

The Amazing Son In Law Chapter 5646 -

It is not surprising to the command center to find human DNA in such a large ruin.

But finding the warhead of the near-defense gun in such a place is really a bit too weird.

The discovery of the warhead of the near-anti-aircraft means that it has been attacked by a near-anti-aircraft.

Combined with the range of the near-anti-aircraft gun of less than four kilometers, even if the near-anti-aircraft gun is not inside the copper mine, at least it is not far from the copper mine when it fires.

Whether it is people in the copper mine attacking other people with close-in defense guns, or people outside attacking copper mines with close-in defense guns, it is incomprehensible.

At this time, an adjutant raised the idea, "Could the copper mine have suffered a terrorist attack?!" As soon as

this idea came out, it immediately won the approval of most people.

Over the years, terrorist attacks in the Middle East have never stopped, and those extremists will make some big noises every now and then. Could it be that they are targeting Cyprus this time?

However, the field commander had a different idea.

He couldn't help but said, "I consulted experts. This type of close-in defense gun made in the former Soviet Union weighs nearly two tons empty. If it is equipped with ammunition and a complete fire control system, it will cost at least three to four tons. Who of you has seen such a large gun?" Terrorists who have spent a lot of time? Besides, although the close-in anti-aircraft guns are very powerful, they only have a caliber of 30 millimeters. If they are used to hit buildings, hundreds or even thousands of shells may not be able to blow up a building, but here it has been blown up like this, it must have been blasted with a lot of explosives inside, since the terrorists have already blown up the entire copper mine into ruins, why bother to get a close-in defense gun?" "This...

" Everyone at the scene fell into deep thought immediately.

What the commander said makes sense. Although the close-in anti-aircraft guns are very powerful, compared with such a big movement like blowing up a copper mine, it is just a few bites from mosquitoes. There is no need for terrorists to carry two or three tons or even Three or four tons of big guys come here to do things.

Everyone suddenly entered a dead end.

However, excavation of multiple points at the site is still ongoing.

The excavation site of the anti-aircraft warhead was discovered just now, and more warheads were soon excavated, and soil containing human DNA was also found.

However, nothing similar has been found at other excavation sites.

The samples excavated from other excavation sites are almost all the wreckage of copper mines, without any existence related to the human body, and there are no clues related to the close-in artillery.

At this time, the sky had begun to gradually brighten, and Wu Shutong led several confidantes on their way to the copper mine.

Along the way, they found that there were continuous convoys of heavy machinery and military convoys heading towards the copper mine at high speed, which made Wu Shutong even more uneasy, so when the group of them was three kilometers away from the copper mine, they left. He found a hidden place and stopped.

Not knowing the current actual situation of the copper mine, Wu Shutong didn't dare to drive any further, so the group ran along the coastline at a very high speed.

Wu Shutong himself is a master of transformation. Although his actual combat ability is not as good as that of Ou Bojun, his body moves very fast, and it is difficult for ordinary people to find him.

The few people who accompanied him were also masters in the late stage of the Dark Realm, so the distance of three kilometers was not a problem for them.

The reason why they chose to advance on foot was that they were worried that the area around the copper mine had been surrounded and blocked by the Cypriot government. If that was the case, the cars they were riding in would have no chance to approach.

However, when the group of them sneaked all the way to the vicinity of the copper mine, they easily sneaked into the scene of the incident by virtue of their strength and skill far beyond ordinary people.

The Amazing Son In Law Chapter 5647 -

At this moment, Cyprus has mobilized a large number of personnel and equipment from multiple departments to come to support, so the people on the scene are mixed, and the troops in charge of security around them focus their energy on blocking media reporters from approaching, so they don't realize at all that Wu Shutong and the others have bypassed their marking.

When Wu Shutong came to the periphery of the copper mine quietly, he was completely shocked by the scene in front of him.

He never expected that this huge copper mine, which took decades to complete, has now turned into a ruin more than ten meters deep!

In the ruins at this time, a large number of construction machinery are being excavated at different points.

There are even several drilling machines at the scene. These drilling machines are constantly drilling into the ground, trying to bring out the soil components hundreds of meters deep underground to see if there is human DNA in it, so as to determine whether the bottom of the copper mine exploded. someone.

Wu Shutong was terrified and frightened. He took out his mobile phone to take some photos of the scene after a long pause, and prepared to send them back to the hero.

Afterwards, he saw a lot of marching tents set up in the surrounding air, so he decided to go in and find out about the current work progress of the Cypriot officials.

When he discovered that someone was sending samples to one of the marching tents one after another, he immediately leaned against it without making a sound.

