

Army 71

Chapter 71 A breakthrough

shua! shua!

Wang Gang and sniper mech JJ01's bodies started to flash.

It took Jiang Li 26000 energy points to upgrade Wang Gang and sniper mech JJ01 to the perfected stage of level two.

Among them.

it required 2000 energy points to upgrade from the early stage of tier 2 to the middle stage of tier 2, 4000 energy points to upgrade from the middle stage of tier 2 to the late stage of tier 2, and 8000 energy points to upgrade from the late stage of tier 2 to the perfected stage.

it only took a few seconds.

The light on Wang Gang and sniper mech JJ01 disappeared. They had completed their upgrade and reached the perfected stage of level two.

Wang Gang's appearance didn't change much. His rank was promoted from first lieutenant to first lieutenant. His information bar also changed, and his intelligence was improved to a certain extent.

troop Type: Combat mech

[rank: Grand completion of rank-two]

[No.: GD01 (Wang Gang)]

skill 1: level-one Ultimate Fighting technique ”

skill 2: rank-two premium vibration ”

“Equipment: Tier 2 exquisite combat gloves”

[machinery: Jian Jia (omitted)]

advancement requirements: one stage-three soul Tinder, 10000 energy points ”

combat mech Wang Gang, greetings, ruler.

Wang Gang saluted.

“Yes.”

okay. Jiang Li nodded in satisfaction and continued to read the messages.

unit type: sniper mech

[rank: Grand completion of rank-two]

[No.: JJ01]

skill 1: rank one gun fighting technique ”

skill 2: rank two superior Eagle Eye ”

[machinery: Jian Jia (omitted)]

advancement requirements: one stage-three soul Tinder, 10000 energy points.

Sniper mech JJ01 had also reached the perfected stage of level two, and his abilities had improved significantly. The original sniper rifle had become a large-caliber sniper cannon.

The power was extremely terrifying.

with the power of the sniper cannon, it was enough to kill deacon zhang in one shot. he didn't even need to use armor-piercing bullets.

In terms of ammunition.

Among them.

It was equipped with 1000 normal rounds, 500 armor-piercing rounds, 300 armor-piercing rounds, 200 armor-piercing burning rounds, and 100 energy rounds.

It was obvious that there were two more types of bullets.

armor-piercing incendiary rounds and energy rounds.

These two types of bullets were naturally more powerful, and they could also be used to deal with some special situations.

“Very good, very good.”

jiang li was naturally very satisfied.

One had to know.

after all, he had used up a total of 26000 energy points.

create 99 bio-meches.

Jiang Li used 990 energy points and started to increase the number of meches.

shua!

The virtual manufacturing interface appeared, showing an illusionary figure. Beside the illusionary figure was the X99 symbol. Countless light spots filled the illusionary figure, gradually solidifying.

A minute later.

The production was completed.

Shua! shua! Shua!

let's go! the illusionary figures turned real. Ninety-nine bio-meches appeared out of thin air and stood in front of Jiang Li in a neat row.

“Greetings, chief sovereign!”

They saluted at the same time.

“Yes.”

okay. Jiang Li nodded again.

upgrade 49 bio-meches.

...

Buzzzzzz!

Jiang Li used another 6860 energy points to upgrade the 49 bio-meches to the perfected level of level one.

There were a total of 50 perfected-stage level-one bio-meches.

biochemical mech No. SH01 upgraded.

Jiang Li thought for a while and used a level-two soul Tinder to upgrade the biochemical mech SH01 to the early stage of level two.

Shua!

The biochemical mech SH01 glowed. He merged the level-two soul Tinder into it and used 100 energy points to modify it.

A few seconds passed.

The biochemical mech had completed its upgrade.

it became a level two troop class.

It could be seen.

...

After being upgraded to level two, the biochemical mech had a huge bazooka launcher on its right arm and a heavy rotating gatling cannon on its left arm.

Its appearance was similar to the ‘chaser’ from the Resident Evil series.

It was the embodiment of violence.

“unit type: biochemical mech

[rank: early stage of rank two]

[No.: SH01]

skill 1: level-one ultimate biochemical poison

skill 2: level-two low-quality biochemical physique

biochemical machinery: Chi Chi (omitted) ”

advancement requirement: 2000 energy points ”

“Very good,” he said.

I’m sorry. Jiang Li finished reading the information of the level-two bio-mech and walked around the bio-mech with the serial number SH01.

“The energy points are almost used up again.”

Shua!

The Dominator panel opened.

After a series of upgrades, Jiang Li only had 2102 energy points left from his original 36052. He had used up 33950 energy points.

although it’s painful to use up so many energy points, I’ve gained a lot. I have two more perfected-stage level two meches. With the ‘biochemical poison’ of the biochemical meches, if there’s a war, I can create a large group of ‘walking corpse puppets’ that are not afraid of death.

jiang li thought, also, a perfected level-two sniper mech has super long-range lethality. if used properly, i can kill the enemy’s leader without anyone knowing.

time passed.

Three days later.

Buzzzzzz! Buzzzzzz! Buzzzzzz!

In the courtyard.

Jiang Li was practicing the Thunder Qi skill. He was holding a blood-red bead in his hand. It was the blood refinement bead. He used the Thunder Qi skill to absorb the pure qi and blood in the blood refinement bead and refine it.

From head to toe.

The blood was surging, and the faint sound of running water could be heard.

“Condense!”

BOOM!

condense! Jiang Li shouted. The qi and blood in his body gathered in his dantian in his abdomen, forming a huge pressure that was being compressed and condensed.

a ‘bang’ was heard.

His qi and blood scattered, creating turbulence, forming an air wave that swept in all directions.

“I failed again.”

“i’ve tried a few times, but i’m always a bit off. i’ve wasted a lot of energy in the blood refining bead.”

In these three days.

Jiang Li didn’t go out. He didn’t care about the Sirius gang’s Affairs either. Instead, he was working hard to improve his cultivation and strengthen his ability to protect himself.

It was just that his talent for martial arts was a little poor, which resulted in him not being able to condense inner force even with the help of the blood refinement bead.

the contribution pavilion had been built recently and jiang li had gone through the specific plan. it was pretty good, so he agreed.

at the same time.

because of long chongzhen's death, the white dragon gang finally merged with the sirius gang. the lord of yongan city and the state lord were dead. now, the sirius gang was the most powerful gang, and jiang li had the final say.

so,

As a result, many people in Yongan city wanted to join the Sirius gang. After a series of general selections, they recruited 1000 ordinary members to manage the various businesses of the gang.

Everything was developing in a good direction.

There was another thing.

let's go. Jiang Li sent Hua Tian to Pingding city to open up trade with them. Hua Tian had been there before and was familiar with the city.

Besides, Jiang Li had saved Dong Lin's life, and Dong Lin was the general of Pingding city.

Therefore, Jiang Li thought it wouldn't be too difficult to open up trade with Pingding city.

"Again,"

Buzzzzzz!

Jiang Li took a deep breath and didn't give up. He continued to practice the Thunder Qi skill, absorbing the blood essence in the blood refining bead and refining it.

BOOM!

Finally ...

after failing so many times, jiang li had accumulated a lot of experience. this time, he finally succeeded in condensing internal force. all the qi in his body merged into one and he successfully condensed a trace of internal force. he entered the early stage of level one and opened up his dantian.
