

## Ball God 251

### Chapter 251

Planet Sala was located on the east side of the galaxy. It was a light green Middle-Level Planet.

The planet was not very large, but because it was at the intersection of several shipping routes.

It was the most prosperous trade planet in the nearby star fields and was one of the more critical planets in this galaxy.

Today, there were three strangers on the pale green planet.

Muyang held a little loli in each of his left and right hands, leading them around the street.

Perhaps because she had never left Planet Sala, Melia showed strong curiosity and felt exceptionally rare in everything she looked at.

“Uncle, look at those aliens; they look so strange.” Melia pointed with her finger at the aliens with six arms not far away.

Muyang smiled, “Don’t make a fuss. There are all sorts of strange races in this universe. Life forms with upright limbs like us are collectively called humans, and they just have a few extra arms.”

Melia smiled and looked around, happily grabbing the corner of Muyang’s coat. Seeing the calm face of Melis beside her, she asked, “Melis aren’t you curious?”

Melis shook her head, “What’s so curious about? I go out on missions all the time with my older sister from the academy. I’ve seen even stranger aliens.”

Melia cried out, “That’s great. Wayne is so biased. He lets you go out on missions but never allows me to leave Planet Sala.”

“I wonder why.” Melis licked her bottom lip.

Muyang smiled at Melia. The reason why Wayne didn’t allow Melia to leave Planet Sala was known to him. It was because he was afraid that she would lose control of her outburst out there.

Thinking that Melia might be a “Legendary Super Saiyan” or a “Mutant Saiyan,” Muyang’s heart dropped. Melia’s situation was precarious; she needed to be treated as soon as possible.

Muyang asked Melis in a low voice, “Melis, you and Melia’s mind are connected, so do you usually have any sudden emotional outbursts or uncontrollable situations?”

Melis tilted her head in thought and said in a lovely, clear voice, “No.”

“Nothing out of the ordinary at all?” In the meantime, Muyang knitted his brows.

“Nothing.”

Melis thought carefully, not knowing what Muyang was going to ask. She then suddenly said, “I remembered, strange things seem to have happened. I heard from a senior sister who was on a mission together said I’ve suddenly fainted several times while on a mission. Then after examination, nothing is the cause.”

“Did you faint for no apparent reason?...”

Muyang jotted down this situation of Melis and looked at the twin sisters seriously. It seemed that both sisters had some problems with the state of their souls.

Perhaps due to one soul splitting into two, there was some residue on their souls.

“Gaia’s Spring of Life has a strengthening effect on both soul and body; try to drink them later.” Thinking this in his mind, Muyang did not dwell on this aspect.

Next, he brought the sisters to have a good time on this trade planet.

On top of the trade planet, besides providing areas for the aliens of various planets to trade goods with each other, tourism was also the pillar industry of this planet.

Muyang took the two little girls to play in the playgrounds of the major cities. The sisters, who had never been exposed to these before, laughed happily and let out silver bell-like laughter from time to time.

“Uncle, look at those fish; they look good!”

In an undersea city, Melia’s little face was glued to the glass window. Her eyes were glaring at the fish swimming around in the deep sea, continually shouting at Muyang.

It would be a big mistake to say that she liked those fish because judging from the saliva being secreted from the corner of Melia’s mouth at this time, she was clearly hungry.

“Do you want to eat fish?” Muyang’s palm over Melia’s fluffy hair.

“Mmm.” Melia nodded busily, touching her belly, “I’m hungry.”

“Uncle, I’m hungry too,” Melis called out as well.

Muyang laughed, “Since you’re all hungry, let’s stop playing. I’ll take you to a big meal.”

“Uh-oh!”

“Let’s go eat a big meal.”

The two little girls danced around; the expression of their emotions was straightforward. Melia jumped straight onto Muyang’s back and let him carry her on his back. Her sister’s eyes flashed, and her body floated to follow Muyang.

Muyang laughed softly, looking at the sisters. It was as if he saw the appearance of Mexia as a child.

.....

The meal was in full swing that only the dishes on the table kept piling high, and the two people who were eating like crazy had no intention of stopping.

The surrounding waiters and aliens had been stunned. They had never seen a race that could eat so well.

The crackling and clashing of chopsticks continued. Soon, the new food entered the twin sisters’ stomachs again.

The plates piled up again in a large stack.

Muyang watched with interest, taking out paper towels to wipe down their grease-stained faces. He then shouted to the waiter, "Quickly bring up two more servings of the most delicious food."

"Oh, yes!" The waiter was stunned and slowed his response by a beat.

"Eat slowly. No one's stealing from you."

Melia took one bite of steamed bun, then grabbed another roasted chicken and tore it apart. Suddenly, she was choking and punching her chest hard. When Muyang saw her, he quickly stroked her back and handed her a cup of water.

Melia hiccuped, "Oh, so refreshing. Uncle, do you not know that a big mouthful of meat is more delicious."

Melis nodded along, "Exactly."

Muyang shrugged, "I really didn't know that."

The Saiyans were a big eater and could consume a hundred servings of food in one meal.

If it were anyone else, they wouldn't be able to afford to feed these two snackers. However, to Muyang, money and everything else was nothing, so it wasn't a problem as long as these two girls were happy.

It could be seen that Muyang was really pampering them.

It was said that a daughter was his father's lover in his previous life. She chased him from his previous life to this one, reluctantly.

This was quite a wonderful thing to say and quite divine at first glance.

Anyway, Muyang was already almost unable to tell whether he was raising a wife or a daughter.

After gorging themselves, Melia and Melis touched their propped up little bellies and lay down on the chairs very contentedly.

They hadn't eaten so much for a long time. In the past, when they were on Planet Sala, Wayne would control their food and wouldn't give them such a big meal at all.

Muyang was a little suspicious that Wayne was just trying to get them off as quickly as possible because these two girls were so good at eating.

"After eating and playing, you guys should practice well next. There are still quite a few Springs of Life in my Accelerated World; you guys should go in and take a sip when you have time. It will be good for your growth."

Melia blinked, "Can it help us grow up quickly?"

Muyang was startled and smiled, "Of course, that's impossible. You guys aren't even at the developmental stage yet."

Melia was a little disappointed. She was envious of Mexia's two bionic human bodies.

“Nah, uncle, what kind of person was I in my past life?” Melia was interested in her past life and had something to find out.

Now even Melis was listening intently with her ears perked up.

“Your past lives?”

Muyang remembered Mexia’s bright smile, “Mexia is a very naive and straightforward person. Sometimes she still has a little bit of a heart, but it will be enjoyable to get along with her...”

He then told them in detail about his life with Mexia.

Melia nodded her head in satisfaction after hearing it, “That’s just like me, worthy of my former life.”

Suddenly looking up and down at Melia, Muyang added, “I don’t know about the future, but there is one thing that is different about you guys now.”

“Which part is different?” Melia asked with interest.

Muyang laughed, “Mexia is a very filthy girl. The reason why you have become two people may be that there is some ulterior motive existing in her heart.”

Of course, the latter sentence was a joke.

“Filthy?” Melia tilted her head.

“What do you mean?”

Muyang said, “You don’t need to know. When your memories awaken a little in the future, you’ll naturally understand.”

“When will that be? Tell me quickly!” Melia was itching, and under her influence, it was as if there were also many ants crawling in Melis’ heart.

Muyang laughed, “You guys are still young, I can’t tell you. If you want to know this, at least wait until you grow up.”

When Mexia’s memories awakened, there would be no need for him to tell them; they would understand.

## Chapter 252

In the following days, Muyang took them to play while heading to earth in the North Area.

In general, his relationship with the twin sisters was pleasant. For the two young girls, Muyang gave them his utmost affection. Not only teaching them the training but also taking care of their lives.

Fortunately, they were very obedient and obeyed Muyang’s rules.

In addition to guiding the twin sisters’ training, Muyang also had to practice. They would enter the Accelerated World and use the time flow to make up for the time lost on road trips.

Taking them all the way to go from Planet Sala to the North Area, Muyang wasn’t in a hurry. From time to time, they stayed on beautiful planets for a while.

When they encountered beast planets, they would take them on hunting trips, making the ordinary days were full of fun.

.....

Two months later, an imaginary shadow flashed in space. Muiyang brought the sisters back to the galaxy where the earth was.

South Area, a cold and snowy planet.

“Uncle, what is this place? It's so cold!” Melia harrumphed out a breath of cold air. Soon, a white cloud of air condensed in the air.

This planet's temperature was about twenty degrees below zero. The twin sisters with thin bodies couldn't endure the freezing environment.

“We have now arrived at the galaxy where the earth is located. This should be a planet in the South Area.” Muiyang judged based on the Astro-chart in his brain

Because he was moving with Instant Transmission to find powerful ki to teleport, the route deviated from the standard spaceship navigation route. The exact location was not very clear to Muiyang.

Seeing the shivering appearance of the sisters, Muiyang waved his hand. Soft power was released and enveloped their bodies, making the shivering chill disappeared without a trace.

“No way. As a Saiyan Warrior, you guys don't have enough resistance to the cold.” Muiyang shook his head, “So, to strengthen your resistance, I decided to stay on this planet for a while.”

“Uncle, don't be so cruel!” Melia immediately stared up with dissatisfaction.

Muiyang eyed Melia, “Can you not call me uncle? I'll be your husband later, so call me senior brother.”

“No, it's still early!” Melia was serious.

“Ugh, Melia, if you don't listen, you will be punished.” Muiyang made a gesture for spanking Melia, but of course, he wouldn't actually do it.

A pinch of his finger removed the protective layer around Melia and immediately put her in the middle of the snow and ice again.

“Woah, it's so cold.” Melia shivered and kept stomping her feet.

“Ah-choo!” Melis was protected by Muiyang's ki but still sneezed uncontrollably.

“Be more obedient for me next time.” Staring at Melia fiercely, Melis was much more obedient than Melia.

Muiyang couldn't let her sister's body catch a cold because of the mistake she had made.

