

ARMIPOTENT Chapter 396

Inside the building where the city's Steele was, six figures gathered.

Tang Shaoyang pointed at the City's Steele, telling the four to check it. It took them a short time to understand what Tang Shaoyang wanted to talk about.

The change of plan as they could no longer move together. They had to divide the force, one was protecting the conquered city and another force was attacking the other cities.

"What should we do now?" Kang Xue was the first one to speak. Dividing the force was a must as adding more force was almost impossible since they had to leave some to protect their base.

"We will call Cao Jingyi to bring over the remaining Warriors and the Militia Force. This will be a big war, I want them to participate in the war," Tang Shaoyang expressed his thoughts, "We will leave the base to TEIS, to your father! It should not be a problem for him to be in charge of the base!"

He looked toward Zhang Mengyao. Kang Jiayi was quite capable as he quickly managed to buy his subordinate's heart quickly. TEIS now had gained a firm holding in the base because of him.

"What about the SZ City Establishment?" Zhang Mengyao was worried that these people would attack the base while the main force was away.

"SZ City Establishment should not be able to do anything. Their main force is busy as well," Tang Shaoyang smiled, "You know that we caught the spies before we left the base, right?"

Everyone nodded their heads. That indeed happened as the spies instigated stupid things such as a protest. Later the spies were caught, but they did not know what happened to these spies. They thought the spies were killed by Tang Shaoyang.

"I received crucial information from the spies. The SZ City Establishment is preparing for the Survival Game. They send their main force to clear the Survival Game, so our base should be safe for at least forty-nine days!" Tang Shaoyang grinned widely. Forty-nine days was the time limit of the Survival Game.

"I have also told Lu An about this information before we left. Now I can't contact him, which means Lu An has joined the second Survival Game. Also, we can use spies to send false information, so the base should be safe from the SZ City Establishment."

Zhang Mengyao looked at her man in a daze. Clearly, she was shocked to hear this solid plan from his mouth. This was not Tang Shaoyang she knew.

The man was reckless and impulsive. Oftentimes, he let his emotion take over his action. She never thought that he would use the spies to their advantage instead of killing them.

Yes, if Tang Shaoyang said that he tortured the spies before he killed them. She would believe that, a hundred percent. But this was not something he would do. It was hard to believe that her man planned all of this by himself.

"How is it?" Tang Shaoyang asked the five as five of them were not responding.

"That's an excellent plan. If we involve all Warriors and the Militia Force, we can have them grow stronger quickly. Battlefield is the best place to speed up their growth," Wei Xi agreed to the plan. Especially after their first clean clash, he was optimistic about their future clash as well.

"Since we lack people, our priority is not only to conquer the cities but also looking for the survivors!" Tang Shaoyang looked toward Yu Shun.

"I will delegate this task to you, Yu Shun! Ask Heron and Doron if they know any base of the human survivors. Also, you can use Doron to look for the survivors if he also does not know about the survivors!"

Doron was a Zombie Lord. He could subordinate the zombies and mobilize the zombies to look for the survivors. That was the most efficient way they had for now.

"While I can ask Doron about the Survivor Base, but for Doron to subordinate the zombies is impossible. The zombies in this territory are under the control of the two strongest Zombie Lords, King Biron and King Rudin."

"The zombies would not listen to Doron's order, but I can do that. I can use my skill and dispose of the weak zombies after the war is over. Leave the task to find the survivors to me, Bo-My Lord!" Yu Shun hammered his chest to assure Tang Shaoyang.

"Good! Our next objective is to find the other seven official cities... No, we just need to find four other official cities. We just need five cities to win the game!" Tang Shaoyang prioritized winning the game.

If they conquered the seven cities, it meant they had to divide the force into seven to protect all the cities. They could not afford to do that with their number.

"Wen, it should be an easy task for you, right? We will split and look for the official cities," only Tang Shaoyang and Wen who could fly. So it should be easier for the two to find the official cities.

"But how to differentiate between an official city and an abandoned city?" Wen asked Tang Shaoyang. To find which one was the official city and which one was not, was not that easy. The system did not give them a sign or tell them where the official cities were.

"It's actually easy!" Tang Shaoyang grinned ear to ear, "The Zombie Consort! Since the seven remaining cities are under the two Zombie Kingdoms' authority, there should be Zombie Consorts in the city. Find the Zombie Consort then you will find the official city!"

The Jade Eagle's eyes shone as he immediately understood his Lord's meaning. Wen nodded his head, indicating he understood.

"Also, I have good news for the army. We will have more healers soon, Pride and Kairu found more healers to fill the Healer Division," Tang Shaoyang did not stop surprising them.

"More healers? Where are they?" Kang Xue was the happiest one to hear the news. She could see how hard her subordinates struggled during the battle. Clearly, a thousand army was too much for thirty-six healers.

It was good news to have more healers, to lessen the burden of those pitiful healers.

"They should be here by now. Oh, Pride just sent me a message, they just arrived in the city," as soon as he said that, Kang Xue excused herself from the meeting, "Then let me greet them. As their Commander, I have to greet them properly."

After she said that, Kang Xue left the building. Wei Xi and Zhang Mengyao shook their heads.

"What should we do for now?" Zhang Mengyao asked in a solemn tone.

"We will wait for Cao Jingyi and the remaining army to arrive. We need them before we attack the next city," Tang Shaoyang looked toward Zhang Mengyao and Wei Xi, "You two should decide which team we should leave behind to protect Jiaying City. This city is close to Bombyx Mori Tribe's territory."

"As for you, you can start your search now!" He then looked toward Yu Shun, "As for me, while the army gets their break, I will start my [Spirit Summoning]!"

More than twenty thousand zombies and with three Zombies Consort. He hoped that he could get a good spirit from this sacrifice.
