

The Amazing Son in Law Chapter (Charlie Wade)

Chapter 2615

At this time, Hank sighed lightly and said with emotion: "Your mother's successful cases back then will not be finished at all. If you have the opportunity to go to Silicon Valley, you can find the boss of a top global group and tell him My mother's name is Ava. They will treat you as a guest and entertain you with the highest standards of etiquette..."

Charlie couldn't help sighing: "If I hadn't met you, I wouldn't know these things about my mother..."

Hank looked at him, smiled slightly, and said, "Your mother's vision and long-term planning are beyond our reach."

"Back then, we didn't even understand your mother's investment operations. Many companies she invested in did not seem to us to have any development prospects."

"Just like Apple. When your mother invested in it, we didn't think this company had any future. At that time, there was no iPhone or even iPod. Apple was already in a huge business dilemma."

"At that time, your mom had returned to China with your dad and gave birth to you, and Jobs had just returned to the head of Apple.

Everyone thought that Apple was impossible to turn over, but your mom knew that Jobs was going to raise funds, and it was not far away. Come here, I only talked to Jobs for an afternoon and decided to invest money in him.

"This kind of forward-looking, more than 99.9% of ordinary people, when placed in the market, are absolute masters and absolute strategists!"

Speaking of this, Hank smiled slightly and continued: "Even the Rothschild family, which has been in power for two hundred years, is in awe of your mother.

You don't know how much the Rothschild family hoped to marry the An family back then."

Charlie nodded lightly, and he finally understood why his father, Bruce, was able to fight the Rothschild family back and forth.

In fact, the strength of the Wade family is really not enough in front of the Rothschild family.

Just as Hank said, the family property created by the Wade Family's hard work over the years may not be as good as the income that Rothschild could get by investing in a few companies.

In this situation, the father can resist the pressure of the Rothschild family, and the help and aura of the mother and even the mother's family must be indispensable.

At this time, Hank looked at Charlie and said seriously: "So, I sincerely recommend that you go to the United States to meet your grandfather. If your grandfather is willing to help you, neither the Banks family nor the Wade Family is worth mentioning."

Charlie nodded, but still said very firmly, "Thank you, Professor Hank, but I still don't plan to see Grandpa.

I have not met him a few times. Moreover, after so many years, he is right. I may not have any affection for me. Besides, as you said, he had been stubborn about my mother's marriage to my dad back then, and maybe he didn't treat me very much."

Speaking of this, Charlie laughed at himself and said: "Although I have been just a poor pauper for many years, now I still hope to be able to go on step by step by my own ability, no matter it is the Banks family,

It's the Wade Family, or some other top family. If any of them needs to take responsibility for the death of my parents, then I hope I can rely on my own ability to defeat them all by myself!"

Hank sighed when he heard what Charlie said, and said: "Charlie, I understand your thoughts and your determination, but with the card in your hand, I want to do this, and It's a long way!"

With that said, he added: "Ocean shipping is an asset-heavy project, and the start-up capital may be tens of billions of dollars. I advise you to be more cautious."