However, just as Muiyang was about to add the protective layer back on Melia, he heard a popping sound. Melis fell to the ground as if she had lost consciousness.

Muyang, who saw Melis faint on the ground, went forward to hug her in his arms, “Melis, what’s wrong with you?”

“It’s hot!”

Melis’s body seemed to burn, emitting searing heat all over her body. The ice and snow on the ground were affected by the heat and melt, rising into a hazy mist.

“What the hell is going on? Why did Melis suddenly faint?” Muyang hugged Melis in puzzlement.

When his brain suddenly remembered that Melis had said she had fainted a few times before, did that mean-

This couldn’t be a coincidence, right?

The vision quickly swept over to Melia’s side and saw that Melia’s body was also burning with blazing heat. Her body’s ki became extremely unstable, and she was puffing out.

A golden and green light mixed with ki flames burning on Melia’s body’s surface, and terrifying ki rose.

Melia’s delicate body had floated unconsciously.

The golden and green lights were continually shifting, and the energy was also rising.

50,000! 100,000! 150,000! .....

Melia’s energy quickly surpassed 750,000, and it was still rising.

There was an invisible ripple spreading out with Melia as the center. It was so fast that it spread throughout the entire planet in the blink of an eye.

Soon, the whole ice planet trembled violently.

Mountains and rivers crumbled, ice and snow separated, and land plates began to fracture under the impact of the enormous energy.

“Is this situation of Melia’s a violent storm?” Muyang wasn’t sure.

Wayne had said that Melia had stormed three times before, and each time she had almost demolished the palace. Now Melia’s ki was increasing, so it should be the storming that Wayne had said.

Muyang quickly flew high into the air while holding Melis in his arms, observing Melia’s changes.

This was the fourth storming. A total of four stormings in eight years, it would be a storming once in two years!

“Ah!” Melia’s mouth let out a low growl, and her eyes opened.

Her original turquoise eyes tinged with a layer of golden light, and her eyes turned completely golden.

“Golden Eyes. It’s really the ‘Legendary Super Saiyan’!”

After seeing Melia's golden eyes, Muiyang's face changed violently. He then felt a powerful force from Melia's body, which was far beyond imagination.

1.25 million power level. The strength of Melia in her storm state was exactly 50 times more than the original!

It wasn't a Super Saiyan transformation, but it wasn't bad either.

It was the power that made Melia lose control.

No, Muiyang suddenly shook his head. If it was the "Legendary Super Saiyan," just like Broly, it shouldn't be that easy to lose control.

Muiyang remembered that Broly's new version would only go berserk when he turned into grass green hair and when his emotions were greatly stimulated. Melia's situation was different from Broly's but similar to Kale of Universe 6.

However, regardless of what happened, Muiyang had to stop Melia first. He couldn't let her continue to run riot. Suddenly, a stream of air arose from his feet's soles, and Muiyang instantly approached Melia's side.

Melia felt someone approaching and shouted furiously, unconsciously launching a counterattack against Muiyang.

However, the uncontrolled Melia was still no match for Muiyang. Muiyang quickly moved forward; a flash came behind Melia's body.

With a snap, a hand knife struck Melia's neck. Muiyang's attack was like a bolt of lightning, immediately causing Melia to lose her ability to resist.

The golden-green flames on her body were gradually destroyed. When all the energy disappeared, Melia's naked body appeared in front of Muiyang's eyes.

The pale green clothes on her body had been burned away by the golden-green flames.

With a hint of worry in his eyes, Muiyang carried Melia on his shoulders. He then opened the Accelerated World's passage and took the twin sisters into the Accelerated World.

"Squeak!" Gaia let out a low chirp and jumped around Muiyang.

Muiyang looked at it, "Go get some Spring of Life."

With that said, Melia and Melis were put inside the hot spring. Due to the fear that the violent state would damage the twin sisters' tender bodies, Muiyang instructed Gaia to fetch the Spring of Life and add it to the hot spring.

"Melia's situation is a bit bad. The transformation in the Golden Pupil state alone should be the same as an ordinary Super Saiyan, without losing her mind... Is it because of Melia's lack of innate state?"

Kale of Universe 6 and Broly of Universe 7 lost control in their grass-green transformation state, and Muiyang could still understand.

After all, it was a sudden increase in power by hundreds of times, and their physical state couldn't withstand it.

However, Melia had just revealed the golden sunburst, so she should not have lost her mind.

The only explanation was that Melia's soul lacked innate control.

Looking at the two sisters soaking in the pool, Muiyang stroked his chin, "Melia's problem is mostly in her soul, and Melis is affected by her. It should have been one person, but they were hardwired to reincarnate into two. Although there is a part of Shenron's power, it still caused an innate deficiency."

"Inborn deficiency can only rely on the acquired to make up for it. I should send them to learn Planet Metamor's Fusion Technique or use Supreme Kai's Potara Earrings to merge and strengthen their state of existence."

Muiyang was secretly thinking about his next plan.

Dragon Ball World's Fusion Technique and Potara Earrings were both capable of producing more powerful warriors.

The most famous warriors born from Planet Metamor Fusion Technique were none other than Gogeta and Gotenks. The Potara Earrings also produced a high-powered Vegito.

Both of these techniques might be able to improve Melia's condition.

Chapter 253

"Mmm..." Melia, who was soaking in the hot spring, let out a comforting whisper.

Beside her, Gaia kept rolling over and sprinkling the accumulated Spring of Life into the pool.

The only ones who were able to take a bath with the Spring of Life and enjoyed such treatment were the sisters and their former Mexia.

Wow, Melia opened her eyes to look around and jumped right out of the pool after discovering that she was actually lying inside it.

"Uncle, why am I in the water? I clearly remember that it was cold around just now." Melia's naked body lay down on Muiyang's back.

Her wet body leaving water stains on Muiyang's clothes all of a sudden.

Muiyang pulled Melia off his body. With a little pressure, the tumbling air stream evaporated the water stains on her body. He then helped Melia dry the water droplets on her body, "You really don't know what happened before?"

Melia shook her head, "I don't know."

Muiyang looked straight at Melia's delicate face, making sure that Melia really didn't know anything.

He then waved his hand, and a screen appeared in the void. The picture of Melia's previous storming away was presented on the screen.

In the image, Melia floated with her head down. Her hair was rising, her body was glowing gold and green, and her ki rising, looking imposing.

Melia opened her turquoise eyes wide, frightened by the state of the picture. She pointed at herself in the picture and cried out strangely, “What’s going on? How did I become like that?”

Muyang said, “Simply put, your power has gone violent; it’s an out of control transformation state. If I’m not wrong, you should be one of the few ‘Legendary Super Saiyans’ among the Saiyans. This transformation is the same as the ‘Super Saiyans’; it’s a legendary level transformation state.”

“What’s a Super Saiyan?” Melia didn’t quite understand that the legend of Super Saiyans was long gone above Planet Sala.

Muyang patiently explained what Super Saiyans were and the difference between the Legendary Super Saiyans and Super Saiyans.

“I wonder why there are no legends about Super Saiyans above Planet Sala, but such legends have been circulating on Planet Vegeta in the North Area. To put it bluntly, once a Saiyan can break through a certain barrier, they can stimulate their internal bloodline to transform into a Super Saiyan, and their power will rise to fifty times their original power!”

Muyang explained the meaning of Super Saiyan to Melia.

“As for the Legendary Super Saiyan, it’s a little different than Super Saiyan. Do you see the golden eyes state in the picture? That’s your transformation and a fifty times increase in power.”

Melia was taken aback, “If my power level has increased by fifty times, so wouldn’t I just have 1.25 million power level.”

Melia wiggled her fingers, suddenly feeling so powerful.

Seeing Melia’s somewhat smug look, Muyang clunked her on the head, “What’s there to be smug about? You can’t control the power in your body at all, because of your violence, even Melis fainted.”

Muyang pointed to Melis, who was soaking in the pool, “Look, Melis isn’t even awake yet.”

Melia covered the place where she was hit and blinked her eyes, “But that’s powerful!”

Muyang sighed, “That’s why Wayne won’t let you leave Planet Sala. If you keep losing control, Melis’ life will also be in danger.”

The Saiyans of Planet Sala was full of masters and could take action to stop Melia at any time, so of course, there was no need to worry about what would happen if she lost control.

However, if Melia was allowed to go out on a mission without supervision, there was a chance that she would remain out of control and eventually be overwhelmed by the surge of power.

Wayne had agreed to let him take the twin sisters away only because he knew that Muyang had the strength to stop Melia from storming out.

Upon hearing that her state might affect her sister, Melia’s face finally began to panic. Her eyes filled with tears, and she wailed, “Woah, what should we do? I don’t want to hurt Melis.”

Muyang squeezed Melia's little face and wiped away her tears, "Don't worry, I've already thought of a way. We won't go to earth; instead, we'll take you directly to a place that can heal you."

"Really?" Melia sobbed.

"Of course, I won't lie to you." Muyang picked Melia up.

He suddenly thinking that Melia still had nothing to wear as the clothes she had just worn had been incinerated by the hot flames, so he asked Gaia to go to the Dominion Spaceship to get some of the old clothes that Mexia had used.

Mexia's clothes were much wider for Melia, and the clothes were about to drag on the ground. But for now, she could wear them.

"These clothes are good, but they're just too big." Melia rolled up her sleeves; her chest was empty.

Muyang said, "Wear them like this for now, and when we pass by the trading planet, I'll prepare some more supplies for you."

Melia nodded and turned around, asking, "When will Melis wake up?"

Her sister had been soaking in the water and couldn't wake up, making her depressed.

Muyang went up to check on Melis's condition and said, "There's nothing serious. Melis is just suffering from too much mental wear and tear. She's temporarily asleep; she'll wake up soon."

After knowing that her sister was fine, Melia put her mind at ease. She then pestered Muyang to ask him about Super Saiyans and Planet Vegeta.

