

the Amazing Son In Law Chapter 6953

Andre stood behind him and saw that he was frowning, so he said, "If the Grand Commander is not used to the environment here, I will find a five-star hotel for him in downtown Lagos. The three elders are already in seclusion in the underground secret room. I will keep an eye on everything here."

Wu Shutong shook his head and said calmly, "The Lord has told me to keep a close eye on the entire process and not to make any mistakes. If something goes wrong and I'm not here, I won't be able to bear the punishment from the Lord."

Andre lowered his head quickly and said in panic, "I was inconsiderate, please punish me, Grand Commander."

"Forget it." Wu Shutong waved his hand, sighed, and said, "It's not a problem to hold on for a few days, but it's really a test to hold on for a long time. I don't know if the person that Lord Ying is waiting for will come. If he comes, I don't know when he will come."

Andre said: "Grand Commander, even if it is the Lord, we don't know who that person is and where he is. If we just wait like a rabbit by the tree, we still don't know what will happen in three to five days, three to five months, or three to five years..."

Wu Shutong said with emotion: "Since the Lord has asked for this, how can we, the ministers, not obey? But General Yuan, don't be so pessimistic. At present, all the garrisons are silent, and only the clues here have been revealed. As long as the other party still wants to continue to be the enemy of the Poqing Society in secret, this is the only target he can find. I personally infer that the probability of him coming is still very high."

Andre added: "It's just that the Lord chose this place as bait, which is really painful. Last year, this place contributed more than 2 billion US dollars in profits to the Right Army Governor's Office, and the profits handed over to the Lord were as much as 1.6 billion US dollars. It is the most profitable industry of our Right Army Governor's Office. If there is any danger here, it is equivalent to losing a banknote printing factory..."

Wu Shutong nodded: "If the three elders really fight here, I'm afraid this oil field will be lost. Fortunately, we have a lot of such industries. Although most of them may not be as large as here, they are still accumulated and drip by drip. Losing an oil field will not have a big impact on us."

Andre couldn't help but say: "Grand Commander, there are countless ways to make money nowadays. It's not a problem for those engaged in technology to make hundreds of billions of dollars a year. Why don't we develop in these areas?"

Wu Shutong smiled. Although Andre was his confidant, he did not know the secret that only the descendants of the Wu family knew, nor did he know the true identity and background of the great leader Sara.
