

## **Ball God 271**

### Chapter 271

In the universe, 10,000 power level was a watershed. Below 10,000 power levels, even with a massive attack, it would at most exterminate the species on the planet.

When the energy reached the 10,000 power level or more, only then would it begin to cause unerasable damage to the planet.

In the face of a high-intensity battle, the planet's solidity was far from enough.

This was the case on Planet Ambera. As the battle between MUYANG and Slug continued, the planet's crust had fractured, as if the end had come. The great rivers had been diverted, and species began to become extinct.

However, MUYANG and Slug in the battle, neither of them had time to pay attention to the death of these species. In front of the strong, the weak could survive, only by luck.

With his eyes gazing into the distance and his ki firmly locked on Slug's position, MUYANG gasped for breath, and crystal sweat had seeped out from his forehead.

Suddenly, MUYANG took a false step in place. With a whoosh, his body suddenly disappeared, leaving only a blurred figure.

The strength of MUYANG had exceeded his expectation, making him unable to control the whole situation.

His eyes followed MUYANG's figure, and the moment MUYANG disappeared, he judged where he would appear next and stretched out a fist to attack, yet there was no touch except a muffled sound.

"Is this afterimage?" Slug's heart tightened. At that moment, a sense of crisis came.

"Not good!" Slug was shocked out of a cold sweat, and his body quickly moved up.

At this moment, the harsh fist wind suddenly brushed past his cheek, and MUYANG appeared with his fist waving.

Then, a violent storm rushed to the ground, but he saw the whole earth violently overturned, and a huge mushroom cloud rose.

"What a close call. If that attack hit me, I would definitely have to pay a great price."

Looking at the huge mushroom cloud that rose, Slug thought while resisting the huge shock wave.

He couldn't help but pinch a cold sweat in his heart. However, his reaction was also swift.

After just dodging the attack of MUYANG, he immediately reacted again. His body moved to the side and smoothly raised his hand.

He lifted one of his hands, grabbed the arm of MUYANG, and fiercely threw him.

When Slug grabbed his arm, the corner of MUYANG's mouth flashed a cold smile.

With the vast force of being thrown out, his other handheld Slug's arm back, giving force to his waist. His feet then kicked his opponent's abdomen with a hook.

However, after all, Slug was also a ruthless character who fought through the universe.

He instantly discovered Muiyang's intentions, and his arms were violently extended.

Muiyang's force was immediately nullified. On the contrary, his force intensified the impact of the fall.

With a rumble, the body smashed into the ground, immediately exploded a huge crater.

**“Just now, I almost got hurt by you.”**

Slug looked viciously. His killing intent almost condensed into a solid body, freezing everything around him.

With a dive, his arms suddenly contracted again, like a leather whip fiercely close the distance. Slug's body suddenly rushed towards Muiyang.

**“The body of the Namekian is bizarre.” Muiyang was shocked.**

The pores of his whole body tightened up to make a defensive posture.

Every part of the Namekian's body could be used as an attack point in the battle.

The arms could be extended, the body could be gigantic, and the eyes and mouth could also release ki waves.

**BANG!**

Slug's knees smashed into Muiyang's arms, and immediately a soreness and numbness came along in his arms.

Muiyang's body began to fall to the ground. However, while falling, Muiyang wasn't wholly helpless –

**“TRI-BEAM!!!”**

A Tri-Beam was unleashed right at Slug's face. The orthodox Tri-Beam required a long time to build up power, but at this stage of Muiyang's development, even if the Tri-Beam was released immediately, its power couldn't be underestimated.

The Tri-Beam that emitted danger was so strong that Slug was afraid to take it hard.

He hurriedly stretched his arms to escape. However, at this time, Muiyang turned from defense to offense and followed up again.

**Peng Peng!**

In the air, Muiyang and Slug blasted each other, fist after fist. Blinding flash rose like a great sun, and both sides flew backward under the huge impact.

**“Damn. How can this kid's body be as flexible as a mudfish?”**

Slug flew in the air a hundred meters above the ground. A mouthful of blood sprayed out of the corner of his mouth, and his face turned pale.

Although the energy of six times Kaio-ken wasn't as powerful as Slug's, Slug had aged after all. The long battle had already made him physically exhausted.

On the other hand, Muiyang was also panting heavily. However, his panting was mainly from the pressure of the Kaio-ken, not from the exertion of the battle itself.

He would not last long at this rate.

SNAP!

A heavy blow was struck with force.

Slug's body fell quickly.

RUMBLE!!!

In the moment of landing, Slug quickly rebounded. The ground suddenly collapsed out of a huge impact crater of a thousand meters square, with the surrounding area of tens of thousands of meters covered with dense spider web cracks.

In the leap to about the same position as Muiyang, the two sides again into two constantly fighting flashes of light.

Between lightning and fire, the two exchanged another tens of thousands of blows, each collision causing tremendous damage to the other's body.

“Pfft!”

Finally, Muiyang frowned and couldn't help but spit out a mouthful of blood in his mouth.

“Worthy of being the rumored Super Namekian. Slug's power is worthy of such a name. Even if Frieza faced him and wanted to defeat him, he would have to pay a heavy price.”

Muiyang's dark eyes stared at Slug. He thought six times Kaio-ken was enough to deal with Slug, but now it seemed that it was not enough!

Although Slug had aged, his combat experience's wealth was not a match for a pampered character like Frieza.

Muiyang could only be Slug's match with the six times Kaio-ken.

This situation couldn't continue. If Kaio-ken were used for a long time, it would cause damage to his body.

After gritting his teeth, Muiyang knew he had to end this battle as soon as possible. He had no time to take care of the situation on Planet Ambera.

Muiyang threw his weight around and frantically unleashed an even more powerful force with a forceful swing of his arm.

“SEVEN TIMES KAIO-KEN!”

Thick energy covered the surface of his body as Muiyang endured the severe pain in his body and unleashed his most powerful strength.

As sweat continued to seep out of his forehead, endless energy surged up madly.

The dark red color was daunting to look at, giving a sense of powerful oppression.

Muiyang's ki at this time had been raised to a level comparable to Slug's.

"Impossible. You actually haven't used your full power just now!" Slug was dumbfounded.

This scene made him roar with his eyes wanting to crack. When he looked into Muiyang's dark eyes, he actually developed a trace of fear.

This taught Slug to feel incredulous. He was a Super Namekian! He dominated one side of the universe; how could he be afraid of a young man in his early twenties!

"Hurry up and finish the battle. Let's finish Slug as soon as possible!" Muiyang couldn't bear the pressure of the Seven times Kaio-ken for too long.

"Haha, I'm Super Namekian, Slug. How could I lose to you, little kid!"

Slug opened his mouth wide and laughed. However, the next moment his voice froze as Muiyang leaped to his side; his speed was beyond his imagination.

BOOM!

A booming sonic boom pierced through the air.

"How is it possible!!!" Slug's jaw dropped, hissing loudly in disbelief as he was sent flying.

His body was cutting a huge abyss along the ground, dust rising and rocks crumbling wherever he passed.

At the same time, his chest collapsed into a large depression, and murky blood dripped down.

Tick!

The sound of bleeding made Slug's heart chill, and he finally felt his life was threatened.

.....

"Great. Muiyang was actually able to suppress Slug." In the distance, Birgil watched in an excited mood.

However, once he glanced at the mountains and forests that kept collapsing around him, his mood could no longer be good.

Even if he managed to hold back Slug and even kill him here, Planet Ambera would never be able to return to its original state.

At this time, a golden glow caught Birgil's attention. Underneath the huge abyss blasted by the aftermath of the battle between Muiyang and Slug, an orange-red plane of light was revealed. It shone as brightly as if it was as crystal clear as glass.

“What is that thing?”

Birgil was puzzled to go up. However, when he flew to the depth of about a thousand meters in the canyon cracks, he could see clearly what the object in front of him was. An expression of disbelief suddenly appeared on his face.

In the deepest part of the canyon, a huge orange-red crystalline body was revealed. With a flat, glazed surface, the exact size was unknown. It was covered with a thick layer of rocky soil.

After this battle, the soil and rocks crumbled away, revealing its original face. The beautiful color was all too familiar to Birgil.

“Super Dragon Ball!!!”

Birgil was shaken. He gazed at the exposed piece of crystalline ground, then snapped his head up to look at the huge Dragon Ball hanging in the sky.

In contrast, he had understood.

Why was the size of Planet Ambera exactly similar to the Super Dragon Ball in the sky?

Why would the two giants be companions to each other and move in a way that they should not rotate around the center point if their masses were different?

And... why Planet Ambera would also give him a familiar feeling of closeness.

The reason for everything was very simple.

Because Planet Ambera itself was also a Super Dragon Ball!

However, in the long years of washing, it was covered by the dust and water vapor in the universe. Over time, it formed an ecological environment similar to a rocky planet.

The two Super Dragon Balls were actually in the same planetary system. They were so close to each other, which was really unbelievable.

Chapter 272

The Super Dragon Ball was as big as a planet. The diameter of one Super Dragon Ball was more than 37,000 kilometers.

Seriously speaking, even if the earth was placed in front of it, it could only act as its small satellite.

A total of seven Super Dragon Ball, respectively distributed in Universe 6 and Universe 7.

In-Universe 7, there were a total of only four. This universe was so big and vast, but now in a small planetary system, there were actually two of them. Such a change was too low.

It was so low that one couldn't help but speculate if someone had collected them and placed them here.

As the Super Dragon Balls inside Planet Ambera revealed, the rock cover layer on the surface began to become slack.

Under the effect of a blast of tremendous energy, the crust finally began to crack.

The crystalline orange-red star revealed itself and echoed with another Super Dragon Ball in the sky, flashing with a bright and dark light.

Buzzing!

A sound similar to a dragon's roar echoed in space.

