

## The Amazing Son In Law Chapter 6096 -

The two chatted until nearly seven o'clock, and the sky finally gradually brightened.

At this time, charlie Wade's short life experience of more than twenty years has almost been described, while Lin Wan'er (Alani) has just talked about the beginning of the 20th century.

Seeing that the sky was already bright, Lin Wan'er (Alani) said to charlie Wade, "Sir, it's almost time for us to leave, right?"

charlie Wade nodded and said, "You haven't detailed your experience of being ambushed by Wu Feiyan on Hong Kong Island and escaping death." Yes."

Lin Wan'er (Alani) smiled and said, "Young master, I want to hear it. I will explain it to you slowly after I return home."

"Okay." charlie Wade stretched out and said, "It's almost time to go to the airport."

After that, He pointed at the Mother of Pu Tea and said, "Miss Lin, you have experience in growing tea trees. Come and dig out the Mother of Pu Tea."

Lin Wan'er (Alani) nodded and was about to dig out the Mother of Pu Tea with her bare hands, but She just stretched out her hand, but suddenly stopped and exclaimed, "Look, sir! The leaves picked last night have grown!

", took a closer look, and sure enough, I found that the two places that I had pulled off yesterday had now grown two young leaves that were extremely fresh and even hung with dewdrops.

charlie Wade couldn't help but exclaimed, "This speed is fast enough, I didn't even notice that she grew the leaves quietly!"

Lin Wan'er (Alani) was also very surprised and said, "It's not unusual to pick the leaves and grow them again, but they grow back so quickly. It seems that the vitality of the mother of pucha is really tenacious."

charlie Wade smiled and said, "With her repairing speed, even if all her leaves are pulled off, she will definitely be able to recover in a short time. It can be back to normal."

Lin Wan'er (Alani) said quietly, "Sir, don't worry about her leaves for the time being, let her grow again anyway."

charlie Wade nodded and said with a smile, "Miss Lin, don't worry, I won't run out of water."

Lin Wan'er (Alani) stretched out her hands, and carefully picked up the loess around the mother of pucha, digging out her volleyball-sized roots and the soil wrapped around them.

dig it outAfter that, she immediately used the mineral water she carried with her to wet the mass of soil intertwined with roots, and then said to charlie Wade, "My lord, let's hurry up and go." "Okay!" charlie Wade agreed, and this

time Once, he didn't take the previous camping equipment, and together with Lin Wan'er (Alani), he returned to the parking lot with the mother of Pucha.

After getting in the car, Lin Wan'er (Alani) wrapped the root part of the mother of pucha in a plastic bag and carefully placed it by her feet, and then said to charlie Wade, "Young master is fine." charlie Wade was about to start the car when he suddenly saw a man in his sixties

. The old man walked out of the village with his head on his shoulders.

Seeing an off-road vehicle parked at the head of the village, the old man was a little puzzled and kept staring at the vehicle.

charlie Wade put down the car window at this time and asked him, "Master, we are staff from the Meteorological Department. Did you hear the sound of thunder and rain last night?" "

What thunder and rain?" The old man said dissatisfiedly, "You guys The Meteorological Department doesn't know if it's raining or not? They're still coming to ask me?"

charlie Wade said with a smile, "That's right, we fired the rain-increasing cannon yesterday, and we did hear thunder, so we came here early this morning. Ask about the rain last night, I wonder if you heard it?"

The old man waved his hand, "No."

charlie Wade asked him, "Could it be that you didn't hear it?"

The old man said angrily, "I woke up seven or eight times a night Once, the neighbor next door could wake me up by farting, can I still hear the thunder?"

As he spoke, the old man said again, "I was hoping that it would rain soon, it hasn't rained for more than a month, Tianchi The water level has dropped a lot!"

charlie Wade nodded, and quickly said, "Then let's go back and report to the leader, see if we hurry up and arrange another round of artificial rainfall."

The old man ignored him and walked away.

charlie Wade closed the car window, and said to Lin Wan'er (Alani) beside him, "It seems that it is indeed a hallucination, maybe that hallucination is only valid for you and me."