Of course, Muyang told her everything he knew, but Muyang didn't know much about transforming into a Super Saiyan.

The only thing sure was that before transforming into a Super Saiyan, Saiyan needed to reach a specific strength of basic power level and then rely on some opportunity to break the physical barrier.

However, how exactly it was done was impossible to say since Muyang was not a Saiyan. Relying on anger was fine, but there were more conventional ways to transform besides emotions.

"Uncle, you're useless; you don't even know such a crucial thing. How can I try to become a Super Saiyan?" Melia said in a crisp child's voice as she shook her head.

Muyang listened and looked at Melia's expression like it was all entirely his fault. A few black lines popped out on his forehead. This girl was grinning greatly and a bit of a badass.

A wall of air directly crushed over and Melia was bounced into the air with a wow!

.....

Melis soaked in the pool for about an hour or so before waking up under the Spring of Life's nourishment. MUYANG also told her about what had happened before and planning to go to Planet Metamor next.

Of course, the sisters listened to MUYANG.

“Uncle, hurry up and take us there with Instant Transmission. I want to learn fusion!”

After understanding that the fusion technique on top of Planet Metamor had the potential to solve their hidden problems, they couldn't wait to urge MUYANG to hurry up and take them there.

“Using Instant Transmission continuously is tiring. So if you want me to speed up, you should all kiss me.” MUYANG laughed and jokingly pointed to his cheek.

“I'll take it. It's just a kiss; it's nothing!” Melia looked at MUYANG with a scowl on her face. She then honestly leaned in front of him and kissed MUYANG on the cheek with a “Ba.”

Melis had some embarrassment and also stood on tiptoe to kiss on the cheek.

MUYANG touched the place where the two sisters had kissed him and suddenly felt his body filled with power. He laughed and said, “Haha, the energy is all replenished. I'll take you to Planet Metamor now.”

It was a pity. It would have been nice if the sisters grew up a bit more.

#### Chapter 254

Planet Metamor was located in the gravitational field of a yellow dwarf planet in the East Area.

It was one of the fourteen planets in the entire planetary system. It was the seventh-largest rocky planet in the system.

The sky was clarified with an azure, flawless and spotless sky as if it had just been washed by rain. It was transparent with an azure luster.

MUYANG, Melia, and Melis came to Planet Metamor together. The location was a western canyon covered with ravines.

The strong bitter wind blew through the valley, hitting the stone wall and rebounding everywhere with a booming strong reverberating sound. This place was desolate and lonely, with few traces of life.

“Is this the Planet Metamor? The ki up there is so weak. It's not at all comparable to Planet Sala.” Melia pulled on the corner of MUYANG's coat; her words were filled with disdain.

MUYANG smiled, “The strength of Planet Sala can only be considered an example. The universe is still generally dominated by Low-Level Planet, and Planet Metamor is High-Level Planet. It's not something that can be found easily.”

Melia wrinkled her nose, “Is this considered a High-Level Planet? That's weak! Let me see how many people on this planet have more than 10,000 power level.”

Melia sensed with her eyes closed, everything in Planet Metamor was soon floating in her mind, 1, 2, 3...

There were only twelve people in the Planet Metamor with a power level of over 10,000, and the best ones weren't even as good as her.

"It's so weak. I doubt there are any martial arts up there worth learning." Melia shook her head.

"Right." Melis nodded in a heartbeat.

In fact, the twin sisters didn't know that it was rare in the universe to find a planet like Metamor that could have twelve combat masters with more than ten thousand power levels.

Even Planet Vegeta, where the self-proclaimed fighting race of Saiyans lived, had the same number of top masters up there.

However, to the twin sisters, who were used to seeing such masters, the fact that they were on Metamor was really nothing.

Such arrogance wouldn't be good!

Muyang looked at them and admonished, "Don't be complacent because of that power you have. You must know that weak planets are also capable of producing strong people. On the earth where I live, the average power level used to be less than five, but it also produced masters like me."

Melia and Melis shook their heads together, "Uncle, you're different. You're much better than the others."

After spending time with Muyang, they knew more about his wonders. A man with so many magical abilities and profound martial arts couldn't be an ordinary man!

Moreover, they had seen Muyang's Accelerated World with their own eyes, which was clearly beyond the mortals' realm.

Muyang laughed, "You guys have quite a bit of faith in me."

Not bad, this was a good start.

Muyang stroked his chin, pondering which part of Planet Metamor he should go to next, "This time we've come to Planet Metamor to learn the Fusion Technique. You two should be humble and quickly gather your ki, revealing 1,000 power level will be enough."

"Alright." Melia and Meris obediently regulated the ki in their bodies.

Soon, the 25,000 power level dropped to less than 1,000.

Honestly, having 1000 power levels on two little girls under the age of nine was quite terrifying. Many of the strongest people on Low-Level Planets didn't have this kind of power level.

Muyang nodded at the sight, "Planet Metamor is famous for its martial arts; there should be many martial arts schools on the planet. Next, you will enter those schools as martial arts practitioners and make sure to learn the Fusion Technique."

With Whis' martial arts perception, Muiyang didn't necessarily look at the other martial arts; only the Fusion Technique was more of his concern.

Melia asked, "Do we go as disciples? What about you, uncle?"

Muiyang smiled, "You all call me uncle, and of course, I'm your guardian. You can also call me Teacher Muiyang!"

"By what right can you be our guardian and still want us to call you Teacher Muiyang?" Although Melia was young, she also knew what guardians and teachers meant. Although she had always called Muiyang "uncle," it didn't mean that she was willing to be junior to him.

"Just because I'm older and stronger than you guys now, so you have to listen to me." Teacher Muiyang laughed and caught a breath in the air.

He then flew straight towards there.

Melia foolishly watched as Teacher Muiyang flew far away. She stomped her feet a few times and followed.

The three of them flew towards the area away from the Western Part. Their speed was like a bolt of lightning, and they soon flew several hundred kilometers away.

Planet Metamor's gravity was twelve times that of earth. However, to Muiyang and the twin sisters, this gravity was like nothing.

As the virtual shadow swept past, they flew through mountains and canyons. The terrain below began to flatten, and the surrounding vegetation took on a lush green appearance.

Ta-da!

They landed in the middle of an old city. From this city floated powerful ki with an energy of about close to 10,000.

The owner of this ki was considered a master on this planet.

Muiyang nodded his head and brought Melia and Melis into the ancient city. The heritage of the Planet Metamor was ancient, and judging from the mottled marks around the city, it had been built for an unknown number of years.

Looking at the pedestrians coming and going, everyone was wearing a small jacket unique to the Planet Metamor. A pair of trousers tied with a ribbon; this was their unique culture.

Walking in a direction towards the ancient city based on the sense of ki, they soon arrived at the front of a martial arts dojo, with a Metamoran guarding the entrance.

"Remember what I just said; it's up to you to learn the Fusion Technique," Muiyang instructed.

Melia and Melis oddly nodded their heads, but to improve their physical condition, they still reluctantly said, "Got it, Teacher Muiyang!"

Muiyang laughed, then went up to negotiate with the Metamorans guarding the martial dojo. The process went very smoothly.

Muyang took the initiative to release a little of his ki, making the door disciple ran into the dojo with a solemn face, looking for his teacher.

Soon, the master of the martial dojo came out.

“Three of you are not Metamorans. I wonder why do you come to our dojo?” An old man with a white beard came out.

Muyang observed the other person’s ki, and the intensity was close to 10,000. It was exactly the person he was looking for.

He then began straight to the point, “We are from a planet called earth in the distant North Area. I am the head of the earth’s Kami School, and these two are my disciples. I heard that magical martial arts exist on Planet Metamor, so I have come to exchange ideas.”

The old man intoned, “Earth, Kami School?”

He had never heard of these two terms before. Still, from Muyang’s words and his demeanor, he judged that Muyang was a remarkable martial arts practitioner, at least not beneath him in strength. He then immediately said, “Since this is a martial arts exchange, of course, we welcome you.”

Muyang smiled, “We definitely won’t let you down.”

If it was a real exchange, the many martial arts that Muyang held in his hands, whether it was the Kami School Martial Art, the North Kai Martial Art, the Grand Kauai Martial Art, or Whis Martial Art, all of them were the top and most profound martial arts. Taking out any one of them would be enough to exchange with the Metamorans.

What followed went very smoothly. When Muyang truly revealed the mysteries of Kami School Martial Arts and deliberately revealed some of the mysteries he had learned from Grand Kai, the Metamorans martial arts practitioners were immediately amazed and spoke with Muyang without hesitation.

The growth of martial arts depended on interaction. There was no difference between stubbornness and entrenchment, so both sides got what they needed.

In the exchange, Muyang was also able to get his hands on the Metamoran’s Fusion Technique. Muyang also gave away a crystal with some martial arts insights.

.....

One day two weeks later, the sun was shining, and the weather was excellent.

Near an uninhabited deserted mountain cliff, two little girls with identical looks danced in a funny dance step, approaching little by little, and then pointing fingers at each other.

The two twin sisters dancing the fusion dance steps were precisely Melia and Melis.

Initially, when Melia and Melis first found out that they had to dance such funny steps to learn fusion, they were dead reluctant to do so.

However, Muyang had his way, and with a good meal, the two sisters were quickly bribed by him.

The training of fusion wasn't easy. Melia and Melis had fused unbecoming characters like Gotenks several times when something went wrong in the middle.

Until now.

Wow-

A brilliant flash of light appeared. After the thick smoke cleared, a girl with a slightly more mature figure appeared in place. Having experienced several failures, Melia and Melis finally succeeded in infusing.

The girl had black hair, looked about 11 or 12 years old, and was slightly more mature than Melia and Melis.

Sixty percent of her appearance was similar to the twin sisters. The other forty percent actually had vague traces of her former Mexia.

Unlike Gotenks and Gogeta, this girl was wearing a pale green jacket, but a white cloth wrapped around her chest, so she didn't bare her breasts.

