

The Amazing Son In Law Chapter 5637 -

As Abbas tapped the keyboard with his fingertips, the three doors had already locked on to Ober-Jun's close-in defense gun, and immediately spun the pitch-black barrel.

Immediately afterwards, shells with a caliber of 30 mm spewed out from the eighteen barrels of the three guns in an instant!

A large number of warheads directly penetrated the camouflaged glass room, and according to the ballistic called Death's Kiss, almost crazy flames were sprayed at Ober-Jun!

The speed of bullets and shells is faster than the speed of sound, but at close range, the speed is not obvious. Under normal circumstances, if a person is sniped hundreds of meters away, he must be shot first and then hear the sound.

However, Ober-jun has been carefully observing the surroundings. Since the speed of light is much faster than the speed of sound and the muzzle velocity of shells, Ober-jun has already discovered that the building has not heard the sound or been hit by the close-range artillery. The three glass rooms on the top shattered at the same time, and flames at least one or two meters long spewed out from each glass room!

At this moment, he instantly realized that he had encountered an ambush!

Moreover, his keen senses have already noticed that in the three glass rooms, a large number of extremely fast and powerful warheads have been fired towards him, and each warhead is menacing!

And at this moment, Ober-jun was already extremely terrified!

In a flash, he burst out the spiritual energy in his body instantly, and ran desperately towards his right side!

However, these three close-in defense guns are only a few hundred meters away from him. Even if the speed of sound and the initial velocity of the bullet are much slower than the speed of light, the initial velocity of the ak630 close-in defense gun is as high as 900 meters per second. Therefore, With such a short distance, the reaction time left for Oberjun is even less than half a second!

Although Auber-jun was already running with all his strength, he still realized sadly that his current position and the position in front where he wanted to escape were all covered by those extremely fast warheads.

This also means that it is impossible for him to escape!

At this moment, Ou Bojun felt extremely resentful in his heart, he never thought that with his own cultivation, he would be so aggrieved to confess here!

What's even more sad is that the speed of the shell of the ak630 close-in anti-aircraft gun is more than twice as fast as the speed of sound. Before Oberjun even heard the sound of the gun, the shell hit his face.

Ou Bojun only felt countless objects whizzing towards the side of his body. The next moment, there was a sharp pain in the knee joint of his right leg, and he lost consciousness instantly when the knee went down!

A shell from a near-anti-aircraft gun just hit the knee of his right leg. The shell could penetrate even three-finger-thick armor, and Ober-Jun's body couldn't resist it at all.

Therefore, this shot directly blasted his right knee joint into pieces, and his right calf and right foot were blown up into the air.

Ou Bojun only felt his center of gravity suddenly lost, and his whole body fell uncontrollably towards the front right, but before his body even had time to land, he felt that the right side of his body was hit hard one after another.

He subconsciously looked down, and the whole person was instantly frightened out of his wits!

At this time, where is my body?

The Amazing Son In Law Chapter 5638 -

His torso, as well as the entire lower body, were almost completely smashed into bones and flesh and blood!

Then, he felt his head spin all of a sudden.

At the moment of spinning, he saw that his neck had been broken by a shell, and the huge force was like a spinning top, directly flying his head into the air!

What's worse is that before his body had time to fall to the ground, it was already smashed into pieces... It was

also at this moment that Ober-Jun knew that after the human head was chopped off, at the very first moment, at least in that short half a second, he will not lose consciousness for the time being.

His brain can still think, his eyes can still see, and his ears can still hear the loud roar of shells!

Oberjun's final consciousness was full of anger and unwillingness.

He never expected that he would end up with a dead body in the end. Compared with the taxi driver he killed just now to vent his anger, he was only decapitated, and he probably had no head. I can't keep it!

Before the spinning head hit the ground, the shells were still whistling densely around, blasting the opposite wall into powder one after another.

Fortunately in the misfortune, although Ou Bojun's body has been turned into a fleshy paste, his head has cleverly avoided the dense barrage because the target is much smaller and is still spinning.

Although the spectacle-shaped ballistics set by the weapon expert in the Wanlong Temple are very powerful, after all, priority should be given to larger coverage, so the ballistic density is not enough to shrink to the size of a skull.

It was precisely because of this that Oberjun's head was temporarily preserved.

However, when the scorching bullet smashed Ober-Jun's body, those body tissues were scorched and scorched, so that the whole air was filled with a burnt smell of roasted meat.

The smell factor permeated the air, even though Ober-jun could no longer breathe, the rotating head still brought the smell into the nasal cavity, making Ober-jun even smell this strange smell passively.