“Planet Ambera is going to disintegrate.” Birgil watched in silence.

As soon as the Super Dragon Balls were revealed from inside the planet, he realized that Planet Ambera, where he had lived for many years, was about to disappear.

In the distance, Muiyang knocked Slug out as soon as possible because he was also blinded by a golden glow in front of his eyes.

Since he was tens of thousands of meters high in the sky, the huge outline of Planet Ambera emerged in front of him. Muiyang could clearly see the state of Planet Ambera.

“This planet is actually a Super Dragon Ball as well!”

He roughly remembered the original story; there was a four-star Dragon Ball among the Super Dragon Balls in the unpopulated void zone, which had become a barren planet because it was covered with rocks.

However, he didn't expect... that vibrant Planet Ambera was actually a Super Dragon Ball as well.

“What's going on? Why this planet looks like this?” Slug cough blood drily, and his face had appeared twilight.

He didn't know what a Super Dragon Ball was, but the Namekian blood flowing in his bloodline made him feel affection for the two planets in front of him.

If there were no dreadful human in front of him, he would definitely want to take possession of these two planets for himself.

The moment he thought of the powerful strength shown by Muiyang, Slug's heart felt a chill.

His face once again gloomy, “Birgil's luck is excellent. This time, I will leave, but one day, I will personally send you guys to hell.”

With this in mind, Slug no longer had the heart to fight. He wanted to get away from the opponent's pursuit as soon as possible and leave the planet.

However, Muiyang had no intention of letting him go-

“HEAVENLY SKY BEAM!!!”

A piece of bright white energy swept over. Slug's scalp tingled after seeing that piece of energy, and he didn't dare to resist.

However, when he just moved his body to avoid it, a cold wind came from the side of his body, and Muiyang's indifferent face appeared at a short distance away from him.

“When did this guy get close.” A look of horror appeared on his Slug's, cold sweat emerged.

Muiyang followed Slug's pace, clenched his fist, and blasted out violently.

“Poof!”

A mouthful of blood spurted out, and Slug’s spirit wilted up.

“AH! GO TO HELL!!!”

Slug’s face was hideous as he roared in annoyance.

“THUNDER SHOCK SURPRISE!”

A light golden arc of electricity crackled, and this was a domain blocking type of move.

Under the Thunder Shock Surprise coverage, Slug’s body was paralyzed by the electricity, and his movements became sluggish.

At this time, Muyang stepped forward, throwing punches, hooks, and horizontal kicks. A violent attack kept hitting Slug’s body.

In just a few seconds, Muyang threw thousands of consecutive punches at Slug, making Slug dizzy and bleary.

“AHHHHHHH!!!”

A burst of intense pain surged to his heart. Slug bowed his body in despair, his mouth letting out a heart-breaking and miserable scream.

Slug had never suffered such humiliation before.

“Damned bastard!”

“This is unforgivable!”

Slug’s mouth muttered as if he had gone mad like a beast. He growled, and his body began to swell up violently. In no time, he had risen to a height of more than ten meters.

Muyang frowned at Slug, who had become a giant. Muyang even felt a pang of unease in his heart for some reason.

At this time, Birgil shouted from afar, “Be careful, Slug is planning to explode himself!”

“What?!?” Muyang was shocked.

Looking at the sinewy face of Slug, it didn’t look huge! This guy was crazy. When he couldn’t beat his opponent, he would blow himself up, which was too decisive.

Muyang didn’t understand Slug’s mentality. He was already very old, more than three hundred years old; he didn’t have much time to live.

So, with many years of power and blessing, he would bring a few enemies to hell before dying. In his opinion, this wasn’t a loss.

“HAHAHAHA, YOU’LL DIE WITH ME. NONE OF YOU WILL ESCAPE.” Slug laughed heartlessly.

Like a star in the moment of destruction, he could release all the energy that burned in eternity. Once he self-destructed with his 70 million power level, he could explode hundreds of millions of energy intensity.

At that time, no matter it was Planet Ambera or other planets in the nearby orbit, they would not escape the destruction.

“Crazy!” MUYANG cursed. He didn’t want to throw his life away here.

His body flickered quickly, and MUYANG appeared beside BIRGIL in a flash. He then took his hand and used Instant Transmission to leave Planet Ambera.

Swoosh.

There was a burst of light, and the entire Planet Ambera had lost MUYANG and BIRGIL’s figures.

Slug stared blankly, “Bastard, where did everyone go?”

“Shit. Stop, I can’t self-destruct!!!”

At this time, his self-explosion could no longer stop. Slug’s face twisted up, but his heart was filled with a pang of sadness. He was such a despicable and shameless villain to deceive himself.

This was a big loss. His self-destruction couldn’t even take a cushion away.

“NO!!!”

“I’M NOT WILLING TO DO IT!!!”

Slug roared sadly. His wrinkled face began to twist as his body swelled to the size of a small mountain.

He then turned into a huge ball of energy more than a hundred meters in diameter.

RUMBLE!

A huge roar resounded through Planet Ambera. The sky was like a rising sun, and then it exploded, making the atmosphere penetrate instantly.

A brilliant light could be seen in space, gradually becoming larger and brighter and finally engulfing the entire field of vision.

The high energy scattered out like a huge belt of light, stretching towards the depths of the universe.

In the blink of an eye, the entire crust of Planet Ambera was destroyed!

The entire planetary system was disturbed by a powerful impact, and several planets deviated unsteadily from their orbits and were then swallowed by the spreading energy.

.....

About two hours or so later, deep in space, the location where Planet Ambera originally stood was no longer a beautiful azure planet.

Two giant orange-red Super Dragon Balls collided together, constantly shining with brilliant flashes of light or darkness, looking spectacular.

Phew!

A figure dressed in casual clothes appeared in the middle of the space.

Muyang's eyes looked excitedly at the two Super Dragon Balls in front of him. The original one-star Dragon Ball was still there.

There was another Super Dragon Ball right next to it in the vicinity of the one-star Dragon Ball with five hot gold stars inside.

“This is a five-star Dragon Ball. My luck is good; I actually found two Super Dragon Balls at once.”

To know that there were only four Super Dragon Balls in the Universe 7, and now half of them were right in front of his eyes.

If it was before the Acceleration World's evolution, Muyang could only see but not touch the Super Dragon Balls, let alone take them away. However, now it was different.

The Super Dragon Ball diameter was 37,000 kilometers, but Muyang's Accelerated World was 50 million meters in circumference.

That meant a spherical area with a radius of 50,000 kilometers, and space inside was so wide that it was more than enough to put in four Super Dragon Balls at once.

With this in mind, Muyang was ready to open the Acceleration World to collect these two Super Dragon Balls.

The two Super Dragon Balls were a huge project, and Muyang carefully manipulated the Acceleration World entrance, allowing it to expand continuously.

When the passage grew enough to fit the Super Dragon Balls, a bright light flashed in Muyang's eyes. The spatial fluctuations of the other world overlapped with Universe 7.

With a “boom” sound, as if hiccuping, one of the Super Dragon Balls became illusory and entered Muyang's internal space.

The line of sight was aimed at the remaining Super Dragon Ball. Muyang followed the same pattern and quickly took it into his arms as well.

“I already got two Super Dragon Balls here. Should I go and collect the other two Super Dragon Balls in the Universe 7?” Muyang thought happily.

People always wanted to get what they want.

Chapter 273

In the end, collecting Super Dragon Balls was just something that Muyang was thinking about in his mind. He wasn't really going to collect them.

Because there were three more Super Dragon Balls scattered in Universe 6, which made it impossible for him to collect all the Super Dragon Balls at once hence, he wouldn't expend too much energy on this.

Wait until the day he could cross the universe; then it wouldn't be too bad to consider collecting the Super Dragon Balls.

This time, he had already collected two Super Dragon Balls because of an outburst of luck. He came across them by chance, so there was no need to dwell too much on the remaining ones.

After transferring the two huge Super Dragon Balls to the Acceleration World, Muiyang stayed in space and looked at the empty universe with a bland gaze. He smiled faintly and then used Instant Transmission to leave this starry sky.

.....

Earth, Great Azure Mountain.

When Muiyang returned to earth, Melia and Melis sat on the sofa, eating snacks while watching TV.

On the other hand, April was busy next to her, serving tea to the Namekian Birgil.

“Thank you. Just give me a cup of water.”

Birgil said thank you, but Namekian itself could use Photosynthesis to synthesize nutrients that meet physiological functions. So, usually, they only needed to drink water to maintain life.

It was the first time for April to face the Namekian. Her two eyes glanced at Birgil from time to time, curious about the Namekian’s bodily functions.

At this time, Muiyang returned, and when they saw him, they all stood up.

“How’s the situation over there?” Birgil asked with concern.

Muiyang shook his head, “Slug has already died by self-destruction, and likewise, Planet Ambera has also been destroyed.”

After listening to the brief description of the situation on Planet Ambera, Birgil looked a bit gloomy and sighed, “Slug deserved what he got, but Planet Ambera was destroyed after all!”

Although his heart was prepared, he couldn’t help but feel some emotions when he actually knew the news.

After all, it was a planet where he lived for hundreds of years. So, it was hard to accept that it was destroyed.

“Muiyang, Birgil said.... that there is e also a Super Dragon Ball inside Planet Ambera?” Melia equally sighed.

She had recovered Mexia’s memory, and she also knew that azure planet.

“Yeah, what about those Super Dragon Balls?” Melis asked.

Muiyang smiled and said, “I just went back and already took care of those two Super Dragon Balls properly. Now, they are staying in the safest place.”

The twin sisters understood the meaning of Muiyang’s words as soon as they heard them, and their pretty faces couldn’t help but show a smile.

