

The Amazing son in law Chapter 7696

Then, he sent another voice message: "If Stephen Thompson was ordered by your father to take care of you and protect you, then his duties are equivalent to those of an ancient minister entrusted with the care of an orphan. He should have done his utmost to protect you and, after you successfully ascended the throne, to assist you wholeheartedly. How could he suddenly disappear when you needed him the most? Not only did he disappear, but he also secretly plotted to get the willson family to leave you?"

charlie wade sighed: "Uncle, I think the same as you, there must be other people that Butler Stephen is loyal to."

Asher smacked his lips and said, "Tsk ts... That's strange! I know him. He was absolutely loyal to your father. Your father and mother are both dead. Who else could he be loyal to besides you? Being loyal to anyone else doesn't make sense!"

Second uncle Homula sent a voice message: "It's indeed illogical. From what I know about Stephen Thompson, he only takes orders from his brother-in-law, and at most from his eldest sister. Now that his eldest sister and brother-in-law are gone, he must be taking orders from Charlie. How could he do these things behind Charlie's back?"

Even Asher and Homula, who knew Lydia (Ava) (Charlie's mom) best, did not dare to imagine that Lydia (Ava) (Charlie's mom) was still alive at this time.

Even Li Yalin, who had solved unsolved mysteries throughout his life, did not guess that Lydia (Ava) (Charlie's mom) might still be alive when he saw the news.

After briefly analyzing the situation, he expressed his thoughts, saying, "I'm wondering, maybe Bruce wade knew that the Poqing Society would want him dead, so when he was arranging his affairs with Stephen Thompson, he had already made all these arrangements?"

Asher said, "Old Li, what you said doesn't make sense. It was indeed Bruce wade who arranged for Charlie to go to the orphanage, but it was definitely not Bruce wade who arranged for Charlie to marry the girl from the willson family. So how could he have arranged it in advance and let Stephen Thompson carry Charlie and take Charlie's wife away?"

Li Yalin explained, "I think it's very likely that he didn't simply leave Stephen Thompson to Young Master wade as a trusted minister, but rather gave Stephen Thompson certain powers, allowing him to privately form a team? After all, this was a well-planned and tightly coordinated undertaking, and it definitely wasn't something that a few people could accomplish."

"Although the core concept of this team still revolves around helping Young Master wade, the specific actions are carried out according to Stephen Thompson's subjective consciousness. When Stephen Thompson felt that the willson family girl and her parents staying with Young Master wade would indeed affect Young Master wade's revenge plan, it makes sense that he would try every possible way to get the willson family to leave Young Master wade."

Asher and Homula sent a thumbs-up emoji at the same time.

Asher said: “I think Lao Li’s analysis is closest to reality.”

Homula said, “I also support Inspector Li’s analysis.”

charlie wade also felt that Li Yalin’s analysis was correct. His father was far-sighted and left Stephen Thompson to carry out a mission to protect himself for twenty years. It was impossible for him not to give him autonomy. So, Stephen Thompson might have secretly established a team that obeyed him over the years. He did not tell anyone except him and his team members about the existence of this team, even he himself did not know.

So, he said, “Inspector Li, Butler Stephen has disappeared in Australia, but I suspect he hasn’t left yet. I need you to immediately instruct the AI model to search for Butler Stephen in the ground network system. I want to see if we can locate his movement path during this period.

Because of the huge investment, charlie wade’s ground network system has already spread to major airports, docks and stations around the world.

Vending machines in various countries have been acquired by the Wade family’s major shell companies around the world. The monitoring data of the vending machines is uploaded to the server of the vending machine operating company in real time. While being backed up in the server, it will also be synchronized to the AI model.

Every day, the AI model receives monitoring information on hundreds of millions of travelers around the world. The model will automatically record the faces captured by vending machines, and then automatically classify hundreds of millions of people based on different facial features.

Although it does not know everyone’s first name or last name, it can remember the appearance of everyone it sees and then convert their facial features into data. Each facial feature has its own database. Whenever other cameras capture this facial feature and the data matches, the information captured subsequently will also be classified into the database of this facial feature.

In this way, you can naturally grasp all the movements of a person.

For example, the system captured Zhang San at Jinling Airport for the first time. After knowing Zhang San, Zhang San will be captured by the system whenever he appears at airports in Yanjing, Tokyo, New York, London, Paris, and even Afghanistan, and the subsequent data will be automatically summarized.

