

Ball God 371

Chapter 371

On this day, people who got the news gathered at the entrance of the delivery room.

Muyang walked around the corridor with an anxious look. He looked towards the inside of the delivery room from time to time, and a ray of his intention penetrated in. Melia and Melis hadn't given birth yet.

"Nothing is wrong." Alice said softly and comfortingly.

"It's been a long time. It wasn't even that long when Sipriel gave birth to the twins before." Muyang's expression showed some concern. Melia and Melis were Legendary Super Saiyans. They should not have any problems when giving birth, right?

The remaining light fixed on the side of the Broly. His mind recalled the appearance of the Legendary Super Saiyan when it was out of control. He hoped that there would be no accidents.

But obviously, Muyang's worries were somewhat superfluous. When he was still distracted and worried about certain accidents, the sound of a baby crying came from the delivery room. Melia gave birth to a boy first, and soon after Melia gave birth to a child, Melis also gave birth to a child, a girl.

Perhaps because the genes of the two parents were too good, as a hybrid child, they were born with an energy value of nearly 1,000 power level. The powerful energy whipped up a whirlwind, almost overturning the entire room, and people with weaker strengths avoided to the side.

"Hahahaha, worthy of my children. They're remarkable."

Muyang smiled and put the two children into the pre-prepared nurturing capsule. The Saiyan toddlers could only grow more robust in the future if they continued to be nurtured outside the body for some time.

The nutrient solution in this nurturing capsule wasn't a simple item, which added the life essence produced by Gaia in addition to the nutrient solution carefully prepared by April. For the growth of the two children, Muyang was using his greatest resources.

"Senior Brother, what name do you plan to give these two children?"

Because of the habits formed since childhood, April still called Muyang senior brother even after marriage.

Muyang pressed against the nurturing capsule and looked at the bubbling children inside, "I have long thought of a name. The brother will be called Muqiu, and the sister will be called Amelia."

"Muqiu and Amelia. The name is very nice." April softly read a few times.

"I think so too."

In fact, Muqiu means autumn. There was no connotation, just because it was born in autumn. On the other hand, Amelia was taken by Muyang from the anime character "Emilia" in his previous life. He hoped that his daughter would grow up to be as dignified and beautiful as she was.

Of course, with the mother's good foundation, he believed his daughter's future would not be bad.

"Broly, they are your brother and sister, take good care of them."

Pointing to the two young babies in the nurturing capsule, Muyang educated Broly. As for the blonde Launch, it was better for her to stay away so that she would not bring his children down.

"Hmm." Broly nodded vigorously. His simple eyes were full of seriousness.

Melia and Melis soon came out of the delivery room. The recovery ability of the Saiyans on earth was too strong. It was only a short while before the body basically recovered. However, it would take some time to recover to the peak. —Muyang wasn't worried about them, so he took out Senzu Beans and Tree of Might's Fruit for them to eat.

The Senzu Beans restored their physical strength, while the Tree of Might's Fruit restored their lost spirit.

.....

A few days later, Melia and Melis returned to their exercise routine. In addition to nursing their two children at regular intervals every day, the rest of the time was spent recovering their fallen training. Because of the ten-month delay in pregnancy, the two sisters' strength didn't improve and was in some decline.

This was not something they could accept.

In their words, they were already going to be unable to catch up with Muyang. If they didn't work harder, wouldn't they even lose sight of the shadow? So the sisters trained very hard.

Late at night, the birds were singing, and the mountains were quiet.

After ten months of absence from the conjugal life, Muyang once again landed on the sisters. This time, they were even more frantic, vowing to add back the missing months. It was so intense that Muyang had to worry about whether he would be drained by them.

The good thing was that Muyang's physical strength was still very good, and he gave the most severe punishment to the damned provocateurs.

This time, after being satisfied with the nourishment, Melis laid comfortably in Muyang's arms while Melia, on the other side, was holding April. Her palms were roaming around April's body in an unfaithful manner.

"What's going on with April's body, it's too tempting!" Melia had a face of envy and jealousy.

How could that soft body not be touched enough?

April had a hard time breaking free from Melia's clutches and said with a blushing face, "Sister, I like older men, I don't do lilies."

Originally, the three of them were serving Muyang together, which already made her, a particularly thin-skinned woman, ashamed. Now, Melia was actually still being dishonest on her body, which was too much.

She didn't know before that the girls' minds were so dirty, thanks to their usual holy appearance.

Muyang looked at them, "Actually, I don't mind."

Melia said smugly, "Look, Muyang doesn't even mind."

April: "....."

Muyang laughed, "Just kidding. You guys can just mess around by yourselves, don't say anything."

The pressure on the three wives was indeed very great. Muyang was overwhelmed, but the joke was a joke, he would not really let them go lily, or there would really be nothing to do with him.

Melia was also shallow. After taking advantage of a little on April, she soon crawled to Muyang's side and exchanged the great joy of life with him.

At this time, April was sitting beside with a sultry face. She actually could look on openly. It was said that women were particularly dirty after marriage, and she felt that her thoughts were being affected after she joined this family.

Obviously, she was as pure as a small white flower before.

.....

The joyful time passed quietly, at this time, in the North Area near the East Area.

