

## Army 200

### Chapter 200 Unlocking

They returned to the city Lord's mansion.

Jiang Li put the twenty top-tier level two spiritual herbs in the special warehouse of the city Lord Mansion. There were also some top-tier level two spiritual herbs that he had collected a few times before.

Speaking of this.

Jiang Li asked Xu Ya, Han Liqi, and the others to appraise the dozens of top-class level two spiritual herbs, but they only recognized half of them. They didn't know many of them.

Furthermore ...

Most of the spiritual herbs they knew were ordinary tier two superior spiritual herbs. They did not have any special effects. They were basically used to refine medicinal pills to improve cultivation.

Jiang Li didn't have an Alchemist, so he had to leave the level two spiritual herbs for now.

It might be useful in the future.

Even if it didn't work, he could still buy it for a large sum of money.

He wouldn't lose anything.

Shua!

The Dominator panel opened.

In the energy points column.

Jiang Li looked at the number.

He now had 35761310 energy points, which was more than 30 million points. He was close to 40 million points, but he was still more than half away from 100 million energy points.

Among them.

The perfected-stage level one mech recovered 1327500 energy points, the early-stage level two mech recovered 925000 energy points, and the perfected-stage level two mech recovered 3525000 energy points.

There were two more cities in the county city of King Jin County.

All the herbs and spiritual herbs, as well as the lower spiritual crystals.

In total, he had obtained 21600710 energy points.

The consumption of war.

He had used 1620000 energy points to repair the meches, replenish ammunition, and upgrade them. This was mainly because he had upgraded QBZ01.

“I’m still lacking a lot of energy points.”

Jiang Li thought to himself.

“Let’s replenish the crocodile Emperor Legion’s lost soldiers first.”

Soon after.

Jiang Li went back to the temporary military camp, which had expanded many times and was enough to accommodate a large number of meches. It took up a large area of the city.

so,

Jiang Li chose to build meches in the military camp.

Of course.

Before making meches, Jiang Li sent meches around the camp to prevent anyone from approaching.

If anyone tried to get close ...

Depending on the situation, they would be killed.

“Create 27030 level one meches.”

Jiang Li used 270300 energy points to build 27030 level-one meches, including 7020 combat meches, 7180 cold weapon meches, 6990 biochemical meches, and 5840 firearm meches.

Buzzzzzz!

The manufacturing interface appeared.

There were four illusionary figures, and each figure had a corresponding number next to it, representing the number of meches to be built.

A minute later.

The illusionary figure solidified.

[creation complete!]

Shua! Shua! Shua!

Twenty-seven thousand and thirty meches appeared out of thin air. They were divided into four groups and appeared in front of Jiang Li in an orderly line.

“Chief sovereign.”

The twenty thousand meches saluted in unison.

This time.

More than seven thousand cold weapon meches were created, but there were no elite units.

“Yes.”

yes. Jiang Li nodded and responded, “upgrade all meches.

Buzzzzzz!

He spent 3784200 energy points to upgrade all 27030 meches to the perfected stage.

It was fully equipped.

They were all promoted from private to Sergeant.

...

create 3510 level two meches.

Jiang Li used 3510000 energy points to build 1400 electric meches, 400 transport meches, 800 tank meches, 800 meches, Rangers, and 110 meches.

upgrade 710 level two meches.

Soon after.

Jiang Li used another 9940000 energy points to upgrade 710 perfected-stage meches to replenish the crocodile Emperor Army.

This time, they were replenishing their losses.

Jiang Li used up 17504500 energy points in total, so he had 18256810 energy points left.

although we did take down Jinwang County, there were too many wasted meches, so we didn't get many energy points.

the Army of Jinwang County didn't cause too much damage to the crocodile Emperor Legion, " Jiang Li thought. it's mainly because of the sudden appearance of the 300000 demon soldiers.

however, without the 300000 demon soldiers, I wouldn't have been able to gather the nine level-three soul Tinders. It's a trade-off.

the losses have been replenished. Next, we should continue to send troops and occupy the county cities around Jinwang County. We should collect enough energy points as soon as possible and activate the stage three mechanical Army.

...

Jiang Li thought to himself.

I now have 12 level-three soul Tinders, and with enough troops, I've long reached the authority to activate the 'battlefield commander' of the special mechanical arms.

it's time to unlock 'battlefield commander'.

Shua!

The Dominator panel opened.

Jiang Li clicked on 'military type' and found the 'mechanical special military type' column. Then, he clicked on it.

Shua!

The separation surfaces expanded.

[sub-surface: special type of machinery]

unit type: battlefield commander (unlocking condition met, unlock yes/no?) ”

?.....?

It could be seen.

The machinery special soldier type interface was completely different from the mechanical Army soldier type interface. It didn't have Stage 1, Stage 2, or Stage 3 soldiers.

There was only the 'troop type' option, and the 'battlefield commander' option.

Obviously.

This was the uniqueness of the special type of machinery.

