

Army 121

Chapter 121 soul imprint

Other than that.

the characteristics of the deputy troop class.

A sub-troop class couldn't be promoted alone, but as long as the main troop class was promoted, the sub-troop class would be promoted as well. The sub-troop class also had a certain level of individual fighting ability.

Of course.

The skills of the sub-troop class served the main troop class, so their combat power was not high in one-on-one combat, and they were the weakest among the same rank.

let's test the power of the mechanical artillery.

fire! Jiang Li ordered, " NB01, aim at the mountain ahead.

"Yes."

right in front.

The machine gun cannon, No. GB01, was similar to the type 86 152 mm cannon, and it was combined with a large off-road vehicle as the base.

in other words.

It was to load the type 86 152mm cannon onto a large off-road vehicle and achieve perfect integration.

The three Deputy troops immediately started operating.

Cannon drives a fixed large off-road vehicle and detects the target's distance, direction, wind direction, altitude, and so on.

He locked onto his target.

Kachaa! Kachaa!

finally.

The cannoneers would then adjust the angle of the barrel and load the shells.

“Fire!”

BOOM!

The Cannonball shook, and with a roar, the Cannonball shot out from the muzzle, leaving a trail of fire. The Cannonball flew straight into the sky and landed on the mountain in front.

“Rumble!”

The next moment.

The ground trembled slightly, and the cannonballs exploded on the mountain top. Flames soared into the sky, soil and stones flew everywhere, and deafening explosions rang out.

After the aftermath of the explosion calmed down.

The mountaintop in front of them was shorter, and a huge pit was blown out.

The power was terrifying!

One had to know.

And this was only at the early stage of Tier 2.

If it was raised to the perfected stage of stage two, the mountain in front of him would be blown to pieces.

It could be seen from this.

The power of the mechanical artilleries was truly formidable.

However ...

From locking onto the target, loading the shells, and finally firing the shells to hit the enemy, it took a long time. This was the weakness of the mechanical artillery.

But it didn't matter.

As long as the number of mechanical artilleries was large enough, they could be divided into several teams to fire one by one, achieving a seamless connection.

“Let's go back to the city,”

after testing the power of the mechanical artilleries, jiang li sat in the passenger seat of the suv and returned to the great xia city with 2000 mechanical artilleries.

2,000 off-road vehicles formed a fleet and drove into the great Xia city in an orderly manner.

“.....”

In the surroundings.

all the city guards and residents saluted with their eyes.

“The city Lord has brought such a special thing again.”

“It looks a little like the special carriage from last time.”

“It’s just a little small,”

“but the iron pipe on this carriage is bigger and thicker.”

“i don’t know what use it has.”

Everyone discussed in low voices. Their tone was filled with curiosity and they kept guessing.

the news that jiang li had recruited a few thousand more power soldiers soon spread throughout the city. han liqi, hong tianqi, xu ya, and the others also heard it.

At the same time.

The spies in the great Xia city immediately sent out the news.

After settling the two thousand mechanical artilleries, Jiang Li returned to the castellan mansion. Before he knew it, it was already evening and the sunset was falling.

“Young master, dinner is ready.”

...

Du Xiaohua said.

“Yes.”

“okay.” jiang li nodded.

At night.

Jiang Li finished his dinner, went back to his bedroom, and lay on the bed.

Shua!

The Dominator panel opened.

“It’s starting.”

Jiang Li tried to calm himself down. He looked at the level-two soul Tinder and started the soul Tinder fusion.

fuse ten level-two soul Tinders!

Buzzzzzz!

...

The fusion interface appeared.

The ten black light spots lined up in a row, then gradually came close to each other. The ten black light spots gradually stuck together.

Shua!

merging in progress. Countdown: 10,9,8,7 ”

“Can we succeed?”

Jiang Li was nervous but full of anticipation.

Although he knew that the success rate of fusing ten level-two soul Tinders into one level-three soul Tinder was frighteningly low, he still couldn't help but think about it.

what if he succeeded?

as long as he succeeded.

Even if there was only one level-three troop, it was enough to change Jiang Li's current situation. He could even take the initiative.

the most important thing was ...

In the battle between Jiang Li and the vanguard of the monster race from Red Dragon County, Jiang Li had a deep understanding of the power of level three. The blue flame burned his bloodline to improve his strength, and he was infinitely close to the early stage of level three.

It was this kind of combat power.

He broke through Jiang Li's blockade.

If Jiang Li didn't have a backup plan and the hundreds of mech drivers behind him, he would have been in danger.

Think about it carefully.

Even Jiang Li was scared.

so,

Jiang Li was in a hurry to have a level-three troop class. He was worried that a level-two troop class wouldn't be able to stop a level-three assassin. Even if he only had one level-three troop class, it would be enough to protect him.

The ten-second countdown ended.

“Whoosh!!!”

Within the fusion interface.

Jiang Li saw a faint white light among the black light, although it was very dim and almost invisible.

but ...

Jiang Li saw it clearly.

Furthermore ...

The white light quickly eroded the black light.