Her bottom was white trousers with a green ribbon, exposing a lot of white skin on her arms and neck, full of collagen and could be bounced off the skin like gelatin.

The face was still young, but the entire figure already had the trend of a teenage girl.

The name of this young girl, born from Melia and Melis's fusion, was called "Melissa"!

Chapter 255

"My name is Melissa."

"I feel full of power now!"

The fused out girl had one hand on her waist, tilting her head up and laughing very proudly.

Perhaps because Melia and Melis were initially identical twins, even more so in her previous life, the fused out girl did not have an accent; instead, had a clear and pleasant voice that was very nice to hear.

Muyang looked at the fusion girl curiously. From her face, there were shadows of Mellie and Mexia from her previous life.

"Melissa, release all the ki in you for me to see."

If what was expected was right, Melissa's strength was definitely more powerful than the twin sisters. However, how much more powerful it was unknown.

"Of course I can, just watch." Melissa nodded her head very proudly.

Her attitude towards Muyang was also different from the original, but at last, she was still obedient.

Wow, the vast ki was released, and a whirlwind was blowing on the ground. The fine stones were blown in all directions by the wind, and the entire Planet Metamor was enveloped in Melissa's ki.

Melissa, who was releasing her ki to the fullest, laughed loudly and very proudly squinted her eyes.

"How about it? Are you scared by my power?"

Muyang frowned at it. Melissa's ki, although it was strong, it didn't seem to be as strong as he thought.

**“How can there be only this little bit of ki. This doesn't seem right.”**

In Muyang's senses, Melissa was stronger. However, her power level was only a mere 50,000, which was only about double the 25,000 power level of a single body.

As a rule, it shouldn't be like this. The power of a warrior born from the Fusion Technique shouldn't be increased by only this much.

In the original story, both Gogeta or Gotenks were boosted more than that in their normal state. Muyang couldn't tell how strong Gogeta was, but Gotenks showed signs of improvement.

From the fact that Gogeta's Super Three state after fusion wasn't worse than Son Goku's Super Saiyan Three, it was clear that Gogeta's normal state strength wasn't much worse than Son Goku's Base Form.

After the fusion of the two little punks, their normal power level could even reach the normal power of the Base Form power of Son Goku in Buu Saga, which was increased by dozens of times. Unlike Melissa's current power, which was only twice as much.

If Muyang thought about it, the problem was still with Melissa.

Carefully observing Melissa's state, Muyang suddenly discovered that Melissa's state at this time seemed to be that of a truly complete individual.

Her soul was complete, and her bloodline was also pure.

Even if it was decided that Melissa was the reincarnation of Mexia, there was nothing wrong with it, except that Melia and Melis would be more like remnants.

Muyang thought whimsically. However, this thought became more and more real. The more he thought about it, the more likely it was.

The two sisters were usually said to be soul-synchronized rather than soul-synced. The twin sisters had equally divided Mexia's soul.

However, by fusing out Melissa this time, Mexia's soul was considered complete. In a sense, it was indeed Melissa who was the reincarnation of Mexia at this time.

**“If Melissa is the only one who is Mexia, then Melia and Melis are equivalent to her split soul state in the Accelerated World back then.”**

Thinking of this, Muyang had a rough outline in his mind. To cure the state of the twin sisters, they would need to appear in Melissa's form often.

After some time, their souls would be replenished, and their state would stabilize.

Just so, the relationship between Melissa, Melia, and Melis became complicated.

They were like the relationship between Mexia's main soul and her divided soul.

After he cleared up the cause and effect, Muiyang's eyes glazed over as he looked at the not-so-mature girl in front of him. The corners of his mouth lifted, "Melissa, is this all of your strength?"

"Huh?" Melissa harrumphed, "Aren't you frightened by my power?"

Muiyang shook his head, "With this little power you have now, you still can't scare me."

Melissa was immediately unhappy. Her green eyes stared hard at Muiyang, and her face had an indescribable pride, "How dare you underestimate me? Even if you are Muiyang, you will not be spared."

After saying that, Melissa stomped her foot forcefully, then squealed; her turquoise pupils actually became a golden glow.

The golden eyes state appeared on her body. In an instant, the ki on Melissa's body climbed fifty times from its original base, suddenly reaching 2.5 million power levels.

"Hahaha, how about it? This state of me will definitely surprise you!"

Melissa unleashed her power to her heart's content, not caring at all if the ground of Planet Metamor could withstand the ki.

The whole world suddenly descended like the apocalypse. Thick clouds covered the sky, and the color of the sky darkened. The electrical discharge phenomenon pulled the free electric charge in the air.

Under the pressure of this powerful ki, the martial arts practitioners scattered all over Planet Metamor woke up. All their faces flashed with horror.

"What a terrifying ki!"

"Who is it? How did this strange power come to be on Planet Metamor?"

"Could it be the two Martial Gods are using the Fusion Technique?"

All the martial arts practitioners guessed up to the fact that the only thing that could produce such a powerful momentum on Planet Metamor was a fusion between two martial gods with over 10,000 power levels.

It was just that there was no strong enemy above Planet Metamor right now, so why would such a powerful master appear.

"No, this ki is filled with tyranny. It's definitely not the ki of the Planet Metamor...."

For a time, all the masters of Planet Metamor were shaken and then flew towards the power source.

While countless masters were speculating over the ki released by Melissa, Muiyang narrowed his eyes at the little girl in front of him.

Melissa was overly arrogant; was this arrogance the nature of Saiyans?

Gently shaking his head, Muiyang swooshed forward, not caring if Melissa resisted or not.

Muiyang grabbed Melissa's wrist with one hand and directly pulled her with Instant Transmission to take her away from the Planet Metamor.

Only after the ki of Muiyang and Melissa disappeared did the blue planet finally regain its calmness...

.....

In a primitive planet a hundred light-years away from Metamor, the figures of Muiyang and Melissa suddenly appeared in the air.

Bang!

Melissa threw her arms down with an unhappy face, breaking free from Muiyang's hands.

Phew!

The pale green light and shadow shifted position in the high altitude, then suddenly attacked Muiyang. Melissa, who had converted to her golden eyes state, actually wanted to fight with Muiyang.

"It seems like it won't storm out anymore. However, to fight me, with your strength, you're not even close."

Muiyang looked on with a faint smile. Facing Melissa's attack, he looked calm and unmoved. When Melissa was about to touch him, his body dodged her attack with a few flicks.

Seeing that her attack didn't work, Melissa's face looked dainty. She then drank loudly, her golden eyes shone with a beautiful glow, and her whole body was wrapped in golden flames.

"I don't believe I can't beat you." Melissa's clear and cold voice sounded, and her ki increased even more.

To Muiyang, Melissa didn't dare to take it lightly.

Muiyang looked on calmly, nodding slightly. Melissa's strength was strong enough. However, due to her inexperience, she raised hands were full of flaws.

Swoosh!

Muiyang approached quickly. He didn't use his full strength, but the gradually increasing ki had caused Melissa to feel tremendous pressure.

"Boom!"

Muiyang's figure appeared on Melissa's side. Melissa's face panicked, and the break became more apparent. With a light slap of the palm, Melissa was immediately knocked out.

A series of streaks followed, and Muiyang kept up with Melissa's figure.

BANG! BANG! BANG!

A few strands of electric light flashed, and Melissa was always in a passive state.

Laughing leisurely, Muiyang fought with Melissa several times, intentionally guiding her opponent's movements.

A steel-clamped palm was placed on the girl's shoulder, and then with force, a huge force pressed Melissa towards the ground.

The ground crumbled, faults appeared, and the entire mountain collapsed.

Heavy smoke spread out, and Melissa hid her ki as she slipped away. However, Muiyang's detection power was beyond her imagination.

Another fierce attack came.

**"BANG!"**

The two figures made contact, and the sky shook violently, spreading out a circular shockwave in all directions.

A beam of impact fell from the sky. Melissa was struck to the ground by Muiyang's attack, smashing into a hundred-meter diameter impact crater.

The winds whistled, and the thousand-meter radius became cluttered, with dense bands of impact all around.

**"Well?"** Muiyang's blurred figure appeared in front of Melissa, pressing her chest with one hand and looking at her in the middle of the impact crater in a half squatting position.

Melissa fell dumbly and openly in the middle of the impact crater. Her small lips were pouting, "You can't count this. I only have 2.5 million power level, while you have less than 8 million power level, which is that much higher than me."

Muiyang pulled Melissa up, patted the dust off her body, and said, "Even if I control my power level to the same level as you, you're no match for me. To be honest, your skills... are too poor."

Chapter 256

**"Are my skills really that bad?"** Melissa glared at him, wondering about life a bit.

With Melia and Melis's memories, she had always thought that she was mighty. With the Saiyan's personality, it made her look so arrogant. However, this pride and arrogance were shattered in front of Muiyang's absolute strength.

Muiyang said, "I can't say it's terrible. However, there's still a lot of room for improvement."

**"Teacher Mu, please teach me."** Melissa's eyes sparkled as she looked at Muiyang, suddenly becoming very polite.

Looking at the tender face of the young girl in front of him, Muiyang nodded slightly. At this time, he suddenly frowned... He seemed to have seen this image somewhere!

Muiyang thoughtfully gazed at Melissa's cheek and felt déjà vu. He then suddenly remembered.

When he was on top of Korin Tower, he had seen a few fragments of the future. One was Mexia disguised as Mellie to participate in the 12th World Martial Arts Tournament, which had already happened. Another fragment was a fight between himself and an 11 or 12-year-old girl with golden pupils.

Mexia!

Mellie!

Melissa!

It turned out that he had already seen this at the top of Korin Tower. Although there were countless possibilities in the future, and just looking at the future picture couldn't determine whether it would happen or not, it had a specific reference value.

Melissa saw that MUYANG was looking straight at her, and her high and cold face turned twisted up, "What are you looking at?" Melissa's heart was a little panicked.

MUYANG smiled leisurely, "I was looking at you. I suddenly realized that I knew you a long time ago."