"It should be." Lin Wan'er (Alani) nodded, but her brows were still slightly furrowed and never relaxed.

## **The Amazing Son In Law Chapter 6097 -**

charlie and Lin Wan'er (Alani)'s return trip went smoothly.

The plane took off on time at 8:30 and arrived in Aurous Hill at 11 am sharp.

At noon, the two hurried back to Purple Mountain Villa. Along the way, Lin Wan'er (Alani) held the young plant of the mother of Pu Cha and did not dare to relax for a moment.

After returning to Purple Villa, Lin Wan'er (Alani) asked everyone in the villa to stay away for the time being. She and charlie went to the top-floor courtyard and immediately started to replant the young plants of the mother of Pucha tea.

And she looked in the yard and found that if other trees in the yard were not cut down, then the open space next to the hot spring pool would be the most suitable.

She pointed to the open space and said to charlie, "According to the normal growth rate of tea trees, the space here is probably enough for a tea tree to grow for ten or eight years. I just don't know how fast the mother of Pu tea grows. If it grows to a certain The scale and soil space here are not enough, so we need to change the place."

Charlie smiled and said, "Don't worry about it now, just settle it here for the time being. It can live in its last life. When it comes to fighting against the catastrophe, I will definitely not die just because of moving a few times in this life. Set it here first, and maybe move it to other places in the future. After you take over the Zhicheng Group and transform Erlang Mountain, Maybe it can be transplanted to Erlang Mountain."

Lin Wan'er (Alani) shook her head and said, "This tree belongs to the young master, and the slave family only takes care of it on behalf of the master. If it cannot be planted here in the future, the slave family will move it to where the master asks."

charlie said seriously, "You have been with her the longest. It's up to you to decide where to plant in the future."

Lin Wan'er (Alani) nodded, "Everyone in the slave family listens to the master."

As she said that, she took a small shovel for gardening and put it on I dug a hole about the size of a basketball in the soil next to the hot spring pool. I carefully put the roots of the mother of pu tea into it, filled it with the dug out soil, and then brought a wooden ladle of water. , scooped some room temperature water in the water tank next to the hot spring pool, and poured the water carefully along the side.

At this time, the noon sunThe light shone on the delicate green leaves, making them translucent. Lin Wan'er (Alani) looked at the perfect green leaves with a face full of information.

charlie looked at the seedling and said doubtfully, "It grew so fast last night, and the two missing leaves were restored to their original state without realizing it. Why doesn't it seem to have changed much now?" Lin Wan'er (Alani) said, "Maybe she saved

up All the energy is used in the process of breaking out of the ground, and then it will enter a long slow growth period. After all, it takes thirty years for a Pu'er tea tree to mature.” charlie nodded, “What are the effects of

her current leaves on ordinary people? , is worth a blood-spreading heart-saving pill, and is a rare treasure for ascetics. After all, no matter how much blood-spreading and heart-saving pills are eaten, it cannot be transformed into spiritual energy in the body;” “But this tea

tree The leaves naturally contain spiritual energy, which is particularly rare;” “

Even if I can refine many elixirs, so far, only Peiyuan Dan can increase spiritual energy, and other elixirs can only cure injuries and prolong life;”

“But refining Peiyuan Dan is too troublesome, and the demand for various materials is relatively high. It is simply unrealistic to refine it in batches and provide a stable supply.” “

If we wait until this tea tree becomes mature, with the normal production capacity of the Pu'er tea tree, At least hundreds of thousands of buds can be sent out every day. If she can still retain the attribute of containing spiritual energy by then, she will definitely be a huge wealth. With such a continuous source of spiritual energy, she can even use it to establish a sect. “. ”

Lin Wan'er (Alani) asked excitedly, “Doesn't that mean that with it, the young master will definitely be able to defeat Sara and Po Qing Hui in the future?”

charlie said seriously, “Sara's personal strength is very strong. After all, he has opened the Niwan Palace. Yes, she and I are not in the same realm at all

