

the Amazing Son In Law Chapter 6951

charlie smiled and said, "I have asked Helena to help find a suitable farm. After the renovation is completed, Miss Lin can come and stay occasionally. Besides, with Helena's help, no information will be left when entering and leaving customs, so there is no need to worry about being found by Sara."

Lin Wan'er nodded slightly. She really wanted to continue living here for a while, but when she thought that it would be difficult for charlie to accompany her like this time, this impulse weakened a lot.

At this time, Lin Wan'er's cell phone suddenly rang. She picked up the phone and pressed the answer button. The voice of Lao Zhang came from the phone: "Miss, I have found some new clues about the plane."

Lin Wan'er hummed and said, "Go ahead, I just happened to be with Mr. Wade."

After that, she turned on the speaker of her cell phone.

Although she knew that charlie could hear every word Lao Zhang said clearly without turning on the speaker, she still did something that seemed unnecessary. In her opinion, this was a respect for charlie.

On the other end of the phone, Lao Zhang said respectfully, "Miss, Mr. Wade, I found out that the plane has landed in South Africa. I also found out the client who commissioned the shipment and the details of the shipment."

After that, Lao Zhang repeated the information he had found over the phone in detail, which was basically the same as the information Sara and Jadiel wanted them to find.

After explaining the clues, Lao Zhang said excitedly, "Miss, I think the Po Qing Society must have a base in Nigeria, and it is likely related to oil extraction. So I checked the oil extraction companies of a certain scale in Nigeria. There are only more than 20 oil extraction companies with a scale of more than 100 people and an extraction area that can accommodate thousands of people. Among them, there are only seven near Lagos. In my personal opinion, there is a high probability that one of these seven companies is the base of the Po Qing Society. I have also verified that the industrial scale of these seven companies is very large, with an annual profit of at least 1 billion US dollars. If we can find it and eliminate the trouble forever, the Po Qing Society will also lose a large source of income."

After listening to this, Lin Wan'er looked at charlie, and then said to Lao Zhang: "Lao Zhang, you did a good job, but you can only follow this clue here. You don't need to continue investigating, so as not to expose yourself if you investigate too deeply. Master Wade will follow up on the follow-up."
