

## Army 741

Chapter 741 The spirit

Therefore ...

The classification of ‘civilization level’ by the ‘eternal civilization’.

Mother planet civilization, planetary civilization, and stellar civilization couldn’t be said to be wrong, but in fact, they couldn’t stand firm in the universe. They could only be classified as ‘indigenous’.

Can not be used.

Shua!

Jiang Li. Jiang Li flew to ‘01 interstellar base’ and entered the room in the ‘ruler’s hub. Hidden Dragon appeared and saluted Jiang Li.

“Chief sovereign.”

” what’s wrong? ” hidden dragon asked jiang li, ” why do i feel like this universe is where i should be? ”

“Why is that?”

“Because what you said is right.”

jiang li smiled and didn’t say anything else. he waved his hand and let hidden dragon experience it himself.

shua!

Soon after.

Hidden Dragon left the room and went outside. His figure rose into the air and he looked up at the 'universe'. He stood quietly like a statue.

“Convert.”

Buzzzzzz!

Jiang Li opened the 'space password box' and turned all the low-level energy crystals into 'origin points'.

a notification appeared.

” conversion successful. you’ve received 10 origin points! ”

.....

” conversion successful. you’ve received 10 origin points! ”

.....

the whole process only took a dozen seconds.

All the low-level energy crystals had been converted.

He had gained 10000 origin points in total.

“This bi an ...”

Jiang Li looked at the less than 20000 origin points. It was too far away from one billion points. even if I mine all the resources on Titan star, it’s not enough to create the ‘master of machinery-the God of games.’

it's imperative to conquer other star systems and civilizations.

Clang!

I'm not sure. Jiang Li took out the pendant and held it in his hand. however, you can only win if you know yourself and your enemy.

therefore, before the war, we have to figure out the strength and situation of the 'Light Civilization' to avoid meeting an iron plate.

"Yes."

jiang li took another look at the 'space password box'. there were still energy crystals inside, but they weren't low-level energy crystals. they were intermediate-level energy crystals.

shua!

[ an item that can be converted into origin points has been detected—intermediate energy crystal. one intermediate energy crystal can be converted into 0.01 (1%) origin points. ]

the low-level energy crystal was pitch-black and diamond-shaped, the size of a thumb. the mid-level energy crystal was the same size and shape, also diamond-shaped.

However ...

The color was different.

It had two colors, black and white.

They each occupied half.

“convert.”

Buzzzzzz! Buzzzzzz!

okay. Jiang Li immediately converted all the intermediate power crystals.

Shua!

conversion successful. You’ve received 5000 origin points!

A notification appeared.

“A middle-grade energy crystal is a hundred times more valuable than a low-grade energy crystal.”

Jiang Li said to himself.

He had obtained 5000 origin points.

In other words ...

They had mined one-fifth of the medium-sized power crystal mine and obtained a total of 500000 middle-grade power crystals.

He would be able to obtain 2.5 million middle-grade power crystals.

Of course.

...

Because of the ‘giant spiritual snakes’, a lot of energy crystals must have been absorbed by them. If it were a complete, medium-sized mine of energy crystals, there would definitely be more than that.

in reality.

The ‘eternal civilization’ had also recorded the ‘medium-sized power crystal’, but many precious records and information had been destroyed in the disaster of the destruction of the civilization, leaving only a very, very small part.

It was only a drop in the bucket.

Under normal circumstances, it would take tens of thousands of years for the myriad life tribe to regain its former glory.

“yes.”

” i’m not sure. ” jiang li pondered. ” based on this situation, a small energy crystal mine can provide about 3000 origin points, and a medium-sized energy crystal mine can provide more than 30000 origin points. ”

“One billion origin points.”

then we’ll need to mine three to four hundred thousand small power crystal mines, or thirty to forty thousand medium-sized power crystal mines. This is definitely not a small amount.

jiang li took a deep breath. ” i’m afraid it’s not that easy to get so many energy crystal mines. unfortunately, a lot of information about the ‘eternal civilization’ has been lost. otherwise, i wouldn’t be so clueless. ”

On the other side.

...

unknown Galaxy.

The 'exploration team' led by Luo Klan was on this life-preserving planet in this unknown star system. Through understanding and investigation, the life being reared on this 'life-preserving planet' was called: The sprites.

He had to describe it.

the main form of the sprites was similar to a demon that had been enlarged many times. they had the height and size of a normal human, and they had wings as thin as a cicada's wings.

Unable to fly.

The wings were just an ornamental object.

In addition.

The only talent of the sprites was the ability to 'transform'. This was an' absolutely perfect 'transformation. As long as one obtained a gene fragment of any race in the universe, they could rely on the' gene fragment 'to transform into that race. After the transformation was completed, the genes would still be absolutely perfect.

In other words ...

The sprites could 'perfectly' transform into super geniuses of any race in the universe.

This innate ability could be called 'heaven-defying'.

It could be used.

It was enough to become a 'super civilization'.

However ...

This 'unique talent' also had a flaw. It could only absorb one gene fragment and transform into a universe race. It couldn't transform a second time.

With such a powerful and unique talent, the sprites had become a captive race of the 'Light Civilization'.

As long as they were an adult 'sprites', they would be taken away by the 'Light Civilization' and turned into an extremely precious and rare commodity. The 'Light Civilization' would sell them to other civilizations.

To make huge profits.

As they were kept in captivity, even their basic technology was locked by the 'Light Civilization'. Therefore, the 'sprites' were not even a level 1 civilization.

It was a completely barren civilization.

It was similar to the 'maternal society' of the humans on earth.

Luo Klan and the others called this unknown Galaxy: They raised a Galaxy and named the planet where the elves lived: A captive planet.

"Captain."

One of the members of the exploration team.

his name was jerry.

He was the most burly of them all, but he had extremely sensitive perception, even surpassing the perception technology of the exploration team. I can feel danger now.

“.....”

the other seven members ‘expressions tensed up.

this is the third time we’ve come to the ‘captive planet’. The previous two times might have left behind traces that we don’t know about.

” i have a feeling that the members of the ‘light civilization’ are about to descend, ” jerry said. ” we have to leave immediately. ”

“What?”

The other team members exclaimed in shock.

there’s no way that Jerry’s senses are wrong. He even vaguely sensed the disaster of the destruction of the ‘eternal civilization’ last time. That’s why I applied to the higher-ups to leave the eternal star system and go out for exploration.

return to the spacecraft immediately, ” Roland said in a deep voice. return to the spaceship and return to ‘Titan star’.

“Yes.”

“Understood.”

“.....”

The members quickly replied.

Half an hour later.

luo klan and the others returned to the aircraft and left in it. they took off and broke through the atmosphere, entering outer space.

After that.

It quickly docked with the 'spaceship' and returned to the 'spaceship'.

“hu ~~ hu ~ hu ~”

They heaved a sigh of relief.

“Haha!”

derrick chuckled. ” jerry, it seems like there’s something wrong with your premonition this time. didn’t we come back safely? ”

“Shut up,” he said.

we’re not out of danger yet. This is still under the jurisdiction of the ‘Light Civilization’.

“.....”

The other team members berated.

activate the ‘teleportation device’ immediately and prepare to return to ‘Titan star’.

Shouted Luo Klan.

“Yes!”

activate the teleportation device!

antimatter energy reactor activated, charging ...

“charging complete!”

“.....”

Di di di di di

A series of sounds rang out.

Spatial collapse.

It formed a wormhole tunnel.

Buzzzzzz!

Suddenly.

A shocking change happened.

about a million kilometers away from Luo Klan's 'spaceship', a dazzling golden light appeared, and a huge humanoid creature appeared out of thin air.

It was like a giant of light.

“What's that?”

Derek screamed.

“hurry up! Hurry up!”

The other members shouted.

activate the spatial teleportation!

Shua!

The universe ship charged into the wormhole, and the wormhole quickly closed.

At the same time.

The giant humanoid being shrouded in a vast golden light did not say anything. He just stared coldly at the spaceship.

After that.

The huge humanoid creature crossed his hands together and formed a terrifying X-shaped beam of light that penetrated the wormhole.

hurry up!

It was too fast!

The 'x'- shaped beam of light was faster than a beam of light. In an instant, before the wormhole closed completely, it hit Luo Klan's spaceship.

kachaa! Kachaa!

BOOM!

It was extremely dangerous.

fortunately, the beam of light only grazed the tail of the spaceship.

Buzzzzzz!

After that.

The wormhole tunnel was closed.

“.....”

this huge humanoid life form looked on and seemed to be dissatisfied with the result of the previous move. ” it’s just a spaceship made by a level 3 civilization. how dare you step into our ‘light civilization’s’ breeding ground’? you don’t know what’s going on. ”

“You can’t escape.”

very soon, our ‘Light Civilization’ will find your ‘home planet’ and make you pay the price.

Shua!

A golden radiance shone.

The huge humanoid creature seemed to have disappeared into thin air.

A light year away.

Buzzzzzz!

A wormhole vortex appeared, and a ‘spaceship’ with thick black smoke coming out of its tail rushed out. Luo Klan and the others were inside the spaceship.

“ah!”

Pfft! Pfft!

Within the ship.

He screamed again and again.

Even though it was only a scratch, it had already caused serious injuries to several members.

“What do we do? What do we do now?”

Jerry and the others were already panicking.

“Calm down! Calm down!”

” the spacecraft is only 30% damaged, ” luoklan shouted. ” the ‘teleportation device’ and the ‘antimatter energy reactor’ are not damaged at all. ”

“i can still continue with the ‘spatial teleportation’.”

return to the ‘Titan star’ as fast as possible. With the Titan race’s biotechnology, the injuries that Derrick and the others suffered will definitely be fully recovered.

“Yes.”

“Understood, Captain.”

“.....”

Jerry and the others calmed down.

Buzzzzzz! Buzzzzzz!

The spatial teleportation began.

However ...

The spaceship was damaged, and it couldn't withstand the power of the 'teleportation', which was the distortion of space. This caused the injuries of Derrick and the others to become more and more serious, and the damage to the spaceship also became more and more severe.

Finally ...

When Luo Klan and the others were teleported to the outer space of Djinn planet.

Kachaa! Crack! Crack!

The universe ship finally couldn't hold on any longer and began to break apart.

"Derrick!"

"No!"

At the same time.

The lives of the three heavily injured members were in danger.

Fortunately ...

The nearby surveillance satellite discovered Luo Klan's group in time. Toria and the others quickly sent a rescue team to rescue them.

Chapter 742 the star map

The next day.

The Imperial Palace.

In the main hall.

Luo Klan's exploration team arrived. They knelt in front of Jiang Li and kowtowed to him. Their pale faces looked Haggard and sad.

"Your subjects pay their respects to Your Majesty."

Luo Klan and the others gathered their thoughts and shouted in unison.

"Yes."

okay. Jiang Li nodded and looked at Luo Klan and the others. There were only six people left from the original nine-person team. Three of them had died because they couldn't be saved in time.

I've learned from Toria that among the nine 'people', Derrick, roranya, and mokolin were severely injured and died when they returned to 'Djinn planet'.

My condolences, " Jiang Li said again.

"....."

Luo Klan and the others were stunned for a moment, then fell silent.

"I thank Your Majesty on behalf of Derek and the others."

yes. Luo Klan saluted. they can die during the 'exploration'. This is the final belonging of us' exploration members', just like 'Warriors' dying on the 'battlefield'. I am proud of them.

"Good, well said."

Jiang Li nodded and said seriously, "Derek, Roland, and mockery. They sacrificed their lives for the great Xia Empire. They deserve to be rewarded.

"Torii,"

stop! Jiang Li shouted.

"Your subject is here."

Torii took a step forward.

"I'll leave this matter to you."

let's go," Jiang Li ordered. we must give the martyrs the treatment they deserve.

"This Minister will obey."

torii immediately responded.

"we thank your majesty."

Luo Klan and the others bowed to Jiang Li again.

"Yes."

Jiang Li calmed down and said, "Tell me about the information you have this time."

"Yes."

yes! Luo Klan responded loudly.

one had to know.

The ‘exploration team’ of nine people, including Luo Klan, had experienced countless dangers and dangerous situations, but they had all survived.

Even at the peak of the ‘eternal civilization’, they were one of the best’ exploration teams’.

And now.

However, three of his team members had died.

The losses were huge.

Time passed.

Luo Klan reported all the information about the ‘captive Galaxy’, ‘captive planet’, and the ‘sprites’ to Jiang Li.