Although Birgil didn’t know how Muiyang handled the Super Dragon Balls, he believed in Muiyang’s character and gave the Super Dragon Balls to Muiyang. Therefore, Birgil was also relieved.

Muiyang looked at Birgil and said, “What are you going to do next? are you going to find a reclusive planet again?”

“No, I’m going to go back to Planet Namek.” Birgil shook his head.

“For now, Planet Ambera is no longer needs me to guard it. I heard you guys say that there is already life repopulating there on Planet Namek. So, I plan to go back and take a look. I wonder how it has become.”

Muyang nodded, “The Grand Elder will be pleased to see you go back.”

Birgil said, “It’s been hundreds of years since I left my home planet. It’s time to go back.”

“Do you want me to send you there?” Muyang smiled lightly.

Planet Namek was only a month or so voyaged from the earth; if he used a more advanced spaceship, he could arrive in a few days.

However, with Muyang’s Instant Transmission, he could go even faster and send Birgil to Planet Namek in an instant.

Having seen the magic of Instant Transmission, Birgil certainly didn’t refuse Muyang’s kindness and smiled, “That would certainly be best. Then I’m sorry to trouble you.”

“There is no trouble.” Muyang smiled, indicating that it was nothing.

Next, Birgil didn’t stay on earth any longer, and Muyang could see his eagerness to return to his home planet.

Hence, he took him by the shoulders, then launched Instant Transmission, and quickly sent Birgil to Planet Namek.

As expected, with the addition of Birgil, a Namekian with 7 million power level, the overall strength of the Namekian was no longer the “weak” like the original Namekian.

.....

A few minutes later, a brilliant light shone again, and Muyang had returned to his home in Great Azure Mountain.

“Senior brother, did that Namekian return to his home planet?” April ambled on the sofa.

Earlier, she had been unable to interject, but now she was chattering and inquiring, with a strong desire to know everything about the situation outside.

Muyang laughed and said, “I have sent him back.”

April regretted, “What a pity, I have not even been to other planets.”

At this time, Melia, like a little adult, picked up a cup of tea. While she drank it, she said, “The planet outside is similar to earth. The food and entertainment are not as good as the earth. Occasionally, it will be a bit refreshing as tourism, but the rest is not much fun.”

“Sister, I think differently from you.” April shook her head.

She didn’t go to the outer planets to eat and play; she went to do scientific research.

At this time, MUYANG said, "April, do you want to take a look inside my Acceleration World? There are still two Super Dragon Balls in there, enough for you to study."

"Super Dragon Balls?" April's eyes lit up for a moment.

She had seen the Earth Dragon Balls a long time ago, but the Super Dragon Balls, she had only heard of the name and had not really seen them yet.

According to Melia and Melis, the Super Dragon Balls were big, but it was still necessary to see them in person to know how big they were.

"Yes. Two Super Dragon Balls are enough for you to study. I hope you can develop a radar that can detect Super Dragon Balls similar to the Dragon Ball Radar." MUYANG smiled lightly.

Although he couldn't collect all the Super Dragon Balls for a while, it was good to make preparations beforehand. April had a strong desire for research anyway.

"Senior brother, I'll take care of the radar. Take me inside quickly."

April confidently patted her chest. As she was dressed as a researcher, April looked heroic.

"When you see the Super Dragon Ball later, you will be stunned."

Melia said with a light smile. Her pair of eyes looked at April's graceful and delicate body and muttered what April used to eat growing up in her heart. Her body development was too good.

However, after thinking about their merging into Melissa, which was their future appearance, and knowing that her body wasn't inferior to April's, she, again, found her confidence.

MUYANG smiled and looked at April and the twin. With a wave of his big hand, a soft power landed, wrapped them up, and transferred them to the Acceleration World.

In the past, the girls had come to the Acceleration World, so it was like coming back to their home.

On the central planet, the two blue Gaia had refused together, and after seeing April and the twin, it jumped up and down.

April looked to the left and right and saw no sign of the Super Dragon Balls, so she asked, "Brother, where are the Super Dragon Balls you said? Bring them out."

MUYANG laughed and pointed his finger down to the two planets in the sky, "The Super Dragon Balls aren't on the planets. Lift your head and look up yourself."

April raised her head suspiciously. Soon, her two eyes were wide open, and her cute little mouth was open.

In her field of vision, two huge planet-like orange and red objects firmly occupied her view.

If MUYANG hadn't told her, she would have thought that the sky was initially this color.

Chapter 274

"This is the Super Dragon Ball. It's so big!" April stared at the sky.

The massive star with a diameter of 37,000 kilometers was floating at a high altitude, which gave her some visual shock. April's voice was trembling a little at this moment.

She had never seen such a huge Dragon Ball before. Originally, the Super Dragon Ball might be huge in her anticipation, but she never thought it would be that huge.

Now she finally knew what Melia and Birgil meant when they said that Planet Ambera was a Super Dragon Ball.

It turned out that the Super Dragon Ball was as big as a planet.

“Awesome! The earth's Dragon Ball is not even a shadow compared to it. Senior brother, are there seven Dragon Balls like that too?”

After she recovered from the surprised, April had a powerful desire emerged from her eyes to learn more if such huge Dragon Balls were collected, how powerful the summoned Shenron would be!

Muyang nodded, “There are indeed seven of them, but it's not easy to collect them.”

The Super Dragon Balls were already big. They were also distributed in the universe 6 and 7, making it even more difficult to collect them.

April said, “Senior brother, don't worry, I will definitely study the Super Dragon Balls thoroughly and then create a super radar for detection.”

Muyang indifferently waved his hand, “There is no hurry about the radar; just take your time.”

“Well, leave it to me.” April's face was cheerful.

As a scientist, exploring the unknown comprehension could bring her great satisfaction, which made her happier than improving her power level. She would be even happier if she could help her senior brother.

“Has Gaia's body grown in size?” At this time, Melis, who was holding Gaia in her arms, suddenly said.

Muyang said, “It may have grown up. Now that this Gaia has fused with the original two, its size has become bigger.”

Melis held Gaia in the air and shook, “..... Gaia is a creature born on Planet Ambera, while Planet Ambera is a super dragon ball. What do you think Gaia is exactly?”

Muyang was stunned for a moment and said, “I don't know. This guy's life is too peculiar.”

He was never sure what kind of a life form Gaia was. Thinking about what Whis told him when he was in the God of Destruction Planet – “It seems that the power of the Dragon God is felt in Gaia's body!” Besides, combined with the fact that Planet Ambera was a Super Dragon Ball.

Maybe Gaia had some relationship with the Dragon God.

“Let's not talk about that. If you want to study the Super Dragon Ball, tell me what's missing, and I'll fill it up for you.” The first thing he could do in the Acceleration World was to find something April couldn't handle.

April smiled lightly, and her pleasant voice said, “There is no shortage. My research equipment is in the Acceleration World; I can carry out research work at any time.”

Suddenly a cold aura swept over from behind, and Melia grunted twice, “April even put her research laboratory here. It seems that in my absence, you have lived together for more than just ten years!”

Melis added, “Yes. Also, she hollowed out the bottom of the Great Azure Mountain.”

Melia: (o`3’\*)

Melis:(? ^-???)

April’s heart broke out in a cold sweat and hastily explained, “No, senior sister. I’m doing this for the Saibamen research. The Saibamen research takes a lot of time, and senior brother’s Acceleration World can save a lot of time for me.”

Melia stared and drifted over. She looked closely at April’s pretty face and shook her hand, indifferently, “Forget it. Just think of it as a mistake I said before.”

April breathed a sigh of relief and said weakly, “Senior sister, you don’t have to scare me all the time in the future.”

Melia glared at her, “That means you’re fainthearted.”

At this time, April was embarrassed and smiled.

Muyang watched Melia, Melis, and April fool around; he shook his head and laughed. He didn’t try to stop it; instead, he re-divided the pattern of the Acceleration World. He fixed the two huge Dragon Balls in the sky to relatively easy-to-approach positions and then sat alone on the ground, thinking about the training.

In the previous battle with Slug, with the seven times Kaio-ken on, it looked as if Muyang won very easily. However, the dangers involved were not small.

The pressure on the body of Kaio-ken was too great, especially with such a high level of execution as seven times Kaio-ken.

It wasn’t just pressing on the internal organs like a gravity chamber, but it was also overspending on the body functions.

Although the gravity chamber training would cause pressure on every cell of the body, it was still within the body’s tolerance range after all.

Under the strength of gravity that could be endured, the body’s energy could resist this oppression and thus hone a more powerful body strength.

However, Kaio-ken was different. The Kaio-ken was very overbearing to perform; it was branching out into the future and was a huge overdraft.

This overdraft was too tremendous and easily caused irreparable damage to bodily functions.

Even North Kai himself had said that he couldn’t continuously use more than twice Kaio-ken because of the damage caused by twice the range of Kaio-ken.

The body might still recover gradually, but once it exceeds twice, it would collapse on the spot, and it would also leave after-effects.

Muyang even suspected that Son Goku, in the original story, would get vital heart disease because of the frequent use of high levels of Kaio-ken, which beyond the body's capabilities, causing a huge burden on the myocardium.

Of course, the effect of taking Ultra Divine Water as a child couldn't be ruled out, but the damage caused by Ultra Divine Water wouldn't have been hidden for more than ten years!

Since there was such suspicion in his mind, Muyang had to check his body carefully. He didn't hesitate to consume a lot of Spring of Life, which nourished the body. After all, it was the essence of the body!

The warm energy gradually penetrated every cell in the body, as if nourished. The cold feeling spread in every cell.

.....

Time flew.

Soon more than six years passed unnoticed, which only fifteen years from the original story's start (the time when Son Goku and Bulma met).

In the Acceleration World, April flew a spaceship to collect data on the Super Dragon Ball's surface. Over the years, in addition to completing her research work on earth, a lot of her time was spent studying the Super Dragon Ball.

