

## The Amazing Son In Law Chapter 5586 -

charlie is not afraid of the four earls who broke the Qing Dynasty. What he is worried about is that Cyprus and Syria, two places beyond his reach and care, will suddenly be attacked by these people one day.

Especially Cyprus.

The fate of those dead soldiers, those brave cavalry guards, and their families and children is extremely tragic. If the four earls find out that they are abnormal, they will surely suffer disaster.

Therefore, charlie needs Abbas to make complete preparations in advance, especially Cyprus. If the opponent resumes Lin Wan'er (Alani)'s (Alani) line, Cyprus must be the destination that the opponent will never spare.

According to charlie's idea, Abbas must hurry up and equip Cyprus with near-defense guns. Once the opponent comes to the door, he will immediately use a saturated attack to blow him into ashes, and then immediately activate the one he set before. "Nest overturning plan".

The so-called overturning plan is to evacuate all personnel in the entire copper mine in an orderly manner, and then completely blow up the copper mine.

Since the copper mine is right next to the coastline, the best option for people to evacuate is to evacuate to the vast sea.

In this world, whether it is by land or by air, it is difficult to cover up one's traces, and the vast sea is the best choice to wash away all traces.

Even a 100,000-ton freighter is nothing more than a drop in the ocean in the vast ocean, and the tides that keep going day and night will not leave any evidence for the enemy to explore.

You know, 29% of the world's area is land, and the remaining 71% is ocean. Moreover, every piece of land has its own ownership, but two thirds of the ocean are public seas that do not belong to any country.

Therefore, after a ship goes out to sea, as long as he does not want people to find it, no one will be able to find it.

In addition, ocean transportation accounts for more than two-thirds of the world's international freight. There are more than 40 million containers drifting on shipping routes around the world. charlie only needs to take out 40 of the containers, and the copper All the people in the mine packed it up, combined with the resources of Ysu Shipping, he could transport these forty containers to any port in the world, pull them out

from the Mediterranean Sea, turn around on the Eurasian route, and finally return. It was transported back to the Mediterranean, and then docked in Syria. Even if the Qing Dynasty moved all the Daluo Jinxian out, there was no way to find out why.

Therefore, as long as the plan to overthrow the nest can be perfectly implemented, let alone breaking the Qing Dynasty, even if the US government comes to find it, it will be difficult to find any substantive clues.

At that time, the British Lord who broke the Qing Dynasty will definitely face the greatest test in his life. An earl disappeared, and the entire base of the dead soldiers also disappeared, and no matter how he investigated, he couldn't find out why. This will definitely make him extremely suspicious of life, and in the next few months, I'm afraid he won't be able to sleep well.

So, thinking of this, Charlie suddenly looked forward to the plan to overthrow the nest.

Whether it was in New York or Northern Europe, it was only a small blow to the Poqing Society, but once the plan to overthrow the nest was implemented, for the Poqing Society, it would be like being shot secretly in the dark forest. Not only can it cause serious harm to them, but it can also scare them to death!

At this time, Abbas also understood Charlie's plan, so he immediately said, "Don't worry, Mr. Wade, the subordinates will immediately find a way to purchase near-anti-aircraft guns, then dismantle the near-anti-aircraft guns and transport them to the copper mine, and then assemble them." "

## **The Amazing Son In Law Chapter 5587 -**

Charlie immediately found out the key point from his words, and blurted out, "Abbas, the only possible clue to the whole plan is the near-anti-aircraft gun! Even if we can destroy the entire copper mine, it will not. The clues related to several anti-aircraft guns may disappear. Once the anti-aircraft guns are fired, we must retreat quickly. I am afraid that there is not enough time to withdraw the anti-aircraft guns. Moreover, even if there is time to withdraw the anti-aircraft guns, Yes, hundreds of shells are fired in a second, and it is impossible to clean up the fragments of those shells, so if the Poqing Council checks later, they will definitely find out that their earl died of close-in defense guns, and then they will go to Global Arms. If you look for relevant clues on the near-anti-aircraft transaction in the trading market, you may be able to find Wanlongdian!"

