

Army 147

Chapter 147 100,000 troops

in the energy points column.

The number of energy points increased from 359800 to 60419800. The eight-digit number made Jiang Li's breath Quicken.

“more than 60.4 million.”

wuzu sub-League of the half-monster Alliance is My Lucky Star, “Jiang Li murmured and smiled. I've made a lot of money from the deal with wuzu sub-League of the half-monster Alliance. I have to say that wuzu sub-League is My Lucky Star.

“With so many herbs, if I were to come here alone, I don't know how long it would take me to get them.”

the half-monster Alliance is different. It's very powerful. The one in the wuzu plain is only one of its sub-alliances, and there are connections between the sub-alliances.

“It's really hard to find such a good trading partner.”

Shua!

let's go. Jiang Li closed the Dominator panel and ordered the meches to throw away all the wooden boxes and burn them like last time.

The flames were blazing, and the flames soared into the sky.

When Jiang Li returned to the great Xia city, it was already daytime.

One had to know.

Jiang Li had to attend a banquet in the county capital of the Black Dragon County this afternoon.

He really didn't have time to rest.

Outside the city.

In a vast open space a thousand meters away from the great Xia city.

jiang li stood there.

build 16700 combat meches, 16700 cold weapon meches, 16700 firearm meches, 16700 biochemical meches, and 86 Intel meches.

Jiang Li opened the Dominator panel and used 668860 energy points to build 66886 meches at the early stage of level one.

An illusionary manufacturing interface appeared before his eyes.

In the interface.

Five illusionary figures appeared. Four of them had the word 'x16700' next to them, while the last one had the word 'x86' next to it.

Buzzzzzz!

Countless light spots filled in.

The illusionary figure gradually solidified.

A minute later.

The illusionary figure turned into a physical existence.

[creation complete!]

A notification appeared.

shua! Shua! “Whoosh!”

The next moment.

The figures in the manufacturing interface were projected into the real world and appeared out of thin air. The figures of the meches appeared in the open space. There were many of them, and they stood in five groups.

“Greetings, chief sovereign!”

More than 60000 meches saluted Jiang Li. Their voices were in unison. Jiang Li felt like he was going through a military parade.

His heart was filled with pride.

“good, good.”

Jiang Li was very satisfied. They were all his soldiers.

Shua!

“congratulations, my lord. because you created 16700 cold weapon meches at the same time, a special probability has been triggered. you’ve obtained level-one elite troops ‘archer mech x19, spear mech x17, and huge axe mech x20’.”

“elite troops.”

Jiang Li raised his eyebrows and smiled. the probability of triggering this is quite high. I got 56 level-one elite troops in total.

“Elite troops, step forward.”

stop! Jiang Li shouted.

In the cold weapon mech group.

Fifty-six meches walked out. Nineteen of them were archers with bow weapons and seventeen were spearmen with spear weapons.

Jiang Li was familiar with these two types of elite troops.

Other than that.

That would be 20 huge axe meches.

This was the new rank 1 elite troop class.

” troop type: huge axe mech (elite)

[rank: early stage of rank one]

[No.: JF01]

skill 1: level-one low-grade cold weapon Mastery ”

...

” skill 2: level one inferior-grade axe technique ”

[machinery: Jian Jia (omitted)]

advancement requirement: 40 energy points ”

.....

The huge axe mech had two broad axes on his back. The blades of the axes glowed with cold light. They were made of special alloy and were very sharp and powerful.

The axe and the handle were half the length of the huge-axe mech.

66886 meches have been upgraded.

Jiang Li used 9371880 energy points, which was nearly ten million, to upgrade all the meches he just made to the perfected stage of level one.

Among them.

The 56 elite troops used 15680 points, and the remaining 66830 ordinary troops used 9356200 points.

Shua! Shua! Shua!

...

There were more than 60000 meches, and each of them was shining with light. The light gathered together and was extremely dazzling.

A few seconds later.

more than 60000 meches were upgraded.

All the equipment was complete.

They were all promoted to Sergeant.

Currently.

Jiang Li had twenty thousand combat meches, twenty thousand cold weapon meches, twenty thousand firearm meches, twenty thousand biochemical meches, and one hundred Intel meches.

build 2000 electric-powered meches, 2000 transport meches, 2000 artillery meches, 2000 tank meches, and 2000 mechanical Rangers.

Jiang Li used 10000000 energy points to create 10000 level-two units.

shua!

The manufacturing interface appeared.

Five illusionary figures appeared, and there was a 'X2000' beside each illusionary figure, representing the number to be manufactured.

Countless light spots filled in.

It gradually solidified.

A minute later.

[creation complete!]

Shua! shua! Shua!

the next moment.

In the open space in front of him, ten thousand level two meches appeared in front of Jiang Li one by one.

it occupied a large open space.

“Greetings, chief sovereign!”

” thank you! ” the ten thousand meches shouted in unison and saluted jiang li.