Many years earlier, the large Dragon Ball radar had been completed by her and was now placed inside Muyang's gravity ship.

The north side of the central planet was a scene of wind and clouds. The emerald green lawn was blown and stirred up by the wind.

The ground was scraped up with a thick layer of soil, and there was a desolate scene of pits and puddles everywhere like after a shell bombing.

Clattering—

A huge tornado storm swept across the globe. Because the central planet was set up with great gravity, any splashing object that flew up soon fell vertically like a nail under the pull of gravity.

In a place hundreds of meters apart, two beautiful girls stood voluptuously, attacking each other—the two girls with golden eyes and black hair fluttering in the wind.

Those two girls were about 16 or 17 years old, 1.7 meters tall to highlight their slender and upright body. Their pretty face covered with sweat because of the strenuous exercise. The fair and beautiful cheeks slightly flushed.

The hazy blush looks even more seductive.

Suddenly, the two girls golden eyes shone a beautiful light, and the green energy in the air stirred together.

The voluminous power squeezed each other, blasting out a huge roar at the same time.

The damaging impact swept in all directions; with the central planet only twenty kilometers in diameter, the shock wave soon scraped around the planet.

Ta-da-da.

The two girls switched to close combat again, and in a moment, countless unreadable residual shadows spread across space between the sky and the ground.

Chapter 275

Six years have passed, and Melia and Melis's power level had increased from 60,000 points to 600,000, which was not particularly advanced compared to the 100,000 power level of ordinary Saiyans on Planet Sala when they reached adulthood.

It should be known that once a Saiyan enters puberty, their strength would rise. If they were allowed to improve, Melia and Melis's power would be much more than that.

Of course, the reason for controlling their power was not because they would surpass him, but because the Saiyan physique was too perverted.

Especially after becoming a Super Saiyan, they were desperate to improve energy.

Not to mention that Melia was also the "Legendary Super Saiyan," the body would almost 100% appear to be out of control once they let go—in an agitated state.

So, of course, Muiyang should prevent the situation from getting out of control.

Therefore, combined with the martial arts insights left behind by Whis, Muiyang made a specific term for their practice.

Coupled with Melia and Melis had mastered the Golden Eye Transformation, which was already not inferior to the ordinary Super Saiyan Transformation, the rush to become stronger was unnecessary.

Instead, it was better to take a little more time to strengthen the control ability and lay the foundation for a greater breakthrough in the future.

Also, Melis' change was worth mentioning. Perhaps because of the merged Melissa's influence, Melis' body as a sister also began to change towards the "Legendary Super Saiyan," and she now also mastered the Golden Eye Transformation.

Once the two sisters transformed, the original 600,000 power level would grow to 30 million power levels at once!

Melia and Melis came to the surface of a completely different planet and then felt the surging energy in their bodies.

Melia was very proud, "Giggle, Melis, my Golden Eye Transformation state power level has reached 30 million."

Melis and Melia psychic connected, so Melis could feel the same happiness and said, "I'm the same as you, also 30 million!"

Melia laughed out loud, "We can reach 60 million power level when we turn into Melissa."

"Yes!" Melis was also overjoyed. "But even Melissa is not a match for Muiyang."

Planet Metamor's Fusion Technique was no longer a fusion technique when it came to them.

Instead, it was like a superpower between two sisters; when Melia and Melis merged into Melissa, their power would double with no fusion technique at all. At the same time, the original time limit disappeared in their bodies.

Melia's face indignantly said, "Muyang has a cheat like Accelerated World, so he can simply ignore the bottleneck. His power will rub up. Even so, he still wants us to suppress power; it's too much."

Melis glanced at her, and her eyes color changed back to black, "Muyang said the Super Saiyan's power is too dominant. Let's take it easy; this is for our own good."

Melia proudly said, "Of course I know, to prevent us from losing control."

"Well, speaking of which, Muyang's power level has almost reached 50 million. He has been brewing in front of the fourth limit for a long time, and he doesn't know when he will breakthrough. Once he breakthrough, his strength will become even more powerful." Melis slightly frowned like a light smoke brow.

She had just caught up with him; how could he about to open the gap again before she was even warmed up?

Fifty million combat power was the position of the fourth limit.

For Muyang, who had mastered the Kaio-ken, the fourth limit wasn't a trouble at all. He stayed in front of the limit for a while to adjust his state and prepare to make a breakthrough.

As long as he could break through the limit of 50 million power levels, he would once again create a miracle in earthlings' history.

Just as Melia and Melis were whispering, a heavenly aura came from afar. When they felt this aura, both of them were slightly surprised.

Is Muyang planning to breakthrough?

With this in mind, Melia and Melis' figures flashed and appeared where Muyang was.

They found him sitting in the sky, thinking hard. The ripples around him were visible to the naked eye.

Six years ago, Muyang's power was only 10 million power level. Even if he could get 70 million power levels with Kaio-ken, it was not his body's power, after all, so he started to retreat.

In the Acceleration World 16 times the speed of time, Muyang trained for several decades.

With the accumulation of time, his strength finally reached the limit of his body at this time.

The whole 50 million power level!

A shadow floated down, and Muyang opened his eyes. The upright figure appeared between the two women and smoothly wrapped around their slender waists.

"When are you going to break through the limit?" Melia's body leaned over and raised her head to ask.

Muyang aimed at the ground that was destroyed beyond recognition. He hit a ring to repair the surrounding environment, said, "Now. I came over to inform you guys. By the way, transfer the things in the Acceleration World to the outside."

"Are you sure?" Melis asked.

Muyang smiled lightly and said confidently, "Definitely!"

Both Melia and Melis laughed and cheerfully helped Muyang to pack up the things in the Acceleration World.

There were not many things to pack up. It was only Super Dragon Balls, a few spaceships, and April's research device.

They then took Gaia to move the unripe Senzu Beans out together with the soil, and the Acceleration World became empty.

"You guys wait for me outside. I'll be able to break through soon." After moving everything out, Muyang said to the girls.

"Go for it!" Melia waved her hand.

"It will definitely work." April clenched her fist and cheered.

Muyang nodded towards the girls and then applied his power to send them all out.

Taking a breath, Muyang looked at the empty central planet. His body began to rise until he flew to a place a hundred kilometers above the ground. Muyang stabilized his body with his eyes looked thoughtfully at the emerald green central planet below.

When he was about to reach the limit of his power, a message came from the underworld, telling him that the limit's location was inside the central planet.

As long as the central planet was destroyed in one fell swoop, the limit would naturally be broken.

Is this considered to be broken and then established?

With this thought in his mind, Muyang adjusted his body's state. His face began to look serious as he lightly shouted, while the surging and vast energy surged around him.

**"TRIPLE KAIO-KEN!"**

A dark red light shone as it floated on the surface of Muyang's body. He didn't use a higher multiplier of Kaio-ken because it was no longer necessary.

In his normal power level close to 50 million, the high times of Kaio-ken had begun to lose the increasing effect.

For example, the triple Kaio-ken at this time could theoretically exchange nearly 150 million power levels.

However, Muyang now had only 80 million power levels. So, even if he uses the seven times Kaio-ken to fight his physical damage, the increase was minimal.

The Kaio-ken researched by the North Kai had lost its effect when the user approached 100 million power level.

“Next, let’s break the fourth limit!”

Muyang gave a long whistle, and with a high fighting spirit, the majestic power converged between his hands into a terrifying ki wave.

As the energy converged, an energy ball with a diameter of more than one meter burst out with a brilliant and radiant light.

Aiming at the central planet underneath, Muyang was filled with anticipation.

“HEAVENLY SKY BEAM!!!”

BOOM!

A loud sound spread out, and a huge pillar of energy light more than a meter thick descended from the sky.

A powerful and oppressive aura immediately roared towards the central planet as if it were a prehistoric beast.

In an instant, time and space seemed to freeze.

The black hair under the ki wave rushed uncontrollably up to the sky. Under the naked eye observation, the terrifying ki had shattered the surface of the central planet and then directly instilled into the planet’s interior.

Click.

It seemed that something was broken.

The central planet stepped into the rhythm of destruction. The surface of the planet slightly rumbled and began to expand!

BOOM BOOM BOOM!!!

At the core of the central planet, an icosahedral crystal floated up, covered with sinuous cracks.

When it reached Muyang, the icosahedron shattered into countless tiny starlights, which entered Muyang’s body.

The moment the starlight entered his body, the limit on Muyang’s body was broken, and the violent energy stirred and became stronger and stronger!

50 million!

54 million!

.....

60 million!

65 million!

Muyang’s power level directly rose to 65 million before stopping!

Simultaneously, the Acceleration World's space range expanded again, from the original 50,000 kilometers square to 5 million kilometers square, enough to accommodate several sun-sized stars.

The time flow rate with the outside world also expanded to 32 times after the breakthrough.

After the original central planet collapsed, a planet 10,000 km in diameter gradually appeared in space's most central location.

As Muiyang descending on top of the central planet, the whole planet was the same size as the earth.

Mountains, rivers, plateaus, and lakes, as well as the endless vast ocean. The central planet becomes more and more like a living planet.

So, this what was the so-called broken and then established.

Chapter 276

“Starting from today, this central planet will be called ‘Planet Wudao!’” Muiyang stood on the central planet and solemnly named the planet.

The breakthrough of the limit was certainly a happy thing. However, there were always worries shortly, and Muiyang knew this truth.

For the third limit and the fourth limit, he had taken a trick, relying on the increase of the Kaio-ken to break the limit forcefully, but he could only rely on himself from the next stage onwards.

Nevertheless, this was still a long time away from him, so there was no need to worry too much.

With a turn, Muiyang left the Acceleration World and came to Melia, Melis, and April.

