

# The Amazing son in law Chapter 7641

Through this incident, he became more aware of charlie Wade's abilities.

Originally, he was extremely respectful to charlie Wade, mainly out of his fear and yearning for the Rejuvenation Pill. If the Rejuvenation Pill was given to his father, he would be able to be the crown prince until his death; if the Rejuvenation Pill was given to him, his son would be able to be the crown prince until his death in the future.

Firstly, he didn't want his father to get the rejuvenation pill, and secondly, he wanted to fight for more for himself in the future.

However, the incident on White Horse Island made him realize that charlie Wade's ability was not limited to the rejuvenation pill.

His strength lies in his strong personal strength and the potential supporting ability behind it.

What Bernard Arnault had gained this time was something that no wealthy person, including the Rothschild family, could even dream of.

Most of the nearly 10 billion people in the world have prejudices against the rich, because many people know that it is the rich who plunder their surplus value and encroach on their per capita resources and wealth, which makes them make a fortune.

In this case, even if they do not hate the rich, they will not have any special affection for the rich.

But through the White Horse Island incident and a series of subsequent operations, Bernard Elno became a wealthy man loved and supported by people all over the world. He became a wealthy man of the people, a wealthy man of the world, and a wealthy man of justice. This made other wealthy people envious, especially Steve. He even always imagined that if Charlie Wade could give him such a good fortune in the future, it would be great. It would be worth spending 10 billion! You know, donating 10 billion may not necessarily have such an effect.

Therefore, when he received Charlie Wade's call, he was particularly excited and asked excitedly: "Mr. Wade, what do you want me to do?"

Charlie Wade smiled and asked, "Steve, your family seems to have a deep involvement in the automotive industry?"

The shrewd Steve Rothschild immediately understood Charlie Wade's intention.

Bruce Automobile made such a big move recently, even inviting Tawana to hold 20 concerts in a row, which shows that Charlie Wade definitely wants to make this brand bigger and stronger.

If I call myself now, it must be about supply chain issues.

For these top wealthy people, their business acumen is countless times more sensitive than that of ordinary people.

So, he immediately said, "Mr. Wade, I've made the right choice for you when it comes to automotive matters! Ever since Henry Ford started developing the Ford production line a hundred years ago, the Rothschild family has invested in his company. Over the years, we've penetrated the entire automotive industry, from top to bottom. We have direct or indirect stakes in over 80% of the world's OEMs and parts manufacturers."

charlie Wade smiled and said, “It seems that you have guessed my intention. Then I won’t beat around the bush with you. When I am free, I will bring the person in charge of bruce Automobile to meet with you to learn from you. Regarding the supply chain relationship, please help me smooth it out.”

Sometimes, the supply chain tests not only bargaining power but also coordination ability.

When chips are in short supply, whoever can get sufficient chip guarantees will not be affected in their production. The same is true for the supply of large-scale equipment. When buying equipment, some companies have to pay first and wait in line for one or two years or even longer, but some companies just need to give a greeting and the spare parts of the equipment will be shipped to a port for loading.

The Rothschild family has an unparalleled position in the European and American manufacturing industry and can be called the father of the European and American supply chain. Many European and American governments cannot compare with it, let alone other companies.

charlie Wade did not need Steve Rothschild’s personal help. With his influence, he only needed to take hank on a tour of Europe, the United States, Japan and South Korea, meet with the heads of those supply chain companies, have dinner and chat with them. This would be enough to ensure that bruce Automobile could get the best resources and prices in these supply chains.

European and American societies, like China, are actually societies based on human relationships.

Steve Rothschild immediately said, “Hey, Mr. Wade, why bother you to come look for me? Why don’t you tell me a place and I’ll come find you! Anyway, I’m not very busy in Aurous Hill recently, so I have plenty of time.”

charlie Wade smiled and said, “The person in charge of bruce Automobile and I are currently at the final assembly plant, which is more than 200 kilometers away from Aurous Hill. However, we will be back later. How about this, let’s have dinner together at Heaven Springs tonight, and I’ll introduce you to each other first.”

Steve Rothschild agreed without hesitation and said with a smile: “No problem, Mr. Wade! I will go to Heaven Springs in advance to wait for you!”