“Your Majesty.”

as we fled in a hurry, we didn’t get to see the situation of the ‘Light Civilization’, ” said rocklan. I hope your Majesty can forgive us.

“Your Majesty, please forgive me.”

The other five members said in unison.

“Your actions are excusable, so how could I blame you?”

” don’t worry. ” jiang li waved his hand and said, ” i’m glad you’ve found so much information. you’ve done a good job. ”

“As for the reward, I’ll leave it to you, Toria.”

“yes, your majesty.”

Toria responded quickly.

“Your Majesty.”

my guess is that the civilization level of the ‘Light Civilization’ is definitely higher than the eternal civilization, ” said Roklan. I’m also worried that the ‘Light Civilization’ will find this place through the traces left behind by our ‘teleportation’.

“We must be on guard.”

“Yes.”

okay. Jiang Li nodded and said, ” in that case, lead the ‘giant spirit Legion’ and board the biological battleship to monitor the space outside of giant spirit planet.

“Yes.”

...

“We accept your orders.”

“.....”

very quickly.

The generals of the giant spirit Army responded one after another.

The court session ended.

In the afternoon.

Jiang Li arrived at the No. 01 interstellar base.

“Chief sovereign.”

Jiang Li. Hidden Dragon appeared and saluted Jiang Li.

“Yes.”

okay. Jiang Li nodded and stood in the open space of '01 interstellar base'.

...

launch facility 'space Expedition Station'.

jiang li said.

Buzzzzzz!

The interface appeared.

unlocking 'universal positioning shuttle'.

Jiang Li said.

Shua!

[ one level-seven soul Tinder has been deducted.'Universe positioning shuttle' has been successfully unlocked. ]

A notification appeared.

“Not bad.”

okay. Jiang Li nodded in satisfaction.

“Create a ‘star map observation base’ and ten ‘space positioning shuttles’.”

Jiang Li said.

Buzzzzzz! Buzzzzzz!

The manufacturing interface appeared.

The first thing that came into view was a black base that looked like a disc, and the other shadow was a spaceship that looked like a ‘drop’.

countless light spots filled in.

A minute later.

it had completely solidified.

shua!

[ creation complete! ]

A notification appeared.

“whoosh!!!”

Immediately.

A black base appeared above Jiang Li's head. It was only about ten thousand meters in diameter.

In addition.

Around this black base that looked like a disc, there were a total of ten 'shuttles'. Their shapes were like dripping water droplets, and their bodies were black and silver, smooth as mirrors.

It was only a hundred meters long.

After all, the 'shuttle' that was only 100 meters long was small and straight. It was floating in the air.

In order to create 11 'conscripts', Jiang Li first diluted one origin point into 10000 trillion energy points. It only cost him 110 trillion origin points.

combat unit: universe star map detection base

[ rank: rank seven ]

[ No.: Yzxtzc01 ]

“Skill: rank 7 star map detection”

[ machinery: Jian Jia (omitted) ]

.....

combat unit: universal positioning shuttle ”

[ rank: rank seven ]

[ no.: yzdw01 ]

“Skill: rank 7 interstellar positioning”

[ machinery: Jian Jia (omitted) ]

.....

In reality.

The two level Seven combat troops of the ‘universe war station’.

This meant that the abilities of the ‘star map detection base’ and the ‘space positioning shuttle’ were equivalent to ‘space detectors’, which could draw a ‘star map’.

To put it bluntly.

In fact, it was to first use the ‘space positioning shuttle’ to travel through the Galaxy, scan and position, and then send all the information to the ‘star map observation base’.

In the end.

the ‘star map detection base’ will process and sort out all the information and positioning transmitted by the ‘universal positioning shuttle’, drawing a complete and accurate ‘star map’.

The most important thing was ...

The ‘universal positioning shuttle’ and the ‘Universal Star map observation base’ were all operating at all times, so the ‘Universal Star map’ was also changing in real time, reaching the level of truly monitoring the Galaxy.

“Hidden Dragon,”

how many ‘star map observation bases’ and ‘space positioning shuttles’ do we need to monitor the entire ‘Titan star system’? ” Jiang Li asked.

“Reporting to you, chief sovereign.”

Hidden Dragon immediately replied, ” as long as it’s a ‘stellar system’, with the capabilities of the ‘star map detection base ‘and’ space positioning shuttle’, it would require nine ‘star map detection bases’, and each ‘star map detection base ‘would need to be equipped with 10000’ space positioning shuttle’.

“After the setup is complete.”

“It’ll take nine days to draw and sort out the ‘star map of the stellar system’.”

“Alright,” he said.

yes. Jiang Li nodded and said, ” build eight ‘star map observation bases’ and 89990 ‘space positioning shuttles’.

Shua!

The manufacturing interface appeared.

two shadows appeared.

Buzzzzzz! Buzzzzzz!

Countless light spots filled the space.

A minute later.

[ creation complete! ]

A notification appeared.

A total of 89998 rank-7 conscripts were produced, and each of them required ten trillion energy points, which was ten trillion energy points.

Finally.

A total of 899980 trillion energy points were consumed.

Jiang Li diluted 90 origin points.

“Go on.”

Nine Star map observation bases and 90000 universe positioning shuttles, listen up. Set off immediately and find the star map of the Titan star system as soon as possible.

Shua! Shua!

Immediately.

The nine ‘star map observation bases’ broke open and flew into the sky, followed by 90000 ‘universal positioning shuttles’. In the blink of an eye, they entered outer space.

he started working.

Shua!

soul Tinder: four level-seven soul Tinders, five level-eight soul Tinders, 1980 level-nine soul Tinders, one level-ten soul Tinder.

[ less than nine level eight soul Tinders, temporarily unable to upgrade '01 interstellar base'. ]

I'll monitor it. Jiang Li muttered, " as long as the star map of the Titan star system is complete, I'll be able to monitor the entire Titan star system.

"when the time comes."

as long as the enemy fleet enters the 'Titan star system', they can lock-on and attack from a distance.

"For now,"

" i don't have the 'ultra-long-range' lock-on strike. "

Of course.

The 'super-long-range' Jiang Li was talking about wasn't just a few million meters, but an 'super-long-range' attack that could be calculated from 'light years'.

For example.

The 'eternal civilization' was destroyed because they touched the 'taboo' that they should not have touched and were attacked by the Super civilizations in the depths of the universe.

It could directly travel through countless light years as a 'particle' and destroy the entire star system.

This was the real 'super long-range' that Jiang Li wanted.

He thought for a long time.

“Yes, I have.”

sniper mech. Jiang Li suddenly had an idea. it's the sniper mech that was upgraded from the firearm mech. Its attack power is far greater than the sniper mech when it's at a lower level.

or the elite troop type 'Archer mech'.

” at a lower level, the 'archer mech' isn't strong. in terms of damage, it's not even as good as the level two 'sniper mech'. ”

” i just don't know if the sniper mech and the archer mech survived. ”

Hence.

jiang li arrived at the 'mech factory'.

“Chief sovereign.”

Hidden Dragon followed behind.

“Hidden Dragon, I need the sniper mech and the Archer mech.”

are all the meches in 'Saint peace state' in the mech factory of '01 interstellar base'? ” Jiang Li asked. if they're still alive, ask them to come out of the factory immediately.”

“Yes.”

Hidden Dragon replied.

buzzzzzz!

The seventh floor of the mech factory flashed.

There were spatial fluctuations.

A two-meter-tall mech stood in front of Jiang Li.

“Chief sovereign.”

Yes, sir! the two meches saluted Jiang Li.

The sniper meches were Ordinary Level two meches, while the Archer meches were level one elite meches. There was a chance that they would appear when making the cold weapon meches.

“Yes.”

good. Jiang Li nodded in satisfaction. not bad.

Chapter 743 colony

Jiang Li had found the meches he wanted. He didn't lack Level Seven to level ten soul Tinders, but he still needed level one to level six soul Tinders.

Hence.

Jiang Li immediately sent out his mechanical Army to hunt the ‘super creatures’ on the ‘giant planet’.

It was a super creature.

In fact, they were 'living creatures' that could absorb 'cosmic energy' and thus obtain genetic evolution. For example, the 'giant psionic snake' was a 'superior creature'.

In reality.

The 'super creature' was named by the 'giant spirit clan', which was not common in the 'Milky Way'.

Star Beast!

It was a 'living being' that could absorb 'energy from the universe', thus achieving genetic evolution and an increase in its life level. It was named 'Star Beast', and above 'Star Beast' was 'interstellar giant beast'.

Half a day later.

Jiang Li's 'mechanical Army' killed a 'Star Beast' named 'Iron Eagle Race'. They killed the entire race and easily gathered enough soul Tinder.

However ...

He couldn't do this kind of thing often.

because the destruction of too many 'astral beasts' would lead to the collapse of the 'biosphere' and the 'ecological chain', which would then gradually cause the destruction of 'titan star'.

so,

The 'biosphere' and 'ecosystem' must be maintained.

Only a small portion could be killed.

[ soul Tinder: 50000 level-one soul Tinders, 13300 level-two soul Tinders, 2560 level-three soul Tinders, 580 level-four soul Tinders, 79 level-five soul Tinders, 9 level-six soul Tinders, 4 level-seven soul Tinders, 5 level-eight soul Tinders, 1980 level-nine soul Tinders, 1 level-ten soul Tinder ]

“That’s enough.”

okay. Jiang Li nodded in satisfaction.

unit type: sniper mech

[ rank: Grand completion of rank-two ]

[ no.: jj01 ]

skill 1: rank one gun fighting technique ”

skill 2: rank two superior Eagle Eye ”

[ machinery: Jian Jia (omitted) ]

advancement requirements: one stage-three soul Tinder, 10000 energy points ”

.....

” troop type: archer mech (elite)

[ rank: Grand completion of rank-one ]

[ No.: GJS01 ]

skill 1: Level 1 ultimate cold weapon Mastery ”

skill 2: level-one ultimate archery

[ machinery: Jian Jia (omitted) ]

advancement requirements: two level-two soul Tinders, 200 energy points ”

.....

First of all ...

Jiang Li checked the information of the two units.

Such a long time had passed.

jiang li had long forgotten about the information and skills of the sniper mech and the archer mech, so he checked them out to get an idea.

consume the soul Tinder and energy points to upgrade the sniper mech and the Archer mech at the same time.

Jiang Li said.

buzzzzzz! Buzzzzzz!

Immediately.

After deducting one level-three soul Tinder and two level-two soul Tinders, as well as 10200 energy points, the two meches started to level up.

On the other side.

Outside the pen-holding Galaxy.

There was an extremely huge planet.

The planet was called the outer spirit planet.

He looked closer.

The interior of the planet was hollow. The 'Light Civilization' had built a huge colony base on the planet.

Colony base 0012

In reality.

...

The 'Light Civilization' was a top 'level-4 civilization'. In terms of energy, they had perfect control over the use of 'nuclear energy' and 'antimatter energy', as well as the use of 'dark matter energy'.

In addition.

Space-based weapons, strong-interaction materials, and other technologies were extremely common in the 'Light Civilization'. The 'gene strengthening liquid' had already been developed to level 11.

The strongest weapon of the 'Light Civilization'.

It was called light.

There was more.

Other than their 'mother star system', the 'Light Civilization' had controlled and colonized a total of 100000 'stellar systems' and had a huge number of 'life planets'.

rich in resources.

there were countless fleets.

Such a powerful civilization.

The 'eternal civilization' was like a child in front of the 'civilization of light'.

...

There was no comparison.

As for the 'captive Galaxy' and 'sprites' discovered by 'Rokland's' exploration team, they were only the tip of the iceberg under the rule of the 'Light Civilization'.

In the 'Light Civilization'.

The real name of the Galaxy where the sprites lived was not 'captive Galaxy'. It did not even have an official name, but was replaced by a number.

In base 001245.

Inside the core.

It was a building similar to a tower.

the top of the tower was extremely sharp, and there was a ball of light that was as bright as the sun. Light ball.

the tower was also known as the tower of light.

This building was an extremely iconic building and facility of the 'Light Civilization'.

He looked closer.

In the Tower of Light.

On the highest floor.

the highest-level meeting of colony 001245 was being held.

The round metal table.

In the surroundings.

Nine light projections appeared.

It was shrouded in a blurry light and could not be seen clearly.

"Everyone,"

At this moment.

