaoyang was awkwardly trying to swing in the sea of fire while thinking of how to break the fire sword. He was just not used to fighting in his dragon form, so it was a little bit hard for him to react faster. In the end, he figured out that he had three tails that were strong enough to break the sword made of fire.

He regained his footing, standing above the sea of fire with his three dark elements spreading out above the sea of fire.

"Where are you hiding, coward? How long are you going to hide? Are you going to wait for your friends to come to help you?" Tang Shaoyang spoke in his dragon voice, which was deeper than his usual voice.

That was right, he taunted Irnus because he could not find Irnus even with his Spirit Eyes and Dragon Sense. The Flame God Rank hid his presence, and maybe because this was also Irnus' domain.

"Are you not ashamed of hiding from a mere Demi-God Rank?"

Chapter 1300 Welcome to The Family

That was a cheap provocation, but that worked well for the prideful God Rank. Irnus came out of the sea of fire, the place where Tang Shaoyang's Spirit Eyes could not see and the place where his senses did not work. At the same time that Irnus came out of the sea of fire, an island twice larger than Tang Shaoyang's dragon appeared right above Tang Shaoyang. The island fell on Tang Shaoyang, pushing him down to the sea of fire.

The black fire and black lightning destroyed the island as Tang Shaoyang came out of the sea of fire. He just came out of the sea of fire, but then he was rained down by meteors from the sky. Irnus could create anything he wanted in his domain.

Tang Shaoyang smashed all the meteors with his three tails. After the meteor, a tsunami of fire came toward him. A hundred-meter wave of fire moved toward, and Tang Shaoyang just let the fire tsunami hit him. The True Flame could not hurt him, at all.

Then it was another island, two times bigger than before, bigger and thicker. But it was all the same when his middle and left head opened. The dark lightning and the dark flame destroyed the island into pieces before it could hit Tang Shaoyang.

"Come at me, Irnus!" Tang Shaoyang was frustrated because Irnus was maintaining the distance while summoning so much useless bullshit and throwing them at him. It was not a fight. He shot the dark poison at Irnus in the distance, but again, from such a distance, Irnus easily dodged the poison. Irnus just teleported a few meters away from the target, and the dark poison missed.

Then Irnus made hundreds of fireballs this time. Hundreds of fireballs made of True Flame, and he rained Tang Shaoyang down with those giant fireballs. However, it was a futile effort because the

flame did not hurt Tang Shaoyang. It happened for a few minutes, and Tang Shaoyang realized what Irnus tried to do. Irnus was trying to exhaust him, waiting for the True Dragon to wear off. He realized that Irnus was scared of the True Dragon.

'I need help to kill this guy, or else I will be trapped in this shitty domain forever,' Tang Shaoyang thought of calling one of the God Rank spirits outside. He tried to use Spirit Link, but then he found that the domain cut off the contact. He could not use Spirit Link, and he did not want to blindly recall his spirits. It would be silly that his spirits lose the fight just because he called one of them.

It was another island above his head, and Tang Shaoyang had enough of it. He used [Blink], moving toward where Irnus was. The island fell on fire as Tang Shaoyang appeared right in front of Irnus with his massive size. However, Irnus seemed to be prepared for his move because Irnus immediately enclosed him inside the fire sphere once more. The fire was moving like a wheel, but Tang Shaoyang brute forced his way out of the sphere.

His dark flame and dark lightning broke apart the sphere. He was then greeted with an unexpected sight. Irnus turned into a giant, his body became one with the sea of fire below them. Irnus sent a fist toward his face.

Pang!

The True Flame burst out as Tang Shaoyang got dizzy from the hit. Tang Shaoyang was pushed backward slightly, and Irnus continued with another uppercut, right to the jaw. It was followed by a flurry of fists toward his chest and face.

Tang Shaoyang flapped his wings, creating a distance from the giant Irnus. The punch contained a powerful force. While it did not damage the scale, he was getting giddy and his ear was buzzing. He shook his head a little bit to regain his composure, but then the giant Irnus was no longer in his sight until he was hit at the back of his head.

