

Army 205

Chapter 205 The liquid metal mech

immediately create one hundred liquid metal meches.

let's go. Jiang Li controlled the Dominator panel and created a hundred liquid metal meches in the first batch.

Among them.

Every stage three soldier class required 100000 energy points.

Create 100.

It consumed 10000000 energy points.

Shua!

The manufacturing interface appeared.

In the interface.

It was an illusory figure.

Buzzzzzz!

Countless light spots filled in the surroundings and gradually solidified.

A minute later.

[creation complete!]

A notification appeared.

Shua! Shua! Shua!

in jiang li's bedroom, a hundred figures appeared out of thin air. they almost filled the entire room and it was very crowded.

“My Lord!”

Immediately.

” jiang li! ” the hundred liquid metal meches saluted jiang li and shouted in unison.

“Yes.”

okay. Jiang Li nodded in response.

It could be seen.

These liquid metal meches were all wearing camouflaged military uniforms and hats. They had square faces and looked determined. They were all wearing black sunglasses.

The most important thing was ...

They were not equipped with any weapons for the time being.

Bare-handed.

Shua!

[troop Type: Liquid metal mech]

[rank: early stage of rank three]

[No.: Ytjs01]

skill: stage three low-grade liquid metal body ”

[liquid metal machinery: a mechanical creation that is not afraid of death, pain, and infinite loyalty. It is made of liquid metal as the main material and has no fatal weakness. The damage caused can be repaired automatically. Unless the strength of the attack reaches the critical point of the liquid metal, it can not be destroyed.]

advancement requirement: 200000 energy points

Jiang Li checked all the information about the liquid metal mech.

In general.

the liquid metal mech had an almost immortal body. its body could transform between liquid and solid, and it could change its appearance at will.

It had the ability to transform.

Of course.

It wasn't really immortal.

As long as the attack reached the critical point of the liquid metal, or in a very short time, more than 90% of the liquid metal mech would be damaged.

Only then could he destroy the liquid metal mech.

however ...

It wasn't that easy to achieve this.

There was another thing.

the stage three troop classes that were created using energy points only had one skill, unlike the stage three troop classes that were upgraded from stage one or two, which had multiple skills.

naturally, there would be a difference in strength.

“Not bad.”

okay. Jiang Li nodded with satisfaction.

upgrade 50 liquid metal meches to perfected-stage level three.

Jiang Li looked at the remaining energy points. It wasn't enough to upgrade all 100 liquid metal meches to perfected-stage level three, so he only upgraded half of them.

Upgrading one liquid metal mech to the perfected stage of level three required 1400000 points, and 50 of them would require 70000000 energy points.

buzzzzzz! buzzzzzz!

...

From ytjs01 to ytjs050, the 50 liquid metal meches had a few flashes of light on their bodies, and they completed their upgrade in a few seconds.

After the promotion.

There was not much change in their appearance, but each liquid metal mech was equipped with a weapon, and their ranks were all promoted to Colonel.

[troop Type: Liquid metal mech]

[rank: Grand completion of rank-three]

[no.: ytjs01]

” skill: tier 3 liquid metal body

[equipment: Tier 3 exquisite liquid metal gloves]

[liquid metal machinery: (omitted)]

advancement requirements: one level-four soul Tinder, 1000000 energy points ”

Soon after.

...

Jiang Li looked at the energy points column. He still had 40751110 energy points left. There were still a lot of them. It was enough for another wave of soldiers.

If he wanted to create a large number of meches, he definitely couldn't do it here.

This was because the place was too small.

so,

Jiang Li walked out of the city Lord's mansion and went to the temporary military camp. A hundred liquid metal meches followed him and lived in the camp.

“My Lord, are they the new level three troop class?”

Zh02 and zh03 were both in the temporary camp. They were talking about the current situation. When they saw Jiang Li, they immediately stood up and saluted. When they saw the liquid metal mech behind Jiang Li, they couldn't help but ask.

“Yes,”

yes. Jiang Li nodded. they're the new level-three troop, the liquid metal meches.

“This is great.”

Zh02 and zh03 looked at each other, their faces filled with joy.

“Commander.”

At this moment.

The hundred liquid metal meches greeted zh02 and zh03.

Obviously.

The battlefield commander had a higher status among the meches, so he could command the meches to fight.

Generally speaking.

If the other meches wanted to command their meches to fight, they needed Jiang Li's permission and orders first.

For example, when ymmyq01 and the others were the temporary commanders, it was Jiang Li who gave the order to the meches, so ymmyq01 and the others could command the battle.

Furthermore ...

They could only command the troops that Jiang Li had set.

“Hello.”

Zh02 and zh03 saluted in response to the hundred liquid metal meches.

“Chief sovereign.”

” I just had a detailed discussion with zh03, ” zh02 said. I even contacted zh01 through the Intel mech.

