

## Army 100

Chapter 100 Transporting meches

one had to know.

Jiang Li sent a lot of meches to guard the city wall and keep an eye on the situation outside the green scale city. Xx02 was standing on the wall.

Shua!

The scene changed.

Xx02 pointed the camera forward.

Not far away.

In the shadowy corner, there were the figures and traces of a few demons. These demons seemed to have realized that they had been discovered and immediately turned around to escape.

“kill him!”

stop! Jiang Li shouted.

bang! bang!

jj01 raised his gun and fired. the sniper bullet tore through the air, making a sharp sound as it pierced through the air. it directly hit the head of a demon spy.

A headshot.

Bang! Bang! Bang! Bang! Bang! Bang!

JJ01 fired continuously. One after another, sniper bullets streaked across the night sky, killing one demon Scout after another. All of them were killed in one shot.

Whoosh! Whoosh!

The archers and meches also shot arrows, killing several demon Scouts.

“This bi an ...”

“What a brutal weapon.”

“One shot, dead!”

In the surroundings.

Other than the monster Scouts who had been exposed, there were also many monsters who were hiding. They were not discovered. When they saw the scene in front of them, they were shocked and their eyes were filled with fear.

“Don’t stick your head out, you’ll be discovered.”

“What do we do now?”

“Find a chance to spread the news that a human army has sneaked into red Dragon County and even captured green scale city. We must keep all these humans here.”

“Hehe, don’t worry. I have already sent the message to long snake City. Long snake City is the closest to green scale city. The long snake Army should be here soon. These humans will die for sure.”

“Good, good, good. That’s great.”

The demons conversed in secret, their tones excited.

“you guys continue to keep an eye on him.”

Jiang Li looked at the communication screen and said, ” as long as you find any demons, kill them immediately. Report to me immediately if there’s any movement or abnormality.

“yes!”

Xx02 and the other meches nodded in response.

The communication was disconnected.

The projection disappeared.

four level-two soul Tinders have been consumed. Transport meches have been unlocked.

Jiang Li operated the Dominator panel.

Shua!

transport mech has been successfully unlocked!

A notification appeared.

“Create 100 transport meches.”

transport meches. Jiang Li immediately opened the mech type interface and used 100000 energy points to build 100 transport meches.

The number of energy points had been reduced by nearly half.

It required 1000 energy points to create a Stage 2 troop class, which was 100 times more than a Stage 1 troop class.

Shua!

The manufacturing interface popped up.

An illusionary image of a military truck appeared. There were two illusionary figures standing beside the military truck. Other than that, there was also the word 'X100'.

The shadow was surrounded by countless light spots, which gradually solidified.

A minute later.

The production was completed.

Buzzzzzz! Buzzzzzz! "Whoosh!!!"

instantly.

a total of one hundred camouflaged large military transport trucks appeared out of thin air, almost occupying the entire large open space in front.

There were a hundred of them.

They were arranged in front of Jiang Li. The scene was shocking. There was a sense of modern technology. There were two meches in camouflage uniforms standing next to each military transport truck.

...

Furthermore ...

Each large military transport truck was also equipped with an 88mm anti-aircraft gun. The front of the truck was like a miniature tank, and the firepower was very strong, forming a perfect combination.

“Greetings, chief sovereign!”

kill! the two hundred meches shouted in unison.

“good, good.”

jiang li smiled.

Obviously.

Level two troop type.

Transport meches.

The main body was not a ‘mech’ but a ‘large military transport truck’. Each’ large military transport truck ‘had two meches.

A mech driver and a mech gunner.

...

Of course.

Whether it was the driver or the gunner, their physical fitness and combat power had reached the minimum level of an early stage-two martial artist.

shua!

troop type: transport mech

[ rank: early stage of rank two ]

[ No.: YS01 ]

skill: level two low-grade as if walking on flat ground ”

[ machinery: jian jia (omitted) ]

advancement requirement: 2000 energy points ”

“A large military transport truck can only carry 40 people.”

a hundred large military trucks can only carry four thousand people. Jiang Li murmured, ” apart from a thousand meches and walking puppets, I can only take two thousand monsters with me.

“In that case, we can only kill all the monsters in the green scale city.”

“It’s a bit of a pity. After all, it’s worth tens of millions of taels.”

Finally.

okay. Jiang Li made the decision.

The current situation ...

It was impossible for Jiang Li to take more than 100000 monsters with him. There were too many of them and they would be too big a target. It would also slow down Jiang Li’s Army.

Furthermore ...

When he crossed the Green Mountain Range, he would definitely attract a large group of ferocious beasts with more than 100000 demons.

As for letting these demons go ...

That was even more impossible.

BOOM! BOOM!

“Kill!”

Suddenly.

outside the green scale city.

There was a loud explosion, followed by the sounds of fighting and machine guns firing. An intense battle had broken out.

“hegemon, a monster army is attacking us.”

Xx01 reported.

“All soldiers, head to the city walls and prepare to fight the demon Army.”

stop! Jiang Li shouted.

“Yes.”

yes! the meches replied in unison.

“My Lord, what about these monsters?”

Xu Li asked.

“Hurry up and run!”

“Brothers and sisters, our fellow demons from other demon cities are here to save us. If you don’t want to die, if you don’t want to become a demon slave, run! This is our only chance to survive!”

“If you don’t run, you’ll die!”

At this moment.

Among the 100000 demons, many of them started to stir up trouble. They roared and created chaos. The chaos immediately caused a major panic.

The most important thing was ...

Some monsters even tried to steal Jiang Li’s loot.

Obviously.

These demons were doing this on purpose, creating chaos to buy time for the demon troops outside the city. They were attempting to coordinate with the outside and disrupt the entire situation.

“You’re looking for death.”

shoot. Jiang Li’s eyes were cold. don’t leave anyone alive.

Da da da da

in the surroundings.

the 300 firearm meches fired their machine guns and submachine guns, forming a continuous rain of bullets that covered the front and killed the chaotic demons.

One had to know.

These demons were just ordinary people. Not to mention the power of blood, there were not many demons who were not even qualified to be called demons. How could they resist the bullets of machine guns?

In an instant.

A large number of them fell.

The ground was filled with corpses.

When the three hundred firearm meches finished their round of bullets, more than ten thousand demons were killed. Their blood flowed and formed a stream.

Such an iron-blooded method had intimidated all the demons.

Shua!

Jiang Li used 300 energy points to refill the ammunition for the three hundred firearm meches.

“Rumble!”

A loud noise came from outside the city.

Jiang Li looked up and saw that the city wall had collapsed from afar. The city wall that was already destroyed by Jiang Li’s bombardment finally couldn’t hold on anymore under the attack of the monster army.

It directly collapsed.

“.....”

“The demon Army is about to charge in.”

“we’re saved.”

“Let’s wait and see. When the demon Army charges in, these humans will be dead.”

In the surroundings.

The monsters looked at each other and were excited. After Jiang Li’s bloody slaughter and suppression, they didn’t dare to make any more moves.

Buzzzzzz!

In the communication screen.

As the city wall collapsed, the monster army was about to break through the blockade of the meches and enter the city. After all, Jiang Li only had a few hundred meches around the city gate.

“Create electric-powered meches.”

Shua!

let’s go. Jiang Li used up 50000 energy points and built 50 electric meches.