“!!!”

jiang li’s eyes widened and his breathing quickened.

in the interface.

It was a pure, white, flawless, and snow-white light spot that looked like a Firefly. It was floating in Jiang Li’s sight.

Level-three soul Tinder!

[fusion successful!]

Four big golden words jumped out.

One shot entered the soul!

” hahahahahahahahahahaha! ”

” haha ... ” jiang li was stunned at first, then he rubbed his eyes as if he couldn’t believe what he was seeing. then he laughed. his laughter spread through the entire mansion.

“What’s wrong with young master? You’re laughing so loudly in the middle of the night.”

what happened? “du Xiaohua was in another room. She was woken up by Jiang Li’s laughter and looked at Jiang Li’s room in confusion. did something happy happen?”

Success on the first try!

Jiang Li succeeded on his first try!

One had to know.

The success rate of fusing ten stage-two soul Tinders into a stage-three soul Tinder was frighteningly low, with less than one in six.

Under such circumstances.

Jiang Li, on the other hand, succeeded on his first try. How could he not be excited and laugh at such luck and opportunity?

It wasn’t that Jiang Li wasn’t calm enough, he was just too happy.

He had obtained the third-stage soul Tinder.

Jiang Li would soon have a level-three troop class.

At that time.

What Red Dragon? what demon Army?

All of them were easy.

huhuhu, calm down, calm down.

jiang li took a few deep breaths to calm himself down. he was too excited just now and his face was still red.

I've got the level-three soul Tinder. It's time to think about what kind of troop class to upgrade.

Jiang Li looked at the White soul Tinder in the virtual interface and fell into deep thought. He thought of different types of soldiers, JJ01, SH01, hammer mech, spear mech, Archer mech, Wang Gang Qianqian, and so on.

For a moment.

Jiang Li was in a dilemma.

First of all ...

Electric-powered meches, transport meches, and artillery meches could be eliminated.

These three Rank 2 troops only had one skill. Even if they were upgraded to rank 3, they would only have two skills, which was not comparable to other troops.

"It's best to upgrade it to an elite troop class."

elite troops have three skills at level two, " Jiang Li thought. if they upgrade to level three, they'll have four skills. They'll be the strongest.

however, SH01 and JJ01 aren't weak either, especially JJ01. If it were to be promoted to rank 3, I wonder what kind of troop it would become.

Jiang Li was looking forward to it.

Shua!

Level 2 troops: electric mech (unlocked), transport mech (unlocked), cannon (unlocked), tank mech (15/16 locked), mechanical Ranger (locked).

Jiang Li looked at the information of the level two troop class.

“Tank mech.”

Jiang Li’s eyes lit up. if cannons are called the ‘God of War’, then tanks are called the ‘King of land battles’.

the combination of artillery and tanks, two types of soldiers on the battlefield, is enough to become the enemy’s nightmare.

“what a pity.”

” no. ” jiang li shook his head. ” i need 16 level-two soul tinders to unlock the tank mech. i only have 15 left. ”

of course, if I don’t fuse them, I can unlock the tank mech.

however, level-three soul Tinder is more important than unlocking the tank meches. I have to ensure my own safety. Without level-three meches, my safety is not guaranteed.

besides, with the artillery, I don’t have to unlock the tank mech immediately.

upgrade Bowmaster mech GJS01 to spear mech CQ01.

Jiang Li used four level-two soul Tinders and 400 energy points to upgrade two elite units, namely the Archer mech and the spear mech.

“Whoosh!!!”

The soul Tinder went into Archer mech GJS01 and spear mech CQ01 respectively. The energy of the energy points went into them and started to upgrade the two meches.

The mech’s body was shining.

A few seconds later.

The promotion was completed.

troop type: Archer mech (elite)

[rank: early stage of rank two]

[no.: gjs01]

skill 1: Level 1 ultimate cold weapon Mastery ”

” skill 2: level-one ultimate archery

” skill 3: level two low-grade chain arrow ”

[equipment: Level 2 inferior-grade elite alloy bow, Level 2 inferior-grade elite alloy arrow]

[machinery: jian jia (omitted)

advancement requirement: 4000 energy points ”

.....

unit type: spear mech (elite)

[rank: early stage of rank two]

[No.: CQ01]

skill 1: Level 1 ultimate cold weapon Mastery ”

skill 2: rank-one ultimate spear technique ”

” skill 3: stage two inferior-grade penetrating gun technique ”

“equipment: stage two inferior-grade elite alloy spear”

[machinery: Jian Jia (omitted)]

advancement requirement: 4000 energy points ”

just like the giant hammer mech, it has one more skill. It has three skills at stage two and has been upgraded to the perfected stage.

Jiang Li used 56000 energy points to upgrade both the Archer mech and the spear mech to the perfected stage of level two. The information changed too.

The Bowmaster’s three skills, chain arrow, had been upgraded to Tier 2 top-tier, and the two pieces of equipment had also been upgraded to Tier 2 top-tier.

The spear mech’s three skills, observation spear technique, and the elite alloy spear had both been upgraded to level two.

The strength of the elite troops had increased greatly.