One of the members had a deep voice. He was the member of the light Civilization who had landed on the 'captive planet' and attacked the 'rocklan' spaceship.

planet 001245 has been discovered by foreign civilizations.

They continued,"when I arrived, because I was a step too late, the other party took a spaceship and used a 'wormhole' to escape"

"However,"

their space technology is probably only at the level of a level 3 civilization. It is estimated to be at the peak of Level 3 civilization. With our technology, we can crush them.

therefore, I propose that we use the 'space wave sensor' to capture the 'space wave' that they left when they escaped and lock onto the other party's 'mother Galaxy'.

activate '001245 light fleet' and colonize the other party.

Buzzzzzz!

While the member was explaining, he was also playing a video of the escape of rocklan's exploration team.

"Additional discussion!"

"Additional discussion!"

"Additional discussion!"

"....."

Just as he finished speaking.

the video had just ended.

the other eight light projections all raised their hands impatiently. this meeting and proposal had passed unanimously.

"Alright!"

give the order. Order '001245 first interstellar detection team' to be the vanguard unit. Determine the coordinates of the other party's mother system, investigate the

other party's specific situation, and finally set up a 'Space Channel'. Light fleet 001245 is on standby.

“.....”

The order was given.

Shua!

Immediately.

The whole process took less than half a minute.

A shuttle-shaped spaceship left the 'outer spirit planet' and traveled through sub-space to the 'captive planet'. The light fleet in the base was also gathering.

The interstellar war seemed to be on the verge of starting.

Time passed.

On Djinn planet.

In Base 01.

Buzzzzzz! Buzzzzzz!

It could be seen.

the two meches in front of jiang li had been upgraded many times. in less than half a minute, they had both reached the perfected stage of level nine.

Among them.

Perfected-level two sniper mech, perfected-level three psionic sniper, perfected-level four psionic Super Sniper, perfected-level five psionic divine sniper, perfected-level six psionic core sniper, perfected-Level Seven Star core sniper, and perfected-level eight Star Destroyer core sniper.

Finally.

He had been promoted to the perfected tier 9.

[ Star Destroyer core sniper upgraded to Super Sniper God-antimatter energy source ]

[ unit type: Super Sniper-antimatter Energy ]

[ rank: complete rank-nine ]

[ military rank: marshal-planet level ]

[ No.: Cjshjb01-FWZNY ]

tier 7 ultimate skills: Gun Master, long-range sniping, psionic sniping, psionic sniping, psionic bullet, nuclear bullet, star snipe ”

” level 8 ultimate skill: starry eyes ”

top-tier level nine skill: antimatter energy bomb ”

“Equipment: level 9 ultra-quality cosmic energy Engine”

[ antimatter energy source: Pi Xiu (omitted) ]

[ machinery: Jian Jia (omitted) ]

[ level up: one level-ten soul tinder, 100 origin points ]

“God-tier sniper.”

what’s the furthest distance you can lock-on with your current ability? ” Jiang Li asked.

“Reporting to you, chief sovereign.”

with the power of the eye of stars, ” the Super Sniper replied, ” we can observe targets within a light year. With ‘long-range sniping’ and ‘space sniping’, we can make’ bullets ‘enter sub-space teleportation.

“So,”

as long as it’s a target within a light year, I can hit it.

“Alright,” he said.

it’s a light year away. Jiang Li was overjoyed. the range is one light year.

One had to know.

the diameter of the solar system was ‘one light year’. the attack range of the’ super sniper ‘could cover the entire’ solar system ‘and shoot wherever it was pointed within a radius of one light year.

Immediately after.

hmm. Jiang Li checked the situation of the Archer mech after it was upgraded.

From the perfected stage of rank one to the perfected stage of rank nine.

Perfected-level one Bowmaster mech, perfected-level two battle bow mech, perfected-level three psionic bow mech, perfected-level four psionic bow mech, perfected-level five psionic divine bow mech, perfected-level six psionic nuclear bow mech, perfected-Level Seven Star nuclear bow mech, and perfected-level eight Star Destroyer core bow mech.

Finally, the great circle of the type 8 realm advanced to the great circle of the type 9 realm.

[ unit type: interstellar space divine Archer-antimatter energy (elite) ]

interstellar space divine archers.

what's your shooting range? ” Jiang Li asked again.

“Reporting to you, chief sovereign.”

The cosmic space godly Archer immediately replied, ” “The range is the same as the Super Godkiller weapon, but I have an ability that the Super Godkiller weapon doesn't.”

” that's fire coverage. ”

the continuous arrows and arrow cover have area-of-effect damage. With the space arrow, the arrows can enter space and become invisible.

” if the conditions allow it, it can do 'long-range assassination'. ”

“The only weakness is that its destructive power is slightly inferior to the 'super Godslayer weapon'.”

Obviously.

After the Archer mech reached the peak of level nine, he couldn't be compared to ordinary archers anymore. The bow and arrows in his hands were all super-advanced products.

after reaching the ninth step.

Jiang Li didn't continue.

the main reason was that after they reached level ten, each advancement would require thousands of origin points. jiang li didn't have enough origin points to upgrade them to the perfected level ten.

At that time.

He needed to decide whether he should be promoted to ‘Super Sniper God’ or ‘interstellar space God Archer’ according to the specific situation.

Nine days later.

In the room in the ruler’s hub of the 01 interstellar base.

Information transmission.

The ‘star map observation base’ and the ‘space positioning shuttle’ had drawn the star map of the entire ‘Titan star system’ and presented it in front of Jiang Li in 3D mode.

The size of the ‘Djinn Galaxy’.

It had a diameter of three light years, three times the size of the solar system.

Almost at the same time.

The Vanguard team of the light Civilization’s colony base 001245 arrived at the Titan star system and pointed to the Titan star system where Jiang Li was.

He was preparing to build a space tunnel.

Chapter 744 The goal

Base 01.

Within the room in the ruler’s hub.

Buzzzzzz! Buzzzzzz! Wuwuwuwuwu!

A vast star map appeared in front of Jiang Li.

the titan star system, which had a diameter of three light years, had been reduced to a star map with a diameter of about three meters according to the proportion.

the distance between the two sides was one light year to one meter.

“Chief sovereign.”

through the exploration of the ‘star map observation base’ and the ‘universal positioning shuttle’, ” Hidden Dragon said, ” the relevant specific information has been sorted out.

there are two stars in the entire Djinn Galaxy.

they are respectively named: giant one star and giant two star.

Titan star is revolving around ‘giant one star’ and ‘giant two star’ at the same time. The orbit of the revolution is roughly equivalent to an irregular Figure 8.

“Also,”

” in the entire titan star system, other than the two stars, there are thirty planets, including the titan star.

we’ll name the thirty planets according to the giant spirit clan.

the closest to ‘Titan’ are ‘giant star’ and ‘spirit star’. Also,’ Titan ‘has a’ satellite ‘that is moving around’ Titan’, too.

“This is ‘great divinity’.”

before the giant spirit clan was fully developed, similar to the feudal era on earth, the giant spirit clan looked up at giant God Star and believed that it was where the gods lived.

“.....”

Time passed.

Hidden Dragon slowly explained the situation of the ‘ju Ling Galaxy’ to Jiang Li. Jiang Li looked at the vast star map in front of him and already had the most basic concept of the entire ju Ling Galaxy.

Di di di di di

Suddenly.

On the star map in front of Jiang Li, there was a red dot near the outer area. It was flashing and Jiang Li even heard an alarm.

“What’s going on?”

what happened? ” Jiang Li’s face darkened. what happened? ”

“Reporting to you, chief sovereign.”

Hidden Dragon immediately said.

Because the hidden Dragon was the ‘intelligent core’ of the ‘01 star base’, it could receive the information from the ‘star map detection base ‘and the’ space positioning shuttle’.

this is the number three star map observation base and 20300 to 20400 space positioning shuttles. An unknown fleet has entered the range of the Titan star system.

hidden dragon quickly replied, ” that’s why the alarm was immediately sounded. ”

“Can you enlarge the picture? And draw your line of sight closer?”

Jiang Li asked.

“Sure.”

Hidden Dragon replied.

“Begin immediately.”

Buzzzzzz! Buzzzzzz!

In the blink of an eye.

The star map in front of Jiang Li started to enlarge. The area where the red dot appeared kept expanding, making the picture clearer and clearer.

Very quickly.

The star map stopped changing.

“This is a Kasaya.”

Jiang Li was stunned. The star map in front of him showed a lonely universe. He could see a giant star and a fleet was approaching it.

There were a total of nine ships.

“Chief sovereign.”

“This planet is called ‘giant king star’,” said Hidden Dragon.”Although it’s not the outermost planet of the Titan star system, it’s still quite close. It’s in the outer range of the Titan star system.

“Continue to Zoom in.”

keep an eye on them, ” Jiang Li said in a deep voice. keep an eye on them.

“Yes.”

Hidden Dragon replied.

Buzzzzzz!

The image continued to Zoom in.

Finally.

There were only nine spaceships left in the entire star map.

...

The spaceships were in a silver disc and were shining with a golden light. Jiang Li couldn’t tell where the nine spaceships came from.

Not long after.

The nine spaceships landed on ‘giant king’.

On giant king.

After the nine ships landed.

The hatch of the spaceship opened, and robots in armor walked out of the spaceship. Each of them was holding different equipment and facilities.

Time passed.

The circular flying ships that were less than 100 meters in diameter were actually continuously being walked out by the armored robots. It was as if there were countless of them, and they were endless.

The whole process took less than an hour.

Millions of mechs appeared.

At the same time.

...

The armored androids were modifying 'giant king'. The surface of the planet was covered with layers of silver, glittering steel floors, which actually covered an area of a million meters in diameter.

Immediately after.

On the steel-like ground.

Many buildings rose from the ground.

In the middle of the room.

the base of a tall tower was built.

Within the nine ships.

Each spaceship was piloted by a member of the 'Light Civilization's Vanguard team from colony base 001245', and each member was wearing the light Civilization's standard light uniform.

The Golden uniform on their bodies made every member of the vanguard squad look like a walking light, extremely dazzling and eye-catching.

the foundation of the 'Space Channel' is 50% completed. When the 'SPACE Tower of Light' is completed, the 'Space Channel' can be opened and the 'fleet of light' can arrive.

"How much longer is the estimated time?"

"It's expected to be completed after 'half a photolithography'."

I have already sent out the 'light drones' to investigate the surroundings. There are no bases or facilities on the surrounding planets. This means that the other party's civilization level is not able to survive in the star system. I estimate that the other party's civilization level is not higher than Level 2.

if that's the case, a mere Level 2 civilization doesn't even need a 'light fleet'. With the configuration of our 'Vanguard team', we should be able to take them down.

don't talk nonsense. Our mission is to build a 'Space Channel' for the arrival of the 'fleet of light'. Don't participate in other matters. Don't you know how strict the rules are? "

"that's also true, zhenzhen."

as long as I accumulate ten more merit points,! 'll reach '99'. By then, I'll become an official citizen of the light Civilization. By then, I'll definitely apply to live in the! country of light', the mother planet of the light Civilization. I'm even willing to be a commoner at the bottom of the hierarchy in the' country of light'!

"....."

The nine members of the vanguard squad communicated through the ship's communication device.

base 01.

In the room.

“There's a saying that those who come are not kind, and those who come with good will not come.”

I don't know. Jiang Li's eyes turned serious as he watched what was happening on giant king. no matter who they are and what their purpose is, they stepped into my territory and built such a building on giant king.

“We can't allow it.”

“Destroy them all immediately!”

Immediately after.

the super sniper and interstellar space divine archer came into the room.

“Chief sovereign.”

They saluted Jiang Li at the same time.

“your mission.”

Jiang Li pointed at the image on the star map and ordered, ” ” destroy this team of spaceships that entered the ‘titan star system’. it's best if we can capture them alive. ”

“Hidden Dragon,”

” send all the relevant information to the super sniper and interstellar space archer immediately, ” jiang li shouted.

“Yes.”

Hidden Dragon replied.

Shua!

Information transmission.

A series of data streams appeared in Hidden dragon’s eyes.

At the same time.

The same data stream appeared in the eyes of the Super Sniper and the interstellar space divine Archer. This was clearly information transmission across space.

“Don’t worry, chief sovereign. I guarantee I’ll complete the mission.”

The divine Archer saluted in response.

“Chief sovereign.”