Through the tarp of the tent, he heard the conversation inside.

One of them said, "Commander, we found the location where the anti-aircraft warheads were located before, and found many warheads one after another. So far, we have found more than 30 warheads, including four warheads with human DNA. In this sentence

, Wu Shutong was so shocked!

He couldn't help thinking to himself, "Close-up artillery? ! How come there are close-in defense guns in the garrison of dead soldiers? ! "

At this time, the commander said "Let the biological experts check the human DNA on these 4 warheads immediately to see if they are the same person." The

reporter said, "Okay Commander, I will arrange it now."

The commander said again, "By the way, There is one more thing."

The reporter respectfully said, "Commander, please tell me!

" It came from the outside of the mine, so the top priority now is that you must find the shell casings of the near-anti-aircraft guns for me!"

After that, the commander said again, "Order, let the excavation team at the site pay attention to whether there are near-anti-aircraft guns in the ruins. In addition, let the second team look for clues to the shell casings within two kilometers around the copper mine!" The

reporter immediately said, "Okay Commander, I will arrange it!"

As soon as the words fell, a voice came from the walkie-talkie " Report No. 31, Report No. 31, we found some shell casings of 30mm close-in anti-aircraft guns in the ruins, please ask weapons experts to see if these shell casings match the previously discovered warheads!" Hearing this, the commander was immediately

excited He got up and blurted out, "Send the shell casings to me immediately!"

A few minutes later, a staff member ran into the tent with several shell casings that had been squeezed and deformed in the ruins.

After receiving the photos, the long-distance weapon experts also gave preliminary opinions. These shell casings are indeed the shell casings of the Soviet-made 30mm close-in anti-aircraft shells, which are very consistent with the caliber and model of the warhead. Basically, it can be concluded that these shell casings It belongs to the same batch as the warhead.

After receiving the reply, the commander exclaimed, "These near-anti-aircraft guns are actually in the copper mine... That is to say, the copper mine did not suffer from a terrorist attack... They secretly equipped the near-anti-aircraft guns themselves!"

The Amazing Son In Law Chapter 5648 -

As soon as the commander said this, the surrounding staff immediately became extremely horrified!

And Wu Shutong, who was eavesdropping outside the tent, was even more scared out of his wits!

When he heard this, combined with all the things that happened before, he immediately guessed the general context of the whole thing.

Originally, they had long suspected that the Cyprus line had the possibility of leaking secrets.

At first they thought that the enemy should be eyeing this place, or that the Jiedushi here was colluding with the enemy internally and externally.

But now he realized that this place has already been completely controlled by the enemy!

If the enemy hadn't completely controlled this place, how could it be possible to quietly prepare such a big killer here as a close-in defense gun? !

The enemy even knew that Ober-Jun was coming, so they set up a death trap for him here in advance!

Combined with the two clues that Nakul Ou Bojun has disappeared and human DNA was found on the near-anti-aircraft shells at the scene, he also guessed in his heart that Ou Bojun may have been sieved by the near-anti-aircraft hidden here in advance by the enemy, even Beat to ashes!

You know, the Poqing Society has developed for so many years, and they have always been in the dark places of all enemies, and they have always been the ones who design ambushes, and they are the ones who plant their own eyeliner around the enemies. Never been infiltrated by the enemy.

But this time, everything changed drastically.

The enemy has actually sneaked into the interior of the Poqinghui quietly, and even without the Poqinghui's knowledge, occupied the entire garrison of dead soldiers, and then killed an earl who had mastered the aura!

At this time, Wu Shutong was not the only one who was horrified.

The commander in the tent, as well as his subordinates, were also speechless by this discovery.

Everyone was silent for a long time, and the commander's adjutant took the lead to break the silence, "Boss, this is just a copper mine, not a military base... If they are equipped with AK47, or even RG individual rocket launchers, I can accept and understand this. After all, copper mines also have their own security needs. It is not very strange to have some individual weapons and set up a security team..."

At this point, he couldn't help muttering, "But... it's just a copper mine, and it's just a copper mine. It's not a military base, why would they be equipped with such abnormal heavy weapons as close-in anti-aircraft guns... Isn't this incredible?!" "

Yeah..." the commander said with a sad face, "I completely miss the question you mentioned. It doesn't make sense..."

As he said that, his eyes suddenly lit up, and he said, "What did you say in the first sentence?"

The Amazing Son In Law Chapter 5649 -

“Me?” The adjutant thought for a while, and said, “It’s not surprising that I said there are ak47s here... ..”

The commander waved his hand, “No, let me add another sentence.”