The three girls had been waiting with their heads held high for a long time, and after seeing Muiyang's delicate appearance, they all gathered around them.

“How is the breakthrough?” Melia asked first.

Muiyang gave a wink of understanding and laughed brightly, “Of course, it has worked.”

Melis had an expectant face, “Then your strength...”

“65 million power level in a normal state. Haha, not much improvement.”

Muiyang held back the excitement in his heart, decisively pretending when he should.

“Wow! I can't believe that you have become so powerful all of a sudden.” Melia said, somewhat sourly, “Your normal state is stronger than Melissa!”

Melissa's normal state was 1.2 million power levels. With the Golden Eyes Transformation, she could raise her power level to 60 million.

However, even that was much lower than Muiyang's normal power level, not to mention Muiyang's Kaio-ken and divine combat skills.

“Senior brother, take us to the Acceleration World to take a look. That central planet is still there, right?” April took small steps to come over.

She didn't really care about Muiyang and Melia's power level. Whether it was the 10,000 power level or 10 million power level, it was the same for her.

It was unattainable, so she might as well step up her research on Sabaimen technology.

"Haha, of course, it's still there. It will definitely surpass your imagination."

Muiyang laughed out loud, "Before that, I'll put the Super Dragon Balls in first."

The two Super Dragon Balls were too conspicuous in the solar system, so it was only right to hurry up and transfer them to the Acceleration World while they were not yet discovered.

Next, he teleported to the Super Dragon Balls location and pressed his palm to the Super Dragon Balls. With a "boing" sound, the two Dragon Balls were absorbed at the same time.

After doing this, Muiyang returned to Melia's side and snapped his fingers, leading them into the Acceleration World.

They appeared on a vast ocean of Planet Wudao with the sky above their heads and the deep blue ocean beneath their feet.

The huge waves rolling at this time lapped up hundreds of meters high. The wind blowing the water vapor, then like a dream drifted in the air. The majestic scene made Melia, Melis, and April stunned.

Muiyang smiled leisurely, "This planet is now called 'Planet Wudao.'"

"Wow, was this the original small planet? It actually became so big all of a sudden." It took Melia a while to come back to her senses.

Muiyang nodded and said, "Planet Wudao is about the same size as earth, with the same continents and oceans...."

With that said, Muiyang led them to a plain and felt that something was missing.

He then built a splendid palace out of thin air like a creator, with courtyards, gardens, internal lakes, everything, and a huge martial arts square inside for cultivation.

"Awesome!"

Muiyang's divine ability subdued the girls, and they looked at him with admiration.

The three women's amazement made Muiyang very receptive. He waved his hand at Gaia and placed the originally transferred out Senzu Beans near a lake, "Gaia, you will live there in the future. It's the same environment as Planet Ambera."

"Squeak." Gaia jumped, looking very happy.

Muiyang laughed loudly and placed April's research equipment not far from the palace.

Today's Planet Wudao looked very prosperous, but most of them were plants, and the animals were very few.

In the future, he might have to transfer some animals over from earth and other planets.

"Muiyang, use your power and let me see. "

After a flash, Melissa, dressed in a beautiful costume, appeared in the same place.

“Sure.” With a smile and a nod, Muyang leaped and flew to the huge martial arts square.

He then took a few steps back, facing Melissa squarely, and began to release the energy within his body.

BOOM!!!

The majestic energy suddenly rose to the sky like a hurricane swept in all directions.

Muyang’s black hair was slightly upward, surrounded by the winding silver-white ki flame.

With Muyang as the center, the white dust swept away, and a terrifying aura enveloped the entire world.

The impact of the energy released by Muyang made Melissa put one hand against her forehead to block the storm, while the other hand was clutching April, preventing her from being blown away by the wind.

“It’s so powerful. It’s actually a silver-white flame.” Melissa’s eyes stared intently at Muyang, and her beautiful eyes flashed with excitement.

Muyang’s state at this time was like a Saiyan transforming into a Super Saiyan with his hair floating upwards and his body covered by a shining light.

However, unlike the Super Saiyan’s blond hair and golden aura, Muyang’s appearance hadn’t changed, and the aura on his body was also silver-white.

Melissa looked excitedly and couldn’t help but turn into a Golden Eyes State, and her powerful aura rose as well.

Now April was in trouble. Her “weak” body was caught between the two forces, shivering. She could only half-crouch to keep the wind from blowing her away.

“That’s enough, quickly put away the power.” April let out a sad cry.

Swish!

The two auras disappeared at the same time, and the sky instantly calmed down. All the previous gusts of wind seemed to have never appeared.

Melissa flew to Muyang, holding his arm excitedly, “The look just now is so majestic. It’s a pity that I didn’t bring my camera; otherwise, I could have taken several posters.”

“I’ve... already taken that photo.”

April’s soft voice sounded, making Melissa turned back and saw her half-crouched on the ground, holding a high-resolution camera tightly in her arms.

The corners of Melissa’s mouth turned up, and teased, “You’re moving pretty fast. Remember to send the photos to me later.”

“Got it.” April got up from the ground and cleaned the dust from her body.

“Muyang, you’re so powerful in your normal state. Wouldn’t you be even more powerful with the Kaio-ken?” Melissa said with a crooked head.

Muyang shook his head, “You can’t say that. Although the Kaio-ken is North Kai’s winning move, North Kai’s strength is not strong. A lot of his deduction of the Kaio-ken relies on estimation. After the strength reaches my stage, the Kaio-ken gradually lost its increasing effect.”

“Oh!”

Melissa said softly, feeling a bit regretful, “It seems that we still have to rely on the strength of the normal state of the body.”

Muyang agreed with this. Training meant to take one step at a time. There were so many tricky places, such as the Super Saiyan Transformation, which was a huge bug that had advantages and disadvantages.

While achieving power enhancement without the ancestors’ guidance, most of the Super Saiyans fell into the trap of frantically enhancing the Body Transformation multiplier.

Thus neglecting the development of the Base Form wasn’t not prominently. If there was an unexpected event, the opportunity to transform would be defeated.

Base Form and multiplier, simultaneously, were probably the desirable ones. Before Muyang raised from 10 million power level to nearly 50 million, which was accumulated in the Acceleration World in decades, it was the normal power.

“Senior brother, recently I have developed a brand new Space Technology with Dr. Brief and Dr. Gero, which can shrink everyday equipment into small containers.”

While chatting, April suddenly talked about her work.

After listening to it, Muyang’s face was stunned for a moment, “Did you developed Capsules?”

April puzzled, “What is Capsules? Well, this is a good name.” She said and took out a capsule-like thing from her jacket pocket, with a lid-like button on it.

“This is a sample of the spatial container, which contains a small car.”

Muyang took the sample of the Capsules. It was indeed the same as seen in the original story, tiny.

Learning to open it from the original story, Muyang pressed the open button and threw it out. After a bang of white smoke, a small car appeared in place.

April was surprised, “Senior brother, how do you know how to open?”

Muyang casually found a reason to say, “I see that there is only one button on it, so I press it to try.”

“So that’s how it is. Senior brother is so smart.” April didn’t doubt.

How could she doubt her senior brother?

Melissa was surprised, “Such a small thing can actually fit a car!”

April said, "Later, it can fit bigger things like houses, spaceship, yachts... as long as you can think of."

"That's a groundbreaking invention!" Melissa stared at April as she said.

This was a great invention that could change everyday life. If this technology became widespread, the lifestyles of earthlings would all change dramatically.

"This is the case. Now Dr. Brief intends to set up a company with this technology and ask me if Dr. Gero and I want to join."

Muyang smiled broadly, "You should definitely join. When the time comes, being a millionaire will be a breeze."

April's delicate face showed a smile, "I'm not short of money. If senior brother is willing, I can transfer the equity to brother's name."

As soon as this remark came out, Muyang was very moved. He felt that his sister was not raised for nothing.

However, Melissa tsked twice and looked at April with a deeper meaning.

"This is not good. After all, it is the invention of participation..."

Muyang felt embarrassed and just about to refuse. However, Melissa was agreed on behalf of Muyang, "We're all family. April is nice so take it, Muyang."

With this money, Melissa could fulfill her desire to eat.

Chapter 277

Capsules technology was undoubtedly a transformative technology in the Dragon Ball World.

Its appearance would completely change the way people on earth traveled, and from then on, it became more convenient to travel.

The emergence of this technology also indicated that the earth's technology officially entered a new era.

Unlike the original story, this time, the capsule technology was not developed independently by Dr. Brief but combined the wisdom of April, Dr. Brief, and Dr. Gero.

So, the capsules technology had already been very mature and ready for mass production.

April insisted on transferring her shares to Muyang's name. Muyang refused several times before accepting them with embarrassment.

Thinking of having him, the "God of Martial Arts," as a backing, there shouldn't be any bold person who dares to hit the Capsule Corporation's idea.

From another perspective, he was also giving this immature but promising company platform.

Next, Muyang took Melissa and April to visit Planet Wudao.

The huge planet was like the earth, with mountains, rivers, plains, hills, and an endless blue sea, all of which were beautiful to see.

Melissa and April toured along with MUYANG, ringing out with silver bell-like laughter from time to time.

This world would be their private world, so it was exciting to see everything.

After strolling around the Acceleration World for a long time and generally appreciating the grandeur and magic of the new world, MUYANG beckoned and sent Melissa and April out of the Acceleration World together.

.....

Under the Great Azure Mountain, Azure Mountain City.

The bustling city was full of noise, and the spacious road was paved with asphalt.

People came and went on it; from time to time, cars drove through the middle, beeping, sounding a sharp horn.

Compared to the town where even electricity was relatively rare a few decades ago, this place had changed so much.

Melissa and April walked hand in hand at the front, looking around for a while, very happy.

