

## ARMIPOTENT Chapter 456

'Wait a minute...' Prince Kaiden realized something. The man in front of him was level 700, yet he had a second class? How?

Not just Prince Kaiden, Tang Shaoyang was also confused. If bloodline was a reward of evolution quest, then how could Mengyao get her bloodline? His bloodline was inherited from Rumru directly, it was not a reward from the system.

But Tang Shaoyang quickly connected the dots, God. Zhang Mengyao got her bloodline through the blessing of God. The same for his second class that he cheated on from God as well.

'But, does Lukan not have a single God? Or is it Prince Kaiden who does not know the existence of God?' Tang Shaoyang could get the answer unless he visited Lukan.

'Or the people who know God's existence do not want to tell the others so they could monopolize the blessing for themselves and also their descendants,' that was possible as well. Since The Lionax Kingdom was just a minor kingdom, it was natural for them to not know about this.

"Then what about the King of the Lionax Kingdom? Is he an Epic? Ancient? Primordial?" This was the crucial information if he wanted to take over the gate that connected the two worlds.

Prince Kaiden stared at Tang Shaoyang. He was hesitating to tell the enemy this crucial information. This was about his father and he was sure that this man wanted to use this information to invade the Lionax Kingdom. However, it was not like he had any other choices.

"My father is an Epic." He tried to give a little information, but the young Prince could not trick Tang Shaoyang, "And?"

"He is an Epic and awakened Flaming Lion's bloodline after he finished the evolution quest," with a defeated expression, Prince Kaiden told Tang Shaoyang.

"Are there any stronger individuals than your father in the kingdom?" Tang Shaoyang continued digging for more information from the young Prince.

"My Grandfather and my Granduncle are still alive, they are also an Epic. My Great Grandfather and my Great-Granduncle are also still alive. Both are Primordial and they awakened their bloodline, had a second class, and also the second talent..." afraid of being tortured, Prince Kaiden told everything.

'So I can't invade the Kingdom, not until I evolve to Epic as well. I have a bloodline and second class, so I need my second talent,' Tang Shaoyang rubbed his chin.

"Alright, that's enough for your Kingdom and your world. We can continue later for that. What about the force that came with you? Surely you are not invading my world with only 200 Knights, right? Tell me everything about them!" The Territory War Game had not finished. He had to focus on the battle against the remaining force of the invading force.

Again, Prince Kaiden told everything about the remaining force and where they were. The remaining force was occupying Jinhua City with 800 Knights and 1 Commander. The knights were averaging around level 450 and the Commander was level 712.

"Does your commander know that you come to this city?" Tang Shaoyang threw his last question. The young Prince's answer would determine his plan to face the remaining force.

"Yes, she knows! She was the one who directed me toward..." Prince Kaiden paused as fury started to bubble up inside, 'Does she know this man is here and purposely send me here so I will be killed by this man?' The young Prince could not help but have such a thought.

He disliked the woman openly. His words might offend her so she sent him to this city to meet his demise, "Yes, she's the one who directed me to this city!"

"Alright, that's enough for today. We will talk again later, and I will send the food to your room," After saying that, Tang Shaoyang left the room, leaving the Young Prince alone.

"She? This is interesting," Tang Shaoyang smiled as he closed the door.

### Jinhua City

"Why Captain Reed and Captain Weed can't be contacted? Have you found something?" Commander Ashley asked the two Captain Knights in front of her.

Captain Knight Morris and Captain Knight Lucas shook their heads.

"We have sent the first scout team, yesterday, but they haven't returned or contacted me yet," Captain Knight Morris replied,

"We are preparing to send the second scout team today, with more people," Captain Knight Lucas added.

"Send fifty people this time, and send five your trusted people to follow the scout team," Commander Ashley let out an audible sigh, "This is my fault to let that pampered Prince go by himself."

There were two possibilities for the scout team's disappearance. It was either they were forced to stay silent by the Prince or they encountered a mishap. She believed the former since this world's Game just started. She believed none of the natives were stronger than them.

"Yes, Commander Ashley!" The two Captain Knights then left the building. Aside from tracking the prince, she also sent a team to find more information about the Tang Empire. But they had not found where the Empire was.

### Ningbo City's perimeter

Tang Shaoyang was playing with Jiaying in the lobby of the building where the City Steele was. All the survivors had been moved here to ensure their safety.

Since he held their Prince as a hostage, Commander Ashley must want to retrieve their prince back. So, he used his advantage to defend the city and let them come instead of attacking them. This way he could use the city to his advantage.

Sure enough, they sent a team of five knights. After interrogating the knights, he found out this group was a scout team.

'If I am guessing right, Commander Ashley should be sending one more scout team today. By the latest tomorrow, they will attack the city,' that was his read of the enemy's movement. He sent Wen to patrol the perimeter.

While playing with the little girl, he received a message from Wen.

[You are right, My Lord. They sent a larger team today, fifty knights.] That was the message.

[Wait, there's something weird with them. There are five more knights who follow the larger group. The distance between the two groups is around a hundred meters!]
