

ARMIPOTENT Chapter 511

"You just need to answer what I asked, you don't have to explain what I don't want to know! Understand?" Tang Shaoyang added in a stern tone.

"I am sorry, My Lord," Aki bowed his head and apologized. He realized that he was releasing a stone onto his own feet, "From what I know, there are four strongest tribes and two Guardian Beasts that maintain the balance as of now. The four strongest tribes are the Dark Tribe, The Elven, The Moon Tribe, and The Beast Coven. Those are the four strongest tribes.

As you know, I was part of the Dark Tribe. The tribe consisted of many tribes but the leader of the Dark Tribe is from the Abyss Sabre Tribe. Chief Igor has evolved into Primordial Rank and has become Infernal Sabre. He is the strongest in the Dark Tribe. As for the Elven, we only know a little about them because they hid deep in the forest within one of the Guardian Beast's territories.

The Moon Tribe is a single tribe but they had a high population and vast territories. The Moon Tribe was founded by Moonlight Rabbit, while it is a single tribe it has other tribes as well who sought protection from them. It could be said that the Moon Tribe was the tribe with the most population.

The Beast Coven is a special tribe. While they have the least population amongst the four tribes, they had the strongest army amongst the four tribes with their Elemental Power. Beast Coven's structure is not centered on a tribe, but it is rumored to have the same system as the human kingdom. The people choose their leader, I am not quite clear myself but there is a strange rumor about them."

"Don't play the suspense game with me, just tell me directly about the strange rumor about the Beast Coven?" Tang Shaoyang said to Aki.

"The rumor said that behind the Beast Coven's establishment is a human. I am not sure myself since no one of the four forces dares to cross the line and start the war. The four tribes were in a stalemate situation," Aki said with a strange expression on his face.

It was indeed a strange rumor but Tang Shaoyang caught the gist of it. Ashley also looked at him, she realized something as well. The rumor might be true and that human might be Commander Alton who had entered the forest years ago. He was building the force and created the Beast Coven.

"What about the Guardian Beast? What are they?" Aki mentioned the four tribes and two Guardian Beasts. That meant the Guardian Beast held an important role within the forest. Or these two Guardian Beasts might be the reason why the three kingdoms could not conquer the forest. The Gigante Forest was more complicated than he thought.

"The two Guardian Beasts are the protector of the forest, the main reason why the tribe doesn't dare to cross the line to wage a war. They don't like the war in the forest and all the beasts that do not affiliate with any tribes are following their command too. The two Guardian Beasts are holding the highest authority in the forest," Aki explained the role of the two Guardian Beasts.

In another world, the forest was under the rule of the two Guardian Beasts, the reason why no tribes could unify the forest. However, Aki did not tell him how strong the Guardian Beast was and their species.

"The first Guardian Beast is Green Sky Serpent and it's a Legend Rank, as for the level, we don't know. No one knows because none of us have seen Green Sky Serpent and come back alive. We have only seen

the trail of the Guardian Beast and for the size, it is enormous. We estimate the serpent might reach fifty meters in length and triple of the giant tree in size.

"The second Guardian Beast is Kirin, the myth said Kirin is the descendant of the Divine Ox and a Dragon. Again, no one can confirm that as no one has seen this Guardian Beast, but we know it exists. Kirin is more mysterious than the Green Sky Serpent and we estimate Kirin is also Legend Rank," Aki explained the strength of the two Guardian Beasts even though it was a vague explanation.

"No one has seen them but they exist? This is interesting..." Tang Shaoyang muttered in a low voice and Aki saw a smile formed on the man's lips. His Master seemed not afraid of the Guardian Beast that the residents of the forest revered. However, something was missing from Aki, the race he wanted to hear and the key for him to return to Earth.

"What about the dwarves? You haven't told me about them yet, I thought dwarves dwelled in the Gigante Forest," Tang Shaoyang asked Aki.

"Dwarves? They were never interested in the affair of the Gigante Forest, they secluded themselves from the other tribes, and the same with the Guardian Forest, they are a mysterious tribe as well. Since they don't have an interest in the forest affair, we don't want to bother with them as well. Most of the tribes ignored their existences," Aki explained. He then looked toward his Master, "Do you want me to look at the dwarves, Master? I can command my children to look at them."

"Yes, I need to find them," Tang Shaoyang nodded. He needed them to repair the Dimensional Gate or else he could not return to Earth.

"Then I will go out and gather my children," Aki nodded and pulled Nol from his back. He placed his grandson on the ground, "You should stay with the Master and listen to him, understand?"

The small rat beastmen looked at Tang Shaoyang then he looked at his grandfather, nodding, "Yes, I understand."

"Good boy," Aki rubbed Nol's head, and the boy smiled at him, "Then I will leave now, Master. I will return in half an hour and at most, it will take me two to three hours to gather all of them."

"Mnn, you may leave,"
