

The Amazing Son In Law (Charlie Wade)

Chapter 3525)

This is also the reason why all the pill that Charlie refines can be melted in the mouth.

Because it's all made of medicine essence, without any other impurities.

However, this method of refining pharmaceutical materials is cumbersome and consumes energy and aura, and it is impossible to achieve mechanized operation at all.

Therefore, similar immortals are naturally more precious.

The pill that Charlie refined before, only had two kinds of blood-saving heart-relief pill and rejuvenating pill.

These two medicines do not have aura in themselves.

In the "Nine Profound Heaven Classics", this kind of pill that does not have aura is divided into ordinary pill. Ordinary pill is divided into different functions according to different functions, such as some healing medicines, some tonics, Some are life-enhancing drugs.

The pill that possesses aura is collectively classified as a pill.

Once you enter the system of spirit pills, you will have the corresponding rank.

From the first to the tenth rank, the spirit pills are divided into ten levels with distinct levels.

And the medicinal pills at each level are divided into upper, middle, and lower levels according to their purity and the level of efficacy.

The first grade to the tenth grade is equivalent to the grade of the student, for example, from the first grade of elementary school to the first grade of high school.

The upper, middle and lower third class is equal to the student's performance.

And Peiyuan Pill is the most introductory kind of spirit pill, belonging to the first-grade spirit pill.

Charlie refined the spirit pills for the first time, and the two main medicines were too rare, so he was also a little nervous in his heart, for fear that he would ruin these treasures of heaven and earth and earth if he was not careful.

Therefore, he took every step very carefully.

After refining all the less important medicinal materials to make me more comfortable with medicinal materials, then I began to refine the other three medicinal materials.

Time passed by Charlie unconsciously.

After he extracted the essence of Ambergris, the sky was completely dark.

Claire called Charlie, and Charlie realized that it was already past seven o'clock in the evening.

He first carefully stored the essence of the medicinal materials, and then connected to Claire's phone.

Claire asked him on the phone, "Hey, husband, where are you?"

Charlie said hurriedly: "My wife, I'm busy with something outside. Tomorrow I will go to Eastcliff to show others Feng Shui. I need to debug some materials for drawing symbols in advance."

Claire also heard Charlie talk about it before. There are actually a lot of exquisite seals used in Feng Shui, especially the cinnabar ink used in drawing symbols, which requires a lot of materials to be mixed together to have an effect, so I didn't think much about it. , So he asked him: "Then do you still go home for dinner at night?"

Charlie said: "I definitely can't go back to eat tonight, you and your parents should eat first."

Claire asked him: "Then you remember to eat something yourself, don't forget to eat when you are busy."

"Okay." Charlie said with a smile: "My wife, don't worry, I'll eat something casually in a while to fill up my stomach."

"Hmm." Claire said with a smile: "Then I won't bother you, you come back soon."

"Okay!" Charlie said: "I am about to proceed to the critical stage of making cinnabar ink. This must be done in one go and cannot be affected, so I will turn on the airplane mode of my phone later. If you can't find me, Don't worry, I will go home straight after I finish my work."

Claire said very understandingly: "Okay, go and work! Come back soon if you are busy!"

"Good wife."

After hanging up Claire's phone, Charlie turned on the phone's flight mode, and then immediately reinvested in the refining of Pei Yuan Dan.

The essence of the medicine has been refined, and now it is the most critical stage of refining the pill of cultivation!
