-----

[Conqueror I]

Affect: Gain 5% bonus exp for killing neutral monsters or enemies for the member of the Tang Empire!

-----

[You have unlocked the map for Zhejiang Territory!]

—My Lord! Do you miss me?

Origin's voice rang right after the announcement was over. The Smart AI immediately got connected with all nine cities including SH city. The AI was now everywhere which was a good thing. Tang Shaoyang could monitor all the cities from one place.

Over the interaction and also observing the people in the base. Origin slowly learned and became emotional over time. The first time he met Origin, the voice was static and toneless. Now he could hear the AI's excited voice, yes it was getting excited.

The discussion suddenly lost its purpose. He gathered everyone to fight the Bombyx Mori Tribe but they ran away before they could find them. The Bombyx Mori Tribe's decision was decisive. They left without fighting.

Yet everyone snapped out when they heard Origin, then everyone in the room looked toward Tang Shaoyang. They were asking for further instruction.

"Origin, tell the knights at the other four cities to rush here! Show them the map!" Tang Shaoyang commanded the AI before scanning everyone on the table, "We won, but the battle is not over." He had

not brought up about the Dimensional Gate now it was time to tell about this. He shot a glance to Zhang Mengyao and the latter received the signal and nodded.

"Just like Lord Shaoyang said, the battle is not over!" Zhang Mengyao raised her voice, "The Lionax Kingdom, they are not the people of Earth but from another world. They come through the Dimensional Gate."

"If you have participated in the Survival Game, you should know what I am talking about." The room broke into a murmur as soon as she mentioned another world. The concept of another world was foreign to most of them while the Warriors who followed the Survival Game had accepted the existence of another world.

Captain Su Hong was not part of the Warriors that joined the Survival Game, but he heard about this another world. Many Captains were in the same position as him.

"The Lionax Kingdom sent a thousand knights into our world but they are all defeated by Lord Shaoyang! The problem is, one of them is the youngest Prince of the Lionax Kingdom. If the Prince does not come back after a certain time, the Lionax Kingdom will send their army to look for the Prince. If we send the Prince back, the Lionax Kingdom will send their army too as we have killed their knights! The battle is inevitable and diplomacy is impossible.

Why I said diplomacy is not possible, we are too weak for them. Diplomacy is only working if we are in equal power, but unfortunately, we are too weak for them. The knights they sent to the earth are level 450 on average!"

As soon as Zhang Mengyao reached the last part, many of them gasped in shock. Level 450, none of the Captain or even Commander reached level 400. If there were people amongst them above level 400. They were the Supreme General and the Vice Supreme General, Zhang Mengyao and Wei Xie. The last one must be their Lord, Lord Shaoyang. Only three people could fight the knights from their side.

"I am not over yet!" Zhang Mengyao raised her voice. It immediately silenced the room as everyone looked toward her, "I am not over! From the thousand Knights, there were ten Captain Knights and one Commander! The weakest Captain Knight is level 641 and the strongest Captain Knight is level 683. Meanwhile, their Commander Knight is level Level 717!"

A deep silence ensued in the room when everyone heard the level of the Captain Knight and the Commander Knight. Their levels were triple and even quadruple of their levels. There was no way they could win against such a force. Panicked, everyone was panicked upon knowing how strong their enemy was.

However, soon they realized something. If the Captain Knights were above level 600 and the Commander Knight was above level 700, how their Lord could win against them? Did that mean...

Everyone looked toward Tang Shaoyang. If he could defeat a thousand knights that were level 450 on average, and the Captain Knights that were above level 640, and the Commander Knight that was level 717, that meant their Boss above level 700 or maybe even above level 800.

Wild speculations swirled in everyone's head, wondering their Boss's current level. Even Wei Xi and Cao Jingyi who joined the empire much earlier were curious about their Lord's level as well.

"The main problem is the King of the Lionax Kingdom is above level 1000. On top of that, there are four stronger individuals than the King!" Zhang Mengyao bombed the room once again. The hope they just received immediately crumbled upon hearing that, but Zhang Mengyao did not stop here.

"There are more, They have Four Marshal Knights that are also above level 1000 but weaker than the King and there's one Exalted Knight is also above level 1000 but equal to the King in terms of power!" Zhang Mengyao told everyone even though this information could discourage the Captains.

Sure enough, all Captains lost their color from their faces as soon as they heard that from Zhang Mengyao's mouth. They were doomed if the fight broke out between the two forces.
