

the Amazing Son In Law Chapter 6972

Helena smiled and said, "Then I'll wait and see your performance. If you perform well, let alone half a pill, even one or even two pills will be no problem!"

Howard didn't know that Helena was making empty promises for him. When he heard this, he felt as if he had received an extremely important guarantee and was instantly overjoyed. What he feared most was that the number of pills was limited. If one pill was sold, one pill would be less. What if he needed the pills again to prolong his life and found that they were not available at all, then it would be too late to save him. If Charlie Wade could sell him one or two more pills, it should not be a problem for him to live to be a hundred years old!

...

At the same time, Howard's son Steve was standing in front of Charlie Wade with a look of surprise on his face.

A few minutes ago, Charlie Wade told him his request, asking him to buy the largest private remote sensing satellite company in the United States.

Although Steve didn't know what Charlie Wade wanted to do with this kind of company, he could guess that Charlie Wade would use it himself, so he asked him: "Mr. Wade, will the company be handed over directly to you after it is purchased?"

Charlie Wade waved his hand: "After you achieve controlling stake, kick other shareholders out of the board as much as possible. Once everyone else withdraws, you will appoint a professional to be responsible for the daily operation of the company. I have the final say on which professional will be in charge. I will prepare the information for you at that time. You can announce him as the next CEO according to the information I prepare, and this matter will be completed."

Although Charlie Wade wanted to acquire the remote sensing satellite company, if he really acquired such an enterprise, he was afraid that the rounds of review by the FBI and the Department of Homeland Security would make the company lose all its advantages in an instant.

So Charlie Wade wanted Steve to hold the company as a white glove. The company's daily operation is to continuously update the global satellite map library. Whoever acquires the company will be able to obtain the highest-definition and most timely global satellite maps in the civilian field. This can continuously provide Ai with the latest satellite maps and help it further improve its database. "

Moreover, the company is headed by a person designated by Charlie Wade. What this means to Charlie Wade is that in the future, no matter where Charlie Wade wants to turn the satellite to look, he only needs to tell this person, and this person will be able to give

orders to adjust the satellite status as required and closely monitor the designated location.