The adjutant thought for a moment, and said, “I said this is just a copper mine, not a military base...” “

Yes!” The commander suddenly widened his eyes and blurted out Said, “That’s the problem! If it’s really just a copper mine, then it doesn’t need to be equipped with close-in defense guns at all!”

Then, the commander continued with some excitement, “But now that it is equipped with close-in defense guns, That in turn proves that this is not an ordinary copper mine! It is very likely that it is a military base that we don’t know about!”

“Military base?!” The crowd was even more shocked and speechless.

In my own country, I found a military base that does not belong to my own country, which really makes people feel incredible.

However, the commander’s judgment logic is very reasonable. The opponent’s ability to master the weapon of close-in defense guns proves that the opponent must not be an ordinary person, but definitely a militant with strong actual combat experience.

It is very likely that this copper mine is indeed a military base as a place where militants use close-in defense guns to defend.

Even if it is not a real military base, at least there are huge and unknown secrets here!

The commander said nervously, “No... this matter is of great importance, and I must report it to the president immediately!”

Soon, the commander directly called the president. After reporting the situation in detail, he respectfully Hanging up the phone, he told the few people around him, “Everyone, the president has orders. The collapse of the copper mine is very likely to cause turmoil. It must be strictly kept secret from the outside world. Do not disclose any information to foreign media, especially near-anti-aircraft guns.” You can’t even mention a single word about it!”

Everyone looked at each other, and the adjutant couldn’t help but said, “Boss, it’s not a big problem to block the news from the outside world, but it’s hard for us to hide such a big commotion here. What if there are voices of doubt in the country? What to do?”

The commander said, “I will immediately notify the people in charge of the surrounding cities and let them announce to the people in their jurisdiction that this copper mine has

been exhausted and has reached the design lifespan, and due to excessive internal mining, there are already Therefore, in order to prevent losses caused by uncontrollable collapse, this time it is a planned man-made abandonment, and all personnel in the copper mine have been evacuated, so that everyone does not need to panic.” This argument is reasonable, and everyone thinks it is

nothing Big problem, after all, only one person’s DNA was found here, which proves that before the explosion and collapse, the others had already evacuated, and no casualties were caused.

Since there were no casualties, this Things can naturally be suppressed.

So, everyone was relieved.

The Amazing Son In Law Chapter 5650 -

At this time, the commander ordered again, “You should notify immediately, all excavation and fixed-point drilling should be stopped immediately, and all heavy equipment should be withdrawn, and then mobilize fences to surround the entire copper mine, and at the same time strictly prevent outsiders from approaching!”

Everyone nodded quickly.

The commander said again, “In addition, we must find a way as soon as possible to transport a large amount of construction waste from the surrounding construction sites. Within 72 hours, the collapsed part of the copper mine must be refilled!” The adjutant asked, “Boss, even if we fill this place

up Yes, the warheads and shell casings inside are still there, and they may be discovered in the future!”

The commander said, “Don’t worry, the above means that after filling this place, it will be hardened immediately, and then this land will be sealed up. , send someone to guard it, and let a trusted department take over after the rumors pass, so you don’t have to worry too much about it, and hurry up and move forward with the matter at hand!” Everyone suddenly realized

.

If this is the case, you can basically prevent future troubles.

So, everyone said in unison, “Obey!”

After finishing speaking, they immediately left the tent and each began to follow the commander’s order.

At this time, Wu Shutong outside the tent was so nervous that he was sweating profusely, and his body couldn't help shaking.

In his heart, the panic has reached the extreme.

Such a major accident was the first time in the hundreds of years of history of the Qing Dynasty.

The point is, as the governor of the right army's governor's mansion, he was able to have the entire base of the dead soldiers stolen under his nose, and even ambushed here to kill Nakul Ou Bojun. I'm afraid death penalty is inevitable...

At this moment, Wu Shutong almost immediately made up his mind that he must not report the actual situation here to the British Lord!

At the very least, you can't tell the British Lord that the warheads and shell casings of the near-anti-aircraft guns were found here.

Not to mention let the Lord know that there is a person's DNA on the warhead of the near-defense gun, and that person is likely to be Uncle Nakul, Ober-Jun.

Because the near-defense gun is too sensitive, and the discovery of shell casings in the copper mine is enough to prove to the British Lord that this dead soldier station has long been secretly controlled by the enemy under his own rule. In that case, his own Dereliction of duty is too serious.

Coincidentally, the Cyprus officials are also planning to conceal the news of the near-anti-aircraft guns, and they will also fill up the entire subsidence area, which means that everything that happened here will soon be dead without evidence.

As long as he didn't say anything, the British Lord would not know about the existence of the near-defense guns.