## **The Amazing Son In Law Chapter 6098 -**

Realm, give me another 20 or 30 years, I may not be her opponent, but with this tea tree, at least a batch of people like the Four Earls can be cultivated in batches If a cultivator with good strength can't win in quality, he will fight for quantity. Although the sea of people tactics is a little behind, it is not without chance of winning. “

Lin Wan'er (Alani) nodded slightly, looked at the seedling and sighed, “Now let's see if she can grow up quickly...”

charlie smiled slightly, “Be normal, she has her own fortune. “

With that said, Charlie said again, "By the way, Miss Lin invites Mr. Sun to come and talk to him about surveillance. Lin Wan'er (Alani) stood up and said, "

Master, wait a moment, I'll call Lao Sun."

Soon, Sun Zhidong (Meir), who was in a much younger body, trotted all the way to the top courtyard. As soon as he

entered the courtyard, he said respectfully, "Miss, Mr. Wade, what do you two want me to do? " "

Lin Wan'er (Alani) said, "Is there a way to mobilize all the surveillance in southern Yunnan these days without alerting anyone? "

Sun Zhidong (Meir) said, "Miss, as long as it belongs to the monitoring of the municipal government, it can be found in the system. My authority is high, and I can retrieve it without trace. You just need to tell me where the monitoring needs to be mobilized. Lin

Wan'er nodded, recalling that Sara appeared on Turtle Back Mountain at 10:00 yesterday morning, so she said, "First call me the surveillance cameras throughout Shuanglang." "

" Good. Sun Zhidong (Meir) said, "Miss, wait a moment. I will arrange for people to prepare. They will use a dedicated line to transfer all the video content to a cloud server. After the transfer is completed, you can view it on the server at will." Lin

Wan'er nodded slightly with satisfaction and said, "Hurry up and do it. I'll wait for your news."

Sun Zhidong (Meir) immediately said, "Okay, miss, I'll make arrangements right now. " "

.....

at the same time.

In the middle of the Shiwan Mountains, a highway winds like a long dragon, interspersed between countless mountains, and an off-road vehicle is driving through the mountains at high speed.

The woman driving the car had a serious expression, her hands clenched on the steering wheel, and she was obviously nervous.

But she was nervous not because of lack of driving experience, but because of the growing sense of familiarity given to her by the surrounding environment.

The woman driving is Sara.

Although she has not been to Shiwandashan for many years, she still knows the place well.

Back then, this place was a huge maze created by nature's miraculous craftsmanship. It blocked the Qing soldiers who surrounded her and Parker, and also brought them a rare opportunity.

But now, this mountain that was once difficult to walk has been completely connected by this highway. Countless tunnels and bridges have closely connected this place with the outside world.

However, although the expressway can change the traffic in Shiwandashan, it cannot change the special landform of Shiwandashan. Since ancient times, this place has been lined with mountains, vast and sparsely populated, and the transportation is extremely inconvenient. You often have to climb several mountains to see one. In some villages, people in some villages have never left the mountains where they live.

In recent years, with the continuous development of the economy and the advancement of urbanization, many mountain people who have lived in the mountains for generations have gradually moved out of the mountains. The population in the mountains is now smaller than that of Sara and Parker. .

At this time, Sara's car had just passed a service area, but she did not choose to stop. Instead, after driving for more than ten kilometers, she pulled over and parked the car in the emergency lane.

After parking the car, she slowly got out of the car, stood on the roadside and looked into the distance for a moment, murmuring, "This is it...Master, Sara is back to see you..."

## **The Amazing Son In Law Chapter 6099 -**

At this time, there are few vehicles on the highway.

Occasionally, a car passed by, and she didn't care about the woman who parked the car in the emergency lane.

Although parking is not allowed on the emergency lane in theory, the expressways in the mountains are less monitored, and the traffic flow is not large and the scenery is good, so drivers who are tired of driving often choose a scenic road to stop on the road. While looking at the scenery, everyone is not surprised.

