# Army 120

Chapter 120 Unlocking the mechanical artilleries

Jiang Li took a deep breath. He looked at the number of soul Tinders in the soul Tinder column on the Dominator panel and became nervous.

he took a deep breath to adjust his state of mind and gradually regained his calm.

beginning to fuse the level-one soul Tinder.

Jiang Li operated the Dominator panel and used the soul Tinder fusion function to fuse the level-one soul Tinder. A virtual soul Tinder fusion interface appeared in front of him.

Buzzzzzz!

In the interface.

Ten soul Tinders appeared in the form of ten gray spots of light. They lined up in a line and gradually came together. The ten gray spots of light gathered.

merging in progress. Countdown: 10,9,8,7 "

a notification appeared.

Ten seconds later.

Within the fusion interface.

The ten gray light spots all gathered together and lit up with a gray light. However, they exploded like fireworks and formed a dazzling gray flame.

After the flames dissipated.

Ten level-one soul Tinders were gone.

[fusion failed!]

Four big red words popped up on the interface.

"Continue."

Jiang Li was quite calm and continued to use the fusion function.

Ten seconds later.

[fusion failed!]

A notification appeared.

He had already knelt down twice.

"again,"

Jiang Li pouted.

Buzzzzzz!

This time.

Within the fusion interface.

The ten gray light spots gathered together. From the center, a black light appeared. Then, like a virus infection, it gradually eroded the surrounding gray light.

It had turned completely black.

A black dot of light appeared.

Level-two soul Tinder.

[fusion successful!]

Four golden words popped up on the interface.

"Continue."

it's good. Jiang Li smiled and looked happy.

[fusion failed!]

......

[fusion failed!]

......

[fusion successful!]

......

There were 500 level-one soul Tinders, and ten of them could be fused once, so he could fuse 50 times in total.

merge! Jiang Li merged again and again.

A series of notifications appeared before him.

Of course.

Most of the notifications were that the fusion had failed.

A few minutes later.

He had fused all 500 level-one soul Tinders, and the number of level-two soul Tinders had increased from 10 to 33.

Jiang Li already had ten level-two soul Tinders.

In other words ...

Out of the 50 times, Jiang Li was lucky enough to succeed 23 times and get 23 level-two soul Tinders. The success rate was quite high.

Generally speaking.

It would be good enough if the success rate was one-third.

...

This time.

It was already close to half.

thirty-three level-two soul Tinders.

Jiang Li looked at the number of soul Tinders in the column and his heart was pounding. If it's thirty-three, then at the very most, there will only be three chances to fuse."

if the success rate of ten level-one soul Tinders fusing into one level-two soul Tinder is one-third, then the success rate of ten level-two soul Tinders fusing into one level-three soul Tinder is less than one-sixth.

for safety's sake, I need 60 level-two soul Tinders to succeed once in six fusions.

To tell the truth.

Jiang Li didn't dare to take the risk.

he had no choice.

The success rate of fusion was too low. Jiang Li had experienced it when he played the 'super mechanical Army' game.

This wasn't a game.

...

It was reality.

if this failed, jiang li's soul tinder would be gone. the soul tinder that he got after killing 30000 demon soldiers would be gone.

He couldn't be careless and cautious, he had to think twice before acting.

He could not allow a moment of impulse to lead to a complete collapse of the situation.

That would be dangerous.

Shua!

Jiang Li opened the sub-plane of the mechanical Army.

[interface: mechanical Army type]

level one mech types: combat mech (unlocked), cold weapon mech (unlocked), firearm mech (unlocked), Intel mech (unlocked), biochemical mech (unlocked).

Level 2 troops: electric mech (unlocked), transport mech (unlocked), mechanical artillery (33/8 locked), tank mech (locked), mechanical Ranger (locked).

?......?

" the number of stage 2 soul tinders has reached 33, and i can unlock the mech artilleries. however, before i unlock the mech artilleries, the information about the tank mech and the mech ranger will not appear. "

" i can't. " jiang li thought, " the unlocking of soldier types is in order. i can't skip the first one to unlock the next one. the rules are a bit rigid. "

I'll just unlock the mechanical artillery first.

Jiang Li made a decision.

no matter what.

As long as he unlocked the mechanical artillery, Jiang Li would have an extremely powerful troop type. With the destructive power of the mechanical artillery, it would be able to play a great advantage on the battlefield.

of course.

Jiang Li was worried that if the fusion failed three times, not only would he not be able to get the level-three soul Tinder, but he would also not be able to unlock the mechanical artillery.

At the very least, he had to unlock the mechanical artillery first.

At that time, even if he failed, it wouldn't be too much of a loss.

mechanical artilleries unlocked.

Jiang Li confirmed.

Buzzzzzz!

the eight stage-two soul tinders disappeared.

[mechanical artillery has been successfully unlocked!]

A notification appeared.

"Alright," he said.

okay. Jiang Li nodded and looked at the soul Tinder column. There were 25 level-two soul Tinders left.

build 300 combat meches, 400 cold weapon meches, 350 biochemical meches, and 300 firearm meches.

okay. Jiang Li started to make up for the losses from last time.