"Wasn't my previous life was your wife?" Melissa bit her lower lip.

MUYANG shook his head and said, "It's not a past life. It's another sense of understanding, like foreseeing the future. Forget it; you don't understand."

Melissa raised her head, dissatisfied, "I hate that you don't make it clear."

MUYANG coughed twice and changed the subject, "I'm now a little convinced that you are the reincarnation of Mexia. Stay like this often; it's good for both Melia and Melis's body."

"I also feel very comfortable in my current state. Too bad the Fusion Technique only works for half an hour." Melissa waved her arms.

It was so unpleasant not to be able to be available at any time. Planet Metamor's Fusion Technique had a time limit, and each fusion could only last for half an hour.

"That's not necessarily true." MUYANG shook his head, "Planet Metamor's Fusion Technique may not work in your case. After all, your relationship with the twin sisters is extraordinary. This can be seen from your voice and fusion power."

The warrior born from the Fusion Technique had an accented voice. Both Gogeta and Gotenks were dual voices.

In Melissa's case, she was the complete soul of Mexia, but her body was a fusion of the twin sisters, so it was hard to say whether the fusion limitations of the Planet Metamor would still be present in her.

For example, in terms of strength, she was different from the average fusion warrior.

Melissa's eyes lit up, "You mean... I can be around for a long time?"

MUYANG said, "I don't know."

"By the way, can you change your outfit?" MUYANG couldn't understand the nature of the clothes on the fusion warriors.

Although Melissa's outfit was relatively cool, it was a bit unreasonable if there were only one clothes set.

Melissa blinked her eyes, "I'm not sure. I guess I can change."

It seemed that Muiyang needed to prepare some clothes for Melissa as well. The twin sisters' clothes were too small for her, and Mexia's clothes were too big.

Ugh, I only had one wife; how could she come up with so many different versions?

.....

Time passed, and after half an hour, Melissa really didn't unmold. It wasn't until three hours later that Melissa split into Melia and Melis in bright light.

Both Melia and Melis, who had split back into two people, retained Melissa's memories. Everything about the three of them was almost identical.

"Uncle, I can control the power in my body just now. Wow, I can become that powerful too." As soon as the fusion was unraveled, Melia chattered on and on.

"If I go back to Planet Sala, bang, bang, bang, I'll be able to knock down a whole lot of people." Melia was so happy that even Melis smiled.

Muiyang also smiled, "It seems that we have found a solution to your hidden problems. In the future, as long as we keep Melissa's state more often, the violence will naturally decrease. With the nourishment of the Acceleration World for you, one day you will be able to maintain your Golden Eyes State alone."

"Hmm." Melia and Melis nodded continuously.

Here, Muiyang could basically guarantee that no accidents would happen to them.

However, Melia and Melis's combat experience and skills were still too far behind, so it seemed that he still had to take on the role of "Teacher Mu" and gave them strict guidance.

.....

In the days that followed, Muiyang instructed them in the Acceleration World.

Under the sixteen-fold time acceleration, the two sisters grew up rapidly. At the same time, Muiyang also brought them into the North Area.

.....

Half a year later, in the outer world.

Thanks to the effect of the Acceleration World, Melia and Melis were basically ready to go. Their power level had soared to 40,000 each. If fused, Melissa's strength would be equivalent to 80,000 power level!

This hadn't counted with the power level state of the Kaio-ken and the Golden Eyes Transformation.

If she had used the Kaio-ken or the Golden Eyes Transformation, she would have become even stronger.

What makes Muiyang even happier was that during this period of training in the Acceleration World, Melissa had awakened the superpowers of her previous life.

She had also remembered the “Vacuum Inner Breath” that she had learned from the Planet Yardrat. Maybe in a few years, Mexia’s memory and personality will be awakened.

BOOM!

In the Acceleration World, Melissa’s length of time maintained her fusion state was extended sixteen times. Melissa was covered in golden light; her golden eyes flashed with a stream of light.

At this time, Muyang shifted and arrived at Melissa’s side. Melissa sneered, her body twisted slightly, and a force was channeled up from her waist.

BOOM BOOM!

SNAP!

The two fists met in the air. Muyang’s strength was greater than Melissa’s, making Melissa’s delicate body was directly knocked out of the sky.

DANG!

As soon as it landed on the ground, the pale green silhouette quickly disappeared.

Muyang smiled in satisfaction while maintaining the same power level. Melissa’s reaction ability had reached his requirements.

He had to say that the Saiyans were really worthy of being born as a fighting race. That kind of intuition and reaction ability in battle was too good.

“You can stop now,” Muyang shouted.

Melissa heard it and disarmed her fighting state, then transformed into two people.

“Your skills have been outstanding. You can say that you have reached the level of a master. However, training and fighting are still different.

“Are you going to let us join the Galaxy Mercenary you mentioned before?” Melia was excited.

“We can really fight now.” Melis smiled with some bloodlust in her eyes.

To be reasonable, Melia had never left Planet Sala. Not to mention killing people, she had never been in a real battle.

At this point, Melis was a little bit better. She had participated in a few missions when she was studying at the academy.

Muyang smiled cheerfully, “There are a few stronger forces in the North Area, such as the Ginyu Force, Cooler Armored Squadron, King Cold Strongest Squadron. Each of these forces has at least one master with a power level of over 100,000.”

“Uh-oh!” Melia’s eyes lit up.

“Uncle, which force are we aiming for this time?” Melis asked seriously.

Muyang narrowed his eyes, "Let's start with the weakest. Ginyu Force is good prey."

"Melia, Melis, I don't care what method you use. Superpowers are fine, martial arts are fine, even if you merge into Melissa. Do everything you can to kill the Ginyu Force. However, I have one request. If you use Melissa's state, don't use the Golden Eyes Transformation and Kaio-ken sparingly. Otherwise, it won't work as an exercise."

If they fused into Melissa and used their Golden Eyes Transformation or Kaio-ken, the Ginyu Force would have no resistance at all, so Muyang limited this aspect.

Muyang would be watching over the side to prevent Ginyu from using his weird superpowers.

"No problem, we'll absolutely kill them for you," Melia assured with a pat on her chest.

"We won't let you down." Melis licked her lips and smiled softly.

"Then let's go. I'll take you to the Ginyu Force!" Muyang laughed. He waved his arm and led Melia and Melis toward the location of the Ginyu Force.

#### Chapter 257

In the Southern Part of the North Area, there was a High-Level Planet called Siang. It was a mysterious and beautiful planet that had been hardly known for a long time.

However, just a few days ago, a disaster struck the Planet Siang.

A group of aliens calling themselves the Frieza Force came there and tried to invade the planet.

However, the Frieza Force underestimated the power of Planet Siang's master. As a High-Level Planet, it would have at least one warrior with a power level of more than 10,000.

The Planet Siang wasn't ordinary. There weren't just one, but four masters at this level.

With the addition of another warrior who was strong but didn't reach the 10,000 power level, the result was obvious that the warriors of Planet Siang annihilated the entire group of aliens from Frieza Force.

Of course, such a result attracted Frieza's attention, following in the arrival of the even more powerful Ginyu Force.

In response to the horrifying and inhuman strength of the Ginyu Force, the masters of the Planet Siang lost their lives one by one.

The killing frenzy began, and the beautiful planet was crumbling into pieces. There were craters everywhere, and the entire planet was in ruins.

**BOOM!**

A cluster of light waves containing great energy swept over and punched a large hole in the stiff mountain range.

The only thing that could be seen as the surrounding lava spewing out of the ground with the pungent smell of smoke.

“Hahaha!” One of the members of the Ginyu Force, Anre, laughed cruelly.

A pair of eyes showed a cold, miserable light. The ki wave in his hand was continuously released, destroying one Siangian’s residence after another.

“Anre, hurry up. Captain Ginyu is waiting for us to return!” A red-skinned alien warned.

“Soon, Bonyu.” Anre licked his lower lip, looking like he hadn’t had enough.

Back then, Burter and Recoome of the Ginyu Force, together with Dodoria, chased down the Saiyans Bazda and Asike.

Unfortunately, they ran into the sudden appearance of Muiyang on a planet in the North Part of the North Area.

After being killed by Muiyang, the Ginyu Force was suffering from attrition. This Anre and Bonyu were the aliens who joined the Ginyu Force later.

They came from two different high gravity planets; both were power-type aliens. Because of their cold and cruel nature, they had a good fighting power. Eventually, they were liked by Captain Ginyu and invited to join the Ginyu Force.

“Hey, the natives of this planet still have some power. However, it’s a pity they’re not too obedient.” Anre had killed all the life within the field of view.

He then looked around at the scene full of debris, tsked twice, and sighed.

“...But it’s just the right thing to give us some practice!”

“Yes, yes, yes.” Anre repeatedly nodded, unable to resist complaining to his friend Bonyu.

“But Captain Ginyu only arranged two days for us to clear the natives on Planet Siang. To be honest, that’s too much time.”

Bonyu pressed the communication device next to her ear and said, “Captain Ginyu has a very tight schedule. It is said that there are even more powerful planets that we need to conquer. Lately, the offensive on King Frieza’s side has been getting increasingly sharper as well.”

Anre opened his mouth wide and said with his eyes wide open, “Haha, that’s great. Next time I’m going to enjoy the fun of battle. It looks like I’ve added the right thing by joining the Ginyu Force!”

“Whatever.” Bonyu shrugged.

Bonyu shrugged her shoulders, feeling no psychological pressure to slaughter the “lowly” natives.

As Frieza’s attack on the surrounding area became more and more aggressive, the Ginyu Force decided to continue to move through the universe.

Thus, the two people soon joined the other Ginyu Force members by spaceship, leaving a desolate ruin with black smoke.

.....

The other side of the planet.

In a city some 20,000 kilometers away, Captain Ginyu sat straddling a large rock. He was holding a bloody arm in his hand and tearing at it. The two black horns reflected the dazzling light of the sun.

