

## ARMIPOTENT Chapter 841

A platform rose from the ground, and there were a pair of black steel bars in the bracket shapes. A murmur could be heard from the people; many of them pointed their fingers at the platform. Park Nam Hoon immediately ordered his people so the civilians did not get too close to the portal gate.

[Do you want to activate the portal gate? Note: You need to pay 10 million Game Coins to activate the portal gate.]

The portal gate did not immediately activate as Tang Shaoyang needed to pay the initial cost. Yeah, the condition for setting up the portal gate was someone with a high position within the faction. Leader and Vice Leaders had the authority to do it. Of course, the Leader could delegate the task of setting up the portal to his people as well. And money was the second condition to set up the portal gate. It was quite simple, and Tang Shaoyang did not hesitate to activate the portal gate right away.

[The Portal Gate detected the connection to the Portal Gate (Tang Empire)? Do you want to connect the portal gate?]

[The Portal Gate has been activated and connected to another portal gate!]

The black steel bar glowed in blue as the portal formed between the bars. That was it; the portal gate had been successfully installed. Of course, there was still the last part, which was to name the portal gate.

[Do you wish to change the name of portal gate b?]

The portal gate in front of Tang Shaoyang was Portal Gate b, but he could change the name based on the region. He immediately changed the name so he and his people could easily identify their destination.

[You have successfully changed the name to Sub-Region Korea!]

Tang Shaoyang stayed in front of the portal, waiting for his people to cross the portal gate. He did not wait for long as the first person crossed the portal gate, a long-haired man wearing an ancient white robe. Yu, the Ancient Alchemist, was the first one to use the first portal gate on Earth. The Ancient Alchemist walked toward Tang Shaoyang and presented him with seven vials. "I have made the antidote, Master."

"Mnn, good work. You can go back now, but I don't mind if you want to go around instead of staying inside the Spiritual Space," Tang Shaoyang intended to reward the spirit for his work. Good work must be rewarded, but letting the spirit stroll around might be a good reward for Yu rather than staying inside the spiritual space.

Sure enough, Yu's face brightened when he heard that from his Master. He raised his head and looked Tang Shaoyang in the eyes. Taking a deep breath, he voiced his request, "May I visit the Alchemist Center?"

Tang Shaoyang paused for a moment as he recalled the place called the Alchemist Center. The Alchemist Center was the Tang Empire's first facility, and they got the facility in a broken state, but Zhang Mengyao had paid quite a lot of sum Game Coin to repair it. After repairing it, they renamed it to Tang Empire

Alchemist Center, and Kang Xue was the person who took charge of the facility. However, since it was just a level 1 facility, there was nothing much they could do.

"It might be a good idea sending you there, so you can help me figure out what the facility from the system can do," Tang Shaoyang was glad sending Yu to the Alchemist Facility. That place was Yu's home ground for sure. Having Yu there, they could maximize the use of the facility. "Off you go then. I will message Kang Xue to lead you there."

"Thank you, Master," Yu bowed his head and turned around. Despite showing no expression on his face, his action told Tang Shaoyang that his spirit was quite excited about the Alchemist Facility. When Yu walked to the portal gate, Zhang Mengyao came out from the portal gate. She came with Cao Jingyi and Wei Xi. The Ancient Alchemist bowed toward his Mistress and returned to the main base.

"Where do you send him to?" Zhang Mengyao watched Yu's back and asked.

"He wanted to check the Alchemist Facility, so I sent him there," Tang Shaoyang replied, but then he noticed Zhang Mengyao was looking somewhere else, not at him. He followed her gaze and found out that she looked at Aleesa and Sylvia. He then noticed Aleesa and Sylvia shook their heads dejectedly. With quick thinking, he realized what Zhang Mengyao was up to. "And so, can you continue the work here? Get them to take the oath and distribute the System Contract too? I will head to give the antidotes and then depart for Japan."

After saying that, he ran from Zhang Mengyao and walked toward Park Nam Hoon, "Can you call your patrol team captain, Mo Joon? Is he here?"

Park Nam Hoon did not know why Tang Shaoyang wanted to look for Mo Joon, but he led Tang Shaoyang to look for Mo Joon anyway without asking. He wanted to know what Tang Shaoyang wanted to do with Mo Joon, so he followed the two after finding Mo Joon while his two Vice Leaders received Zhang Mengyao.

'Infirmery? Why would His Majesty go to the infirmery? Do his people get injured?' Park Nam Hoon's head was full of thoughts, thinking about what Tang Shaoyang wanted to do in the infirmery. When they reached the Infirmery Floor, he watched His Majesty Tang Shaoyang giving four vials to Mo Joon, "This is the antidote for your men. Give them this, and they should be fine."

"Thank you, Your Majesty. Thank you very much," Mo Joon bowed and kept thanking Tang Shaoyang.

"There's no need to thank me. This is my responsibility because you are also my people now. Go give the antidotes to them, and I will take care of the remaining three people," Tang Shaoyang waved his hand at Mo Joon and walked into the infirmery. Park Nam Hoon watched it with his own eyes that Tang Shaoyang gave the antidote to the unconscious people. Of course, it was not the Tang Empire's people because they wore the Legion Guild's armor. Those unconscious people were his people, not the Tang Empire. The pieces connected, and Park Nam Hoon quickly understood what happened.