There was no division of soldier seed levels in the world.

Furthermore ...

Only when the conditions for unlocking a certain special troop class were met would the corresponding option appear in the column, and one could choose to unlock or not to unlock it.

It was precisely because of this uniqueness.

When Jiang Li first played this game, he only unlocked some special units and only knew the conditions to unlock some of them.

Among them.

The commander of the battlefield needed an entire Army of 1500 meches and a level-three soul Tinder to unlock it.

‘Mechanical engineer’ could only be unlocked after the army base was opened.

Wait, wait, wait.

unlocked ‘battlefield commander’.

yes. Jiang Li confirmed.

Shua!

[do you wish to use a stage-three soul Tinder to unlock ‘battlefield commander’?!]

A notification appeared.

“Yes.”

Jiang Li confirmed again.

Shua!

The interface flashed with white light.

A rank-three soul Tinder had disappeared from the soul Tinder column.

[sub-surface: special type of machinery]

troop type: battlefield commander (unlocked)(able to manufacture 0/126) ”

?.....?

Obviously.

Jiang Li had 190109 meches, which was close to 200000. He needed 1500 soldiers to unlock the command of the battlefield.

so,

Jiang Li could only create 126 battlefield commanders at most.

There was also a limit to the number of people.

“Create three battlefield commanders.”

Jiang Li thought about it and only created three battlefield commanders for now.

Buzzzzzz!

The manufacturing interface appeared.

In the interface.

An illusionary figure appeared, surrounded by countless light spots, which gradually solidified.

A minute later.

The figure solidified.

[ creation complete! ]

Shua! Shua! Shua!

Three figures appeared out of thin air and stood in front of Jiang Li. Two men and one woman. The women stood in the middle and the two men stood on both sides.

He had a determined look on his face, and no expression could be seen on his face. He had a cold and handsome temperament.

He looked to be in his twenties.

He was wearing a green formal military uniform and a military cap.

He looked rather majestic.

Furthermore ...

The three battlefield commanders were not equipped with any obvious weapons, only an ordinary-looking pistol at their waists.

the commander of the battlefield salutes the Lord.

Pa! Pa! Pa!

With three loud sounds, he put his legs together and saluted to Jiang Li.

“Alright,” he said.

Jiang Li smiled.

Shua!

special troop type: battlefield commander

[rank: early stage of rank three]

[No.: Zh01]

skill 1: level three inferior-grade advanced intelligence

skill 2: level three low-grade advanced learning ”

skill 3: stage three low-grade advanced battlefield commanding skill ”

[artificial intelligence machinery: a mechanical creation that is not afraid of death, pain, and infinite loyalty. Equipped with advanced artificial intelligence, it has infinite possibilities. Only when the mechanical heart is destroyed or when the damage has reached 90% will it be truly scrapped. After it dies in battle, it can be recycled for half of the energy points of the cost.]

advancement requirement: 200000 energy points

commander. Jiang Li carefully read through the commander's information.

First of all ...

The battlefield commander was equipped with advanced artificial intelligence and computing power comparable to a supercomputer. It was enough to command the battle and respond to all kinds of situations.

It could be said that ...

Every battlefield commander was a general who had experienced hundreds of battles.

The most terrifying thing was ...

Battlefield commanders were like real living beings. They had the ability to 'learn', and through 'learning', they could learn all kinds of skills and abilities.

That was why it was said to have 'infinite possibilities'.

There was another thing.

Although the battlefield commander wasn't good at fighting, he could gradually learn combat skills through learning skills. He could even reach the level of a combat soldier.

Of course.

It would take a long time.

However ...

Even so ...

In the beginning, even if he was not good at fighting, his rank was still there.

It still possessed a certain level of combat strength.

“Upgrade.”

Soon after.

Jiang Li used 4200000 energy points to upgrade all three commanders to the perfected stage of rank three. They were all Colonels.

“Thank you, hegemon.”

thank you. the three commanders saluted Jiang Li and said gratefully.

“You’re too polite.”

Jiang Li smiled and looked at the three commanders. “I’ll still have to trouble you guys to command the war for the next matter.”

“This is our duty.”

Zh01 was the female commander. Her face was delicate and pretty. Although she wasn’t the most beautiful, she was still the type that could be looked at.

the Lord’s words are more polite. We commanders were created to command Wars and to win them.

Zh02 said.

“Yes, I am.”

Zh03 seemed to treat his words like gold.

“Alright,” he said.

Jiang Li’s smile grew wider.

One had to know.

The meches that Jiang Li had created before wouldn’t be able to talk like these three battlefield commanders.

To tell the truth.

Jiang Li felt like he was talking to a normal person.

zh01, go to the Thearch-crocodile Army and take over the position of commander.  
Zh02, go to Tianshui city’s border defense line and take over the role of  
commander ynmyq01. As for zh03, you will temporarily stay in the great Xia city.

go! Jiang Li ordered.