MUYANG followed behind, with one hand in his pocket, leisurely scanning the stores on both sides of the road from time to time.

“MUYANG, there is a jewelry store in front; I’ll go in with April and have a look.”  
Melissa pointed to a store and shouted.

“You guys go ahead. I’ll wait for you at the teahouse.” MUYANG said with a smile.

Now he didn’t have to go in with them to look at jewelry, not like the old days when he was young and had to coax them.

“Speaking of which, I’m already fifty-two years old; time flies by.” MUYANG sighed and entered a teahouse to sit for a while.

With a long lifespan, he no longer worried about life expectancy; his lament was more about the passage of time.

The teahouse was the latest to open. Although the decoration inside was done in ancient style, traces of deliberate old-fashionedness could be seen.

MUYANG sat in the corner by the window alone and made a cup of tea. He then leisurely watched the people coming and going from the street below, without a trace of worry.

He liked this quiet and relaxed atmosphere.

Just when MUYANG was absorbed in watching, a surprised voice rang in his ears, “Ah, Uncle MUYANG, you’re here too!”

MUYANG looked back and saw a woman with blond hair walking toward him, holding a little girl in her hand, followed by a stout man.

MUYANG smiled, “Oh, Landy, long time no see.”

This blonde woman was the daughter of Muiyang's good friend Big Sister Marlen.

When Muiyang took Mexia back to earth to look for Shenron to reincarnate, this little girl was only fifteen years old.

In the blink of an eye, sixteen or seventeen years had passed, Landy had already started a family, and the man beside her was her husband, a martial arts practitioner with dark blue hair.

Looking at the ki in his body, he wasn't weak.

Landy happily laughed and picked up her child, "Uncle Muiyang rarely goes down the mountain; it's so lucky to meet you this time."

Muiyang laughed, "That's true; I'm quite close to your family. You can go to Great Azure Mountain anytime."

Landy laughed and shook her head, "It's a sacred place for martial arts. I would be embarrassed to disturb it."

Muiyang laughed and looked at Landy's husband, "Are you a martial arts practitioner?"

"Yes." Landy's husband was a bit restrained.

"You're not weak." Muiyang smiled lightly.

At this time, Landy introduced her husband to Muiyang, "He is my husband; his name is Puster, and he is the director of your Kami School Martial Dojo."

Muiyang looked at Puster with kind eyes. His approachability was what taught Landy's husband to be flattered.

"To be able to become the instructor of the Kami School Martial Dojo, your strength is not weak."

"Lord Muiyang is too kind!"

The man in front of him is the legendary "God of Martial Arts." He largely created the earth's current situation, not to mention the fact that he had saved the earth many times.

This kind of admiration was difficult for people who weren't martial arts practitioners to comprehend.

Muiyang smiled and nodded toward him; his eyes shifted to the little girl Landy was holding in her arms. She had dark blue hair with a red ribbon tied on her side.

Her face was very tender, and her black eyes were full of spiritual light. She was looking at him with a curious gaze.

"Is this your daughter?"

"Yes, her name is Launch, and she is my child with Puster." Landy took her daughter's hand and waved it toward Muiyang. "Little Launch, call him grandpa."

"Uncle!" Launch called out in a milky voice.

“Call grandpa....”

Although Muiyang’s appearance looked very young, according to the generation, he was Landy’s uncle. So, Launch should call him grandfather.

“Uncle.” Launch continued to call out.

Muiyang laughed out loud, “Little Launch is very discerning; just call me, uncle.” He reached out and patted little Launch’s head.

He then carefully looked at the little girl. Her dark blue hair, the red-colored hairband, and the aura of weakness and easy bullying, this sense of resemblance...

Could this child be the dual character of Launch in the original story?

“Landy, does this child have a dual personality?”

“Uncle Muiyang, how can you know?” Landy sighed in surprise. “We never understood Launch’s situation. Every time, after she sneezes, her personality will change....” Landy was quite confused with Launch’s situation

It really was the original Launch!

Muiyang was a little surprised, looking at the petite little girl in front of him. The well-behaved look had the potential of a virtuous wife and mother, indeed in the future.

Suddenly, he grabbed hair and gently waved it in front of her nostrils.

“Ah-choo!”

Little Launch couldn’t help but sneeze. This time Launch’s hair and eyes color all changed.

Her dark blue hair suddenly became gold, and her black eyes also turned turquoise.

This was the “Super Saiyan” Body Transformation!

Looking at Launch’s face turned fierce, Muiyang exclaimed in his heart. The current state of Launch was like the Super Saiyan. So, Launch was the earliest “Super Saiyan”!

“Launch, stop it!”

The little Launch, who turned blonde, was very restless and kept struggling in Landy’s arms, making Landy was busy calming her down.

“Uncle Muiyang, what do you think should be done about Launch’s situation?” Landy looked at Muiyang with an expectant face, hoping that he could do something about it as the God of Martial Arts.

Muiyang shook his head, “Launch’s dual personality is innate, and over suppressing it is not good.”

Suddenly Muiyang thought of something and said, “The blonde state of the little Launch potential is excellent. I see that it’s quite a destiny. You should consider sending her to the Great Azure Mountain; I can arrange Kanalita to guidance her.”

The original blue-haired Launch was too soft, but the blonde Launch was tougher.

Unfortunately, she was keen to be a bandit, even when her strength wasn't strong. Muiyang thought it would be interesting if he made Launch as Kanalita's disciple.

To be honest, after entering the Saiyan story in the Dragon Ball plot, the lovely Launch was drowned in the plot as if it had been forgotten. Not even her shadow could be seen.

The last appearance was when Son Goku fought Majin Buu in the Sacred World of the Kai, with elemental energy.

She seemed to be working in a courier company; at that time, Launch's appearance had been a little older, and life was not very much as it should be.

It was too bad that such a spiritual character was forgotten. Plus, now that Launch was the granddaughter of Big Sister Marlene, he should take care of her as an elder.

Once Landy and Puster heard that Muiyang intended to take Launch into the wall, they were happy.

Landy smiled and was busy nodding her head, "Yes, of course."

Muiyang laughed loudly, "Then it's settled. When Kanalita returns in a few days, let her take Launch as her disciple."

Muiyang really wanted to see if Launch would learn a skill. Thus, she wouldn't be a powerful bandit in the future!

#### Chapter 278

Landy and her husband left with little Launch, while Muiyang continued to sit quietly in the teahouse for a while.

He estimated that Melissa and April had already finished shopping and got up to pay the bill and left.

When he found Melissa, Muiyang noticed that Melissa had split into two people, Melia and Melis.

They had bags full of things at this time, and when they saw Muiyang, they came running towards him.

Muiyang took the package in their hands and looked inside. April's bag was filled with clothes and jewelry, all girly things, while the twins were all snacks and treats.

These two girls, besides eating, what else do they know?

Muiyang frowned, "There is no need to buy so many things to eat; there are still plenty at home."

Melia spat out her tongue, "You know Saiyan appetite. If I don't eat more, I will have no strength."

Muiyang was speechless. If April hadn't provided the Capsule Corporation's shares, his savings would have been eaten up by these two losers sooner or later.

"All you know is to eat. Can you be good like Little April?" Muiyang sighed. Compared to the twin sisters, who only eat and couldn't make money, the housewife type, April, was much more virtuous.

He now somewhat understood Chi-Chi's hard work in the original story.

"Humph." Melia coldly snorted but didn't retort.

April narrowed her eyes, gurgling, and smiled, “Senior brother, I have contacted Dr. Brief. In a few days, we will set up a company to develop and produce spatial containers. We discussed the name is called Capsule Corporation, which is provided by my senior brother!”

“You guys can do it. If you encounter trouble, talk to me directly.” MUYANG said, completely at ease.

Although he had occupied a large part of the Capsule Corporation’s shares because of his relationship with April, he wouldn’t interfere at all with management matters. It would be most reassuring to give it to a professional.

“Got it.” April’s face bloomed with a smile.

Next, he found a place where no one was and directly threw the big bags into the Acceleration World. He then instantly moved to take the girls back to the Great Azure Mountain.

.....

When they returned home, he told them about bumping with Landy’s family.

“If you are optimistic about that little Launch, why don’t you just take her as your disciple?” Melia hung back on the sofa when she got home.

MUYANG gave her a blank look, “I have enough trouble taking care of you guys. I don’t have time to take care of little kids.”

After hearing this, Melia jumped up swiftly and pounced on MUYANG with her teeth and claws. Unfortunately, MUYANG was prepared and threw her back to the top of the sofa.

“So you just dumped the trouble to Kanalita?” Melis hid her mouth and laughed lightly.

MUYANG said, “Launch is very obedient. At least in the blue-haired state, she is excellent to take care of. As for her blonde state, although she’s a little cranky, I think Kanalita can handle it.”

“I’m just saying.” Melia pouted.

“You guys just watch.”

MUYANG glanced over and saw the curved line on Melia’s chest. He then went up to tighten the clasp on her chest. Melia hummed uncomfortably, with a lock of cloud-like hair tossed from side to side.

.....

Three days passed in the blink of an eye.

Kanalita arrived at Great Azure Mountain after receiving a notice from MUYANG. Central City previously invited her to be the guest of honor at the 18th World Martial Arts Tournament. So, she rushed over as soon as the tournament was over.

“Teacher, I heard that you found a little disciple for me?” Kanalita said when she saw MUYANG.

When Kanalita arrived, Muyang was meditating in the courtyard. After sensing Kanalita, he opened his eyes, "That's right. It's Landy's child. Go and pick her up when you have time."

"So it's Landy's child." Kanalita nodded her head.

The twenty-five-year-old Kanalita was already quite mature and was fully capable of taking charge on her own to complete the tasks instructed by her teacher.

After knowing the identity of her young disciple, Kanalita didn't say anything more. She was also an acquaintance with Landy's family, which made things easier.