The punch threw him off balance, and Irnus grabbed his middle head's neck, but the other two heads turned around. Tang Shaoyang shot the dark poison to the face. Irnus's head made of fire turned murky and soon melted. The poison melted the True Flame, that was how strong the poison was. However, the giant was not Irnus's real body because the grip on the neck was still there. He could feel the force in the grip, pushing him down to the sea of fire.

Tang Shaoyang smashed the hand with the tail, and the hand broke apart, the other two tails swept toward Irnus' chest. The giant Irnus was left with the lower part that connected to the sea of fire. Once more, Irnus was not in sight, the Flame God Rank went hiding inside the sea of fire again.

"I have enough of your domain!" Tang Shaoyang roared as he activated Void Domain. He had not tried to use the other domains while he was in his True Dragon form. The Wicked Domain was proved to be effective with how his three main elements destroyed the True Flame. He wanted to try Void Domain, wanting to throw the fire into the void. That was his goal, and Void Domain was effective.

The space cracked, forming many gaps in the air. With his frustration and fury, Tang Shaoyang opened a giant hole below the sea of fire, five giant holes into the void. He did not care if Void Creatures came through the hole. He just wanted to get rid of the fire so he could look for Irnus.

The flame poured into the void, and he kept creating the void cracks. Irnus tried to put another big island on his head, but it could never work again. The middle head shot the black fire into the

island, melting the island with his fire. Then he realized how convenient it was to have more than one head. While the middle head destroyed the island, the other two heads were looking for Irnus while the sea of fire was being emptied into the void.

"You dumbf*ck!" Irnus burst out of the sea of fire with his real body. He accelerated toward his head with the sword of fire, trying to slice his middle head.

Tang Shaoyang grinned as he discovered Irnus. The Flame God Rank was fast, but he was faster. Before Irnus could reach the middle head, his tail hit Irnus first. Irnus's small body flung downward, but Tang Shaoyang had prepared the void crack, connected to the void crack in front of his right head. As soon as Irnus came out through the void gap, his right head shot the dark poison, shrouding Irnus with his poison.

Irnus fell into his remaining sea of fire while getting poisoned. Tang Shaoyang canceled the void holes, looking at where Irnus fell. He was about to dive into the sea of fire, following Irnus down, tracking the Flame God Rank until something unexpected happened. He had the fourth perspective, the fourth vision, meaning another head just popped out.

Tang Shaoyang was stunned mid-air, and the three heads turned toward the new head that just popped out. He blinked his eyes, stunned and surprised by the new additional head. The four pairs of eyes blinked at the same time.

"Yo, welcome to the family," That was an urge in his head, and he ended up saying it. He spoke through his middle head, then he replied to himself through the head that just appeared, "Thank you."

"So what does the youngest do?" The three heads had different elements, and the fourth head should have his own element.

[Your Wicked Dragon Bloodline has evolved after your Dragon Heart absorbed enough Void Energy!]

[You have learned Void Elemental!]

[You have learned Mastery of Void!]

[You have learned a new skill, Void Domain!]

The notification was late for sure because it was a while after the fourth head appeared. The confusion cleared, and it turned because he used the Void. Thanks to the sudden evolution, it was easier for Tang Shaoyang to use Void Elemental. He had enough of the sea of fire, so he opened a giant door toward the void, as long as the sea of fire stretched out.

The True Flame poured into the Void, and Tang Shaoyang quickly discovered Irnus who was trying to recuperate from the dark poison with the True Flame. His gold flame had turned murky because of the poison, and the dark poison made the True Flame weaker as well.

Irnus looked up as he realized he had found out. He was breathing heavily because of the poison, and stared dagger at Tang Shaoyang, "You are the epitome of disaster! You should not exist!"

The four heads turned toward Irnus, and four of them chuckled at the same time, "You tried to take my home. You tried to kill my people! You tried to kill my family! You tried to kill me! And when

you lost to me, you said that I am the epitome of disaster? You can't be joking with me, right?" His aura burst out, he was filled with fury to hear that from Irnus.