” according to the star map and information, the enemy’s position is more than one light year away from titan planet, ” the super godly armor soldier said. ” they’re out of range. ”

“So,”

“I’m ready to set the sniping point at ‘spiritual star’.”

“Alright,” he said.

” sure. ” jiang li nodded. ” no problem. ”

“Thank you, hegemon.”

The Super Sniper saluted.

“Let’s begin.”

Jiang Li waved his hand.

“Yes.”

The Super Sniper and interstellar space divine Archer replied at the same time.

Shua! Shua!

After that.

The two meches left and entered the ‘sub-space’. They flew at light speed and couldn’t be seen.

A few minutes later.

“Hidden Dragon, split the screen.”

play the images of giant king star and spiritual star at the same time. Jiang Li ordered.

“Yes.”

Hidden Dragon nodded.

Buzzzzzz!

The scene was split.

On Jiang Li's left was the giant king star and on his right was the spirit star.

On the spirit star.

The Super Sniper soldier and interstellar space divine Archer stood side by side. However, from the outside, the Super Sniper soldier and interstellar space divine Archer both had ordinary appearances.

he had a determined look.

when he stood upright, he was like a statue.

He was wearing a military uniform.

On his shoulder was the 'Marshal epaulet'.

"Starry Eyes."

At the same time.

The Super Sniper and the interstellar space divine Archer activated the same skill. After the 'eyes of the starry sky' was activated, their eyes changed.

Circles of patterns appeared on his eyes.

It was like a starry sky.

One had to know.

The 'eye of starry sky' no longer used light to observe its target. If it used light, it would be impossible to kill the enemy in an instant.

In reality.

The 'Starry Eyes' was an application of spatial technology.

for example.

To compare 'space' to a piece of paper, the ability of the 'eye of the stars' could fold the 'paper', allowing the sniping point to overlap with the target's position.

This way ...

It would achieve the effect of 'sniping'.

It made use of the 'spatial line'.

"I'll go first."

I'll first use my coverage ability to destroy the base they've built, " said the interstellar space divine Archer. then you'll destroy the nine enemy spaceships at fixed points.

"Alright," he said.

The Super Sniper soldier nodded. no problem.

"Yes."

Buzzzzzz!

the interstellar space divine archer took a step forward and waved his right hand. the black watch on his right wrist opened, and a light screen appeared, projecting a longbow of stars.

“Weapon.”

The interstellar space divine Archer stretched out his hand. space energy bow.

It could be seen.

The projection of the ‘starry sky Energy bow’ materialized and landed in the hands of the interstellar space divine Archer, who held the bow.

He took a closer look.

The ‘space energy bow’ didn’t seem to be any different from an ordinary longbow. The pitch-black bow body and the pitch-black bowstring seemed to be one.

He didn’t find anything special.

but ...

The ‘space energy bow’ was a ‘super-technological weapon’ created by combining various technologies. It had unparalleled destructive power.

The arrow that was shot.

It could easily destroy an ordinary planet.

Chapter 745 fight

“It’s actually the interstellar space divine Archer who made the first move.”

I’ve spent a lot of resources to upgrade my meches. Of course, I’d like to test their strength.

“don’t let me down.”

Buzzzzzz! buzzzzzz! Buzzzzzz!

First of all ...

The interstellar space godly Archer locked onto his target. Through the observation of his Starry Eyes, he had locked onto a base on giant king planet across a distance of nearly one light year.

One had to know.

The space energy bow was a combination of a large number of technologies.

Among them.

In terms of materials.

The material used was a ‘strong interaction force material’, which had the characteristics of absolute zero, absolute smoothness, and indestructible. It was an extremely powerful material.

Generally speaking.

Within a Level-5 civilization.

they were all made of ‘strong interaction force materials’.

This 'material' was difficult to destroy and had many effects that other materials could not match.

In addition.

in the space energy bow.

It also had a small 'antimatter energy reactor', a small 'nuclear energy device', a small 'psionic energy device', a small 'materialization device', and a small 'space device'.

A combination of all sorts of technology.

He had assembled the star energy bow.

Only then would it be worthy of being a 'level 9 top grade' equipment.

Of course.

Other than the 'weapon'.

Interstellar space divine archers also had powerful abilities.

The two combined.

They were the powerful interstellar space divine archers.

"Divine Bow Master and psionic master activated."

Buzzzzzz! Buzzzzzz!

Hence.

The interstellar space divine Archer activated two skills. These two skills were not lethal skills, but they were enhancement-type and buff-type skills.

after it was activated.

Interstellar space divine archers would be enhanced by psionic energy.

‘Godly Bow Master’ was a passive mastery.

For example, the ‘Grandmaster of Kendo’.

This was an ability similar to a law.

The law of the art of archery.

“antimatter energy arrow!”

Buzzzzzz! Buzzzzzz!

immediately after.

The ‘antimatter energy reactor’ inside the divine Archer and the small ‘antimatter energy reactor’ inside the bow were activated at the same time.

The light flickered.

The materialization device was activated.

The ‘antimatter energy’ condensed into an ‘antimatter energy arrow’.

It was compressed.

It turned into an energy entity.

a pitch-black arrow appeared on the bow.

“target locked!”

Buzzzzzz!

The interstellar space divine Archer’s body flickered with light.

“Whoosh!”

In that instant.

he drew his bow and shot an arrow.

The ‘antimatter energy arrow’ was like an extremely sharp ray of light as it shot out. The sharp ray of light was resplendent, as if it had drawn out a beautiful long River of Stars.

...

He appeared in the outer space of the spiritual star.

Kachaa!

In an instant.

The ‘antimatter energy arrow’ pierced through space and disappeared from the outer space of spirit star, as if it had teleported.

“.....”

Jiang Li stared at the scene in front of him.

The next moment.

In the outer space of giant king.

The black arrow shot out of the space and appeared in the outer space of giant king. Jiang Li saw it clearly through the picture he took.

It could be said that ...

From the moment the interstellar space divine Archer fired the arrow to the moment the antimatter energy arrow appeared in the outer space of giant king, it took less than half a second.

...

It pierced through space.

On giant king.

Di di di di di

within the control room of the nine ships.

an extremely urgent alarm sounded.

“What happened?”

The nine members of the vanguard squad were shocked.

‘Warning beep beep, warning beep beep, unknown energy reactor approaching at superlight speed, unknown energy reactor approaching at superlight speed, please prepare to engage the enemy immediately beep beep’

.....

‘Warning beep beep, warning beep beep, unknown energy reactor approaching at superlight speed, unknown energy reactor approaching at superlight speed, please prepare to engage the enemy immediately beep beep’

.....

A piercing alarm sounded.

“What?”

The nine members of the vanguard squad were shocked.

Shua!

The spacecraft projected the image.

In the outer space of giant king.

It was a sharp black energy arrow that pierced through space. The arrow was only a meter long and looked so small.

However ...

It was such a small arrow, but it had pierced through space.

The most important thing was ...

The spaceship's alarm and detection equipment.

The arrow was only one meter long, but it contained enough energy to destroy an entire planet.

It was truly terrifying.

“How is that possible?”

The members of the Vanguard team screamed.

“Fire!”

At the same time.

The interstellar space divine technique soldier could clearly see the situation on giant king planet through the ‘Starry Eyes’. He activated his skill again and remotely controlled the ‘antimatter energy arrow’.

Shua! Shua! Shua!

in that instant.

The ‘antimatter energy arrow’ began to split like a cell. In an instant, it had split into over 10000 black energy arrows.

Tens of thousands of arrows fell.

It shot towards giant king.

“Light energy shield activated!”

Buzzzzzz! Buzzzzzz!

Time was too short.

The main reason was that the nine members of the Vanguard team had never expected such a situation to occur. They had never expected the enemy to attack from a light year away.

facing such an attack, they only had time to defend.

it could be seen.

Nine spaceships rose into the air, and a golden beam of light shot out from the center of each spaceship. The nine spaceships were connected by the Golden beam of light.

in an instant.

It formed a huge golden defensive light shield.

It enveloped the entire base.

Bang Bang Bang Bang!

Countless explosions were heard.

Tens of thousands of arrows fell.

All of them hit the huge golden defensive light shield, and the antimatter energy exploded, producing a terrifying power that caused the energy of the universe to shake.

The sound of the explosion reverberated in all directions.

“What a powerful defense.”

Jiang Li said in a deep voice.

“Antimatter energy.”

One of the members of the Vanguard team said, ” this is an antimatter energy source. It’s very powerful. I didn’t expect the enemy civilization to have already used this energy source.

most importantly, it’s actually able to compress such a terrifying ‘antimatter energy’ into an arrow, and it even uses ‘space technology’. This kind of power is no small matter.

“I was too careless.”

the civilization level of the enemy is definitely not what the civilization had expected. Even if it is not a level four civilization, it is definitely a peak level three civilization.

“.....”

The members of the Vanguard team were talking to each other anxiously.

“Antimatter energy arrow!”

Whoosh!

he drew his bow and shot an arrow.

The interstellar space divine Archer shot out this arrow once again. The antimatter energy arrow drew out a resplendent Galaxy and appeared in the outer space of spirit star.

The space was pierced through.

He appeared in the outer space of giant king in an instant.

This time.

The antimatter energy arrow did not break apart. Instead, it was like an extremely sharp ray of light that pierced through the starry sky and pierced through the Golden energy light shield.

BOOM!

a violent explosion was heard.

Bang Bang Bang Bang!

There was a series of sounds.

Kachaa! Kachaa!

The antimatter energy was compressed to the extreme.

After that.

it directly exploded.

It produced an unparalleled destructive power.

the golden energy shield was on the verge of collapse.

there was a fluctuation.

“Not good!”

“At this rate, I’m afraid we won’t be able to last much longer.”

“Can you determine where the enemy is?”

“I can’t lock on!”

“The enemy’s attack seems to have pierced through space. We don’t know where they are at all. According to this situation, we’ll probably be discovered by the enemy as soon as we enter the galaxy.”

we can’t continue like this. We can’t lock onto the enemy, but they can lock onto our position. We have to find a way to retreat. If this continues, I’m afraid we’ll all be wiped out.

The members of the vanguard squad became anxious.

At this moment.

bang!

The space trembled.

it was as if the surface of the water had rippled.

It was a pitch-black ‘bullet’ that seemed to have swallowed all the light. It was a ‘sniper bullet’ compressed to the extreme by ‘antimatter energy’.

An antimatter energy bomb!

It was only the size of an ordinary sniper armor-piercing bullet.

It pierced through space.

He appeared in the outer space of giant king.

BOOM!

An explosion sounded.

this ‘antimatter energy bomb’ instantly hit the golden energy light shield and produced an unparalleled destructive power, shattering the defensive light shield.

Kachaa! Kachaa!

With the spot hit by the antimatter energy bomb as the center, countless cracks spread out, covering the entire defensive light shield in the blink of an eye.

Finally.

There was a loud ‘bang’.

The defensive light shield was completely shattered.

“No!”

The members of the vanguard squad screamed.

“Rumble!”

The power of the energy explosion sent the nine flying discs flying. They even flew out of giant king and stopped in outer space.

Kachaa! kachaa!

Below.

on the surface of giant king.

The foundation of the spatial passage was like a floor paved with silver steel plates. It couldn't withstand such a powerful energy impact, and countless cracks appeared.

Even to the extent that ...

The entire giant king planet was shaking violently.

one had to know.

The diameter of giant king star was a hundred times that of giant spirit planet.

On the spirit star.

“You're so silly!”

the interstellar space godly archer frowned and turned to look at the ‘super godly sniper’ on his right. ” didn't we agree to let me make the first move? ”

“Yup,”

The Super godly armor soldier shrugged. I did let you make the first move. However, I didn't expect you to fail to destroy the enemy's ‘defensive light barrier’. In order to complete the Lord's mission as soon as possible, I had to make a move.

obviously.

The spear just now.

It was fired by the Super Sniper.

It could be seen.

In the Super Sniper soldier's hand was a pitch-black 'sniper rifle'. However, from the surface, it looked like a very ordinary sniper rifle.

In reality.

It was just like the 'space energy bow'.

The 'cosmic energy sniper rifle' of the Super Sniper God was also made of 'strong interaction material', and it was equipped with many super technologies.

There were small 'antimatter energy reactors', small 'nuclear energy devices', small 'psionic energy devices', small 'materialization devices', and small 'spatial devices'

Wait, wait, wait.

The spear just now.

The Super Sniper soldier activated the gun Master at the same time, and the psionic master assisted in shooting. The eyes of the stars and the space snipe locked onto the target.

