

## ARMIPOTENT Chapter 945

Tang Shaoyang's vision came back, and he was in the middle of a plaza. The portal no longer made him dizzy. He did not have the dizziness he used to be. He observed the giant plaza with barely a few people around. However, through the Spirit Vision, he could see the cast of the giant tower shadow, and he immediately turned around.

He was surprised by the giant tower behind him, and he looked up at the tower. It was the same reaction as the others when they arrived here, wanting to see the end of the tower, but it was just not possible. He could not see the end of the tower even with his sharp vision.

"I wonder what it looks like at the end," Tang Shaoyang muttered by himself. He wanted to fly and check it out, but then he shook his head.

People on the plaza were pointing at him, and he heard them talking about him. They wondered where he was from. For now, only twelve major factions had access to the Dimensional Tower area. The other factions must reach this place with no portal. It was supposed to be not hard to find the tower with how tall it was, but the danger of reaching this area must be challenging for most factions.

"Based on Origin's deduction, this is on Greenland. Where's Greenland anyway on the map?" Tang Shaoyang tried to picture where Greenland was on the map, but there was no way he could know that. That was even the first time he heard of a place called Greenland, "But the System is kinda unfair, no? The small faction will be left behind even more by the major factions."

"Not my problem. Let's figure out how the Dimensional Tower works first," He approached the Dimensional Tower directly. He knew a little bit about how the Dimensional Tower worked, not much different than the game issued by the System, but the scale was just on another level as each floor was a whole new world.

'I think the System tries to make the Game even more exciting by letting whatever is inside the tower go out into your world. Fewer participants to clear the Dimensional Tower, it will take longer to clear the first ten floors in a year, no?' Zaneos quickly figured out what the System tried to achieve.

Li Shuang had told him about the Dimensional Tower, all the information they knew about the tower. Including the tower break if the players failed to clear the first ten floors in a year.

"But it's not impossible to clear the first ten floors in a year, no? I think it's not that hard to achieve that," Tang Shaoyang did not think it was hard to clear the first ten floors within a year.

'Not impossible, but it's hard. It's been like almost a month, but your one hundred thousand armies haven't returned yet from the second floor. If we count how long since the Dimensional Tower appeared, it's around a month. It's not bad to clear two floors in a month, but as you can see, the difficulty for each floor will go up. It only took a few days to clear the first floor, but almost a month for the second floor. How long will it take for the third floor? Two months? If it goes that way, then clearing ten floors in a year is almost impossible.'

Rosalie explained with more details to Tang Shaoyang. As usual, the spirits tried to help him with the problem ahead of him. They did not know what was inside the Dimensional Tower. God might be there, and Tang Shaoyang was not ready to face God yet. It was bad if the Tower Break happened when Tang Shaoyang was not ready yet as they laid their hope on Tang Shaoyang.

"That's true, but I think it should not be an issue if I am with them, no? I am quite confident in my strength as I am now Ancient Rank," Tang Shaoyang was confident that ten floors in a year were not that hard.

'I like your confidence, but pay extra attention to the issue. Revalor, Moonsong, and Alton have gotten their second talents and also the second class. Even though their second class is a basic class, their power should be upgraded to another level. However, despite all of that, they are still having a hard time clearing the second floor.'

Zara, the Angel of Death, reminded Tang Shaoyang. Those three names were the closest ones to Tang Shaoyang, and with the second talent and also the second class, they should be around the same level as Tang Shaoyang or even slightly stronger than him when he was still Epic Rank.

'We don't mean to discourage you, but we want you not to underestimate the challenge ahead of you. Being confident is good, but overconfident could lead you to an unpleasant ending.' Lilliana, the Grand Guardian who usually stayed quiet, also spoke up. She mostly did not join the conversation about fighting, but she shared the same sentiment with the other spirits. She wanted Tang Shaoyang to keep his guard up.

'I want to say not to worry since you can summon me, but being reliant on me is not good for you too. So yeah, being extra careful will not hurt you,' Avyn joined the conversation.

"It seems I am being overly excited because I want to test out the new me, you know," Tang Shaoyang nodded understandingly, "But yeah, I will pay extra attention to what I will face inside the Dimension Tower.'

He reached the entrance and saw the black monolith. He ignored the door and approached the monolith as he saw words written on it. It was the text about the warning for failing to conquer the first ten floors, "I already know all this information from Li Shuang. Let's start the rescue mission,"

Tang Shaoyang turned toward the entrance. He was about to walk, but the double stone door opened. A black whirlpool was beyond the door. It was similar to the teleportation thingy. He took two steps back and waited for the people to come out.

As the first person came into his sight, a smile formed on his lips, "It seems the rescue mission is unnecessary."

Zhang Mengyao was the first person to come out of the tower. She was followed by Kang Xue, Elin, and Delia. The four women were stunned for a moment to see Tang Shaoyang in front of the entrance. Kang Xue was the first one to move, running toward Tang Shaoyang.

She jumped off the stairs, straight leaping toward Tang Shaoyang. Tang Shaoyang smiled while shaking his head, but he opened his arms, catching the woman.

"I miss you so much," Kang Xue placed her cheeks next to his while closing her eyes. Then Delia also ran toward Tang Shaoyang, followed by Elin and Kang Xue. The four women got their hugs and kisses in turn.

Marshal Alton witnessed the reunion, and he smiled while directing his subordinates not to disturb the reunion. He did not even let his subordinates pay respect to The Emperor. This was not just the right timing.

Tang Shaoyang hugged Selena and Arina for the last, and he noticed two girls were staring at him from the front of the entrance. The two girls were Aleesa and Sylvia. After the two girls got off his arm, he opened his arm toward the two women. He motioned to them to come over.

Both girls still acted reserved in front of his other women, so he must be the one to be proactive when it came to the two. Even though it was a political marriage, they were still his wives, and both were stunning beauties. It was stupid of him not to accept beauty.

Sylvia and Aleesa came over. He hugged Sylvia and kissed her on the forehead. Aleesa got the last turn, and he kissed her forehead too as he pulled her into her embrace.

Aleesa's face turned red as many people watched them. Of all his girls, He had not slept with Aleesa yet. The elf elder was still shy and reserved, being intimate in public sight.

"Congratulations on passing the trial," Aleesa whispered sweetly in his ears.

"Thank you," Tang Shaoyang released the hug. Alton, Allan, Moonsong, Virion, and the others came over and congratulated him too.