However, he no longer cared about these things. With his remaining consciousness, he realized that his head was about to fall to the ground. At this moment, he felt a little lucky, thinking that he still retained a complete head.

But just when his head was about to hit the ground, a shell from a near-anti-aircraft gun pierced directly through the socket of Ober-Jun's left eye. enter!

At the moment when the cannonball pierced into the eye socket, Oberjun's brain was dead silent, and the last realization was that he really complied with Yun Ruge's words this time, ashes to ashes, dust to dust... Afterwards, the cannonball bangs

, Blow his head to pieces!

And Ou Bojun's last consciousness was also wiped out at this moment... The

confident Ou Bojun never thought that someone here could threaten his safety, let alone that he would die here without a place to die.

Both Abbas and Qiu Zhiyuan witnessed the process of Au Bojun being blasted into a pulp through the monitor. Although they had already expected this ending, they were both extremely shocked and terrified at this moment.

From Ober-Jun's fast-moving figure, they could see that Ober-Jun's strength was far above the two of them, and that kind of weird, almost abnormal reaction speed was simply not something a human could possess.

The Amazing Son In Law Chapter 5639 -

But so what?

Although Ou Baijun's speed has not changed much faster than ordinary people, he still has no chance to escape and resist in front of the dense close-in artillery shells.

A top expert was wiped out in an instant. If this weapon was used on the two of them, they might not even have a chance to react.

At this time, the motor of the near anti-aircraft gun has stopped running.

Because the system judged that the target it locked on was completely dead.

The whole process actually only lasted about two seconds.

In these two seconds, the three close-in defense guns fired a total of more than 300 shells.

Among them, less than one tenth actually hit Oberjun.

While Abbas was horrified, he also realized that from now on, charlie's plan to overthrow the nest began, so he immediately picked up the walkie-talkie and blurted out, "Everyone obeys orders and retreats in an orderly manner according to the established plan!"

When Abbas gave an order, the bases of the three proximity guns suddenly made a series of explosion sounds, and the proximity guns that were originally rigidly fixed on the concrete base were instantly disconnected.

Immediately afterwards, the base of the glass house was completely blown off, and the engineering team arranged earlier rushed up, pushed all the glass roof downstairs, and then connected the prepared hoisting belts, waiting for the helicopter to come to hoist.

At the same time, the Xiao Qiwei (Bertrand) and their family members who had already prepared to retreat began to rush out of the room they were in like firefighters calling the police.

They hardly have any luggage, because here, they don't have many personal items.

And those dead men and their families had been transferred to the ship a few days ago, so when retreating, as long as all the people on the ground evacuate, they can directly blow up the place into ruins.

In the open space where Ou Bojun's body was dismembered, nearly a thousand people quickly assembled in the open punishment area according to the steps that had been practiced many times before.

All the vehicles specially used for transporting ore in the copper mine were also activated. Each vehicle had its own reserved parking space.

At the same time, three helicopters roared in the sky.

According to Abbas's request, they were on standby on the cargo ship at the port. As soon as the cannon sounded, they immediately started their engines and rushed over at top speed.

At this time, trucks full of people had already driven out of the copper mine and galloped towards the port.

Because there had been drills, the retreat of hundreds of thousands of people was carried out in an orderly manner.

The helicopter also quickly hoisted up the three close-in defense guns and hurried back to the port.

Due to the remote location of the copper mine, officials have not received any news at this time.

And only ten minutes had passed since Oberjun's death, and everyone at the scene had already evacuated.

The fourth helicopter brought Abbas and Qiu Zhiyuan several hundred meters into the air. Abbas looked down at the copper mine, which was brightly lit but empty, and pressed the remote detonator in his hand.

Immediately afterwards, a series of huge explosions were heard from the depths of the ground. The sound of the explosions was more than a hundred times that of the near-anti-aircraft guns!

The Amazing Son In Law Chapter 5640 -

Then, a shocking scene appeared in front of Abbas.

The ground of the copper mine began to collapse one after another, each time the ground trembled, and the buildings on the ground, like paper paste, were quickly collapsed into debris.

Due to the large number of renovations made to the interior of this copper mine by the Qing Dynasty, the interior space is huge. When all these spaces collapsed, a subsidence area with a depth of more than ten meters was formed on the ground of the entire copper mine, and the subsidence area was more than It is the position of the ground copper mine, and the direction of the extended roadway has also formed a serious subsidence.

Soon, the copper mine was in ruins.