Finally.

The antimatter energy bomb produced a huge amount of damage.

the enemy's defense was destroyed.

[ note: photolithography = one day (24 hours) ]

.....

During the debate.

The interstellar space divine Archer made his move once again. He drew his bow and shot an arrow. The 'bow' lit up, and the antimatter energy condensed into an energy arrow.

Whoosh!

this arrow pierced through the air, drawing out a brilliant light. it was as beautiful as the milky way and pierced through the space.

In that instant.

before he knew it, he had already appeared in the outer space of giant king.

“Fire!”

Shua! Shua! Shua!

The skill was activated.

the 'antimatter energy arrow' instantly split into 10000 rays and fell straight toward 'giant king', enveloping the entire' base of the space tunnel'.

At this moment.

The nine spaceships had just stabilized not long ago and were unable to face the enemy. They could only watch.

“Rumble!”

In an instant.

Countless explosions were heard.

The entire ‘giant king’ was shaking violently, and it almost left its original orbit. The ‘Foundation of the space Channel’ was completely destroyed.

Kachaa! Kachaa!

The steel-like floor crumbled, and the buildings built on the foundation were all turned into ruins under the explosion of the ‘antimatter energy’.

At the same time.

Millions of androids were destroyed.

In the blink of an eye.

The foundation that the ‘Vanguard squad’ had built was completely destroyed by an arrow from the interstellar space God Archer, and an incomparably huge pit appeared.

From afar.

It was as if ‘King’ had collapsed.

“No!”

“Damn it!”

the 'Foundation' has been completely destroyed. The mission has failed.

“retreat!”

return to the base immediately.

Without the slightest hesitation.

After the nine members of the Vanguard team had calmed down, they saw that the foundation had been destroyed and the enemy had displayed their strength. They immediately prepared to retreat.

However ...

It was too late.

Because ...

From the moment they entered the boundary of the 'Titan star system', it meant that their fate was already set. Only death was left.

“star snipe!”

Bang! Bang!

The skill was activated.

the super sniper soldier locked onto one of the spaceships and fired directly. the 'sniper bullet' with antimatter energy compressed to the extreme tore through space.

it was as if he had seen a crack in space.

It pierced through space.

BOOM!

An explosion sounded.

It was only for a moment.

the spaceship that had been locked onto by the super sniper exploded. the 'antimatter energy bomb' hit the spaceship, and the terrifying destructive power destroyed the entire spaceship.

They became the dust of the universe.

"Quickly run!"

The other eight members of the vanguard squad screamed in fear.

At this moment.

They no longer had the arrogance from before, only fear was left. Facing an unknown enemy, they had no way of knowing the enemy's location.

he was like the god of death in the dark night.

...

It was silently harvesting their lives.

"spatial arrow."

whoosh!

Without a sound.

the interstellar space divine archer's arrow directly entered space without any sound. it was completely hidden.

in that instant.

BOOM!

It exploded.

Another ship exploded.

The spatial arrow appeared in front of the spaceship and tore it apart. Faced with such an attack, the members of the vanguard squad had no way to fight back.

” we’ve been completely locked on by the enemy. ”

...

“It’s already impossible to retreat.”

“Prepare to counterattack!”

“.....”

The members of the vanguard squad shouted.

Bang! Bang! bang! bang! Bang! Bang!

Immediately after.

the super sniper kept firing. after locking on to the target, he fired three shots in a row. three antimatter energy bombs pierced through the space.

in an instant.

He appeared in the outer space of giant king.

The snipe arrived.

“Ship cannon of light!”

at the same time.

BOOM! BOOM! BOOM!

the remaining seven members of the vanguard squad piloted the seven spaceships and activated the weapons on the spaceships. the energy weapons were activated and materialized.

buzzzzzz! Buzzzzzz!

The antimatter energy condensed.

“Rumble!”

The battleship cannons of light automatically sensed and aimed at the antimatter energy bombs that appeared in an instant. Then, all of them were fired, rapidly producing seven antimatter energy beams that collided with the antimatter energy bombs of the Super Sniper God.

Instantly.

The two sides collided.

It produced a huge energy explosion that shook the universe's energy. It produced a vast explosion sound and rings of energy ripples spread out.

A terrifying explosion and shock wave were produced.

After that.

The seven Vanguard ships were sent flying, and the terrifying shock wave slammed into the ships, causing damage to the disc ship.

“Spatial arrow.”

whoosh!

The interstellar space divine Archer attacked again, using the ‘spatial arrow’ skill. It was silent, and all auras and energy senses were hidden.

After that.

‘BOOM!’ There was a loud sound.

The space arrow pierced through the vanguard ship.

Another Vanguard ship exploded.

It was like a beautiful fireball.

Time passed.

The remaining six Vanguard spaceships could not hold on for long either. Although the vanguard spaceships were also equipped with ‘antimatter energy’ weapons, the Vanguard team could not lock onto the position of the Super Sniper and interstellar space divine Archer. They could only passively take the attacks and defend. In addition, they had been locked on again.

so,

after holding on for half an hour.

The six Vanguard ships were all destroyed and turned into dust in the universe. The nine members of the Vanguard team were all wiped out, leaving only the wreckage of the ships.

“Mission accomplished.”

Buzzzzzz!

The ‘sniper rifle’ in the Super divine sniper soldier’s hand turned into a stream of energy data and merged into the mechanical watch on his left wrist before disappearing.

“The enemy has been completely annihilated.”

At the same time.

The interstellar space divine Archer also quickly put away his weapon. The ‘starry sky Energy bow’ also merged into his watch and disappeared. we can’t catch the enemy alive.

Shua! Shua!

Immediately.

the super sniper and interstellar space divine archer started their return journey.

Base 01.

“Not bad.”

great. Jiang Li looked at the projection and nodded in satisfaction. the Super Sniper and interstellar space Archer are very destructive. They can kill enemies from a light year away, but the enemies can't find them.

unless the enemy has a certain level of 'space technology', they will not be able to capture the whereabouts of the Super Sniper and interstellar space God archers through the trajectory of space.

Obviously.

Jiang Li was quite satisfied with the performance of the Super Sniper and interstellar space Archer. They had completed the task Jiang Li gave them perfectly.

However ...

the matter was not over yet.

this was because the super sniper and interstellar space divine archers had only eliminated the enemy's 'vanguard team'. it would not be long before the enemy's real interstellar fleet arrived.

At that time.

It would be a tough battle.

Time passed.

Half a day later.

Jiang Li ordered Luo Klan and the others to take the 'spaceship' that had been repaired and go to 'giant king' to collect the wreckage of the spaceship.

The next day.

luo klan and the others had completed their mission and brought back all the remains. as for the bodies of the nine vanguard members, they had all turned into ashes.

There was nothing left.

Three days later.

Technology research Institute.

It was the ‘Science and Technology Research Institute’ that the giant spirit race’s ‘Science and Technology professors’, led by Toria and the other’ myriad life race’, had established a year ago.

Among them.

The Science and Technology Research Institute was divided into Energy Science and Technology Research Institute, Biological Science and Technology Research Institute, war weapon Science and Technology Research Institute, Space Science and Technology Research Institute, and Qin Zhuan studio.

Wait, wait, wait.

Currently.

Toria and the others had already gradually recovered nearly one-third of the technology of the ‘eternal civilization’. The giant spirit tribe’s biotechnology had also made new breakthroughs with the help of the technology of the eternal civilization.

Among them.

Hence, they developed a biotechnology called ‘creature’s heart’.

‘Creature’s heart’.

They were implanted into the ‘biological warship’.

It was comparable to an ‘antimatter energy reactor’ and could be used as a power source for a ‘biological warship’. Because it was a ‘biological’, it had the function of automatic repair.

It could continuously produce ‘antimatter energy’.

Inside the palace.

In the main hall.

“Your Majesty.”

it’s a spaceship. Toria reported to Jiang Li, ” after the Research Institute got the wreckage of the enemy’s spaceship, they studied it for three days. Although they couldn’t decipher their technology, they found out where the enemy came from.

“What’s his background?”

Jiang Li asked.

“Your Majesty.”

the other party is the ‘Vanguard team’ of the ‘Light Civilization’, ” Toria said. the spaceship is equipped with the ‘space tunnel ‘construction device, but it has been scrapped. With our current technology, it is basically impossible to repair it.

the light Civilization? ”

jiang li muttered.

“Yes, I am.”

Toria nodded. it's because they've seen the spaceship of the 'Light Civilization' before. That's why we're sure that it's one of their spaceships.

“Your Majesty.”

Luo Klan immediately walked out and bowed to Jiang Li. ” toria and the rest have restored the virtual image of the spaceship. in addition to the wreckage of the spaceship, i can deduce that the enemy is most likely the light civilization's vanguard team. ”

“Yes.”

okay. Jiang Li nodded.

” your majesty, the situation is urgent. we must be prepared for battle. ”

Toria said with a heavy tone.

that's right, Your Majesty. Even though the vanguard squad has been annihilated by you, the light Civilization will definitely send out their fleet if they don't receive a reply.

“your majesty!”

“.....”

The ministers all said.

“Alright,” he said.

yes. Jiang Li nodded and said, ” listen up. Form a fleet and prepare to fight the enemy. I'll leave the specific tasks to you.

“Yes.”

“This Minister will obey.”

“.....”

Toria and the others said in unison.

Time passed.

Jiang Li discussed the details with Toria, including setting up traps, ambushing enemies, global martial law, and mobilizing all the soldiers.

no matter what.

The cooperation between the giant spirit race and the myriad life race had already allowed them to burst forth with unparalleled creativity in an extremely short period of time. Under the pressure of the enemy, the relationship between the two races had become harmonious.

It could be seen.

On the land of Djinn planet, there were military bases, war bases, warship factories, weapon factories, and so on. They sprung up one by one like bamboo shoots after a rain.

They would create batches of war weapons.

At the same time.

They also built one biological battleship after another, the interstellar battleship.

Of course.

Jiang Li didn't rest either.

Jiang Li didn't dare to be careless in the face of the 'Light Civilization', which was more advanced than the eternal civilization. He had to deal with it with all his might. It was imperative to build an army of mechanical warships.

Chapter 747 promotion

giant spirit planet.

The atmosphere of war enveloped every corner of the world. Even the three-year-old children of the giant spirit race and myriad life race had serious expressions on their faces.

Buzzzzzz! Buzzzzzz! Buzzzzzz!

It could be seen.

In outer space.

There were battleships and spaceships that formed patrol teams, patrolling in outer space. They didn't dare to bring anything with them.

As the technology of the eternal civilization had not been fully restored, only about a third of it had been restored, Toria and the others could not build warships and spaceships that could perform 'teleportation'.

it could be said that ...

The entire Army of 'Titan star'.

Only one 'spaceship' had the ability to 'teleport', and that was Luo Klan's 'spaceship for universe exploration', which could teleport.

Other biological battleships, interstellar battleships, and so on.

They could only enter 'sub-space' and travel in the universe at sub-light speed.

Luo Klan's 'space exploration spaceship' was almost destroyed the last time. Fortunately, the 'teleportation device' was not destroyed. Otherwise, the only spaceship that could perform 'teleportation' would be gone.

Of course.

The 'battleships' that Jiang Li created through the 'Dominator panel' were not included.

In addition.

Toria had indeed tried to unlock 'space technology' by studying the 'teleportation device' of Luo Klan's 'space exploration spacecraft'.

The result was unexpected.

'Space technology' was hard to decipher.

Even if there was a 'ready-made product' in front of them, they still felt like they had nowhere to start.

For example.

Bringing an ordinary 'calculator' to a 'feudalistic society' and handing it over to the 'scientists' of the 'feudalistic society' to study, they would also be in the dark and would not know anything.

Plastic, electricity, wires, and so on.

He probably had no place to start.

He said a thousand things and ten thousand things.

Toria and the others lacked the basic technology of space technology.

Base 01.

Shua!

With a thought.

Jiang Li opened the Dominator panel.

[ soul Tinder: 50000 level-one soul Tinder, 13298 level-two soul Tinder, 2557 level-three soul Tinder, 577 level-four soul Tinder, 76 level-five soul Tinder, 6 level-six soul Tinder, 1 level-seven soul Tinder, 2 level-eight soul Tinder, 1977 level-nine soul Tinder, 1 level-ten soul Tinder ]

“There’s not enough soul Tinder.”