It consumed 13500 energy points.

the manufacturing interface appeared.

there were four figures on the interface with numbers beside them.

Buzzzzzz!

Countless light spots filled it and gradually solidified.

A minute later.

[creation complete!]

One thousand three hundred and fifty meches were finished.

Soon after.

The illusionary figures gradually became real. One thousand three hundred and fifty meches appeared in the open space in front of Jiang Li, divided into four groups.

"Greetings, chief sovereign!"

The mech saluted Jiang Li.

"Yes."

okay. Jiang Li nodded.

this time, there were two elite soldiers, both spear meches.

I didn't get any elite soldiers after creating thousands of cold weapon meches last time. There are two this time, although they are both spear meches.

Jiang Li checked the information and pouted. I can't calculate the probability of elite troops appearing. It's all up to luck.

"Upgrade mech."

jiang li continued to operate the dominator panel and started to upgrade the 1350 meches he had just created.

It cost him 189000 energy points.

Shua! Shua! Shua!

The mech's body was shining.

A few seconds later.

The promotion was completed.

All 1,350 meches had reached the perfected stage of level one.

This included the two spear-wielding meches.

make five transport meches and three electric meches.

Jiang Li started to replenish the lost level two meches. Eight level two meches cost him 8000 energy points.

Shua!

The creation interface appeared, and there were two illusionary figures in it. Countless light spots filled in, and the illusionary figures gradually solidified.

A minute later.

The production was completed.

Shua! Shua!

Five large military transport trucks and three electric meches appeared in Jiang Li's sight and occupied a large open space in front of him.

"Greetings, chief sovereign."

master! the meches greeted Jiang Li in unison and saluted.

"yes."

okay. Jiang Li nodded.

The lost meches were all replenished. The number of Jiang Li's mech Army reached 17211 again, plus 11000 walking corpses.

Jiang Li now had nearly 30000 soldiers.

Shua!

The Dominator panel opened.

In the energy points column.

The number of energy points decreased from 3269375 to 3058875 points. This time, replenishing the troops had cost him 210500 energy points.

more than 200000 yuan.

Soon after.

Jiang Li left the city.

Because he was preparing to build the mechanical artillery, he needed to find an empty place.

soon, jiang li came to the empty field where he made the transport meches and the electric meches last time. it was not far from the great xia city and there was no one around.

build 2000 mechanical artilleries.

Jiang Li looked at the remaining energy points and built 2000000 mechanical artilleries without hesitation, which cost him 2000000 energy points.

Buzzzzzz!

The manufacturing interface appeared.

Within the interface.

There were three meches standing straight in the virtual troop class, and in the middle of the three meches was an illusory cannon.

The style of the mechanical cannon was similar to the type 86 152 mm cannon. Then, it was combined with a large off-road vehicle, the two were integrated into one.

It was equipped with powerful firepower and mobility.

Other than that.

Next to the virtual troop type was the word 'X2000'.

It represented the quantity to be created.

Shua! Shua!

countless light spots filled in, and the virtual troop type slowly solidified.

A minute later.

[creation complete!]

A notification appeared.

"Reveal!"

Buzzzzzz!

the virtual soldiers appeared out of thin air. in front of jiang li, there were mechanical artilleries that occupied a large area.

Two thousand mech artilleries appeared.

Each unit had three meches, including: Cannon gunner, cannon Scout, cannon pilot.

Among them.

The cannoneers were responsible for loading shells and shooting, while the scouts were responsible for detecting, locking, and confirming targets.

The mech pilot was mainly responsible for moving the cannon.

"Greetings, chief sovereign!"

" jiang li! " the mechanical soldiers greeted jiang li in unison and saluted.

"Alright," he said.

Jiang Li looked at the mechanical artillery in front of him with satisfaction.

Shua!

unit Type: Mechanical artillery

[rank: early stage of rank two]

[no.: nb01]

" skill: level-two inferior-grade explosion "

[machinery: jian jia (omitted)

advancement requirement: 2000 energy points "

......

sub-troop type: mech cannoner

[rank: early stage of rank two]

[No.: PBS01]

skill: level two inferior-grade cannon mastery "

[machinery: Jian Jia (omitted)]

......

" sub-troop type: mech cannon scouting

[rank: early stage of rank two]

[No.: GBZ01]

skill: level two low-grade detection lock ”

[machinery: Jian Jia (omitted)]

......

[sub-troop type: cannon Driver]

[rank: early stage of rank two]

[No.: Kabj01]

skill: level two low-grade driving technique ”

[machinery: Jian Jia (omitted)]

Jiang Li checked the basic information of the mech artilleries. Apart from the main arms, there were three other Deputy arms.

One had to know.

The transport mech had two meches, but they were not a sub-troop and didn't have the corresponding skills. Compared to the artillery, the transport mech was much weaker.

Of course.

The transport trucks of the meches were equipped with simple 'space folding technology'.

so,

Although the transport meches had decent firepower, they were not considered a combat unit. The artillery was a pure combat unit.

One had to know.

Artillery was known as the 'God of War' on the battlefield. As long as they were used properly, a powerful artillery team was enough to secure victory in a war.