"Have you encountered any problems with your recent training?" After explaining to Kanalita about Launch's matter. Muyang was concerned about his disciple's training.

Kanalita immediately told Muyang about the difficulties she encountered in her training. After listening to her and thinking briefly, Muyang quickly gave a solution.

Muyang's instructions were straightforward and very precise to pinpoint the root cause. It was only a few short words, but it made Kanalita's mind clear.

"Teacher, I have some questions about Kaio-ken," Kanalita said thoughtfully.

"What's the problem?"

Kanalita said, "The Kaio-ken is good, but the conditions for performing it are too harsh. It can't be performed without a certain profound level. There are so many martial arts practitioners in the Lookout, but only a few of them can comprehend the Kaio-ken. Such a move doesn't seem to make much sense to earthlings."

Kaio-ken was the move created by North Kai, and it had an extremely high starting point for training. It was basically impossible to comprehend the mysteries of Kaio-ken without systematic study.

For earthlings, Kaio-ken was a profound martial art. So, trying to use it as a popular move would be impossible.

Muyang engraved the Kaio-ken in the martial crystal to allow earth martial arts practitioners to learn this skill. Unfortunately, so far, not many people have learned this move.

"I have also considered this issue. Kaio-ken is a martial art collection of great accomplishment. Its roots are not in earth martial arts, so beginners are bound to encounter great problems." Muyang thought about it and said, "If we want to popularize Kaio-ken, we must improve on its principles."

"It is a very advanced work." Kanalita frowned slightly, knowing the difficulty of it.

"Right." Muyang nodded seriously.

It took North Kai millions of years to research Kaio-ken, and it would be difficult for Muyang to modify it to adapt to the strength of his current strength.

However, it might not take much time to reduce the strength and just fit the earthling stage.

When he thought of this, MUYANG felt that he should find North Kai to discuss with him about Kaio-ken.

“It looks like I need to sort out the Kaio-ken. Meanwhile, you can take care of Launch’s matter.” MUYANG waved his hand and explained about Launch.

He was especially talking to her about Launch’s dual personality physique.

Kanalita nodded her head, decently. It was her first time leading a disciple, and her attitude was solemn.

After Kanalita left, MUYANG talked to the girls about his intention to go to the North Kai’s Planet. Melia and Melis had been to the North Kai’s Planet when they were still Mexia. The poverty atmosphere emanated from everywhere there, and the twin sisters wouldn’t be interested in the North Kai’s Planet. So, they waved their hands and let MUYANG go on his own; they wouldn’t follow.

The two sisters were too spoiled and should be allowed to suffer a little. So, without saying a word, MUYANG dragged them to North Kai’s Planet with Instant Transmission.

.....

Space above Other-World, North Kai’s Planet.

In the pink space, auspicious golden clouds were floating. At one end of the dense auspicious clouds was the end of the winding serpentine path, below which floated a small green planet of more than fifty meters in diameter.

“MUYANG, we said we’re not coming back. Why did you bring us along!” Melia chattered on about her dissatisfaction.

“Yes, the North Kai’s Planet is not interesting at all.” Melis also frowned.

For their level, the gravity of the North Kai’s Planet wasn’t even useful for training. They had learned the North Kai’s masterpiece “Kaio-ken” a long time ago, and it was impossible to learn the Spirit Bomb, so they didn’t have to come here.

MUYANG glanced at them and laughed, “You also know that the North Kai is very boring. So, consider it as a company for me.”

“Humph!” The two sisters hummed together and then merged into Melissa.

She was dumbfounded and looked around North Kai’s Planet. She then saw a brown gorilla looking at them curiously with its head tilted, shouting “uh-oh, uh-oh.”

“Yo, long time no see, Bubbles. Go find North Kai.”

MUYANG raised his hand to greet Bubbles.

After breaking through the fourth limit, his dimensional level was promoted to the fifth-dimensional level, which was already on par with North Kai.

With “uh-oh,” Bubbles cocked his head to look at Muyang and Melissa, seemingly not recognizing them.

When Muyang saw it, he obviously knew that he had overestimated Bubbles’ intelligence.

The gorilla didn’t recognize them at all, so he walked straight through Bubbles toward the North Kai’s hut.

Upon knocking on the door, the room was empty. North Kai was not in his place.

“Where the hell did he go?” With a chant on his lips, Muyang sensed North Kai’s ki and determined that North Kai was above this divine planet.

At this time, “beep beep beep” a few long honking sounds came.

Stepping out of the room, he saw North Kai was driving an old red car, traveling over at a plodding speed. The speed was meager. Muyang eyebrows raised; he couldn’t help but hold his forehead.

He walked faster than North Kai’s driving.

North Kai was so idle that he had nothing else to do and drove a small car around the North Kai Planet. But then again, this divine planet of the North Kai was indeed a little smaller.

Living on it was like being in jail. Not being suffocated was already an indication that the North Kai’s mental quality was relatively high.

If he didn’t find something to amuse himself, wouldn’t he die of boredom?

“Ah ah, who are you?” North Kai jumped down from the car and pointed at Muyang but couldn’t remember his name.

“Muyang.”

“Yes, your name is Muyang.” North Kai walked up to Muyang and carefully sized him up. “I haven’t seen you for decades, and your strength has grown quite fast. I can’t even see through you anymore.”

“Huh, level five dimension. How on earth did you train?”

North Kai suddenly rubbed his eyes in disbelief and was shocked on the spot. Only a few decades had passed, and Muyang’s level had actually risen to the level five dimension, which was already comparable to him.

When he came to the North Kai Planet, he was only a level three dimension!

When did it become so easy to raise life dimensions?

Muyang said, “Because I have been training in the Grand Kai’s Planet for several years.”

North Kai shook his head, “Even if you trained on the Grand North Kai’s Planet, it is impossible to raise the life dimension so quickly.”

Muyang added, “Also, I trained in the God of Destruction Planet for some time.”

“God of Destruction Planet, what kind of place is that?”

North Kai didn't react for a moment after hearing this, still thinking about which mysterious place the God Destroying Planet could substantially raise dimensional life level, making him want to go and see it.

Suddenly he thought of something, and his face became stiff. He then asked in a small voice, "The God of Destruction Planet you are talking about, it can't be the place where the God of Destruction... Lord Beerus lives, right?"

Only a few places in the universe were qualified to be called "God-World," not to mention the word "destruction" in front of it.

Muyang nodded with a smile, "Indeed, it was Lord Beerus' place. I was fortunate to be appreciated by Lord Beerus and Whis, and was invited to practice in the God of Destruction Planet..."

Of course, the main thing was to go to the God of Destruction Planet as a chef; the training was only incidental. Muyang pretended in front of people; of course, he picked the shiny side to say.

North Kai didn't know who Whis was, but the God of Destruction Beerus, he was aware of.

His North Kai Planet turned out to be quite huge; just because he somehow provoked the God of Destruction Beerus, Beerus slapped his planet into what it was today.

So, whenever he thought of the God of Destruction Beerus, the North Kai trembled in his heart.

Who could understand the suffering in his heart!

"Your opportunities are prosperous... Did Lord Beerus do anything to you?"

North Kai shivered a little bit, looking at Muyang.

Muyang glanced at North Kai and said, "How should I say, I was well fed and entertained when I was in the God Destruction Planet..."

"What the hell..."

Not waiting for Muyang to finish, North Kai cried out loudly. What an honor it was to be entertained by the God of Destruction Beerus.

No wonder his life dimension increased so fast; he might have been taken as the mantle heir by Lord Beerus.

When he thought about what had happened to him, tears flowed down his face.

Cough cough!

Muyang coughed a few times dryly.

He hadn't finished his words. He was entertaining Whis and God of Destruction Beerus in the God of Destruction Planet with good food and drink, not the other way around. However, since North Kai had misunderstood, he simply didn't bother to explain.

"Who is this girl?" After crying for a while, North Kai swept his sight towards Melissa.

Muyang said, "She is my wife, Melissa, the reincarnation of Mexia."

North Kai looked at Melissa and nodded, “So it was that impure-minded soul body back then that succeeded in reincarnation.”

When Mexia was in her soul state, North Kai was able to see through her essence at a glance. After reincarnation, Mexia had a physical body, so it was not easy to see through.

When Melissa heard what North Kai said about her past life, her face blushed for a moment. Her body couldn't help but burst out with a powerful aura. What did you mean by impure mind? It was too much.

Muyang's reaction was quick. He pressed Melissa down when her aura was just about to burst out.

“North Kai, I'm here this time mainly to discuss the Kaio-ken.”

“Didn't you already learn the Kaio-ken?” North Kai asked curiously.

“The situation is like this....”

Next, Muyang talked about the situation he encountered. When he said that as the power level was approached 100 million, there was a delay of Kaio-ken, North Kai was already too shocked to speak.

100 MILLION POWER LEVEL?!?

North Kai shivered in his heart: Worthy of being the one who was favored by Lord Beerus. His strength increase was too fast. One hundred million power level, he couldn't even think about it.

Coughing lightly, North Kai pretended to maintain his majesty and said, “It is already sporadic for Kaio-ken to increase to this level of strength. Although Kaio-ken is the crystallization of my life, above 100 million power level, there is nothing I can do.”

Knowing that it was impossible to get a technique of improvement here at the North Kai's Planet, Muyang retreated and stated his intention to downgrade Kaio-ken and popularize it to the earthling.

“Transforming Kaio-ken to fit the earthling physique is something that can be studied.” North Kai nodded his head.

The original Kaio-ken was condensed from the martial arts he collected from many planets in the North Area.

The starting point for training was extremely high and not necessarily suitable for earthlings.

It would take a little time if it was modified for the earthling's physique, but it wasn't impossible to achieve.