“Yuck, the blood of the Siangian contains a lot of energy, but it just doesn’t taste good.” Captain Ginyu spat out a broken bone, “Jeice, Natania, would you like some too?”

Jeice shook his head, “Captain, you can enjoy it yourself.”

Natania twisted her voluptuous body, her voice timid, “The Siangian’s bloody appearance is unappetizing. If you deal with it, you can barely swallow it.”

Captain Ginyu laughed, “Hahahaha, you guys are demanding. If you don’t want to eat it, then don’t eat it.”

Throwing away the arm in his hand, Captain Ginyu looked up to the sky and said, dissatisfied. “Anre and Bonyu are really slow. They haven’t finished off the natives after so long.”

Jeice said, “We’ve wiped out the best of the best on this planet, so they should be quick to deal with.”

Natania said, “I’m afraid they might play a cat-and-mouse trick and miss the time.”

Captain Ginyu snorted, “These two guys, we have to warn them. King Frieza’s schedule is very tight, so there’s no time to delay here.”

At that moment, Natania’s eyebrows quirked, and she covered her mouth with a soft smile, “They’re already here.”

There were two streaks of white light in the sky, and two black dots came from the far side of the sky, trailing behind them in a long stream. When they got closer, they could see that they were two spherical spaceships.

The dust rose after a loud rumble as Anre and Bonyu emerged from the spaceships, leaving a desolate, smoky ruin in their wake.

“You two. If you miss the big event for King Frieza, even I won’t be able to explain.” Captain Ginyu snorted.

“I’m so sorry it won’t happen again.” Bonyu saw that Captain Ginyu’s face was displeased. She then hurriedly smiled and apologized. At this point, she must not anger Captain Ginyu, or else there would be dire consequences for the two of them.

Captain Ginyu nodded and spoke a little better, “Get ready. The next target is a planet nine days away, and this planet is very powerful. King Frieza is anxious to call us back, so we need to deal with it as soon as possible.”

“That means we can let go and fight.”

Anre stretched, finding it fascinating. However, after meeting Captain Ginyu’s icy eyes, he quickly straightened his posture.

The Ginyu Force was ready to get into the ship, but at this point—

PHEW! PHEW! PHEW!

A series of energy rays suddenly fell from the sky, hitting their spaceships with unerring accuracy.

The sturdy outer shell of the spaceship was originally extremely resistant to attack, but it became fragile as tofu in front of those energy rays.

It was obvious that they could no longer be used.

The sudden change caused Captain Ginyu to be stunned for a moment. His chest swelled with rage, and his face became as dark as the bottom of a pot, “Who on earth is it? How dare they destroy my spaceships?”

Is there still a remnant of the Planet Siang?

This thought passed by and quickly dissipated because a man dressed in a black leisure suit in their sight appeared. By his side, there was a girl in a light blue dress.

“Captain Ginyu, long time no see!”

A lazy voice came, and MUYANG appeared in front of the Ginyu Force, holding Melissa’s hand. By the way, the last time he saw Ginyu was four years ago when he fought with Frieza.

At that time, Captain Ginyu and Zarbon, with the entire group, were hiding far away. So, MUYANG didn’t have time to pay attention to them. However, Captain Ginyu didn’t know this. He stared at MUYANG for a long time but couldn’t remember his identity.

Who is this person? He looks damn familiar!

Captain Ginyu’s face was gloomy as he stared at MUYANG. It was after MUYANG opened his mouth that he realized.

Isn’t this man in front of him the same human who humiliated his Ginyu Force fifteen years ago and finally escaped from his hands?!

A cold chill emanated from Captain Ginyu’s body. The battle back then was a memorable one for Captain Ginyu.

At that time, the Ginyu Force was being formed, and it was the man in front of him who killed the first two members of their team, Gausan, and Ouaosi. He also killed the Time Ability Guldo, whom they were about to recruit.

“Well, well, so it’s you. I haven’t seen you for more than ten years, and you still dare to come to my door.” Captain Ginyu craned his neck. His eyes full of killing intent.

“Yeah, it’s been more than ten years; I haven’t seen your strength rise much.” MUYANG leisurely smile as he said the words to make Captain Ginyu angry.

He didn't pay any attention to Captain Ginyu's threat, then looked at the other four members of the Ginyu Force with a bland gaze and read out the Ginyu Force's information.

"Captain Ginyu, 108,000 power level."

"Jeice, 44,000 power level."

"Demoness Natania, 50,000 power level."

"Anre, 47,000 power level."

"Bonyu, 45,000 power level."

These data came from the Galaxy Mercenary Organization. To find out the Ginyu Force's whereabouts, Muiyang and Melissa had jumped around many planets.

Chapter 258

"Captain, who is this man?"

The Demoness Natania sensed an unusual atmosphere in the air when Muiyang declared their information. So, she trotted up to Captain Ginyu and asked.

"Hmph." Captain Ginyu grunted and didn't answer.

At this time, Jeice also recognized Muiyang's identity, and his face showed fear, "Natania, we have to be careful. This guy is mighty; I'm afraid that only the captain himself can fight him off."

"No way, is this guy that strong?" Natania was shocked, and her face became ugly.

It must be known that Captain Ginyu's strength was far above theirs. If the captain himself had to take action to deal with it, they would surely be nothing more than food.

Jeice nodded with a solemn look on his face, "He's powerful. He killed several members of our Ginyu Force in the early days."

He had never forgotten that when he was in the Eastern Part North Area on the Planet Demen.

If Captain Ginyu hadn't appeared in time to repel this guy, he would have suffered the same fate as Gausan and Ouaosi.

"So it was him!"

That was when Natania remembered. Back then, she, Burter, and Recoome had the chance to join the Ginyu Force because of the attrition that occurred for some reason. It turned out that the culprit for all this was the man in black in front of her.

That was really scary.

Natania's heart had developed jealousy, causing the energy in her body raised. Of course, she didn't plan to fight but was ready to use her superpower to make a run for it at any time.

"Muiyang, you also had great achievements in the past!" Melissa's pretty face smiled at Muiyang.

She was not like the twin sisters who called MUYANG their uncle and had always called him by his first name. Her personality had become more independent since she had awakened a part of Melissa's ability.

"It's nothing." MUYANG laughed.

"It can't be nothing." Melissa nodded her head seriously.

Her vision was also very high; with MUYANG's current strength of up to 8.6 million power levels, he was considered a great master in Planet Sala.

The best of the Ginyu Force in front of him was only a little over 100,000 combat power, which was nothing.

'Although these old things don't seem like a big deal now, can't you just go along and give some recognition?'

At this moment, MUYANG had the urge to give Melissa a thrill.

However, it was evident that MUYANG and Melissa's downplayed attitude had already angered the Ginyu Force members.

Anre and Bonyu were both members who joined later and had no idea what had happened before.

"Be careful. Don't go over there." Jeice shouted at the sight of the two.

"Idiots!" Captain Ginyu cursed but stood there indifferently.

On the surface, he was dismissive of MUYANG, but in fact, he was terrified, especially since the opponent had the "Transformation Ability" that could increase his power level several times.

He wasn't sure whether the opponent had significantly improved in the past ten years or not, so it was better to keep an eye on him.

Captain Ginyu's gaze flickered, and a pair of fierce eyes sweeping over MUYANG's body.

"Heh, the little minions have brought the food."

Facing the suddenly rushing Anre and Bonyu, MUYANG gave a faint glance and paid no attention at all. With his strength, even if he stood still, the opponent couldn't break his defense.

The purpose of coming out this time was to train Melissa, so Melissa made her move after he gave her a wink.

Melissa stepped forward slightly. Her light body swooshed and flashed a few times; then, her arm swung out in one direction.

With a bang, Anre was directly hit in the head by Melissa, and his eyes flew out of his body.

At this time, Melissa sneered, her eyes glanced at Bonyu on the other side. Her body appeared next to Bonyu in a flash and then swung out with an iron fist of steel.

**BANG!**

Both Anre and Bonyu were knocked back by Melissa in a brief moment.

“Giggle....” Melissa let out a silvery bell-like laugh.

Her eyes suddenly flashed with tyrannical light. Her body took another step forward, chasing after Bonyu, a bright ball of energy already condensed in her hand.

“Oh no, Bonyu is in danger!”

When Natania saw this, she said a bad word in her heart. She then hurriedly used her superpower to prepare to pull Bonyu’s body back.

Just then, Melissa’s eyes stared towards her, and an invisible wall of spiritual energy crushed over, overlapping with Natania’s superpower.

“You have no business here, so get out of my way,” Melissa yelled, very rudely.

With her eyes wide open and a glittering glow in her turquoise eyes, her pale green superpower directly broke up Natania’s superpower, then continued to crush towards Natania.

After the fusion, Melissa now has up to 80,000 power levels. Both strength and superpowers were far superior to the Demoness Natania.

With that, Natania suffered a tragedy, as her face turned white from the devastation of her superpowers.

“This girl. She actually has a superpower.” Natania’s face was bloodless, unbelievably alarming.

After skipping over Natania, Melissa targeted Bonyu and Anre again.

At this point, Captain Ginyu finally couldn’t resist. His foot stomped on the ground, leaving a large cracked rock, and his body sprang up, intending to stop Melissa’s attack.

However, a black silhouette was in front of Captain Ginyu’s face.

Muyang lightly fanned his hand. It was a casual movement that raised a wall of ki, which directly blocked Captain Ginyu from taking a step closer.

“What a terrifying strength.” Captain Ginyu’s eyes were straightened with a trace of horror.

Immediately after that, his scalp went numb.

The opponent had actually knocked him back with a casual wave of his hand, a force that was far beyond his ability to resist.

In these ten years, had he improved so much?

Captain Ginyu’s pupils had shrunk to pinpoints, and his heart was beating wildly.

“Stay quietly on the side; it’s not your turn to make a move yet.” Just like a referee ruling on the offending player, after stopping Captain Ginyu’s action, Muyang faintly glanced at Captain Ginyu.

