

# The Amazing Son In Law ( Charlie Wade )

## Chapter 3473 )

Charlie heard this and said, "That's why they want to establish a base of their own in the Middle East, and then find a way to arm themselves with some heavy equipment from here, right?"

"Yes!" Hunter (Hamid) nodded and said seriously: "The perennial war in the Middle East is itself a paradise for mercenaries. Although I don't know how much output value the mercenary industry has every year, at least 60% of it is in the Middle East. "

Speaking of this, Hunter (Hamid) said again: "Don't look at Africa, it's messy, but to put it bluntly, those war-torn African countries are all poor and dying. Mercenaries fighting in that place really can't make much money. Big money, but the Middle East is different. Many countries in the Middle East are very rich. Even Iran, which has been sanctioned for a long time, is actually rich and rich, and they all have demand for mercenaries and are willing to spend money. Said it is a huge market."

"Moreover, there are a lot of heavy weapons and equipment in the Middle East. It is almost an exhibition hall of Eastern and Western weapons. Among them, Russian-made weapons and equipment are the most. As long as you have money, there is nothing you can't buy. A batch of heavy equipment is built locally in the Middle East. After that, the combat effectiveness in the Middle East will rise sharply and it will definitely be very popular."

Charlie asked a little puzzled: "Why do your government forces cooperate with them? Are you afraid that Wanlong Palace will affect the security of your country in the future?"

Hunter (Hamid) chuckled and said, "For them, the Wanlong Palace is much better than us, the opposition. After all, we are fighting them with real swords and guns."

"That's true." Charlie paused for a moment and asked him again: "By the way, do you know who the highest commander of the Wanlong Temple in Syria is?"

Hunter (Hamid) said immediately: "The Greenwood Wolf King, one of their four great kings, is said to be a Chinese."

Charlie nodded lightly, and said lightly: "I plan to find an opportunity. I will meet him for a while in the past."

Hunter (Hamid) was very nervous and blurted out: "Brother, don't be impulsive, but I have heard that every one of the four kings of the Wanlong Palace is a top master, and not only do they have The King of the Four Great Wars and hundreds of warriors with different star ratings are very powerful. If you rush past, the danger is too great!"

Charlie smiled and said: "I don't know what's wrong, I always have a feeling that there may be many intersections between me and this Wanlong Palace in the future, and may even be a big enemy of mine in the future;"

"It's fine if I'm in the country. Since I'm here this time, I have to find a way to feel their way."

"Besides, I want to take Su Shoudao away. There is only one way to go, so I have to go this time anyway. It's best to tie him out."

Hunter (Hamid) said anxiously, "Brother, there are at least 15,000 people around me in the Wanlong Temple. Even if the Greenwood Wolf King is on the front line, he must be in the hinterland of their army. I don't know how many soldiers guard there, you It would be as difficult to find him in the army, not to mention that you still want to tie him out of the army. Isn't it even more difficult?"

Charlie smiled slightly: "It's okay, I don't have to sneak into his army to find him out, I can go over and see him swagger."

Hunter (Hamid) exclaimed: "What?! Are you crazy?! As long as you get out of here, their soldiers will definitely shoot directly, and they won't give you a chance to speak!"

Charlie smiled and said, "Don't worry, I haven't finished speaking yet."

Speaking of this, Charlie paused slightly, and then said: "In this way, you will let the wind go today and say that you hope to have peace talks with them. The content of the peace talks includes but is not limited to shaking hands and making peace with them, or if you have conditional intentions. The Wanlong Palace and the surrender of government forces;"

"But as for the specific conditions of surrender, you need to sit down and talk with the Supreme Commander of the Wanlong Temple face to face. I believe they will definitely be interested."

"When the time comes, you will tell them that you will send a negotiator to their site and consult with their top commander."

"And I am your negotiator!"