Jiang Li frowned. it’s mainly because I don’t have a level-eight soul Tinder. I can’t upgrade Base 01, but I have enough level-nine soul Tinder.

“.....”

Jiang Li pondered for a long time.

Finally.

Helplessly.

jiang li had to send out his mechanical army to kill the star beasts on giant soul planet. he had to kill several star beast groups to get enough soul tinder.

[ soul Tinder: 1300000 level-one soul Tinder, 13900 level-two soul Tinder, 23590 level-three soul Tinder, 5882 level-four soul Tinder, 722 level-five soul Tinder, 112 level-six soul Tinder, 71 level-seven soul Tinder, 7 level-eight soul Tinder, 1977 level-nine soul Tinder, 1 level-ten soul Tinder ]

This time, the mechanical Army had set out.

Not much.

He had only captured soul Tinders below the ninth-rank.

However ...

That was enough.

The mechanical Army returned to the mech factory without any losses.

“Fuse.”

buzzzzzz!

fuse. Jiang Li immediately started the soul Tinder fusion.

Instantly.

The fusion interface appeared.

The level-one soul Tinder began to fuse.

countless notifications appeared.

Finally.

...

The 1.3 million level-one soul Tinders were fused into 130000 level-two soul Tinders.

Immediately after.

fused 233900 second-stage soul Tinders.

Buzzzzzz!

The soul Tinder fusion began again.

Shua! Shua! shua!

[ fusion successful! ]

.....

[ fusion successful! ]

.....

Countless notifications popped up on the fusion interface, and he obtained 23390 level-three soul Tinders.

...

“Continue.”

Jiang Li said.

Buzzzzzz! Buzzzzzz!

46,980 tier-three soul Tinders were fused into 4698 tier-four soul Tinders, and 10580 tier-four soul Tinders were fused into 1058 tier-five soul Tinders.

1,780 level-five Soul Fire Seeds were fused into 178 level-six Soul Fire Seeds, and 290 level-six Soul Fire Seeds were fused into 29 level-seven Soul Fire Seeds.

Finally.

one hundred level-seven soul tinders were fused into ten level-eight soul tinders.

[ soul tinder: 17 level-eight soul tinders, 1977 level-nine soul tinders, one level-ten soul tinder ]

nine level-eight soul Tinders consumed, one trillion energy points, upgrading Base 01.

” go! ” jiang li ordered.

one trillion energy points.

after the conversion.

in fact, it was only 0.1 origin point.

Immediately after.

nine eighth-tier soul tinders and one trillion energy points were deducted.

Shua!

a notification appeared.

[ Base 01 is starting its upgrade! ]

Buzzzzzz!

the next moment.

There was a change in Base 01.

an extremely vast amount of energy enveloped the entire base. under the influence of this energy, base 01 began to transform from the inside out.

my Lord, upgrade time: 24 hours. Please wait patiently.

Jiang Li. Hidden Dragon said to Jiang Li.

“Alright,” he said.

I see. Jiang Li nodded. He had expected it.

after that.

okay. Jiang Li left Base 01.

On the other side.

In the military camp.

jiang lijun and his five subordinates were learning how to use technology and weapons that they didn't understand while they were cultivating.

Not only that.

Toria had sent out top-tier war weapon professors and makers. Based on the characteristics of Jiang Lijun and his five subordinates, they had specially made war mechas that could be used by Jiang Lijun and his team.

It was called the eternal set.

It was mainly divided into three parts.

the first part.

It was called the eternal armor.

The 'eternal battle armor' was a war weapon that was completely fitted to the body, similar to the 'exoskeleton armor', but it was countless times more advanced than the 'exoskeleton armor'.

in terms of energy.

it was equipped with a small 'nuclear reactor' and a small 'antimatter energy reactor'.

In terms of weapons.

Energy-powered beam saber, energy-powered weapon, and so on.

It was also equipped with a small 'sub-light speed propeller'. After activation, it could enter sub-space and reach sub-light speed travel. At the same time, it was also equipped with intelligent war support.

Wait, wait, wait.

The second part.

It was called the eternal mech.

If one wanted to operate the 'eternal life armor', one had to wear the 'eternal life armor'.

The eternal life armor was a giant robot that was a hundred meters tall. It was similar to the mecha weapons in anime, and its combat power was one level higher than the 'eternal battle armor'.

Among them.

It was powered by energy.

It was equipped with a medium-sized 'nuclear reactor' and a medium-sized 'antimatter energy reactor'.

Weapons and other aspects.

It was even stronger than the eternal battle armor.

The third part.

It was called the eternal warship.

This was no longer a conventional war weapon. It was large enough to participate in interstellar wars. It was comparable to a shrunken planet.

Operate the 'eternal warship'.

Naturally, it needed to be paired with the ‘eternal life armor’ and ‘eternal life armor’.

Three in one.

It was the ultimate power.

it could be said that ...

When Jiang Lijun and the others used the ‘eternal suit’, their combat power would directly soar to the ninth-rank, and they would be able to destroy stars easily.

In reality.

This was also a characteristic of the technological civilization of the great cosmos.

Even though ...

Most of the universe’s races had a high life level. After injecting the gene strengthening liquid to evolve, their life level would increase, reaching level 8,9, and 10.

but ...

The combat power of the universe’s races was low.

combat relied on technological weapons, energy weapons, space weapons, and so on.

The Super Fantasy world was almost completely different.

When an individual’s life level was extremely high, they would possess extremely powerful combat and destructive power. They could use all kinds of energy, laws, and profound meanings.

With a flip of his hand, he could turn the heavens and earth upside down, destroy stars, shatter space, and so on.

They were like two extremes.

However ...

The existence of the 'military formation' in the Super Fantasy world had further enhanced the strength of the group. Even if they only had a level one cultivation base, as long as there were enough of them, they could arrange an invincible military formation.

it was extremely powerful.

On the other side.

The sprites were in Galaxy 001245.

The outer spirit planet.

Inside the planet.

Base 001245.

On the top floor of the Tower of Light.

Buzzzzzz! Buzzzzzz! "whoosh!!!"

Nine hazy figures appeared.

the higher-ups were having a meeting.

Nearly two hours of 'photolithography' had passed.

We lost contact with the Vanguard team.

It had already attracted the attention of the base's higher-ups, and they were holding another meeting.

we've lost contact with the vanguard squad. It's very likely that they've been destroyed by the enemy. The vanguard squad didn't even have time to send us a message. It's obvious that the enemy's strength isn't low.

"we've somewhat underestimated them."

"Underrated? Hehe, I don't think so. The Scout ships of the vanguard squad were only equipped with low-end energy war weapons. It's normal for them to be destroyed. There's nothing to be worried about."

the Scout ships of the vanguard squad are only equipped with medium-grade antimatter energy weapons, a small 'spatial device', and a low-end AI.

no matter what, we can not be careless. We must have enough respect for the civilizations in the universe. To be cautious, we should send out the 'light fleet'.

"Additional discussion!"

"Additional discussion!"

The nine higher-ups raised their hands to vote.

"Who will be commanding the 'fleet of light' this time?"

"This bi an ..."

“I’m currently not in a Galaxy near Galaxy 001245. I’m in the 99th branch of the Milky Way Alliance on another mission. I’m afraid I won’t be able to make it.”

“My words, Yingluo”

“I’ll do it!”

at this moment.

One of the figures stood up and said firmly, ” I’ll lead the light fleet this time. If I succeed, my contribution points will exceed 10000.

“Alright!”

“In that case, I’ll have to trouble you, number three.”

“I agree.”

“I also agree.”

“.....”

nine votes passed, granting ‘001245 colony base manager No. 3’ the right to command the ‘fleet of light’ as the ‘ship master’.

After half a photolithograph.

Buzzzzzz! Buzzzzzz! “whoosh!!!”

The outer spirit planet.

The fleet of light appeared out of thin air in the outer space of the planet. What came into view was a fleet of light warships, forming a huge fleet.

After that.

The light seemed to be distorted.

The battleship stretched.

He flew at superluminal speed.

At the same time.

Djinn Galaxy.

Shua!

[ Base 01 upgrade completed! ]

Jiang Li received a notification.

Chapter 748 Physical body

okay. after Jiang Li received the notification, he immediately went to interstellar base No. 01.

He stood in the air, his gaze able to see Base 01 from afar.

After the base had been upgraded to the type 8 realm, the diameter of the entire base had increased by more than ten times.

It could be said that ...

The size of the tier 7 '01 interstellar base' was equivalent to the size of 'earth', so the current '01 interstellar base 'was equivalent to' Titan star'.

One had to know.

the '01 interstellar base' was right above the imperial palace on titan star. now that it had expanded to the size of titan star, it naturally attracted the attention of all the living beings on titan star.

the myriad life race and giant spirit race members looked up at the sky with shock in their eyes. they widened their eyes and were extremely shocked.

Because the base was too big, they could only see the tip of the iceberg.

“What’s going on?”

“Yup!”

“Why would such a vast ‘base’ suddenly appear?”

” the size of this base is probably no smaller than djinn planet. ”

“.....”

Many living beings were discussing among themselves.

Shua!

okay. Jiang Li entered the base.

“Chief sovereign.”

Buzzzzzz!

Immediately.

Jiang Li. as soon as Jiang Li stood on the surface of the base, Hidden Dragon showed up to welcome Jiang Li and saluted him. Hidden dragon's eyes lit up.

“Yes.”

Jiang Li just nodded and didn't say anything.

he looked around.

In general.

Other than the change in size, the main change was in the 'facilities'. The original facilities only had seven floors, but now it was eight.

Furthermore ...

The corresponding area, size, and so on also expanded with the changes of the base.

“Hidden Dragon, immediately display the basic information of the 'base'.”

go! Jiang Li ordered.

“Yes.”

Hidden Dragon replied.

Buzzzzzz!

Hidden Dragon waved his right hand.

rays of purple light appeared out of thin air and intertwined together, forming a three-dimensional image. it was a base model that was scaled down according to a certain scale.

He could see everything in the base.

Shua! Shua!

Jiang Li opened the basic information of the base.

“interface: army base”

[ sub-plane: interstellar base 01 ]

[ rank: rank eight ]

facilities: Galactic Dominator hub (can be expanded), Galactic mech factory (can be expanded), Galactic Research Center (can be expanded), Galactic Construction Center (can be expanded), Galactic Sentry tower (can be expanded), Galactic teleportation room (can be expanded), Galactic Nuclear Station (can be expanded), galactic space Station (can be expanded), space Expedition Station (can be expanded) ”

basic construction requirements: ten normal mechanical soldiers, one normal mechanical engineer, 100 million energy points.

advancement requirements: nine level-nine soul Tinders, 10 origin points ”

.....

It was only from the basic information.

After reaching the 8th rank, Base 01 didn't change much.

There were no new facilities.

Of course.

After upgrading to grade-8, all the facilities and units were upgraded to grade-8.

It was like comparing.

After the two units in the universe war station were upgraded to level eight, their corresponding abilities were increased tenfold.

Now, all they needed was a 'star map observation base' and 10000 'universal positioning shuttles' to monitor the entire Titan star system.

...

The abilities of the other facilities and units were also greatly enhanced.

Immediately after.

jiang li checked the information of the nine facilities one by one.

There were no new units in the nine facilities.

Jiang Li was surprised.

"it's not bad."

yes. Jiang Li nodded. it's only upgraded to level eight. Although there aren't any new facilities, all the functions of the base have improved significantly.

“Hidden Dragon,”

let’s go. Jiang Li gave an order, ” the current size of Base 01 is no longer suitable for giant spirit planet. Go to space immediately.

“Yes.”

Hidden Dragon said.

...

Buzzzzzz! Buzzzzzz! Buzzzzzz!

Base 01 began to move.

After absorbing the vast amount of energy, the base was like a spaceship. It quickly flew out of Titan star and arrived in outer space in the blink of an eye.

It occupied a region in outer space.

In the surroundings.

Countless members of the myriad life tribe and the giant spirit tribe looked up at the sky. They clearly saw the ‘base’ leaving giant spirit planet, and their eyes were filled with shock.

His Majesty actually created such a vast interstellar base so easily.

even during the heyday of the eternal civilization, they only built one such huge interstellar base. Who knows how much time and resources were spent on it, but Your Majesty only took one day to complete such a vast interstellar base. It is truly powerful.

“.....”

toria and the others exclaimed in awe.

In outer space.