“Alright,” he said.

Jiang Li smiled.

As a result ...

Jiang Li now had 4000 transport meches, 4000 electric meches, 4000 artillery soldiers, 4000 tank meches, and 4000 mechanical Rangers.

In addition, there were 2nd rank elite troops and the only 3rd rank psionic biochemical soldiers.

Jiang Li had 100108 meches in total.

it had exceeded 100000!

[prompt: congratulations, Lord, you have more than 100000 mech soldiers and have successfully obtained the authority to activate ‘mech Air Force service’ or ‘mech Navy service’. Please collect’ nine stage-three soul Tinder ‘and’ 100000000 energy points ‘as soon as possible to activate’ mech Air Force service ‘or’ mech Navy service’.]

shua!

Immediately.

A notification popped up in Jiang Li’s line of sight.

“This bi an ...”

I've finally gathered 100000 soldiers. I've gained the right to activate a new military type, but the requirements are too harsh.

in the current situation, it's difficult to meet these two conditions.

nine level-three soul Tinders and 100 million energy points. Neither of these two conditions is easy to get.

No. Jiang Li shook his head.

Shua!

[prompt: congratulations, Lord. You have more than 100000 meches and have reached the basic standard of an Army. You have successfully obtained the authority to open the 'army base' interface. Please gather 'nine stage-three soul Tinders' and '10000000 energy points' as soon as possible to open the 'army base' interface.]

Soon after.

Another notification appeared in Jiang Li's line of sight.

This time, it wasn't a military type, but a 'army base'.

However ...

However, the conditions were the same. They both needed 'nine level-three soul Tinders' and 'one hundred million energy points', which Jiang Li couldn't achieve at the moment.

in any case, the authority has been activated. The next step is to gather the soul Tinder and energy points as soon as possible.

jiang li wasn't depressed. instead, he was full of energy. he was even looking forward to the opening of the military base and other military units.

In the energy points column.

After Jiang Li stopped the mass killing, the number of energy points decreased to 40379060 points. He used up 20040740 points in total, more than 20 million energy points.

“There’s still over 40 million left.”

I’ll be able to rank more than 2800 if I use all these energy points to upgrade my level-two troop classes, “Jiang Li murmured.

upgrade 400 electric meches, 400 transport meches, 500 artillery meches, 500 tank meches, and 500 mechanical Rangers.

It took 14000 energy points to upgrade a level two mech to the perfected stage. Jiang Li upgraded 2300 level two meches, which cost him 32200000 energy points.

Buzzzzzz! Wuwuwuwuwu!

The 2,300 level two meches glowed. They were dazzling when they gathered together. After a few seconds, they completed the upgrade.

all of them had reached the great circle of stage two.

his military rank was promoted to first lieutenant.

This way ...

Not including the mechanical mammoth Rangers.

All of Jiang Li’s level-two troops had 500 soldiers at the perfected stage of level two. The number was extremely equal, so there would be no shortcomings.

it was an all-round development.

Among them.

After the tank mech reached the peak of stage two, the tank doubled in size, and the barrel doubled in diameter. The capacity of the Cannonball increased from 100 to 1000.

The interior of the tank had a simple 'space-folding technology' to store the tank shells.

Of course.

Other than that, there was also a tank machine gun with a caliber of 13mm. Its ammunition capacity had been increased to 100000 rounds, and its firing rate had reached 3000 rounds per minute.

It was much faster than the firing speed of the firearm meches.

After the cannon was upgraded to the peak of the type 2 realm, the cannon had become a howitzer, or 'cannon' for short. The caliber had reached 200 mm, and the range had increased to 50 kilometers.

A 200mm cannon barrel was already extremely exaggerated. The pitch-black muzzle was like a black hole, making people feel cold.

Each shell weighed about 50 kilograms.

The Cannonball capacity had been increased from 50 to 200 rounds.

Similarly.

After the main cannon vehicle was upgraded, it was equipped with a simple 'space-folding technology' to store cannonballs.

It could be said that ...

The space-folding technology was no longer exclusive to transportation meches.

Finally.

It was the mechanical Rangers.

After the mech Rangers reached the peak of stage two, their size doubled, and they were even more powerful. They were also equipped with small cannons, which could fire long-range attacks.

The mechanical Ranger's equipment set had all been upgraded to Tier 2 top-tier.

His skills had also been upgraded.

"Next, it's time to distribute the troops."

No. Jiang Li said, "first of all, the great Xia city needs to be heavily guarded. The Green Mountain Range is the border. We need more troops to guard it.

besides, we need to bring enough soldiers to attend the banquet in the county capital of Black Dragon County.

however, the black snake barbarian kingdom is under the protection of the celestial water city. There shouldn't be too much of a problem. Even if there is a problem, it won't affect the great Xia city for the time being.

"However, Yingluo"

jiang li thought for a long time. " it's better to send a division to check out the situation. "