Abbas couldn't help smacking his lips and said, "Mr. Wade, what you said is very reasonable. We don't have such a thing as a close-in anti-aircraft gun. As far as I know, Commander Hunter Hamid doesn't have such a powerful weapon. There is no other way to buy it from the arms market; "

And this kind of thing is usually only sold by Russians or arms dealers in the former Soviet member states in Eastern Europe. We have to inquire layer by layer, so we want

to steal a few. Or it is not realistic to grab a few units, and it is not realistic to kill them after buying them. Once a fish slips through the net, the whole thing will be exposed. By then, the near-anti-aircraft guns may not be installed, and we have already been hurt by global arms dealers. I scolded..."

charlie frowned, pondered for a long time, and suddenly thought of a way, and blurted out, "There is a way!"

Abbas hurriedly asked, "Mr. Wade, what good way do you have?"

"In the Dragon Palace, find a few members of American nationality and make them change their faces. Qiao Zhuang became a member of the American Blackwater Company to find the seller of the near-anti-aircraft gun. For the transaction, it is said that this batch of equipment is to be transported to the Middle East to help the United States fight the war, it is more sensitive, and then the transaction is low-key."

Abbas blurted out, "Good way! Put the blame on Milia Side and let Poqinghui go to Milia Side to investigate, not only can divert their attention, but also bring a lot of trouble to Milia Side! Damn, we Wanlongdian and Milia Side Company have never dealt with it. They rely on the support of the United States, and they often trip us up, and the hands are very dirty, although it is not honorable for us to do this, it is also an excellent opportunity to weaken them!"

charlie asked him, "Does Wanlong Palace have gold reserves?"

"Yes." Abbas said without hesitation "We have about a ton and a half of gold reserves, which should be around one billion U.S. dollars."

"Absolutely no cash, let alone cash!"

"Okay!" Abbas immediately said, "Don't worry, Mr. Wade, I understand! At that time, all transactions will be made in gold, and I will ask someone to remelt the gold in advance. At that time, we will start from the gold, and we will definitely not find any clues."

charlie said, "Since you want to play a show, you must do a full set. You first find a way to investigate how many men Milia Side has in the Middle East, and then find a way to quietly capture two or three of them, and then hide these two or three people. Then you select the subordinates who are most similar to them in stature and age from the Hall of Thousand Dragons, and let them disguise themselves as the people of the Blackwater Company, take their documents and pretend to be their identities to go to Eastern Europe to discuss business, and directly give the The water is a scapegoat!"

Abbas said without hesitation, "Mr. Wade, what you said is simple! Blackwater Company also has many mercenaries in Syria. Recently, they are busy helping the US military transport the oil extracted from Syria. I personally Go out and tie up a few people easily!"

charlie immediately said, "Okay! It's not too late, you go to do this today! Then implement the near-anti-aircraft as soon as possible. Choose two to three commanding heights that cover each other. On the selected commanding heights, build a glass room with one-way glass, and place the near-anti-aircraft gun in the glass room to ensure that you are always in a state of combat readiness.

## **The Amazing Son In Law Chapter 5588 -**

Once the near-anti-aircraft gun locks on the enemy, directly Fire me through the glass!"

As he spoke, charlie muttered to himself, "The ammunition for close-in anti-aircraft guns is on the black market. I'm afraid it will cost a thousand dollars a round. Three cannons are prepared, one cannon per second." If the clock hits 100 rounds, it's only 300,000 U.S. dollars per second, it doesn't matter! When the time comes, beat me to death!"

Hearing charlie's instructions, Abbas said without hesitation, "Mr. Wade, don't worry, my subordinates will do their best to prepare the layout before the other party comes. When the time comes, my subordinates will personally go to the copper mine to sit in charge and make sure that he does not come back! "

"Okay!" charlie said, "By the way, abbas, I have one more thing. Since the plan to overthrow the nest is already on the line, I suggest that it is better to start the evacuation of personnel in advance." Then, charlie said, "Once the other party suspects this

base If there is a problem, or if you want to come to this base to look for clues, you will only make an entry point from the ground, and we will not act with him. We will open fire and kill him immediately, so there is no need for the underground dead soldiers and their families Continue to stay underground,"

"I suggest that you prepare a freighter now, and evacuate all the dead men and their families to the ship in the evening, so that the guards and their families on the ground are also ready to evacuate at any time, just like Like the earthquake drill, first arrange the details of the evacuation; ""

For example, once the evacuation starts, who is responsible for covering the family members, who is responsible for counting the number of people, who is responsible for the transfer of important materials, and who is responsible for the final comprehensive blasting. For the transshipment pressure at the beginning of the nest plan, if only the ground personnel are kept, they can devote their energy to dismantle the near-defense guns and take them away in time, after all, your base in Syria will also be used." "No problem!"