This glance made Captain Ginyu feel like he was in an ice cellar, and his body couldn’t help but tremble.

How could this be? How could the gap between them be so wide?

“Captain!” Jeice was holding up Natania, and his face already bloodless.

“It looks like there’s more bad luck this time.”

Captain Ginyu gritted his teeth and quietly pressed his finger on the scouter at his ear.

In addition to detecting energy, the scouter could also be used as a communication device to get in touch with the outside world.

Captain Ginyu now thought that even if he couldn’t escape, he had to send the message to King Frieza to take revenge for them.

On the other hand, Melissa’s attack was quite rude and fiery. With the power level was just over 40,000, Anre and Bonyu were no match for her.

A ki wave soon penetrated Bonyu’s heart, and then Melissa’s figure flickered and chased after Anre again.

BOOM!

Melissa smashed Anre’s head out. The blood splattered all over her face, sticking to her face with an innocent smile, which was really bizarre.

“Melissa is actually still such a violent loli!” Muyang stammered a bit.

Technically speaking, with Melissa’s age, she could only be considered a little girl. However, because of the fusion, her figure was slightly more mature.

“Anre and Bonyu are dead.” Jeice witnessed the tragedy of the team members.

The images of the old days when Gausan and Ouaosi died tragically overlapped with this moment, causing him to break out in a cold sweat.

“What... should we do?” Demoness Natania also began to grow restless.

“Hey, Muyang, how was my performance?” Melissa jumped to her side with blood on her face.

Muyang looked at her, “Dry the blood on your face first.”

“Giggle...” Melissa’s face changed as she said, “Next, it’s your turn.”

The purpose of Muyang bringing her to the Ginyu Force was to let her experience the atmosphere of battle.

Of course, these ordinary members of the Ginyu Force didn’t give her a chance to practice, so only Captain Ginyu was her target.

“Natania, get out of here!” Captain Ginyu suddenly turned back and shouted.

“I got it!” Demoness Natania nodded her head vigorously and forcefully launched her superpower regardless of the previous superpower reversal damage.

A sudden illusory flash of light enveloped Ginyu and Jeice. By the time the light dissipated, the three had disappeared from the spot without a trace.

“They escaped....” Melissa lowered her head and suddenly laughed, “But still on this planet.”

Muyang said, “Then go after them; they are your prey!”

“Okay!” Melissa’s young face was smiling.

.....

One thousand kilometers away, Ginyu and the others appeared on a gravel beach in a mess. As soon as they landed on the ground, Demoness Natania spurted out a mouthful of blood.

“Captain, I can’t use my superpower,” Natania managed to say with difficulty.

Captain Ginyu’s eyes were shifty. He was about to use his communicator to call Frieza headquarters to send a spaceship over.

However, at that moment, across from him, a young man slowly came holding the hand of a small girl.

“You are my prey, don’t think of running away!” Melissa had bright eyes and a bright smile on her face.

However, this smile was like the devil’s smile in the eyes of Jeice and others... making their heads chill.

“Captain Ginyu, let’s run away. We’re no match for that man!” Jeice looked panicked and retreated backward. Facing Muyang and Melissa, he really couldn’t muster the courage to fight.

Chapter 259

The remaining three members of the Ginyu Force were all in a grave mood at this point.

Ginyu looked at his two team members, but he didn’t know what to think.

“Jeice, calm down. How can you keep thinking about running away now!” Ginyu scolded Jeice with a gloomy face.

They should take out the courage to fight so that there might be a chance of survival. The idea of escaping was impossible.

Moreover, the other party aimed at themselves and others early on, so how could they let them run?

After Ginyu scolded Jeice, he calmed down, subsequent hitting his senses, “Captain, I understand.”

“Good.” Ginyu nodded faintly, calculating in his heart. “If I can seize the opportunity to snatch the opponent’s body, there might be the hope of survival.”

His eyes aimed at Muyang, whose body had been on his mind for more than ten years.

He wanted to seize his body, but when he thought of the power he had used to force him back then, he was afraid that it was no worse than King Frieza’s usual power.

That was why the risk of seizing the body of such a master was too high.

“The little girl’s body...” Ginyu hesitated. Melissa’s body was undoubtedly excellent. Unfortunately, she was a woman.

After a moment’s hesitation, the greedy desire still prevailed, and Ginyu’s eyes became malicious.

“As long as I seize the girl’s body at the right time and then quickly destroy her consciousness, that man shouldn’t be able to detect it. When I get used to her body, my power will rise quickly, and I can then exchange that man’s body without being noticed by anyone.”

Ginyu’s plan dinged loudly. He then settled down after repeatedly considering it and found that it was really feasible.

“Jeice, Natania, let’s fight them.” Ginyu waved his hand and gave an order to the two team members.

“Yes!”

“This is the only way.”

Jeice and Natalia nodded their heads vigorously.

The windswept up for a time, and the three of them attacked Melissa. This time, MUYANG didn’t stop Ginyu but stood aside and watched Melissa’s performance.

In the face of Ginyu Force’s trio’s attack, Melissa shouted in excitement. The fighting gene in the Saiyan bloodline awakened, and her whole blood boiled.

“AFTERIMAGE TECHNIQUE!”

More than a dozen illusory shadows appear on the battlefield. The Afterimage Technique was perfect for confusing people, especially alien beings who couldn’t use ki senses.

Swoosh, swoosh!

Melissa knew she was no match for Ginyu for the time being, so she first stared at Jeice. Her figure was flashing like a ghost, and unknowingly, she had touched Jeice’s side.

“No!”

With a sudden warning of danger in his mind, Jeice red’s body began to chill when an enlarged smile suddenly appeared in front of him.

“Captain, she’s so fast.” Jeice broke out in a cold sweat and hurriedly called for help from Captain Ginyu.

Captain Ginyu turned his head, knocked out an afterimage. He found that the opponent’s real body actually ran to Jeice, so he cursed and hurried towards Jeice.

Unfortunately, Melissa’s action was faster than Captain Ginyu’s. She smiled coldly and directly pinched up a bright ball of energy in her hand, which had already hit Jeice’s body.

With a loud “bang“, the pain of a broken body surged up to his heart, and Jeice’s’ eyes were filled with fear.

Melissa had gotten away with it and was about to run up and make up for it. However, Captain Ginyu had already approached her at that moment.

Even though Melissa had good fighting skills, the battle suddenly became a mess because of the strength between her and Captain Ginyu.

“Well, well, such excellent quality. If I can take it away, I can soon become strong.” Ginyu’s heart began to calculate with joy.

Even if Melissa’s body was a female, Ginyu thought that gender and all other things would be acceptable as long as he could become strong.

So, he intentionally drained the water in the next battle to avoid harming such an amazing body.

As he fought and looked for opportunities to seize the body, Ginyu’s smile grew wider.

“SPACE LOCK!” Demoness Natania seized the opportunity to display her superpower.

Feeling the freezing sensation in the space around her, as if her body was wrapped in countless moist ribbons, Melissa shouted out in displeasure. With a wave of her arm, and even more powerful superpower struck back.

With an “ah” sound, green light enveloped Natania’s body. She flew away without resistance, like a kite with a broken string.

BANG!

Natania hit a ridge, and a human-shaped depression appeared in the hard stone wall.

“I was going to save you for last, but why are you so uninteresting!”

For Demoness Natania, a voluptuous woman, Melissa had no intention of letting her go.

Her face was fierce, and the overwhelming spiritual power began to crush her like a torrential torrent, breaking through the watery space.

Soon, it wrapped around Natania’s side, making her unable to move. Then the superpower began to squeeze inward, trying to crush her.

“DIE FOR ME!”

Melissa widened her emerald green eyes and squeezed with her slender fingers. On the other side, Natania popped as if she squeezed in Melissa’s hand.

Dark Planet’s Demon King, Demoness Natania, was actually pinned to death by Melissa’s superpower.

“Hahahaha, this is the time!” The purple figure suddenly appeared beside Melissa, and Captain Ginyu laughed maniacally.

He had been waiting for this opportunity for a long time. The moment Melissa killed Natania, he performed his Body Change superpower toward Melissa.

He was desperate.

**“SWAP!”**

A bright light shone up, and Captain Ginyu’s spiritual body came out of its shell and lunged toward Melissa’s body.

**“Huh?”** Melissa bit down on her thin lips.

Her body suddenly became rigid, and at this moment, a great sense of crisis came over her heart.

At this time, she couldn’t care less about what Muiyang asked of her, and the golden light shone in her eyes.

Seeing that Melissa suddenly used the Legendary Super Saiyan Transformation, Muiyang, who was prepared to stop Captain Ginyu from using his powers, stopped.

He observed. Once he found something wrong, he would immediately take action to block it.

**“You’re looking for death!”** Melissa snorted coldly. The golden light in her eyes was flashing away.

Captain Ginyu’s spiritual body came close to Melissa’s body, flew halfway to it when the immense momentum suddenly hit it. The spiritual body paused and returned to its original body.

Captain Ginyu’s head went blank, and his whole body trembled, “How could this happen? My superpower actually failed. Is the power in her body still above the limit of my superpower?”

There was only one possibility of the superpower failing, and that was that the opponent possessed a level of power that the master couldn’t capture.

At the moment just now, he felt the fear that he had only felt in Frieza.

This girl, too, possessed a transformation ability that instantly increased her power level.

At this moment, Captain Ginyu’s eyes were filled with deep scruples when he looked at Melissa. In his heart, he mistook Melissa’s power just now for Muiyang’s ability of “Kaio-ken.”

**“You seem to have used some weird superpower just now. Is it the ‘body exchangeability’ that Muiyang told me about before?”**

Melissa tilted her head, very angry, “How dare you try to take my body; you deserve to die.”

Her body was actually being watched by such an ugly alien, making Melissa’s heart swelled with rage at the thought.

