

# The Amazing Son In Law ( Charlie Wade )

## Chapter 3358-3359

Soldiers also began to enter the tunnel in an orderly manner under the command of officers at all levels, and the soldiers in the construction team and the engineer battalion that were just under construction began to set up all the equipment as quickly as possible.

At the same time, the scouts on the front line sent back news that the opponent was not moving fast.

Although armored vehicles can maneuver quickly, most of the thousands of soldiers can only rely on walking.

Moreover, the truck was loaded with a large amount of materials. Towed artillery is still dragging behind. In this winding mountain road, the speed of action is not much faster than running.

This made Hunter (Hamid) even more relieved.

The opponent is coming fiercely, but the coming is also quite slow.

It may also be in the eyes of the other person. He is already the flesh on their lips, so the other party is not in a hurry.

And the other party is not afraid of him fleeing at all, because the other party's purpose is to destroy its base and destroy his troops as much as possible. As for his own life and death, it doesn't matter.

For opposition forces like Hunter (Hamid), the base is everything to them. Only with a base can they have a foundation for their lives. Once they lose the protection of the base. They will be like bereaved dogs and can only be beaten passively.

And if Hunter (Hamid)'s soldiers are eliminated in seven or eighty-eight, then Hunter (Hamid) will not be able to turn over. When that happens, he can only hide and run for his life, and he will not have the ability to launch any counterattacks. Or bring any threat.

Therefore, the crusade troops were not in a hurry. They also knew that Hunter (Hamid) had discovered himself, but they didn't care at all.

But what they don't know is that the current Hunter (Hamid) is no longer the previous Hunter (Hamid).

Hunter (Hamid) now has the strength to resist them!

The arrogance of the other party gave Hunter (Hamid) more than an hour of breathing time.

After more than an hour, everyone in this base evacuated into the reverse slope tunnel.

All the houses inside the base have become furnishings, and all the valuable and useful things inside have been taken away.

Some large-scale power generation equipment that was too late to be dismantled, but also because of more than an hour's time, were methodically hoisted by helicopters and sent into the reverse slope tunnel. There were also a few pieces of engineering equipment that could not be put in, so they were directly picked up. The helicopter flew north away from the base.

Hunter (Hamid)'s soldiers. At this moment, check the guns and ammunition methodically in the reverse slope tunnel, and be ready to attack at any time.

Everything was ready, and the frontline scouts sent back the latest intelligence. The opposing army had stopped in a gentle zone 20 kilometers away in a straight line. At the same time, the opposing 30 towed artillery began to deploy on the spot.

Hunter (Hamid) knew very well that this should be the artillery position chosen by the opponent. After they deployed the artillery and prepared for the artillery, the first round of artillery would begin.

While the artillery was unfolding, the enemy left more than 2,000 soldiers defending the artillery position, and the remaining more than 5,000 infantrymen. Immediately after the armored vehicle cleared the way, he continued to head towards Hunter (Hamid)'s base!

After Hunter (Hamid) heard the news, he felt aroused in his heart, and he thought to himself: "The infantry really continued to get close to me! They must be ready to shell me with artillery first, and when the shelling is over, the more than 5,000 infantrymen will be near the city. At that time, it should start a charge! This should be the infantry coordinated tactics that Charlie said, well, let's see how can beat your infantry back!"