“After some discussion, we feel that the news of the 300000-strong demon Army being wiped out in Jinwang County can not be hidden for long. The red eyebrows demon Kingdom will find out about the situation sooner or later.”

we have already occupied Jinwang County, so it is easy for them to know that we have annihilated the 300000 demon soldiers of the red-browed demon Kingdom.

in addition, the assassins sent by the red eyebrows Yao Kingdom failed to assassinate him last time.

under such circumstances, we have already formed a deep enmity with the red eyebrows Yao Kingdom. We have also prevented the red eyebrows Yao Kingdom from obtaining any benefits from the great Qian dynasty.

therefore, the red eyebrows Yao Kingdom will definitely attack us.

“Yes.”

Jiang Li nodded. you’re right. In fact, I’ve thought about that too. A war with the red eyebrow Empire is inevitable.

“Yes, I am.”

Zh02 nodded his head, ” we were worried that we didn’t have enough strength and manpower, so we were thinking of a plan. Should we give up on the great Xia and Jin Wang County? ”

or, we can push deeper into the great Qian dynasty while retreating and avoiding a direct confrontation with the red eyebrows Yao Kingdom. We can slowly accumulate our strength.

“But it seems like there’s no need for that now.”

because the ruler has unlocked a level three troop class and has more than 50 powerful combat forces at the perfected stage of level three, which is enough to deter the red eyebrows Yao nation.

“the biggest problem is the fourth rank.”

“we don’t have a type 4 combat power,” zh03 replied.

level four is the power of a National Guardian level.

“They won’t easily make a move,” zh02 replied.

even if a stage four is involved, as long as we have enough perfected-stage level three meches, we will be able to fight against a stage four.

Zh02 said.

“There’s no hurry.”

No. Jiang Li waved his hand and said, ” as long as the red eyebrow Empire hasn’t sent troops, we still have time to grow. The only thing we lack is energy points.

“Yes.”

Zh02 and zh03 nodded.

“I’ll replenish the crocodile Emperor Legion’s losses first.”

build three thousand level one meches and one thousand and one hundred level two meches. Jiang Li used 1130000 energy points to control the Dominator panel.

Shua!

The manufacturing interface popped out.

Illusionary figures appeared one after another. Each illusionary figure represented a troop type, and the number of words next to the illusionary figures was the number of soldiers to be created.

A minute later.

[creation complete!]

Shua! Shua!

A few thousand meches appeared out of thin air.

“My Lord!”

The meches saluted Jiang Li.

“Yes.”

yes. Jiang Li nodded and spent 1820000 energy points. upgrade 3000 level one meches and 100 level two meches.

Buzzzzzz!

A white light flashed.

The upgrade was completed a few seconds later.

The battle losses had been replenished.

Immediately after.

Jiang Li used 1000000 energy points to make 100000 early-stage level one meches. He made 25000 of each of the five types of meches, except for the Intel meches.

A minute later.

the production was completed.

Shua! Shua! Shua!

In the temporary military camp.

A large group of people appeared out of thin air and showed their real bodies. They were divided into four groups and saluted Jiang Li.

if others were to see such a scene, they would probably be dumbfounded.

Because he created 25000 cold weapon meches at once, Jiang Li triggered a special probability this time and an elite troop appeared.

However, there were no new elite troops.

Among them.

there were 50 hammer meches, 50 axe meches, 50 spear meches, and 50 archer meches. there were 200 elite soldiers in total.

“It’s alright.”

okay. Jiang Li nodded and continued to control the Dominator panel. upgrade 100000 meches.

This time.

It consumed a total of 14000000 energy points.

Buzzzzzz! Buzzzzzz!

A large area of white light flickered. There were too many of them, and when they combined together, the white light was extremely dazzling and eye-catching.

A few seconds later.

All the meches had been upgraded.

After making the level one meches, Jiang Li had 22801110 energy points left. He then used 20000000 energy points to make 20000 early-stage level two meches.

He had created four thousand soldiers for each of the five second-stage troop classes.

Shua!

A notification appeared in front of Jiang Li’s eyes.

[congratulations, my Lord. Because you created 4000 mechanical Rangers at the same time, a special probability has been triggered. You have obtained a rank two elite troop type, 'mechanical mammoth Rangers X2'.]

Obviously.

An elite troop class dropped.

“I’m quite lucky.”

” hmm. ” jiang li raised his eyebrows. ” there are two rank-two elite units. they’re both mechanical mammoth rangers, but i don’t have enough energy points now. i only have two million points left. i can’t upgrade these two elite units. ”

Currently.

Jiang Li’s meches had exceeded three hundred thousand.

There were a total of 310212.

Among them.

There were 260097 perfected-stage level one meches, 45500 early-stage level two meches, 4507 perfected-stage level two meches, 50 early-stage level three meches, and 58 perfected-stage level three meches.

The next day.

In the morning.

Jiang Li gathered his troops.

There were more than 140000 meches in total. 120000 of them were sent by Jiang Li yesterday, and the remaining 20000 were the escort team.

More than 140000 meches set off from the great Xia city to The Magic Cauldron Prefecture and met up with the Thearch-crocodile Army led by zh01.

That afternoon.

Under the leadership of zh01 and zh02, they continued to conquer the surrounding counties according to Jiang Li's orders.
