

Army 113

Chapter 113 Eight-figure number

The amount of herbs that e kui's men sent this time was about three times that of the previous deal. Jiang Li confirmed the number of herbs through the conversion function on the Dominator panel and agreed to the deal.

Jiang Li paid 380 million taels of silver, which was 3.8 million taels of gold.

In addition to the amount of the previous transaction.

Jiang Li spent five million and sixty-five thousand taels of gold on the deal with the half-monster Alliance. He had used more than half of the ten million taels of gold.

The transaction was completed.

Both sides had achieved their goals and were happy.

They all had smiles on their faces.

Elder E kui, if you have any more ordinary herbs, you can continue to contact me.

Jiang Li said with a smile.

“No problem, no problem.”

e kui nodded with a smile on his face. after buying all these herbs, it had solved one of e kui's worries, ” the power of the half-monster alliance is not something city lord jiang can imagine. they are just ordinary herbs. if city lord jiang really wants them, i promise you that i will bring more next time. ”

“As long as city Lord Jiang is able to eat it.”

“Don’t worry,”

money isn’t a problem. Jiang Li smiled. it’s not a big deal.

“By the way, when is the next transaction?”

jiang li asked.

“Well, about this.”

e kui paused for a moment, ” let’s talk about it when the time comes. city lord jiang is in quite a bit of trouble now. it won’t be too late to discuss the deal after city lord jiang has settled his own problem. ”

“That’s good.”

Jiang Li nodded and didn’t say anything else.

It was obvious.

E kui thought that Jiang Li’s chance of survival was too slim under the Red Dragon County’s demon Army’s revenge. The next deal would definitely be impossible.

There was no need to waste time.

All the herbs filled the 40 transport trucks. Jiang Li sat in the passenger seat of the YS01 truck. The electric meches also got in.

The truck fleet left Qingshan Valley.

if it wasn’t for what happened in the green scale city, this Jiang Li would be a good trading partner. He only wants ordinary herbs and there’s no limit to the amount.

e kui looked at where jiang li left and murmured, ” “It’s a pity,”

“Elder E kui, don’t you think it’s suspicious that Jiang Li only wants ordinary herbs? Why did he only want ordinary herbs? There must be a secret behind this.”

“Besides, those hundreds of mechanical carriages are definitely not simple,” Rollin said as he walked over.

also, from the information we’ve gathered about Jiang Li, we suspect that he has mastered the ancient ‘secret puppet technique’. Many of his men have made powerful puppets.

it’s because of these powerful puppets that Jiang Li was able to destroy the green scale city, annihilate the one-line snake Army, and even kill the Ouroboros clan.

“And the reason why he only wants ordinary medicinal herbs, could it be that it has a great connection with the ‘secret puppetry technique’ that was passed down from the ancient times? I think it’s very suspicious.”

“And then?”

Hong Ling glanced at Rollin. what do you want to do? attack jiang li? Don’t say that I didn’t warn you. Jiang Li is very afraid of death. He’s protected by powerful warriors all the time. You won’t have a chance.”

“Furthermore, I’ve never heard of the ‘puppetry’ being related to medicinal ingredients. Only alchemists and alchemists are able to be related to medicinal ingredients.”

Rollin, I think you’re interested in Jiang Li’s ‘mechanical carriage’. You want to study it, right? ”

E kui laughed and said, “alright, stop thinking about it. You don’t stand a chance. Besides, we have more important things to do. The alliance leader has already given the highest order. We will use the Red Dragon County’s demon Army’s attack on Black Dragon County as an opportunity to launch the plan.

“The battle for the Dragon of the nation!”

“this is the most important thing. everything else has to be put aside.”

“Tsk, you guys are so boring.”

rollin said unhappily.

on the other side.

“Stop the car.”

On his way back to the city, Jiang Li made sure that no one was around and stopped the truck. He got out of the truck and put his hand on the wooden box on the truck. He started the conversion function and converted the herbs he got this time.

” convert energy points. ”

Jiang Li operated the Dominator panel.

Buzzzzzz!

a white light flashed.

A truck full of herbs had been converted into energy points.

conversion successful. You’ve received 126500 energy points!

A notification appeared.

The herbs in a truck could be converted into 126500 energy points. Jiang Li had filled up 40 trucks this time.

“Convert!”

...

“Convert!”

“Convert!”

“.....”

jiang li walked over and converted all the herbs on the trucks into energy points. an illusionary pop-up window appeared in front of him.

conversion successful. You’ve received 126500 energy points!

.....

conversion successful. You’ve received 126500 energy points!

.....

A few minutes later.

After all the herbs on the forty trucks were converted, Jiang Li gained 5060000 energy points in total. The Dominator panel opened.

In the energy points column.

...

the number of energy points had increased from 2988800 to 8048800.

More than eight million energy points.

It was close to ten million.

This was an exaggerated number.

Furthermore ...

I'm done. Jiang Li just received a message from Hua Tian. He had completed his mission in Hope City.

Although the Chamber of Commerce in Moon City had lowered the price, causing some losses in the transaction, the price was still very low.

but ...

Hua Tian sold all the spirit herbs, gold, silver, jewelry, weapons, and equipment. He also used the money he earned to buy ordinary herbs.

Although the Chamber of Commerce in Moon City had raised the price of ordinary medicinal herbs by half, the price of ordinary medicinal herbs was still very high.

no matter what.