The vehicles passing by in a hurry were not surprised by Sara, but Sara found it difficult to see the 100-meter-high bridge spanning two mountains and connecting two tunnels.

She knew that this was the closest point on the entire expressway to the place where the master retreated back then.

However, since there are almost no people living in this area, there are no highway exits for dozens of kilometers before and after.

In other words, if you want to reach your destination as quickly as possible, you can only jump from here.

Otherwise, you can only get off at the highway exit dozens of kilometers ahead, and then spend at least a day or two walking on the mountain road.

For Sara, it is easy to jump from here.

However, if people go down, if the car is still here, it will inevitably bring unnecessary trouble.

Any eager driver who finds a car parked beside a bridge, with no one on the inside or outside, is likely to think that someone is committing suicide here.

Once he calls the police, the police will definitely arrive at the scene as quickly as possible.

They will first find a way to confirm whether there are signs of people falling or even dead bodies under the bridge.

And if he jumped from here, it would be impossible to pretend that there was no trace at all. If the police discovered that someone had indeed jumped from

such a high bridge, and not only did the person not die, but he also disappeared without a trace. I will definitely do everything possible to get to the bottom of it.

In this way, they will use various photos of the car taken on the highway to determine the appearance of the driver, and then continue to push back through the clues when they came.

Sara also knows very well that since she has entered the world, even if she has great abilities, she cannot escape the various surveillance systems in modern society, so her idea is to leave behind image data. There are more than one billion people in China, and her own image The information here is like a drop in the ocean, and it is not dangerous. As long as you don't attract the attention of the domestic police or even higher-ups because of certain things, you can escape unscathed.

Therefore, what she wants to achieve now is how to disappear from this bridge with this car.

> She is familiar with the car.

Even on the island on the edge of Antarctica, she often drives various vehicles. Although she has not left there for so many years, it does not prevent her from knowing the technology of this world well.

Because she was very familiar with cars, Sara came up with a countermeasure after thinking for a moment.

Immediately, she closed her eyes slightly, and powerful spiritual energy surged out of her body and immediately merged into the off-road vehicle.

Immediately afterwards, she released her spiritual consciousness to explore the surroundings and waited silently.

It wasn't until no other people or vehicles appeared within the coverage area of her consciousness that she suddenly opened her eyes, pushed the off-road vehicle with her empty hands, and shouted "Get up!" As soon as she finished speaking, the off-road vehicle seemed to be blown by the wind

. It is like blowing up, and it will rise into the air after tumbling.

A strange scene also happened at this moment.

The off-road vehicle, which weighed more than two tons, seemed to be turned into paper at this moment, rolling and falling slowly.

Sara's spiritual energy has always tightly wrapped the off-road vehicle, causing the off-road vehicle to sink slowly at an extremely slow speed. However, this pure use of spiritual energy to control an object weighing several tons in the air also consumes a lot of Sara's spiritual energy, so When the off-road vehicle fell below the bridge deck, she immediately changed the aura that wrapped around the entire vehicle to only wrap around the off-road vehicle's fuel tank and battery.

At this moment, the vehicle's falling speed suddenly accelerated, and then it hit the ground with a loud bang, breaking many branches along the way.

Fortunately, both the fuel tank and the battery were protected by spiritual energy, so although the car was completely deformed and the glass was shattered, it did not catch fire and explode, so after a crash, the valley quickly became calm again.

Then, Sara jumped up and slowly landed on the ground.

There are many kinds of trees in the valley, and the off-road vehicle directly made a gap in the dense woods.

With a thought in Sara's mind, the spiritual energy wrapped around a large number of broken branches and covered the off-road vehicle tightly.

Then, she straightened her clothes and walked towards the depths of the mountain without looking back.

...

at the same time.

## **The Amazing Son In Law Chapter 6100 -**

All Shuanglang's surveillance videos have been transferred to a special cloud server by Sun Zhidong (Meir)'s subordinates.