How could her body be taken away by someone else! At this moment, she didn’t care what Muiyang had told her before, that she couldn’t use her Golden Eyes Transformation and she should use the Kaio-ken. It had already been thrown out of her mind.

**“DOUBLE KAIO-KEN!”**

Melissa shouted, and dark red energy rose. The whole earth suddenly cracked open with countless cracks, and after the ground sank a large section, the bursting stones bounced out with a swoosh.

“Your power has actually increased that much!” Ginyu was dumbfounded.

“Damn, you and that human really are the same race!”

Ginyu wasn't happy about it. Such “transformation ability” was really desirable. Moreover, he couldn't even take such a body away.

Chapter 260

Melissa, who had displayed Twice Kaio-ken, had increased her power level to 160,000.

That was why it was no problem to deal with the mere 100,000 power level of Captain Ginyu. Therefore, Captain Ginyu was miserable.

Once Melissa launched into a frenzy, even Muiyang's heart was terrified. Within two or three blows, Ginyu's body was battered and bruised.

“I'm not happy; King Frieza will not let you go.”

After the exchange of superpower failed, Captain Ginyu knew he was in danger and would threaten to use the name of Frieza even before he died.

“Frieza is nothing!” Melissa was so arrogant that she didn't even care about Frieza.

Even if she couldn't beat that Frieza, so what, Muiyang would protect her!

She was the one who had the “backing.”

The thin, flapped winged energy blade emitted a dizzying light; starlight flashed and scraped Captain Ginyu's body one by one.

The hallowed Captain Ginyu was even scraped into pieces by her.

“I'm sorry, Muiyang, I didn't keep my promise.” After killing Captain Ginyu, Melissa honestly came to apologize in front of Muiyang.

He knocked her on the head with a “slap,” then said, “Next time, don't make an exception. Remember my arrangement in the future. If you use the Kaio-ken or the Golden Eye Transformation at every turn, you won't achieve the purpose of exercise at all.”

“Uh-huh, I know!” Melissa smiled as she put her hands over the beaten area.

“By the way, there's still a white-haired alien in the Ginyu Force that hasn't been killed.” Muiyang pointed down to Jeice, who had been knocked flying by Melissa earlier.

“I'm going to kill him!” Melissa said.

Her figure then appeared in a flash to where Jeice had fallen.

Looking at Melissa's back, Muiyang shook his head, “Melissa, this girl is too jumpy. I wonder who she resembles more.”

Planet Metamor's Fusion Technique could fuse the consciousness and body of two people.

If it was anyone's personality, it should also be a fusion of the two. However, although Melissa was a fusion of Melia and Melis, she seemed to have a more independent mind.

This might be caused by the fact that Melissa was a complete soul body.

What happened next was simple. Melissa came and went in a matter of seconds, and she killed the last member of the Ginyu Force.

Thus, Ginyu Force, under Frieza, had truly fallen.

"Muyang, where are we going next?"

Melissa jumped to Muyang's side and looked at him with her head cocked. The battle just now was not at all enjoyable for her. The Kaio-ken was cool to use but not very challenging.

"Let's go find Cooler Armored Squadron. Their strength is about the same as when you used Kaio-ken. They don't have any weird superpowers, so don't use the Golden Eyes Transformation this time."

Muyang had already planned everything out. As long as Melissa could be obedient, he guaranteed that she could grow her combat experience quickly.

"As you wish." Melissa's bright eyes looked at Muyang.

Her body split into the twin sisters in a burst of white light, then hung onto Muyang's body separately.

.....

More than two months passed in the blink of an eye.

During this period, Muyang continued to bring the twin sisters to challenge powerful masters. After destroying the Ginyu Force, they first approached the Cooler Armored Squadron.

The newly-formed squadron was the same as the original, with a three-person squad, and its power level was up to 160,000 to 170,000.

On that day, Muyang brought Melissa to the Cooler Armored Squadron. With the Kaio-ken on, Melissa fought a good fight, finally destroying the Cooler Armored Squadron again.

Next up was King Cold's strongest unit, considered the most powerful fighting force in the North Area.

The leader looked like an alien, and when Muyang saw it, he discovered that this guy was actually the same family as the wild race of Pui Pui's alien under King of Demon Realm Dabura. His power level was as high as five million.

Even though Melissa had used her Golden Eyes Transformation, she was still severely injured. In the end, if it weren't for Muyang, Melissa would have lost her life.

"Ouch, it hurts." Melissa wailed in pain.

Her whole body was lying in the center of a huge circular pit, half of her body buried by the soil.

“Won’t you get up yet?” Muiyang crouched at the edge of the impact crater and threw a gravel head at her.

“Muiyang, my bones are broken. It hurts when I move.” Melissa looked dumbly at the clouds floating in the sky, just lying there without moving.

Muiyang said, “You still have Senzu Beans on you; just eat them.”

Melissa said, “I can’t move. Come and feed me!”

He looked at Melissa, who was buried halfway in the soil a moment ago and was now wilting.

Finally, seeing her in such a miserable state, he shook his head and walked over to her and stuffed the Senzu Beans into her mouth.

After one Senzu Bean went down, the rich vitality immediately healed all the injuries on Melissa’s body. She soon became lively again, and after coming out of the impact crater, she lay down on Muiyang’s back.

“Muiyang, I seem to remember some things from the past.”

“What have you remembered?” Muiyang looked at Melissa with surprise.

Melissa didn’t know what she was thinking of; her face suddenly became flushed, “It’s all some messed up things.”

Muiyang was thoughtful and cupped Melissa’s chin, “Did you feel that you used to be dirty?”

Melissa snorted, “Not at all. I think that’s quite good.”

Muiyang laughed, “You and Mexia’s personalities haven’t even merged yet, and you already agree with her behavior? However, it’s already good to be able to remember a little bit of stuff. In a few years, you’ll be able to really wake up.”

Melissa was still too young now. Even if she looked a little more mature than her actual age because of the Fusion Technique, it couldn’t hide the fact that she was still a loli.

“Muiyang, take me to Earth!” Melissa suddenly said.

“Yes, let’s go see your friends from your past life. Maybe it will help you awaken faster.” Muiyang nodded his head in agreement.

Isaac and Alice would be delighted if they saw Melissa, as well as the brothers and sisters of Kami School.

When he thought of this, Muiyang was determined to return to his hometown. He then grabbed Melissa’s hand and started to perform Instant Transmission.

.....

The earth was located in a starfield far to the South of the North Area.

It was a very backward area in terms of force. The nearby planets had little useful things besides water, plants, and animals.

Even if the Frieza Force already knew this star field's situation, they didn't send a large army to conquer it.

Due to the frequent use of Instant Transmission between the earth and the outer planets, Muiyang found the earth's location very easily. With a flash of light, Muiyang brought Melissa to the earth.

The breeze washed the shore in fine waves, creating white waves.

This place was around March or April when the warblers and willow floss were growing, and the warm sunlight was already a little hot.

"Muiyang, where is this place?" Melissa wasn't very familiar with the earth.

Although she already had a partial memory of the planet in her mind, it was impossible to get her to remember the geographic location.

"Not sure, but it's okay. I'll take you back directly."

Muiyang shook his head. After his thoughts spread out, he quickly determined the location of the Great Azure Mountain. Then with another Instant Transmission, he returned to his own house with Melissa.

.....

The Great Azure Mountain was in September, and the air was vaguely hot.

In the small building of the house halfway up the mountain, April was lying leisurely on a sun chair, wearing a pair of sunglasses on the bridge of her nose.

She was wearing a cool-looking dress, showing a large piece of delicate white skin, with melons and fruits and drinks beside her.

"My brother has been out for over a year; I wonder if he has found Senior Sister Mexia."

"I think he should have found her!"

In the meantime, April's lips moved. Suddenly her eyebrows knitted together as if she were bothered.

"Em, what are you thinking about so intensely?"

A clear voice sounded in her ears, making April thumped and jumped up. What entered her eyes was the handsome figure of Muiyang, who was accompanied by an eleven or twelve-year-old girl.

"Brother, you're finally back!"

April looked agitated and looked over at Melissa, "Is this the reincarnation of Senior Sister Mexia? Shouldn't she be just over nine years old? How did she..."

If she were the reincarnation of Mexia, she would have been only nine years old.

However, the girl in front of her looked eleven or twelve years old. Her body was starting to develop, so were the Saiyans that precocious of a race?

Muyang smiled, “She is the reincarnation of Mexia. You can call her Melissa. It was just that her situation is a bit special.”

Before Muyang finished speaking, an icy gaze was ushered in behind him, “Muyang, tell me clearly, who is this woman?”

“Haven’t you regained a little memory, or have you forgotten April? She is our sister?”

Melissa was startled and then said thoughtfully, “April, erm, it does seem that there is someone so beautiful... but why is she living in your house?”

“Senior sister, you’re the one who let me live in to ‘supervise’ my brother.” April was the first to take a stand.

“Is it my idea?” In the meantime, Melissa muttered, her eyes sweeping over Muyang and April, “You two wouldn’t have anything to do with each other, would you?”

“Absolutely not!” April jumped up in shock.

“What are you thinking?” Muyang laughed and patted Melissa’s head.

Why was Melissa acting like this? Was she jealous?

It was unexpectedly kind of cute!

“What the hell is going on?” Melissa pressed the question with authority.

April became weak under Melissa’s eyes. Although she was usually a very heroic female scientist, she seemed to feel a little guilty in front of Melissa now.

“Senior Sister Mexia, no, Melissa is like this...” April said what Mexia had told her.

After listening to all this, Melissa stayed for a long time. Her turquoise eyes stared at April for a long time, and she blamed herself for her past life, “My past life was sick in the head. Looking for such a beauty to supervise her husband, isn’t she afraid of the other party stealing him from her? No, no, it’s too dangerous.”

She knew too well how attractive Muyang was to the women around him. She still had many years to go before she reached adulthood, and with such a beautiful woman by his side, Melissa’s heart was uneasy!

The only good thing about April was that she looked weak and very obedient.