Jiang Li stood in the No. 01 interstellar base and looked at the universe. With Jiang Li's eyesight, he could see the two stars of the Titan star system more clearly.

One-star and two-star.

two stars.

Same size.

It was burning with terrifying flames and had extremely high temperatures.

Hidden Dragon, the Titan star system only needs one star map base and 10000 'space shuttles'. Send out the other eight star map bases and 80000' space shuttles 'and have them monitor all the other galaxies around the Titan star system.

Jiang Li said.

"Yes."

Hidden Dragon nodded.

Shua! Shua!

It could be seen.

data streams flickered in hidden dragon's eyes. this was the transmission of orders. the communication of base 01 naturally did not rely on optical or electricity.

One had to know.

The interstellar base and the surveillance base were too far apart.

If they were to rely on optical and electrical communication, it would probably take a lot of time to communicate with each other. It was not suitable.

so,

The communication between the interstellar base and the detection base, as well as the transmission of information, was based on 'energy communication'.

What was 'energy communication'?

In the universe.

There was 'cosmic energy' in almost every corner.

'Energy communication' relied on 'cosmic energy' to transmit information and messages. Such a transmission speed far exceeded the so-called light speed.

It was called energy speed.

to make an analogy.

The speed of transmission in the universe was equivalent to the speed of sound on earth.

"Chief sovereign."

eight observation bases and 80000 shuttles have been sent out, " Hidden Dragon replied. we estimate that we will have a complete 'star map' in ten days.

“alright,” he said.

okay. Jiang Li nodded with satisfaction and said, ” I have enough level-nine soul Tinders and origin points. I can upgrade the base again.

“Continue to level up.”

okay. Jiang Li took action immediately. He used nine level-nine soul Tinders and ten origin points to upgrade the level-eight base.

Shua!

[ base 01 is starting its upgrade! ]

A notification appeared.

my Lord, upgrade time: 24 hours. Please wait patiently.

Hidden Dragon still said the same thing.

“Yes.”

” okay. ” jiang li nodded.

Shua!

After that.

Jiang Li left the base and returned to giant spirit planet. He would wait for Base 01 to complete its upgrade.

After returning to the Djinn space.

jiang li stood in the high sky of titan star and looked down. he saw many military bases rising like bamboo shoots after a rain. a large number of weapons and warships had been built, forming powerful armies with terrifying firepower.

In addition.

Jiang Lijun and the rest had also gradually adapted and mastered the 'eternal suit'.

with the current strength of the giant spirit planet, even a stage nine imperial dynasty in the 'Super Fantasy world' might not be able to compete with it. I'm afraid only a top stage eight imperial dynasty can compete with it.

it's not bad, " Jiang Li said. it can even fight in a medium-sized world. If there's a chance, we can try to send the Army of planet juhun to an alien world.

On the other side.

Galaxy 001245.

It was also the 'captive Galaxy' where the elven race lived.

After 'base No. 3 administrator' obtained the qualification of 'ship master', he led the' light fleet 'and flew at superlight speed, arriving at the' captive planet'.

Not long after.

They found the traces left by the 'Vanguard team', and based on these traces, they determined the direction of the Army and quickly left the' captive Galaxy'.

In reality.

Because they could not determine the exact location of their target, they could not March through 'teleportation' and could only fly at 'superlight speed' at the speed of the 'fleet of light'.

It would take three days at most.

He would definitely arrive.

A day later.

Shua!

[ Base 01 upgrade completed! ]

Jiang Li received a notification.

Hence.

Jiang Li flew into outer space and arrived at the level-nine interstellar base No. 01. What greeted his eyes was the base that was as vast as a star.

From afar.

There was a sense of shock.

Unknowingly.

Military base 01, which was originally only half the size of a city, was now as vast as a star after it reached level 9.

“Chief sovereign.”

Before Jiang Li arrived at Base 01, which was at least a few million kilometers away, Hidden Dragon left the base and appeared in front of Jiang Li.

“Why did you come out of the base?”

Jiang Li asked.

my Lord, after Base 01 reached the type 9 realm, I have a physical energy form, and can transform between illusory and real.

not only that, ” Hidden Dragon replied, ” with the base as the center, I can move and appear as I please within a light year.

“Oh.”

I can’t believe it’s changed so much, ” Jiang Li said. I can’t believe it.

“Chief sovereign.”

Hidden Dragon’s tone was slightly anxious. seven light years away from the Titan star system, the 06 observation base has discovered a huge fleet. The other party is heading straight for the Titan star system.

therefore, I suspect that the other party is the fleet of the ‘Light Civilization’.

“And ...”

the other party’s fleet is flying at superluminal speed. This means that the ‘Light Civilization’ has already grasped the preliminary stage of space technology and can not be underestimated.

## Chapter 749 Heavenly punishment

“They actually came so quickly.”

what level is he? ” Jiang Li frowned and asked, ” can you tell what level he’s at? ”

“I can’t,”

Hidden Dragon replied, “I can’t deduce the combat power of the enemy fleet from long-distance observation.

“.....”

okay. Jiang Li was silent for a moment. let’s enter the base first.

“Yes.”

Buzzzzzz!

Hidden Dragon’s figure disappeared into thin air.

let’s go. Jiang Li quickly arrived at the base and entered the room in the ruling hub. He then ordered Hidden Dragon to open the basic information of the base that had reached level nine.

buzzzzzz! Buzzzzzz!

the projection screen appeared.

What appeared in front of Jiang Li was a 3D model of the base. It was scaled down to a certain scale. When he clicked on the model, an information interface would pop up.

Shua!

“Interface: army base”

[ sub-plane: Base 01 ]

[ rank: rank 9 ]

[ facilities: ruler Galaxy hub (can be expanded), Galaxy mech factory (can be expanded), Galaxy Research Center (can be expanded), Galaxy Construction Center (can be expanded), Galaxy Sentry tower (can be expanded), Galaxy teleportation room (can be expanded), Galaxy energy station (can be expanded), Galaxy Space battle station (can be expanded), divine punishment (can be expanded) ]

basic construction requirements: ten normal mechanical soldiers, one normal mechanical engineer, 100 million energy points.

advancement requirements: nine level-ten soul Tinders, 1000 origin points

First of all ...

The 01 Galactic base had been upgraded to '01 Galactic base', and the basic construction conditions had never changed from the beginning. The interstellar space Station and the space Expedition Station had been combined into one.

It had become a brand new facility.

It was called the universal space battle station.

In addition.

The interstellar nuclear energy station had been upgraded to a stellar energy station.

Finally.

There was also a new facility called 'heavenly punishment'.

Immediately after.

Jiang Li opened all the facilities one by one.

a total of nine facility information interfaces appeared.

[ facility: ruler's Galaxy hub ]

Lord soldier types: base heart (unlocked), normal Lord armored soldier (unlocked), elite Lord Battle armor soldier (unlocked), Lord auxiliary device (unlocked), Lord mechanical soldier (unlocked), Lord interstellar space soldier (unlocked) ”

Obviously.

Because of the ‘Dominator mode’.

The ‘dominating hub’ didn’t need new dominating units because Jiang Li could control all the meches in the ‘dominating mode’.

The ruler’s arms could only be superfluous.

so,

The ‘control hub’ had become the ‘core of the base’.

[ facility: galaxy mech factory ]

” factory units: normal mech production line (unlocked), normal mech production line (unlocked), elite mech production line (unlocked), elite mech production line (unlocked), interstellar mech production line (unlocked), interstellar mech production line (unlocked)

Similarly.

There was no change in the types of soldiers in the factory.

However ...

All the production lines and soldiers had been upgraded to level 9.

The mech factory had nine floors.

It could create all types of soldiers from level one to level nine.

.....

[facility: star system Scientific Research Center]

Research Unit type: Normal research equipment Center (unlocked), normal mechanical research soldier (unlocked), elite research equipment Center (unlocked), elite research soldier (unlocked), biological research soldier (unlocked), interstellar research soldier (unlocked), Energy Research soldier (19681)(locked)

.....

[facility: star system construction Center]

[construction units: normal mechanic soldier (unlocked), normal mechanic engineer (unlocked), psionic engineer (unlocked), hovercraft technician (unlocked), Galactic architect (unlocked), base architect (19681)()]

...

.....

[facility: planetary system sentry tower]

[Sentinel units: normal Sentinel mechanical soldier (unlocked), normal Sentinel mechanical soldier Captain (unlocked), mechanical soldier (unlocked), air Sentinel

(unlocked), interstellar mechanical soldier (unlocked), Galaxy mechanical soldier (19681)(locked)]

.....

[facility: Galaxy teleportation room]

teleportation units: normal wormhole maker (unlocked), mechanical teleporter (unlocked), wormhole upgrade device (unlocked), mechanical space teleporter (unlocked), interstellar space teleporter (unlocked), Galaxy Space teleporter (19681)(locked)

.....

[facility: intergalactic energy station]

nuclear soldiers: mechanical nuclear energy manufacturing base (unlocked), mechanical nuclear soldiers (unlocked), mechanical Nuclear Research soldiers (unlocked), interstellar Nuclear Research soldiers (unlocked), mechanical antimatter energy manufacturing base (19681)(locked), mechanical antimatter energy soldiers (19682)(locked), mechanical antimatter Energy Research soldiers (19684)(locked)”

.....

[facility: space battle station]

...

[Space Station type: Space Station base for star map observation (unlocked), space positioning shuttle (unlocked), space blockade ship (19681)(locked)]

.....

[facility: divine punishment]

Tian FA's Army Type: Tian fa base (unlocked), spear of heaven's punishment (19681)(locked)"

.....

jiang li had finished browsing through all the facilities.

"Unlock all the facilities and units."

Buzzzzzz!

go! Jiang Li ordered.

After that.

He used 13 level-nine soul Tinders and unlocked all the facilities. Jiang Li also received many notifications that the unlocking was completed.

"Chief sovereign."

Buzzzzzz!

okay. Hidden Dragon waved his right hand and showed Jiang Li the image from the sixth star map observation base.

This is the fleet of the 'Light Civilization'.

"after careful calculation and observation, this fleet has a total of 100000 space carriers and 10 billion space battleships," said hidden dragon.

" mech armors, mech warriors, and so on are countless. it's impossible to estimate.  
"

these battleships and motherships are at least equipped with ‘antimatter energy reactors’. They are loaded with a large number of energy weapons, such as star Annihilator cannons.

Obviously.

As the level of civilization increased.

Nuclear energy had gradually become outdated and could no longer be a regular energy source.

“Chief sovereign.”

“We can’t rule out the possibility that the other party has more powerful weapons,” continued Hidden Dragon.

“Yes.”

okay. Jiang Li nodded and observed the enemy fleet carefully. Because of the ‘light fleet’, Jiang Li didn’t have time to check the abilities of the new facilities.

“Hidden Dragon, what do you have in mind?”

Jiang Li asked.

“Reporting to you, chief sovereign.”

” because the ‘interstellar space station’ and the ‘space battle station’ are combined, ” hidden dragon said directly. ” with the ability of star base 01, you only need to transform all nine star map detection bases into space station bases, as well as transform 90000 space positioning shuttles into space positioning shuttles. ”

“Plus,”

all the facilities and units have been upgraded to rank-9, and the corresponding abilities have been enhanced several times. It's enough to accommodate and monitor the entire star system within ten light years in a day.

"Finally."

create nine more 'Galaxy Space teleportation soldiers', and we'll be able to teleport within the surveillance range.

"according to the speed of the enemy's fleet, it will take two days to reach the djinn star system. by then, it will be enough to use 'space transmission' to teleport the fleet over and ambush the enemy's fleet. "

"We might be able to test the strength of the enemy's fleet."

"alright!"

yes. Jiang Li nodded. we'll do as you said.

"also,"

what's with the divine punishment facilities? " Jiang Li asked. what's with them? "

"My Lord, this is an extremely powerful offensive device."

Hidden Dragon replied, " because of the update of the 'super divine mechanical Army' and the integration of the 'will of the great universe' and the will of the Supreme expert of the Super Fantasy great world.

a 'facility' that was born from that.

it's the power of a fusion of machinery and laws.

although the ‘spear of heaven’ is a mech, it’s a one-time-use item. With the function of the ‘Galaxy teleportation room’ and the ‘base of heaven’s punishment’ locking onto the target, the ‘spear of heaven’s punishment’ can attack the target.

“It’s like a punishment from the heavens,”

“Punish the enemy.”