Hua Tian's mission was considered complete. He was currently bringing the medicinal herbs he had purchased back to the great Xia city. He estimated that he would be able to return to the great Xia city by tonight.

At that time.

jiang li would have a lot of energy points in his account.

The number of energy points might exceed ten million.

“Let’s go back to the city,”

let’s go. Jiang Li threw away all the wooden boxes on the trucks and burned them all. The hundred trucks drove at full speed and used the skill to return to the city as fast as they could.

at noon.

Jiang Li returned to the great Xia city.

in the evening.

hua tian came back from hope city safely and went to the governor’s mansion to see jiang li. he reported what he had seen and heard in hope city and the details of the deal.

Finally.

He gave the list of transactions to Jiang Li.

“Yes.”

good job. Not as good as Xu Ya, but much better than Hu Dong. You’ve sold all the spirit herbs, gold, silver, jewelry, weapons, equipment, materials, and pills I gave you.

“Although it’s 30% lower than the normal price.”

“You can go to Xu Ya to get your reward.”

I’ll pay you. Jiang Li waved his hand. I’ll pay you 1000 points.

“Thank you, city Lord.”

thank you. Hua Tian was overjoyed. He bowed to Jiang Li and left the hall.

On the list of transactions.

It recorded every transaction in detail.

Hua Tian had sold a total of 2000 lower-grade tier one Spirit herbs, 1800 medium-grade tier one Spirit herbs, 1000 upper-grade tier one Spirit herbs, and 340 superior-grade tier one Spirit herbs.

This was because the price had been lowered by 30%.

Thus, he only received 86.24 million silver taels.

The gold, silver, and jewelry were sold for seventy million taels.

The weapons, equipment, and spirit herbs were sold for a total of 84 million taels.

In other words ...

Hua Tian had completed a transaction of 240.2 million taels of silver in Hope City. All of the 240.2 million taels of silver had been used to purchase ordinary medicinal herbs, and it had all been spent.

However ...

The Chamber of Commerce in Hope City had increased the price of ordinary medicinal herbs by nearly 50%.

so,

Although Hua Tian had spent 240.2 million taels of silver on the surface, in reality, he had only bought ordinary medicinal herbs that were worth around 200 million under normal prices.

According to a normal transaction.

Jiang Li did suffer a loss.

However, according to the energy point conversion function of the ‘super mechanical Army’, Jiang Li made a profit. If he converted spiritual herbs into energy points, it would be a hundred times worse.

The herbs that Hua Tian brought back from Hope City were still on the transport truck and had not entered the city.

At night.

jiang li left the city lord’s mansion and went outside the city.

“City Lord!”

“City Lord!”

At the city gate.

“master jiang.” the city guards quickly saluted jiang li when they saw him.

“Yes.”

okay. Jiang Li nodded.

Soon after.

let’s go. Jiang Li got on the transport truck YS0101 and sat in the passenger seat. He ordered the transport mech with the herbs to leave with the truck.

“Stop the car.”

Jiang Li came to an open space outside the city. After making sure there was no one around, he stopped the truck and got off the truck. He started to convert the herbs on the truck into energy points.

The herbs that Hua Tian had purchased in Hope City filled up 20 trucks.

convert energy points.

Jiang Li put his right hand on the wooden box on the truck and started the energy point conversion function.

Buzzzzzz!

A white light flashed.

All the medicinal ingredients were transformed and disappeared.

conversion successful. You've received 110000 energy points!

A notification appeared.

“Convert!”

“Convert!”

“convert!”

.....

Jiang Li finished converting all the herbs on the twenty trucks.

conversion successful. You've received 110000 energy points!

.....

conversion successful. You've received 110000 energy points!

.....

It had been converted twenty times.

He had obtained a total of 2200000 energy points.

I've obtained another 2.2 million energy points.

Jiang Li was all smiles.

Shua!

The Dominator panel opened.

In the energy points column.

the number of energy points increased from 8048800 to 10248800.

"Just over ten million."

Jiang Li looked at the eight-digit number of energy points and felt a sense of achievement. The sense of danger and pressure disappeared.

more than ten million energy points.

This was a terrifying number.

"If we send out all the level 2 troops, we can send out 10000 troops."

an Army of 10000 meches as powerful as early-stage level-two martial artists, fearless, and loyal, ” Jiang Li thought.

“It can be said that he is invincible.”

100000 demon soldiers. Even if there’s a difference of ten times in number, the level-two troop type can still crush them in terms of quality. If I can unlock the ‘mechanical artillery’, it will be a very terrifying weapon on the battlefield.

if there are thousands of mechanical artilleries, no matter how many demon soldiers there are, they will all die in one round of bombardment.

” 100000 demon soldiers is indeed a lot. with the power of the mechanical artilleries, level 1 demon soldiers can’t even withstand a few rounds of bombardment, let alone those below level 1. ”

Of course.

Jiang Li didn’t make any meches because he didn’t know the formation of the monster army in Red Dragon County. Besides, the firearm meches were also powerful weapons.

He could increase the number of firearm meches.

the transformation of the bio-mech into walking corpses can also increase our forces.

The combat meches and the cold weapon meches had their own functions.

It was a powerful Army.

It was extremely wrong to have only one type of Army, as it was easy for the enemy to find its fatal flaws. Only by developing in all aspects could they become more powerful and invulnerable.