This was something that North Kai could help with, but it would take two people to figure it out together.

“Just as long as it can be achieved.”

Muyang smiled lightly, then released the Acceleration World's power, and at once absorbed several people into the Acceleration World.

For suddenly transferring to an unfamiliar environment, North Kai showed extremely high psychological quality.

When he noticed that the huge planet in front of him possessed powerful divine ki no less than the North Kai's Planet, he still couldn't help but take a breath of cold air backward.

“What is this place, and why does it have a spatial intensity no less than that of the North Kai's Planet?”

Muyang explained vaguely, “This is Planet Wudao; you can think of it as my divine planet. The time flow rate here can be expanded to 32 times that of the outside world. We can take our time to study Kaio-ken here...”

Muyang was called the God of Martial Arts on earth, and the name Planet Wudao was quite appropriate.

Just after he finished his words, North Kai wowed and cried.

This was someone's divine planet, which was as big as a real planet. Looking at the vast mountains and rivers, the lofty and towering mountains, and the splendid palaces behind, this was where the gods live!

It was said that happiness was contrasted. Compared with this divine planet, his North Kai's Planet was just... like a doghouse.

The aura of poverty was revealed everywhere.

“Muyang, what's wrong with him?” Melissa pointed to North Kai and whispered.

Muyang said, “Let him cry a little. North Kai is aggravated.”

Melissa looked at him, pitifully, “He's so miserable.”

North Kai cried for a while, then wiped down his sunglasses and looked at Muyang with envy and jealousy, “As expected of someone who is favored by Lord Beerus. The treatment is just different.”

Muyang didn't move and didn't answer. Since the North Kai misunderstood, he would continue to misunderstand. He would only waste his time if he explained.

So in the following days, Muyang and North Kai began to discuss the improvement of the Kaio-ken.

However, he didn't focus all his attention on Kaio-ken but also did spar with Melissa from time to time.

## Chapter 280

When North Kai was brought to the Acceleration World by Muyang to develop the Kaio-ken, in the second headquarters of Frieza Forces, Frieza sat on the egg-shaped spaceship, with a grim face listening to the report of Zarbon's work.

These years Frieza had been through a lot of trouble. In addition to the harassment from the Galactic Patrol, there were also a variety of unexpected events to deal with.

Eleven years ago, he fought with the mysterious Shadow Man. Although the Shadow Man was finally defeated, which greatly increased Frieza's reputation, Frieza's headquarters planet was destroyed and relocated to the second headquarters.

The Ginyu Force was wiped out seven years ago, which left Frieza's hands missing a sharp edge.

A similar blow was inflicted on Cooler's Armored Squadron and King Cold's Strongest Squadron. The attackers appear to be the same group of people.

This was because the tree was so big that someone was targeting their forces!

Frieza had been investigating the cause of the Ginyu Force's destruction for several years, but the specific perpetrators never showed up.

The Ginyu Force was repeatedly wiped out, which already made Frieza angry. So, Frieza was uncomfortable without uncovering this mysterious force as if he was stuck in his throat.

"Zarbon, how does Slug control of that territory he occupied?" Frieza's scarlet eyes burst out of the compelling cold light.

Rumor had it that the ruler of the border area between the North Area and East Area had disappeared for many years for no reason.

Now, many predators with a certain amount of strength were aiming their attention at that territory. Frieza, who certainly joined them, was busy expanding his territory.

Zarbon truthfully reported the situation, "Frieza Force collaborated with King Cold's Legion and has occupied a large area in the past few years."

"Ho ho ho, finally we hear some good news." Frieza narrowed his eyes, and his heart flowed much more freely.

"King Frieza..." Zarbon came forward and said, "On the way to the edge of the North Area, my subordinate passed by a mysterious planet and found a magical fruit tree on it. The trunk of that fruit tree was huge. The branches and leaves were huge that it covered almost the entire planet."

Frieza was very surprised to hear. He rubbed his chin and said, "Do you know what kind of fruit tree it is?"

Zarbon reported, "My subordinate was confused. After returning, I looked up a lot of information and determined that its name was 'Tree of Might.'"

Frieza was surprised, "What is Tree of Might?"

"This Tree of Might is a kind of demon tree, very authoritative. Once rooted, it will absorb the entire planet's essence until the planet is completely desertification; even a small grass can no longer grow. The Tree of Might will condense dark red fruits. It is said that the fruit of the Tree of Might is a fruit that can only be consumed by gods..."

“Interesting. What is the effect of this fruit?” Frieza asked with interest.

“Because it is condensed from the life essence of the whole planet, it is recorded that the Tree of Might fruit can greatly increase the strength and life span of the person taking it!”

As soon as Zarbon’s words were finished, Frieza was amazed and jumped up from the little spaceship with a pair of fierce scarlet eyes stared deadly at Zarbon.

Frieza had great power; for power, he didn’t have too much pursuit, but if the Tree of Might fruit could really increase life expectancy, he was determined to get it.

“Are all these things you said true?”

In the face of Frieza’s breathtaking pressure, Zarbon said, “King Frieza, everything is true. I am sure that the giant tree is the Tree of Might.”

“Where is the exact location?”

“It is located in the southeast part of the North Area near the East Area region, on a living planet called ‘Planet Munster.’”

“Hahahaha, Mr. Zarbon, this is the best news I have heard so far.” Frieza laughed loudly and patted Zarbon’s shoulder. “If this news is true, I will praise you. When the time comes, you will also have a share of the fruit from the Tree of Might, Mr. Zarbon.”

Zarbon humbly said, “Thank you for the reward, King Frieza.”

When the time comes, the Tree of Might fruit would definitely be a large share for Frieza.

However, to get a part of it, Zarbon was satisfied. He didn’t want to take it for himself because he had seen the desperate power that Frieza showed and didn’t think he could surpass Frieza after getting the Tree of Might fruit.

Zarbon was living under Frieza’s command. Instead of risking a great deal of private possession of the Tree of Might fruit, it was better to contribute generously in exchange for greater appreciation of King Frieza.

Besides, the Tree of Might fruit was so important that even if Zarbon wanted to take it for himself, he felt powerless against the other forces eyeing it. It would be better for Frieza to shield it from the storm.

“Are the news all blocked?”

Zarbon was as modest as a gentleman and elegant in his demeanor, “The entire ‘Planet Munster’ is heavily guarded, absolutely foolproof.”

Frieza nodded his head in a comfortable mood and said emphatically, “Absolutely no outsiders must know, especially Cooler!”

When he said this, Frieza’s tone was significantly aggravated. He could share the news with King Cold, but Cooler must not know.

“Yes. Please rest assured, King Frieza.” Zarbon nodded vigorously.

“Find an excuse, and I will personally go to the top of ‘Planet Munster.’”

After thinking about it, Frieza still felt uneasy. He could only be completely at ease if the Tree of Might were kept under his nose to keep an eye.

Zarbon, of course, obeyed the order and then found a reason to assemble a team. When Frieza gave the order, the vast army flew towards the distant Planet of Munster.

Time soon passed for more than a year.

.....

Not only Frieza’s army’s voyage in the universe, but there was also another scene in Muiyang’s Acceleration World.

On the wide seat, North Kai was comfortably lying on it. Next to it was the coffee table with various fruits and snacks, and the warm daylight shining down, very comfortable and soothing, which made North Kai didn’t even want to go back.

Under the time flow of 32 times, North Kai had already sorted out the Kaio-ken practiced for the earthlings.

Of course, the Kaio-ken at this time had been degraded and became more suitable for the earthlings to practice.

North Kai named it “Kami-ken”!

Wow!

At that moment, the ground shook violently, and a roaring force came from everywhere.

When North Kai took off his sunglasses, he saw a crimson pillar of energy rising from the sky.

A silver and a gold figure were fighting in the sky, so fast that even North Kai could only see a blurred shadow.

North Kai paid attention for a while and couldn’t help but sigh, “Worthy of being the one who was favored by Lord Beerus. Muiyang’s power is too terrifying. Perhaps Frieza is not even his opponent.”

Until now, King Cold and two of his sons had been a big problem for North Kai within the North Area. However, North Kai was not strong enough, and there were no strong masters in the North Area.

So, even when King Cold and two of his sons were in North Area, there was nothing he could do.

North Kai was not quite sure about the strength of Frieza’s Final Form. However, he thought Frieza was at least at the same level as Muiyang. If Muiyang was willing to help, maybe the problem that had been bothering him for years could be solved.

He had helped Muiyang improved the Kaio-ken, so he wondered if Muiyang was willing to help him. At least Muiyang could do it to respect him!

North Kai laughed as he played his little game in his heart. Turning to Melissa, who was fighting with Muiyang, he thought this strange woman was even more eccentric than Muiyang.

Her age was a lot younger than Muiyang, but her strength was particularly outstanding.

“I heard that Melissa is Saiyan, but she doesn’t even have a tail. Her ki is also different from the Saiyan of Planet Vegeta. Although Saiyan was a Warrior Race, they weren’t that strong! Was there another race of Saiyans outside the North Area?”

North Kai couldn’t understand the situation of Melissa, so he simply stopped thinking about it. Now, if he could have a good relationship with this couple, he would have something to rely on in the future when the North Area was in chaos.

While North Kai was thinking, Muiyang and Melissa were facing each other from a distance in the distant sky.

His body was burning silver-white flame, and his black hair was straight up in flames. Muiyang was wearing a black undershirt, and his form was like a Saiyan in the Super Saiyan Transformation.

Opposite him, Melissa’s hair was also black, but her eyes were golden, and her body burned with a mixture of golden and green flames.

They both had three hundred times the gravity exerted on their bodies, as well as huge bondage of spatial rules.

Otherwise, with their 70 to 80 million power level, even the surface of Planet Wudao couldn’t withstand such a huge energy impact.