Abbas immediately said, "My subordinates will first tie up the person in Milia Side, and then go to the copper mine. Make a good plan with my master, and ask him to start preparing immediately!

" Don't kidnap someone from Syria, after all, you are in Syria now, if you kidnap someone, you may be suspected."

Abbas blurted out, "Then my subordinates will go to Iraq and tie them up. Anyway, the US military never The oil extracted in Syria has to be transported from Syria to Iraq, and I tied it up from Iraq and quietly brought it back to Syria."

charlie smiled and said, "Okay! Let's do it like this!"

...

At this moment.

The suburbs of Bergen, Nordic.

The farm where Lin Wan'er (Alani) lived at the beginning has been tightly sealed off by the police.

On the farm, the wooden structure of the villa has been burned down to only one frame, but even so, there are still multiple police cordons around it.

At the beginning, the police found many charred bodies here, and most of them died from gunshot wounds. This was listed as a rare major criminal case in Northern Europe in recent years, and the Nordic police have been racking their brains to investigate, but No clues have been found.

Right now, all the corpses at the scene have been taken away for disposal, and useful physical evidence and clues have also been extracted. What is left is only the ruins where people died.

## **The Amazing Son In Law Chapter 5589 -**

A vintage Porsche 911 with the top of the roof whized down the country road and pulled to the side of the road where the farm ruins were.

The driver was a middle-aged Asian man who looked to be in his thirties, and the passenger sitting in the co-pilot was a charming Asian beauty who looked to be in his thirties.

After the car stopped, the man who drove the car looked at the burnt wreckage, sighed, and said helplessly, "The British Lord is too hot-tempered. If it wasn't for the old man who insisted on blowing up the scout who came to the scene to investigate, this place would have been destroyed." It won't be burned like this, it's almost burnt to ashes, what other clues can we find..."

The beauty on the co-pilot curled her lips, "You've been serving the Lord of England for so many years, and you still don't know about his old man's identity. Temper? Lin Wan'er (Alani) left those eight words, not only to mock his old man, but also to tell him that the ring is no longer on her body. This is what the lord is most angry with! What the lord wants most is the ring, Lin Wan'er (Alani) Losing it means that even if you find Lin Wan'er (Alani), you may not be able to find that ring!" "

Hey..." The man looked depressed, "There are no clues at the scene, and the whereabouts of the ring are gone. I really don't want to come out here." Wading in the muddy water, can't I practice in seclusion with this time? I think Willie's mastery of spiritual energy has improved to a higher level. If you don't work hard, you will be thrown farther and farther away by him!" The beauty said lightly, "I

also If you don't want to come, why don't you let Uncle Willie look it up yourself, I'm too lazy to claim the first credit..."

After finishing speaking, she said helplessly, "But who told Willie to go to China... The British Lord recently felt that Lin Wan'er (Alani) might not really be in China, maybe she was in the Far East of Russia, or near the Arctic Circle in North America, so she let her go to China." The two of you and I came to Northern Europe to trace the origin, so we can check and make up for Willie."

The man stretched his waist and sighed, "You are still a smart Zhongyongbo. People say that he went to New York to investigate the failure of the last attack on Anjia. In fact, it must be to go to New York's Huahua World to relax, and the two of us are going to do some investigation."

Then, he pointed to the burnt ruins, and said dissatisfiedly, "Check it out, check it out. Ah check, it's all like this, what else is there to check."

The woman hugged her shoulders and said, "Since the Lord has spoken, you and I must pay attention."

She sighed and said, "How about this, Uncle Jiangong, there are two ways now, either, find out how Lin Wan'er (Alani) left Northern Europe, or find out how the Xiao Qiwei (Bertrand) we sent disappeared in Northern Europe. These two directions, the two of us One for each person, I'll be more generous and let you pick first."

