

Army 70

Chapter 70 Skyrocketing energy points

On the manufacturing interface.

An illusionary human figure appeared. There were countless light spots around the figure, which gradually filled the illusionary figure and slowly solidified.

A minute later.

” biochemical mech construction completed! ”

Buzzzzzz!

what’s going on? ” the illusionary figure enlarged and showed up in front of Jiang Li. It was a two-meter tall, muscular, bald, middle-aged man in Black leather armor.

biochemical mech SH01 greets my Lord!

Biochemical mech SH01 saluted to Jiang Li. He was a few heads taller than Jiang Li, so Jiang Li had to look up.

“Yes.”

okay. Jiang Li nodded and looked at it carefully.

For example, the biochemical mech was tall and muscular. It was wearing black leather armor and gave off a strong sense of oppression.

It was somewhat similar to the Tyrant T-103 from the ‘Resident Evil’ series. The Tyrant T-103 was also known as the ‘leather tyrant’. The two of them had an 80% similarity in appearance.

Shua!

unit type: biochemical mech

[rank: early stage of rank one]

[No.: SH01]

“Skill: level-one low-grade biochemical poison”

biochemical machinery: a half-biological, half-mechanical creation. It is not afraid of death or pain. It is infinitely loyal and can transform its body to a certain extent. It will only be truly scrapped when its mechanical heart is destroyed or 90% of its body is destroyed. It can be recycled after it dies in battle for half of the energy points of the cost.

advancement requirement: 20 energy points ”

jiang li finished reading the information about the biochemical mech.

In general.

the abilities of the biochemical meches were the same as when jiang li was playing the game. in fact, the abilities of the other units were the same.

First of all ...

Biochemical poison.

The biochemical meches contained extremely toxic biochemical toxins. They could control the biochemical toxins freely and could even infect and control living creatures, turning them into ‘puppet zombies’.

Of course.

Although the biochemical poison was powerful, it was not as powerful as the T-virus. If it had the power of the T-virus, it would not be a low-level rank one soldier.

even so ...

That was still quite powerful.

A level-one bio-mech could infect and control three walking puppets of the same level. The middle stage of the first level could infect and control five 'walking corpse puppets' of the same level. at the late stage of the first rank, he could infect and control seven 'walking corpse puppets' of the same price. The completion of the first stage could infect and control nine 'walking corpse puppets' of the same price.

other than that.

Since the biochemical meches were half-biological and half-mechanical objects, they had strong defense and could be used as meat shields. They could also transform to a certain extent, so their combat power was very strong.

it could be said that ...

The biochemical mech was considered a more perfect type of soldier.

“Upgrade.”

Jiang Li waved his hand and used 140 energy points to upgrade biochemical mech SH01 to the perfected stage of level one.

Shua! Shua!

Biochemical mech SH01's body glowed several times. In a few seconds, it had completed the upgrade and reached the perfected level one.

There was no change in his appearance, but the epaulet on his shoulder had been upgraded from private to Sergeant, and the information had also changed.

his abilities had also improved significantly.

unit type: biochemical mech

[rank: Grand completion of rank-one]

[No.: SH01]

“skill: level-one ultimate biochemical poison”

biochemical machinery: Chi Chi (omitted) ”

“advancement condition: one stage-two soul tinder, 100 energy points.”

“Yes.”

good. Jiang Li nodded with satisfaction. the defense of the biochemical mech is very strong. It's perfect as a meat shield. Plus, it's tall. I can keep it with me to protect me.

At this moment.

In the backyard.

the chests were already filled with 13220 ordinary medicinal herbs, and they were so densely packed that it was almost to the point of being unable to fit them all.

convert them all into energy points.

yes, ” Jiang Li confirmed.

...

Buzzzzzz!

After that.

The entire backyard lit up with a white flash of light. All 13220 stalks of ordinary medicinal herbs had disappeared and were converted into energy points.

Shua!

conversion successful. 35100 energy points obtained!

a notification appeared.

ordinary herbs.

A 10-year-old one could be converted into one energy point, and a 20-year-old one could be converted into two energy points. For every 10 years, an additional energy point would be converted.

Among the 13220 stalks of ordinary medicinal herbs, many of them were medicinal herbs that were over ten years old.

so,

In the end, he obtained 35100 energy points.

...

Shua!

The Dominator panel opened.

the number of energy points had increased from 952 to 36052 points. jiang li now had a real ‘ten thousand’ income.

One had to know.

jiang li still had a lot of spiritual herbs that he hadn’t converted yet.

Of course.

Jiang Li didn’t convert the spiritual herbs.

Because ...

A low-grade spirit herb could only be converted to 10 energy points, but its price was 100 times that of an ordinary spirit herb. If he sold the spirit herb and used all the money he earned from selling the spirit herb to buy ordinary herbs, he would be able to buy them.

Then ...

the energy points that jiang li could get would be greatly increased.

it was much more profitable than directly converting them into spirit herbs.

This debt.

Jiang Li knew what was going on.

“However,”

” i’ve already run out of ordinary herbs in yongan city. most of the wealth is in my hands. ” jiang li said.

the best way to get more common herbs is to trade with other cities, such as Pingding city, which is the closest to Yongan city.

we can transport the spiritual herbs to Pingding city for sale, and then buy ordinary medicinal herbs from Pingding city.

Jiang Li had made up his mind.

Of course.

Jiang Li didn't need to do this in person. After all, he had so many people under him. He had to let them do something.

Just pass down the order and let the people under you do it.

before that, I can take advantage of the surge in energy points and send another wave of troops.

Shua!

Jiang Li opened the troop type interface.

After the battle at Qingshan Valley.

Jiang Li had lost more than half of his meches. The original 820 meches had been reduced to 406.

Among them.

Fifty firearm meches at the perfected stage of level one; 44 combat meches at the perfected stage of level one; 46 cold weapon meches at the perfected-stage of level one; six information meches at the perfected-stage of level one.

Eighty level-one firearm meches; 90 combat meches at the early stage of level one; Ninety cold weapon meches at the early stage of level one.

” wang gang has been promoted to sniper mech jj01. ”

After the battle in Qingshan Valley, Jiang Li fully realized the importance of the combat power of the higher level.

One had to know.

more than one hundred meches at the perfected stage of level one attacked man xiong. dong lin had to heavily injure man xiong to win.

Early-stage Tier 2 was much stronger than perfected Tier 1.

Of course.

It didn't mean that more than a hundred perfected-stage level one meches couldn't defeat man Xiong, who was at the early stage of level two. After all, they killed man Xiong while two combat meches were disabled.

Even without Dong Lin's help, they could still kill man Xiong after a few more meches were destroyed.

The 2nd rank was strong.

But there was a limit to how strong it was.