Army Commander abbas let out a sigh of relief, took out his mobile phone, and sent a message to charlie, "Mr. Wade, the master of the Po Qing Society has been wiped out, and the plan to overthrow the nest has been successfully completed!" After that, he also recorded the video of the whole process recorded by the monitoring

equipment They sent them to charlie together.

It was early morning in Aurous Hill at this time.

Just as charlie got up from the bed, Claire beside him was still fast asleep.

He picked up his mobile phone and received Abbas's message and video. He was overjoyed, and after stepping onto the terrace, he clicked on the video.

This scene is the whole monitoring of the defense system of Wanlong Palace.

It has followed and photographed Oberjun since it discovered him, so what charlie saw was almost the whole process of Oberjun from appearing to being killed.

Although charlie couldn't see Ou Bojun's cultivation level from the video, but like Abbas, he could tell from Ou Bojun's skill when he sneaked into the copper mine and the movements he tried to avoid shells that he was quite powerful.

Leaving aside whether he has mastered spirit energy or not, Abbas is simply no match for him in terms of his speed and explosive power.

If it was Abbas who came into direct contact with him, he might have been killed by the opponent before he recovered his senses.

Therefore, according to the opponent's strength, he must be one of the four earls.

charlie also breathed a sigh of relief, and returned a call to Abbas.

As soon as the call was made, Abbas said respectfully, "Mr. Wade, have you seen all the videos sent by your subordinates?"

"There is absolutely no power to fight back, and it is very simple and clean!"

Abbas hurriedly said, "Thanks to Mr. Wade for your good method, otherwise, you will make your subordinates want to break their heads, and they will never think of using close-in anti-aircraft guns to deal with the broken A super master of Po Qinghui (Benn)..."

Abbas was not flattering, but admired Charlie's foresight from the bottom of his heart.

Before Wanlongdian received missions all over the world, he had seen a lot of swords and fires. Abbas felt that he was not only strong personally, but also had a high level of command on the battlefield.

However, for such a long time, Wanlongdian never thought of using such a big killer as a close-in defense gun.

The Amazing Son In Law Chapter 5641 -

However, Charlie's phobia of insufficient firepower gave birth to this kind of cruel master meat grinder, which is indeed a genius-like idea.

Charlie was not complacent about his flash of inspiration, on the contrary, because he watched the video of Auber-jun disappearing into ashes, he also had a great shadow in his heart.

He felt that his strength might not be much stronger than Au Bojun.

Therefore, Ober-jun couldn't escape the strangulation of the three close-in defense guns, and he had no chance either.

This also means that I am still full of dangers in this world.

Among them, the greatest danger is arrogance!

It was because Ou Bojun was too arrogant that he didn't investigate the scene carefully.

If he is cautious enough, he will observe it secretly from a few hundred meters away. After observing the copper mine for a few days, I am afraid it is not difficult to find the strangeness in it.

Especially the three close-in defense guns were hidden in the glass room on the roof. If he noticed the glass room and became suspicious of the glass room, then he would not come in so rashly to die.

In fact, from charlie's point of view, if Cyprus were me tonight, if I was as reckless as Oberjun, I would definitely end up dead.

But as long as he is cautious enough and does not give the three close-in defense guns a chance to lock himself, it is not easy for the three close-in defense guns to hurt him.

charlie felt that he actually had many ways to eliminate the threat of the three close-in defense guns. One was to use the Thunderbolt, and the second was to use the Soul Piercing Blade.

Although the thunder caused by the thunder order cannot smash the steel cannon, it can at least completely destroy the circuit system of the cannon. If the cannon is out of power, it means that the battery of the electric car has been stolen. The huge turret and thick barrel couldn't move at all, let alone lock the target.

The power of the soul-piercing blade is even more arrogant. It cuts iron like mud. If it is used to greet the near-anti-cannon, it can cut off the near-anti-cannon in one blow.

These two methods can completely eliminate the threat of near-defense guns.

But the crux of the problem is that one must be cautious and careful enough to be able to detect the other party before the other party locks oneself.

Therefore, at this time, charlie also told himself in his heart that he must be cautious and cautious in his actions in the future.

Therefore, charlie said to Abbas, "Abbas, from now on, you must be absolutely cautious when dealing with the soldiers of the Wanlong Palace, and never leave opportunities for the enemy." Abbas immediately said, "Don't worry, Mr. Wade!

", the subordinates have personally experienced Yeling Mountain and Cyprus twice, and they will not dare to ask for more at any time in the future..."

charlie hummed, and said, "We must destroy all clues. In addition, all members of Xiao Qiwei (Bertrand) After evacuating, let them float on the sea first, and don't dock in the next six months, I will completely cut off the clues at sea!"
