Steve said worriedly, "Everyone else is blocking the water, land and air transportation routes, and we are the only ones here. Sit back and wait for the rabbit. If the rabbit doesn't come here, wouldn't our work be in vain?"

Speaking of this, Steve said again, "This is not an ordinary mission. This mission is about the family inheritance. If someone else If you seize the opportunity, everything will be ruined."

Steve was relieved and was about to let Hank step back first. At this time, someone stood aside His son Royce asked, "By the way, Hank, you said that we have sufficient redundancy at the equipment supplier, so I want to ask, what would happen if there was a sudden power outage?"

Hank was stunned for a moment, then smiled. Said, "Our security system mainly relies on thermal imaging radar and various monitoring equipment. If there is a sudden power outage, these equipment will come to a standstill."

After that, Hank added, "But don't worry, young master, this villa has two The power supply lines belong to two different power supply service providers. As

Royce asked again . What if the other party destroys both of our circuits?”

Hank was startled, and quickly said, “Well...it shouldn’t be possible. I’ve checked the circuits before, and they are all underground lines. They are very safe, and we There are also heavy guards here...”
