

Army 106

Chapter 106 A million energy points

“that’s good.”

okay. Jiang Li nodded and ordered, “go and bring me all 100 lower spiritual crystals.

“Alright, city Lord.”

Xu Ya nodded and left.

A few minutes later.

Xu Ya came back with a blue jade box in her hand. She walked to Jiang Li and put the box on the ground.

then, he opened it.

city Lord, here are 100 lower spiritual crystals.

Xu Ya said.

“yes.”

Jiang Li looked over.

within the jade box.

there were egg-sized diamond-shaped crystals, which were gray and transparent. if one observed carefully, there seemed to be air flowing inside the crystals.

Jiang Li asked Wang Gang to give him a lower spiritual crystal.

“These are the spirit crystals.”

jiang li played with it in his hand and didn't feel anything special.

This was because Jiang Li's cultivation was too low. He was only at the early stage of level one and had just formed his internal force. He was still in the stage of opening the twelve main meridians, let alone connecting the heaven and earth bridge.

there was more.

The spiritual crystal did contain the energy of heaven and earth, but one needed to reach level three cultivation and connect the celestial bridge to sense the energy of heaven and earth in the spiritual crystal and use it to cultivate.

It was for this reason that spiritual crystals were circulated above level three.

spiritual crystals were not available for those below level three.

In reality.

The human race, monster race, barbarian race, demon race, celestial race, and ghost race could all use spiritual crystals to cultivate, which was why spiritual crystals were regarded as 'equivalent' by the six races.

Shua!

[discovered item that can be converted into energy points. Do you want to convert it?!]

at this moment.

a notification suddenly appeared in front of jiang li.

“Crystals can be converted into energy points.”

Xu Ya? ” Jiang Li raised his eyebrows. He didn’t expect this. After calming down, he said, ” Xu Ya, there’s one more thing I need you to do.

“Apart from the gold, silver, jewelry, weapons, and equipment, distribute them to the sect members and the city guards. Find a way to sell the rest.”

“Yes, city Lord.”

Xu Ya nodded and left the hall.

“Convert.”

spiritual crystal. Jiang Li immediately converted a lower spiritual crystal.

Buzzzzzz!

A white light flashed.

The lower spiritual crystal in Jiang Li’s hand disappeared.

conversion successful. Received 10000 energy points!

a notification appeared.

“Ten thousand points!”

Jiang Li’s pupils constricted, then he was overjoyed. He looked at the 99 lower spiritual crystals in the jade box in front of him. one lower spiritual crystal is 10000 points, so 100 of them is a million points.

“This is really a great profit.”

spirit crystals are indeed worthy of being the currency circulating in the upper class of the continent. They contain 'heaven and earth energy'. Compared to medicinal herbs, they're not even a little bit inferior.

convert, convert, convert all of them.

Jiang Li walked to the jade box and put his hand on the spiritual crystals. He turned all 99 lower spiritual crystals into energy points. With a flash of white light, the spiritual crystals disappeared.

the jade box had also become an empty box.

shua!

conversion successful. You've received 990000 energy points!

one million, three hundred and ten thousand energy points.

Jiang Li opened the Dominator panel and looked at the energy points column. It jumped from 310000 points to 1.31 million points.

It changed from six figures to seven figures.

1.31 million energy points are enough to make 1310 level-two meches. I can make almost 10000 perfected-stage level-one meches.

it's still not enough. Jiang Li was happy, but when he thought about the 100000 monsters in Red Dragon County, his joy disappeared. but it's still not enough.

...

One had to know.

That was a hundred thousand demon soldiers.

A quantitative change was enough to cause a qualitative change.

If they were to master some kind of military formation, the combat strength of the 100000 demon soldiers would be raised to another level.

Even if Jiang Li had more than 1000 level-two troops, he couldn't defeat 100000 demon soldiers.

Soon after.

let's go. Jiang Li left the city Lord's mansion and came to an empty space outside the city.

Shua!

The Dominator panel opened.

make three hundred transport meches and three hundred electric meches.

Jiang Li operated the Dominator panel and used 600000 energy points to create 600 level-two troops.

...

Nearly half of the 1.31 million energy points had been consumed.

Energy points came quickly, but they were used even faster.

Shua!

The illusion creation interface appeared.

Two illusionary figures appeared, with the word 'X300' beside them.

There were countless light spots filling up the surroundings, and they were gradually solidifying.

A minute later.

three hundred transport meches have been built. Three hundred electric meches have been built.

“Whoosh!!!”

Right in front.

Three hundred large military transport trucks appeared out of thin air. Each truck was equipped with a mech driver and a mech gunner.

The trucks occupied a large area of the open space.

There were also three hundred electric-powered meches.

All of them appeared.

“Greetings, chief sovereign!”

the mech saluted jiang li.

“Yes.”

” yes. ” jiang li nodded. ” come back to the city with me. ”

The next day.

Xu Ya, Hua Tian, and Hu Dong went to five lakes city, Tianshui city, and hope City as Jiang Li told them to. They brought a lot of gold, silver, and spirit herbs.

At the same time.

In order to ensure the safety of the trade and the transportation of goods, Jiang Li equipped each team with 100 transport meches and 100 electric-powered meches.

The meches he made yesterday were for this purpose.

Each team brought an Intel mech to keep in contact so that Jiang Li could know the specific situation and respond at all times.

Even though ...

Compared to the lower spiritual crystals, the amount of energy points converted from herbs was too low. However, it was too difficult to get lower spiritual crystals.

Jiang Li only got 100 lower spiritual crystals after taking down a green scale city.

Furthermore ...

the great xia city didn't even have a single spiritual crystal.

so,

For now, the right thing to do was to find ways to get more medicinal herbs.

City Lord's mansion.

Buzzzzzz! Buzzzzzz!

Jiang Li was practicing the Thunder Qi skill. He was holding the blood refining bead in his hand and absorbing the pure blood energy in the blood refining bead.

Not only that.

Jiang Li also took some precious spirit herbs to help with his cultivation.

a day later.

Jiang Li finally accumulated enough internal strength and connected the first meridian, the lung meridian of hand Taiyin. Internal strength gushed out of his dantian and circulated along the meridian.

However ...

jiang li's internal force was unstable because he had taken too many pills.

Hence.

jiang li started to practice martial arts.

He had consumed the 'Bear Strength pill' to help him practice the violent Bear Paw, and the 'Thunder origin pill' to help him practice the thunderous movement technique.

Two days later.

Even though the violent Bear Paw was still at the minor completion realm, he had finally successfully crossed the threshold of the thunderous movement technique. He could be considered to have grasped the martial arts of the thunderous movement technique.

One had to know.

Jiang Li's talent in martial arts wasn't high.

the most important reason why he was able to grasp the basics of the thunderous movement technique in two days was that he had consumed a large amount of 'resources'. he had consumed the 'thunder origin pill', which was worth more than a thousand taels of silver, as if it were candy.

this was how he achieved such an effect.

Only a martial arts genius could master a martial art in a day or two, even if it was just the beginning.

Of course.

If a martial arts genius had the help of medicinal pills, he would probably be able to learn the basics of the thunderous movement technique in half a day.

However ...

the realm of martial arts.

Naturally, it would become more difficult the further one went. It was relatively easy to get started, but it was extremely difficult to achieve great success. Even if one's comprehension was not enough, they would not be able to reach perfection in their lifetime.
