

## **The Amazing son in law ( charlie wade ) - The Amazing Son In Law Chapter 6342**

Late at night.

charlie parked the car in a roadside parking space and then disappeared at the end of the alley.

The Zhou Manor is located at the bend of a U-shaped river. The manor is just at the inner end of the U-shape. Therefore, the manor is not only at the end of the road, but also surrounded by water on three sides.

Not long ago, charlie remotely commanded Abbas and used high technology combined with close-in defense artillery to kill Jian Gongbo in Cyprus, so he knew very well that he would not be trusted tonight, so he did not head to Zhou's house rashly, but Choose to approach Zhou's house from the embankment on the other side of the river.

In the night, charlie moved silently while concealing his figure, while constantly using his spiritual energy to check the surrounding situation. When he was less than one kilometer away from Zhou's house in a straight line, he stopped and released more spiritual energy to attack Zhou. Conduct inspections within a few hundred meters of your home.

Soon, he discovered many Rothschild family men hiding in the surroundings of Zhou's manor. Some of these people were hiding in cars, some were hiding in river embankments, and some were even hiding on tree trunks. In addition, there was a speedboat parked by the river, and even this speedboat had people hiding on it.

charlie continued to explore and soon noticed the villa next to Zhou's manor. The villa looked almost light from the outside, but there were forty or fifty people inside, which looked extremely abnormal at first glance.

charlie immediately concluded that this should be the stronghold of the Rothschild family here, and the core members of the Rothschild family should be staying in this villa at this time.

Later, charlie carefully inspected the situation of the entire villa. There

are several snipers hidden on the top of the house. They are equipped with large-caliber anti-material sniper rifles. Although they do not have the almost

terrifying rate of fire of close-in defense guns, they are The power of a single shot is not much worse than that of close-in defense artillery.

In addition, multiple detection devices were installed on the roof of the villa, not only monitoring the Zhou family manor, but even the entire villa.

charlie knew very well that he could never get around this kind of professional detection equipment. Once discovered by it, he would be exposed immediately.>

So, how to sneak into the villa quietly has become charlie's biggest worry now.

Just when charlie didn't know what to do, a solution suddenly flashed in his mind

...

At this moment, in the villa next to Zhou's manor, Steve Rothschild was holding the curtains In the tight room, every move in the entire scene is monitored through monitors.

In the picture, the surrounding environment is all black and white. The black outlines are mostly buildings, roads and trees, while the white shadows are large and small. Most are human shapes, and a few are in the shape of birds or other small animals.

These human-shaped white figures are the Rothschild family's men lurking throughout the Zhou family.

On these white figures, each figure has a green dot. This is the identification friend or foe system that Hank is proud of.

Its principle is that the thermal imager uses thermal imaging to find everyone within the coverage area, and in this process, the identification friend or foe device worn by each person uploads their own location to the cloud server in real time, and the cloud server receives the information from each person. The identity and positioning of the person, combined with the thermal imaging pictures, can determine the corresponding identities of these white figures.

If the other party's identity and location are consistent and the system confirms the other party's identity, it will add a green dot on his figure to distinguish between ourselves and the enemy;

if someone enters the monitoring range without authorization, the system cannot verify the other party's identity and will immediately Mark it with a red dot and send an alarm to notify everyone.

Steve stared at the white figure on the screen, and said to his son Royce with some disappointment, "Your grandfather asked us to stare here, but I always feel that this is a bit inappropriate."

His son Roy

Si asked curiously, "Father, why do you say that? Where is the inappropriateness?"

Steve said worriedly, "Everyone else is blocking the water, land and air transportation routes, and we are the only ones here. Sit back and wait for the rabbit. If the rabbit doesn't come here, wouldn't our work be in vain?"

Speaking of this, Steve said again, "This is not an ordinary mission. This mission is about the family inheritance. If someone else If you seize the opportunity, everything will be ruined."

Royce asked quickly, "Father, what do you mean?"

Steve was silent for a moment and said, "Royce, I think the two of us need to divide the work. I'll stay here to guard the Zhou family. You can quickly go back and find other ways. You can also check out the current progress of others and see if you can get the Sifang Baozhu back before others." "

Okay. Father!" Royce nodded slightly, agreed respectfully, and said, "Then I will let the helicopter prepare now."

Steve took the lead and said, "I will make the arrangements, and by the way, I will tell you about Hank. "

As he said that, he picked up the phone and called Hank over.

After a while, Hank knocked on the door and said respectfully, "Master, this is Hank."

Steve said lightly, "Come in," and Hank opened the door and walked in, asking respectfully, "Young Master, what are your orders?"

Steve said, "Hank, please inform the helicopter that they will take off on time and return to New York in 20 minutes."

Hank said without thinking. "No problem, young master. Should you go back or the young master?"

Steve pointed to his son Royce beside him and said calmly, "I have some things that need to be done by Royce immediately. There is no room for delay."

Hank Nodding, he picked up the walkie-talkie and said, "Attention crew members, Master will take off to New York in twenty minutes. Please be prepared."

The helicopter's main pilot immediately replied, "Roger! We can take off in twenty minutes!"

Hank asked Steve again, "Master, do you have any other instructions?"

Steve asked, "You said before that we set up If there is a dragnet, then I want to ask you, is there any possibility that the dragnet will fail? Is it possible that someone comes in and out but these devices miss the picture?"

Hank smiled and said, "Young Master, any professional equipment we use, the number of simultaneous jobs They are all more than two sets. We have already set aside sufficient redundancy on this point. Even if any one of the detectors and radars on the roof breaks down, it does not matter, it will not affect our monitoring and security at all. , and as long as these devices are running, absolutely no one will be able to sneak here or sneak into the Zhou family under our noses."

Steve was relieved and was about to let Hank step back first. At this time, someone stood aside His son Royce asked, "By the way, Hank, you said that we have sufficient redundancy at the equipment supplier, so I want to ask, what would happen if there was a sudden power outage?"

Hank was stunned for a moment, then smiled. Said, "Our security system mainly relies on thermal imaging radar and various monitoring equipment. If there is a sudden power outage, these equipment will come to a standstill."

After that, Hank added, "But don't worry, young master, this villa has two The power supply lines belong to two different power supply service providers. As long as the entire power grid is not paralyzed, even if there is a problem with one of the power supply lines, the other line will be immediately replenished and the connection can be seamless."

Royce asked again . What if the other party destroys both of our circuits?"

Hank was startled, and quickly said, "Well...it shouldn't be possible. I've checked the circuits before, and they are all underground lines. They are very safe, and we There are also heavy guards here..."

Before Hank could finish the words "heavily guarded", his eyes suddenly turned dark!

He subconsciously asked, "Is there a power outage?"