The man in the driver's seat is Jiangong Bo, one of the four Earls of the Qing Dynasty, whose real name is Ou Bojun.

Ou Bojun touched the steering wheel, smacked his lips and said, "Women are first, let's choose Uncle Dingyuan first!"

As he spoke, he couldn't help teasing, "By the way, if Uncle Dingyuan can become Marquis Dingyuan or Duke Dingyuan in the future, don't Forget about Oumou!"

The woman on the co-pilot is Uncle Dingyuan among the four Earls, Yun Ruge.

Although Yun Ruge is a girl, her strength is very strong, and in the early years she fought for the British lord, so she was named Uncle Dingyuan by the British lord, and she is the only woman among the four counts.

## **The Amazing Son In Law Chapter 5590 -**

Originally, according to the ancient Chinese system, the British Lord of the Poqing Society established five ranks of titles in the Poqing Society: Duke, Marquis, Bo, Zi, and Male.

However, since the Duke and the Marquis were both high-ranking officials and princes who dominated one side in ancient times, and the Poqing Society had never divided them into enfeoffments, so so far, in the Poqing Society, these two levels have only been established but not established.

Because of this, in addition to the British Lord, the Poqing Society now has four Earls.

However, the British Lord had also promised that if someone could help him find Lin Wan'er (Alani) and the ring, and if he got his wish, he would be made a Marquis immediately.

Once you become a marquis, you will have the opportunity to choose a place in this world as your own fiefdom, and cultivate your own power on the fief. At that time, the marquis will only need to obey the orders of the British lord when he needs it, and he can be free at other times play.

At this moment, Yun Ruge smiled self-deprecatingly, and said, "If I can really find Lin Wan'er, if I find Yingzhu's ring, I will never be granted the title of Marquis. "

Ou Bojun smiled and said, "Why?" Are you afraid of the master of high power? "

Yun Ruge waved his hand, "I'm just taking it lightly. No title is as important as strength. If I really win the first prize, I will be satisfied if the British Lord rewards me with a few pills. "

Ou Bojun nodded, and said with a smile, "Come on, Uncle Dingyuan, there are two directions, you should choose one first." "

Yun Ruge thought for a while, and said, "Let me check the line of the cavalry guards, Lin Wan'er (Alani) is too cunning, I may not be as smart as her. "

Ou Bojun was a little disappointed, but still nodded and said, "Okay, then I will choose Lin Wan'er (Alani) as a route. "

Actually, Ou Bojun is more inclined to choose the line of the Xiaoqiguards ( Bickford guards ). After all, this line is relatively fast. If you can't find the clues of the missing Xiaoqiguards ( Bickford guards ) in Northern Europe, you can go to Cyprus to try your luck. But

, Lin Wan'er (Alani)'s (Alani) line, there is really nothing to rush.

Lin Wan'er (Alani) has disappeared from the world here, and she may have gone to any place in the world. It is really difficult to find this clue. And

he The reason why Yun Ruge was chosen first was actually because he had always had some thoughts about Lin Ruge, and wanted to have fun with her as a partner for double cultivation. A woman as powerful as Ge is still a good deal.

Because of this, even though he didn't want to choose Lin Wan'er (Alani), seeing that Yun Ruge chose another one first, he had no other choice but to accept it

. At that time, Yun Ruge suddenly sighed, and said, "Forget it, let's leave the line of Xiao Qiwei ( Bertrand ) to Uncle Jiangong, and I will check Lin Wan'er (Alani).

Ou Bojun asked in surprise, "Why did Uncle Dingyuan change his mind? " Lin Wan'er (Alani)'s (Alani) line is the most difficult to check! "

Yun Ruge chuckled, and said casually, "It's not easy to check, and there are no clues to base on, but because of this, I can go to places I want to go, just take it as a chance, and try my luck , Traveling while traveling, it's very good. "

Mr. Ou Bo was overjoyed, and immediately gave a thumbs up, and praised, "You are tall! Uncle Ding Yuan, you are really tall! If that is the case, let me check the line of Xiao Qiwei ( Bertrand )!"