After Sun Zhidong (Meir) gave Lin Wan'er (Alani) the address and key of the cloud server, Lin Wan'er (Alani) watched the surveillance video on a laptop with charlie Wade in her boudoir.

Although there was no surveillance in Guibei Mountain, Lin Wan'er (Alani) looked for the surveillance at the mountain pass based on the time Sara went up the mountain, and soon discovered Sara's figure.

Starting from this surveillance probe and working backwards to Shuanglang Ancient Town, all of Sara's routes are within the surveillance range.

As a result, the two easily found the off-road vehicle driven by Sara in the parking lot.

In China, it is possible for people to escape surveillance, but it is basically impossible for cars.

As long as it is a road where cars can pass, I dare not say that it will be monitored throughout the entire process, but there will definitely be major entrances and exits.

Moreover, the monitoring of road traffic has the function of license plate recognition, which can recognize the license plate number, so the seemingly large amount of video and image data can be converted into data with clear labels by the system and stored in the system. With

this layer of transformation, as long as you enter the license plate number, you can retrieve the videos, images and corresponding time nodes of the car that appear under all road surveillance.

Sara never thought that someone would predict that she would go to the south of Yunnan, let alone that Lin Wan'er (Alani) dared to play her role under her nose, so she never thought that someone would already bite her at this very moment tail, and began to look for clues along its own tail.

After only a few minutes, Charlie Wade and Lin Wan'er (Alani) got a detailed data, which included the time and place when Sara's car appeared in all traffic monitoring systems recently.

Charlie Wade ignored all the previous information and looked directly at the last one. The last information showed that half an hour ago, this car drove through the highway leading to Shiwanda Mountain in southern Yunnan at a speed of 120 kilometers per hour. service area.

The surveillance that captured the vehicle information is the main road surveillance outside the service area. This surveillance is just between the entrance and exit of the service area.

In other words, being captured by it means that the car directly skipped the Dashanzi service area and continued to drive towards the main road.

charlie Wade looked at the previous surveillance again. Node information, I found it strange that before this car was driving on the expressway at a speed of 120 kilometers, it would be monitored and recorded every 5 minutes or so, which means that the monitoring interval of this high-speed The distance is about ten kilometers.

Sara passed the last recording point half an hour ago. Based on her speed at that time, she has now continued to drive 60 kilometers.

However, no new records can be seen on the system, which proves that Sara's driving status has most likely changed.

So charlie Wade immediately checked the next monitoring location from west to east in the Dashanzi service area and found that the next monitoring location was 22 kilometers away.

If Sara had maintained a speed of 120 kilometers, she should have passed this surveillance area ten or twenty minutes ago, but her vehicle did not appear here, which means that she either reduced her speed to 50 kilometers per hour. below, or the car has been parked on a certain section of the 22 kilometers.

charlie Wade took a screenshot of this section of location on the satellite map, and said to Lin Wan'er (Alani) beside him, "Let's wait and see, if Sara doesn't show up at the next monitoring point, then she has probably left in the middle of this section of the road on the expressway."

Lin Waner said, "There is no service area or exit on this 22-kilometer expressway. If she leaves here, the only possibility is to leave the expressway on foot." charlie Wade nodded, and said, "Almost all here

are Viaduct and tunnel, if she wants to leave here, there is only one possibility, that is to jump directly from the viaduct."

Lin Wan'er (Alani) agreed, "It is impossible for the expressway to be built to the place where Shigong retreated by such a coincidence, and Sara must pass the expressway first. Find the closest point, and then abandon the car and go on foot."

Charlie Wade said, "So the place where your master retreated back then should not be too far from the 22-kilometer expressway."

Lin Wan'er (Alani) asked him, "My lord thinks we should how?"

Charlie Wade said, "The most enthusiastic answer is to kill her now to find her whereabouts, but from the actual situation, I am not as strong as her, and she has already seen us. If we appear in front of her again, we will definitely be suspected." , so my suggestion is to wait! If Sara abandons the car here, then we will no longer be able to track the car, and we will just wait in Aurous Hill for Sara to enter our sight again! "