In this way, Zhang San’s activity trajectory will be recorded.

With billions of people around the world, the amount of information collection, storage, and processing required would require an astonishing amount of computing power and storage space. Fortunately, charlie wade’s AI model has the world’s strongest computing power, so it can collect, store, analyze, and calculate information at will.

The information of hundreds of millions of passengers is recorded one by one by the AI model, but the information of many people may just be stored and will never be used in a lifetime, but once it is needed, clues will definitely be found.

Unless, he never uses public transportation.

The Amazing son in law Chapter 7697

But what charlie wade didn't expect was that the AI model did not match any relevant information about Stephen Thompson.

What charlie wade can be sure of is that all airports in Australia have their own vending machine equipment.

This means that Stephen Thompson has never used public transportation!

charlie wade suddenly felt a little flustered, because he did not expect Stephen Thompson to have such unfathomable abilities. When he entered Australia, not only did he not leave any entry records of his real identity, he did not even leave any video footage of himself!

I have used a fake identity to travel to other countries before, but in most cases, I had to take a plane to enter the country normally. As long as I got on a plane and walked through the terminal, it was impossible not to leave visual information.

Moreover, some vending machines are placed at the inspection areas of customs and airport security with ulterior motives. Everyone who comes here must take off their hats and masks, and their facial information will inevitably be collected.

The fact that there is no information about Stephen Thompson in the AI model proves that he definitely did not go through the airport terminal.

Li Yalin instantly felt the situation was difficult.

He asked charlie wade: "Master wade, has Mrs. wade been abroad recently?"

"Recently?" charlie wade said, "The last time we went abroad was around the Spring Festival when we went to the Maldives together."

Li Yalin asked again, "Did you separate when you went to the Maldives? Or to put it more bluntly, is it possible that Stephen Thompson secretly met Mrs. wade in the Maldives?"

"Impossible." charlie wade said, "Claire and I were inseparable during that time, and there was also a mercenary attack on the island. There is no way that Butler Stephen was on the island."

After that, charlie wade asked again: "Why do you ask this, Inspector Li?"

Li Yalin said, "First of all, I personally think that since he was able to convince Mrs. wade to make the important decision to leave Young Master wade, he must have met with Mrs. wade, and it must have been in a very safe and private place. He must have had a detailed discussion with Mrs. wade, using both reason and emotion. Otherwise, he would not have been able to persuade Mrs. wade."

“Secondly, if Mrs. Wade has only traveled abroad once recently, and this time she was with Young Master Wade the entire time, then this proves that Stephen Thompson’s face-to-face advice to Mrs. Wade did not happen abroad, but in China!”

“Given that Stephen Thompson just disappeared again in Australia, this suggests two possibilities: First, Stephen Thompson hasn’t left China since his previous disappearance; second, he had already left China when he disappeared, but quietly returned to China to persuade Mrs. Wade.”

“No matter which one it is, it shows that Stephen Thompson is much more powerful than we imagined.”

“Because, since our underground network system was built, we have never captured any information about him.”

“If it’s the first case, then he completely concealed his whereabouts when he left China for Australia this time;”

“If it’s the second case, then he left China for an unknown country the first time, returned to China from that unknown country the second time, and then went from China to Australia the third time. He managed to completely conceal his whereabouts each time.”

“Besides that, let’s talk about Mrs. Wade’s family. If he can take Mrs. Wade and her family, who have clearly left obvious traces of their lives, out of China without leaving a trace, then that’s even more unfathomable!”

“To have such capabilities, there must be an extremely large and powerful backing force, providing convenience in all aspects. This backing force may be more powerful than we imagine, even more powerful than us.”

Asher interrupted him, “Is that really an exaggeration, Old Li? Currently, Charlie’s assets, combined with those of the Ye and An families, wouldn’t be the best in the world, but they’re probably second only to the Po Qing Society and the Rothschild family. Stephen Thompson is just the Wade family’s steward. How could he possibly be more powerful than us?”

Li Yalin said: “Asher, this is like seeing a fresh, freshly chewed piece of gum on the moon. When we see it, we can’t think about who is so uncultured as to go to the moon and spit out gum. We should think about what kind of organization has the ability to send people to the moon, and have them chew and spit out gum in the ultra-high vacuum environment of the moon. This is terrifying.”

“From what I’ve seen, I personally feel that the power behind Stephen Thompson is no longer something that can be described as a team; it’s simply an empire!”
