

The amazing son in law - The Amazing Son In Law

Chapter 7137

charlie Wade agreed with Lin Wan'er (Alani)'s guess.

He sighed and said, "The Four-sided Treasure Tower must want to pass some information to me, but I am worried that it is passing the information to me for my own good or for its own good."

After that, he said, "It passed me the handprint, but the spiritual energy from the handprint cannot be used by me, and it even cheated all my spiritual energy away. If this treasure tower has selfish intentions, then it is lurking in my body and wants to parasitize in my body. If this is true, it will be a big trouble in the future."

Lin Wan'er (Alani) smiled and said, "Young Master is a noble person of Shenglongge, and good people have their own blessings. I think this time may not be full of dangers, and it may become an opportunity in the future."

After a slight pause, Lin Wan'er (Alani) continued, "I know that Young Master's spiritual energy is not easy to come by, but I still suggest that Young Master try all the handprints in the Four-sided Treasure Tower again. What if it is a once-in-a-lifetime opportunity?"

charlie Wade was silent for a moment, and said, "It's not impossible to give it a try. Anyway, it depends on the situation. Its posture is that it just wants my spiritual energy but not my life. "

Then, charlie Wade said: "It's just that it needs spiritual energy, and the ring also needs spiritual energy. I don't have much Peiyuan Dan left. I plan to think of a way to gather some more materials in the near future, and use the cauldron of Taizhen Dao to refine an enhanced version of Peiyuan Dan. When the time comes, I will risk it to get 20 pills to solve these two problems in one go. "

Lin Wan'er (Alani) nodded and said: "You can tell me what materials you need, and I will help you think of a way. "

charlie Wade said: "There are two most difficult materials. One is ambergris that is more than ten thousand years old, and the other is the top-grade snow ginseng that is more than a thousand years old. "

Lin Wan'er (Alani) asked in surprise: "The age requirement is so long? I used to use ambergris as a perfume, but it seems that it was just separated from the sperm whale not long ago. The longest estimate is only a few decades. The timeline of ten thousand years is too long, longer than the history of human civilization..."

"Yes." charlie Wade sighed, "The history of human civilization is only more than 5,000 years old. The ten thousand year old ambergris can only have fallen from the body of a sperm whale that died naturally ten thousand years ago, or been left behind after the corpse decayed. No matter it was left on the seabed or on the shore, most of it has probably been corroded and worn away over the years. Even if some of it survived by chance, I don't know how many layers of sand and gravel on the beach and seabed have buried it."

Lin Wan'er (Alani) asked him, "How did you get the ten thousand year old ambergris, sir?"

Charlie Wade said, "I killed a villain who liked to raise Gu in Aurous Hill, and the ten thousand year old ambergris was obtained by accident from him." Lin

Wan'er smiled and said, "That's really accidental, but you don't have to worry, sir. I can think of a way to see if I can find out."

...

When Charlie Wade and Lin Wan'er (Alani) returned to Aurous Hill, it was already noon.

Lin Wan'er (Alani) had been out for many days, and she was thinking about the Mother of Pu'er Tea in the yard, so Charlie Wade went to Zijin Villa with her first. At the same time, he asked Don Albert to wait for him at Zijin Villa and drive him home in the afternoon,

so that he could complete the trick with his family. When she arrived at Zijin Villa, Lin Wan'er (Alani) told the servant Lao Zhang to find some ten-thousand-year-old ambergris for Charlie Wade. Lin Wan'er (Alani) has cultivated a lot of her own power and connections over the years. Although her power is not in martial arts and cultivation, she has accumulated a lot in all walks of life in society.

Then the two came to the top-floor villa. The Mother of Pu'er Tea has become stronger, and its vitality has not been affected in the cold winter.

At this time, the leaves of the Mother of Pu'er Tea are so dense that it is difficult to count them all at once. However, for a Pu'er tea tree, it is still too small at this stage. An adult Pu'er tea tree is several meters or even more than ten or twenty meters tall, with tens of thousands of leaves. The Mother of Pu'er Tea is the ancestor of Pu'er tea. If it had ample time to develop and grow, it would probably be much larger than the average Pu'er tea tree.