“From what you’ve said, as long as it’s within the base’s surveillance range, it can lock onto the target and carry out ‘heavenly punishment’?”

Jiang Li asked again.

“Yes, I am.”

Hidden Dragon nodded.

“Alright,” he said.

hmm. Jiang Li’s eyes lit up. in that case, let’s test the strength of the light Civilization’s fleet with the power of the ‘spear of divine punishment’.

“Hidden Dragon,”

start modifying the nine Star map observation bases, 90000 universe positioning shuttles, and produce nine Galaxy Space teleportation soldiers and nine ‘Spears of divine punishment’.

modifying level nine meches only requires one trillion energy points and 9009 origin points to modify.”

10 energy points to build one level 9 facility mech, ” Hidden Dragon said. you need to build 18 level 9 facility meches and 180 energy points.

Buzzzzzz!

He had consumed a total of 9189 origin points.

One had to know.

It consumed almost half of Jiang Li's origin points.

Modifying level nine meches consumed the most energy because they were just the foundation. Without a Space Station base and a space positioning shuttle, they couldn't be monitored.

wuwuwuwuwu!

The creation and modification interfaces appeared at the same time.

There were four illusory figures.

Countless light spots filled the space.

a minute later.

[ creation and modification complete! ]

A notification appeared.

"Alright," he said.

okay. Jiang Li nodded and said, "order the space station base and the space positioning shuttle to build the star map and monitor the situation.

"Yes."

Hidden Dragon replied.

Tian FA's base, get ready.

Jiang Li said.

"It's done."

Hidden Dragon replied.

In an empty space in the 01 base.

A huge base appeared.

It was like an altar.

It covered a vast area.

Around the base.

There were a total of nine 'Spears of heavenly punishment'. They were long, slender Spears that were pitch-black in color. The body of the spear was completely condensed from antimatter energy.

he took a closer look.

The body of the spear was actually wrapped in the runes of laws.

Shua!

One of the spears flew up and landed in the center of the base.

Buzzzzzz! Buzzzzzz!

the base began to recharge.

the spear of heaven's punishment also shone with a dense radiance, containing an extremely destructive aura.

Chapter 750 probing

the Tian fa base has been fully charged.

on standby, ” Hidden Dragon replied.

“Yes.”

okay. Jiang Li nodded in satisfaction.

A day later.

The ‘fleet of light’ had already arrived at the ‘dustless Galaxy’, which was four light years away from the Titan star system. With the speed of the ‘fleet of light’, they would arrive at the Titan star system in a day.

at the same time.

“Chief sovereign.”

I’ve finished the star map. Hidden Dragon reported to Jiang Li.

“Alright,” he said.

Shua!

Jiang Li flew into the sky like a ray of light and went straight to the base of the 01 Galaxy and entered the room of the ruling hub.

“Please take a look.”

Buzzzzzz!

Hidden Dragon stood in front of Jiang Li and waved his right hand. Rays of light interweaved and formed a star map. The star map was oval in shape with a diameter of about 20 meters.

The ratio was one light year to one meter.

within the entire star map.

with the djinn galaxy as the core, a vast galaxy area was planned out. there were a total of nine galaxies, including the djinn galaxy.

They were divided into upper, lower, left, and right.

Among them.

On the far left side of the star map, about ten light years away from the Titan star system, was the ‘captive star system’ that Luo Klan had discovered. It was already within the surveillance range of Base 01.

Jiang Li was reading the star map carefully.

I’m sorry. Hidden Dragon explained in detail.

the nine galaxies, from top to right, then to bottom, and finally to the left, and so on, were respectively: The Golden Bull Galaxy, the tidal Galaxy, the Centaur

Galaxy, the RODO Galaxy, the silver crab Galaxy, the kede Galaxy, the dustless Galaxy, the illusionary fog Galaxy, and the pen breeding Galaxy (colony Galaxy 001245).

my Lord, the enemy's fleet is currently in the dustless star system. They are about four light years away from our Djinn star system.

hidden dragon said.

enlarge the dustless Galaxy.

lock onto the enemy's fleet, " Jiang Li said.

"chief sovereign."

we can't rule out the possibility that they have anti-detection and anti-lock technology, " Hidden Dragon said. if we lock onto the enemy's fleet rashly, I'm afraid we'll alert them.

"This isn't beating the grass and alerting the snake."

I'm just testing their strength, " Jiang Li said. I'm just testing their strength.

"Follow my orders,"

" go! " jiang li ordered.

"Yes."

Hidden Dragon nodded.

Buzzzzzz! wuwuwuwuwu!

immediately.

The ‘dustless Galaxy’ on the star map was expanding and soon, the ‘fleet of light’ appeared in front of Jiang Li.

Many space carriers and battleships were in the shape of long shuttles. They were covered in layers of illusory energy light curtains and moved at superluminal speed.

“Lord, the target has been locked.”

“Please give me your instructions,” Hidden Dragon said.

“activate ‘divine punishment’.”

destroy one of the enemy’s motherships, ” Jiang Li said. destroy one of them.

“Yes.”

Hidden Dragon replied.

Buzzzzzz! Buzzzzzz!

Base 01.

Tian fa base.

Kachaa! Kachaa!

It was like lightning and thunder.

The base had already been charged and was on standby. As soon as Jiang Li gave the order, ‘divine punishment’ was activated.

Shua!

...

In an instant.

The 'spear of heaven's punishment' in the center of the heaven's punishment base pierced through the void. The 'Galaxy teleportation room' was activated at the same time, and the target was locked down through the surveillance of the 'star map'.

The spear of heavenly punishment charged into the universe.

Then, it pierced through space.

Buzzzzzz!

He disappeared.

Spatial teleportation.

Dustless Galaxy.

The fleet of light LED by administrator No. 3.

Among them.

administrator number three was in the mothership.

...

In reality.

When Jiang Li's 'star map observation Space Station base' and 'space positioning shuttle' locked onto the 'fleet of light', the 'fleet of light' had already discovered them.

ship master, the fleet has been locked on by an unknown enemy. We can't determine the enemy's specific location for the time being. We're now counter-locking the enemy.

"Di di di di di di di di"

activate the anti-lock spatial device!

"....."

It only took a few seconds.

Buzzzzzz!

The next moment.

The 'spear of heavenly punishment' had descended.

It crossed a distance of four light years and appeared above the 'light fleet'. The 'spear of heavenly punishment' was pitch-black, and nomological laws twined around it like lightning.

The 'spear of heavenly punishment' was only nine meters tall.

below.

The motherships and battleships.

The smallest warship was 100000 meters long.

In comparison.

The ‘spear of heavenly punishment’ was like a toothpick.

No!

Calling the ‘spear of heavenly punishment’ a toothpick would be a little farfetched.

” abnormal spatial fluctuations detected. ”

an extremely strong ‘antimatter energy’ fluctuation has appeared directly above the fleet. The energy reaction fluctuation has reached the limit of the ‘antimatter energy’.

it can be confirmed that this is the weapon of an unknown enemy. It arrived through space teleportation.

“.....”

Administrator number three looked at the image projected before him.

“oh.”

Administrator number three was expressionless. interesting. Not only has he grasped the ‘space teleportation technology’, but he has also mastered the complete ‘antimatter energy compression technology’.

” this means that the other party’s civilization level is not low. it’s already at the peak of a level-3 civilization. however, it’s just a compressed weapon with ‘antimatter energy’. it’s not worth my time. ”

The third administrator’s tone was extremely calm.

Obviously.

In his 'years', he had experienced countless' interstellar wars 'and even destroyed many civilizations, which was why he was so calm.

He was already used to it.

This was because there were countless civilizations in the Milky Way that had a diameter of 100000 light years. There were many Level 1 to Level 3 civilizations.

Only when they became a level-4 civilization would they have a place in the Milky Way.

Shua!

The next moment.

The 'spear of heavenly punishment' descended, turning into an extremely dazzling light. From top to bottom, it pierced directly through the mothership in the center of the light fleet.

immediately activate the 'anti-matter energy destructive device'.

Buzzzzzz!

Instantly.

The 'spear of heaven's punishment' locked onto the mothership and directly activated the 'antimatter energy obliterating device'. In an instant, it formed a vast invisible wave that surged toward the 'spear of heaven'.

One had to know.

Level-4 civilization.

He had already thoroughly researched the ‘antimatter energy’.

so,

The function of the ‘anti-matter energy destructive device’ was to render ‘anti-matter energy’ useless. This kind of ‘device’ was a destructive weapon for a level 3 civilization that used an ‘anti-matter energy bomb’ as its core.

It could be said that ...

Once the antimatter energy became ineffective, all weapons and technological equipment that used ‘antimatter energy’ as their power core would become a pile of scrap metal.

To make an analogy.

It was like locking down Earth’s technology, rendering Earth’s ‘electricity’ useless. When the time came, all technology that was powered by ‘electricity’ would be completely paralyzed.

At that time.

Earth’s civilization would be regressed by nearly a hundred years.

This was the principle behind the ‘antimatter energy destructive device’.

However ...

Although the main body of the ‘spear of heavenly punishment’ was formed by the extremely compressed ‘antimatter energy’, the body of the ‘spear of heavenly punishment’ ‘also had’ runes of law’.

The power of ‘laws’ came from ‘Super Fantasy worlds’.

This was not some ‘antimatter energy’.

so,

The anti-matter energy destructive device could not make the power of the ‘runes of law’ ineffective. It could not break through the ‘runes of law’, so it naturally could not affect the ‘spear of heaven’s punishment’.

Bang Bang Bang!

so,

The ‘spear of heaven’s punishment’ was like a hot knife through butter. Like an incomparably sharp ray of light, it directly tore apart the invisible waves released by the ‘antimatter energy obliterating device’.

Unable to withstand a single blow.

“What’s going on?”

The third administrator was stunned.

“Not good!”

“The ‘antimatter energy destructive device’ can not affect the opponent’s weapon!”

“Counterattack immediately!”

Buzzzzzz! Buzzzzzz!

a vast energy fluctuation appeared.

However ...

It was too late.

Kachaa! Crack! Crack!

“Boom! Boom! Boom!”

The power contained in the ‘spear of heavenly punishment’ directly pierced into the interior of the mothership. The power of the runes of law burst out, directly triggering the antimatter energy to produce an unparalleled explosion.

“Rumble!”

In that instant.

The entire mothership, which was as huge as a vast star, was directly destroyed by the nine-meter-long ‘spear of heavenly punishment’. It was destroyed from the inside.

after that.

the space carrier exploded.

A ball of light exploded like the sun.

A terrifying shock wave spread out.

“Whoosh!!!”

Immediately.

All the space carriers and warships activated their 'energy shields'. The space carriers and warships of the 'fleet of light' all used 'dark matter energy'.

Dark matter energy.

This was much more powerful and advanced than antimatter energy. A higher grade energy material had a more terrifying and vast destructive power.

"Alright!"

Jiang Li saw everything through the star map and smiled. I didn't expect the spear of heaven's punishment to destroy the enemy's mothership.

In reality.

the reason why the 'spear of heavenly punishment' could achieve such great results was mainly because the 'fleet of light' had underestimated their enemy and believed in the 'antimatter energy obliterating device' too much.

Originally.

They were crushed according to the level of technology.

it was normal for the light fleet to be confident.

But unfortunately ...

they encountered jiang li. the weapon in jiang li's hand wasn't developed from a normal civilization in the 'great universe'. jiang li also had the means of a super fantasy world.

The rules!

Jiang Li had the power of 'rules'.

the ‘runes of law’ wrapped around the ‘spear of heaven’s punishment’, rendering the antimatter energy destructive device ‘ineffective. energy weapons had to be used to destroy the’ spear of heaven’s punishment’.

“Continue.”

use all the remaining eight Spears of divine punishment. Jiang Li ordered.

“Chief sovereign.”

the spear of heaven’s punishment was able to achieve great results because the enemy fleet was careless and used all eight ‘Spears of heaven’, ” Hidden Dragon reminded. I’m afraid they can’t achieve any greater results.

“That’s enough.”

Jiang Li said.

“yes!”

Hidden Dragon said.

Buzzzzzz! buzzzzzz!

The base of heaven’s punishment was operating at full power.

shua! Shua! “Whoosh!”

The eight Spears of divine punishment pierced through the air at the same time, drawing a beautiful path of light. They pierced through the space and appeared in front of the ‘light fleet’ in an instant.

they were like eight sharp arrows.

It was a direct kill.