A quick flash crossed the deep starry sky, and a small scout wandered through space. The red and green lights flashed a few times as if it was emitting some kind of signal. Soon after, there was a fluctuation in the void, and a giant white planet emerged from the void.

The Big Gete Star quietly approached an advanced blue planet, and a fierce alarm sounded from a probe inside the planet.

"Not star body found in outer space, danger Level SSS!"

"Repea. Not star body found in outer space, danger Level SSS!"

After receiving the alert, the warriors of the advanced planet all acted. Tens of thousands of High-Ranked Warriors, led by several powerful warriors with a power level of over 10,000, rushed out of the planet and confronted the white planet that was getting closer and closer.

At that moment, the surface of the opposite white planet began to change. A black swarm of figures like locusts swarmed out from the interior of the white planet, each with sharp fangs, black skin, barbs on their backs and tails, and a few fingers with sharp, scythe-like blades like demons.

"What is that thing? It's disgusting."

"Be careful, the number of enemies is too much. Everyone keep in good formation."

Beep beep beep

The energy alarms sounded sharply and then burned out one after another. The foremost warriors burst into color. After taking a closer look at the appearance of the opposite monster, they all sucked in a breath of cold air.

"That is the Demon Beast Yakon!"

"No, Yakon does not look like this. Also, the number will definitely not be that many."

"This is the artificially modified Yakon!"

Everyone's face became pale. Demon Beast Yakon was living on the dark planet above the rare species. The power was strong, but the number was definitely not many. These Yakon appeared in

groups, at least a thousand. If each one was as strong as the adult Yakon, their planet would be in danger.

No, not only their planet, even the entire universe, was in danger.

"Quickly, retreat. Immediately arrange for the planet's clansmen to evacuate the planet."

The chaotic voices began to pass, and the commanders on the scene made the first decision! Immediately thereafter, the most front-line warriors went forward, ready to delay the enemy's arrival at the home planet. However, all resistance was in vain. The Demon Beast Yakon was too terrifying. Before long, the entire planet's life was slaughtered before they had time to evacuate.

At that moment, the white Big Gete Star bent its shape. It opened its bloody mouth like a giant beast from the ancient flood. Several thick tentacles stretched out and swallowed the advanced planet a little...

Chapter 372

There was a huge boom!

There was a violent jet of energy, and the huge planet was compressed into a very small point in the process of being swallowed. Then the Big Gete Star bent its shape and swallowed it wolfishly. After eating the High-Level Planet, the whole planet emitted a crystal light and stopped quietly in space.

It seemed to be digesting the energy brought to it by the High-Level Planet.

After calming down in the silent starry sky for a while, the Big Gete Star spat out some worthless planet remnants and then swaggered off to find its next target.

"Report. A total of XIONX Metal Yakon 2 were deployed on this hunt. The number of breakage is 0, the breakage rate is 0%, the energy gained is 1562 degrees, and it is expected to make 500 level 2 Biotic Yago."

"Find the next target." The Central Lifeform ordered.

This command was sent down to every metal body through countless pipelines, and the core computer of the Big Gete Star ran. The high-powered bio-radar scanned the nearby starry sky.

"Search completed, scanned three nearby star areas, found 7 High-Level Planets, 48 Middle Level Planet, 370 Low-Level Planet, exclude low energy signals, redefine the target!"

Besides probing the intensity of the energy contained in the planet itself, the bio-radar of the Big Gete Star could also detect the life energy above the planet. After a series of complex calculations, Big Gete Star identified the next planets to be devoured from hundreds of planets, all of which were invariably High-Level Planets or planets with high-level energy reactions.

Tick!

"Target locked, re-routing."

"Route planning is complete, the new route order is: Tus Oak Star, Planet Tegart, Planet Huangping, Planet Namek, Planet Yadrat...."

Following the results of the computer's calculations, a series of green data flashed through the eyes of the giant Metal Lifeform in the center of the Big Gete Star. All the instructions were transmitted to all the metal bodies for the first time.

The white Big Gete Star turned its direction and headed for its first target, Planet Tus Oak Star.

.....

Planet Yellowstone, in the grotto.

After a long hibernation, the black phantom Loomu finally had a powerful legion in his hands.

"The number of Level 2 Metal Yakon has reached 5,000, each with 30 Degree Energy Value which is not a small Power Level."

Loomu sorted out his plan in a happy mood.

"But it's not enough. Although the energy of the Level 2 Metal Yakon is very high, compared to the more famous powerful people in the universe, it's still a long way off."

"Degree" was a measurement of energy standards in ancient times. One degree was converted into today's universal standard of about 100,000 energy values, which meant that each of the Level 2 Metal Yakon in Loomu's hands had a power level of 3 million. This was a terrifying army of Demon Beast Yakon. However, in Loomu's eyes, these were far from enough.

"The adult Yakon has about 8 million power level. These Level 2 Metal Yakon though numerous, are actually not even comparable to the adult Yakom, not to mention the original Yakon that was captured."

Loomu calculated in his heart and shook his head slightly. The Demon Beast Yakon by the Big Gete Star some time ago had about 30 million power level, which was considered very rare and powerful Yakon. However, the individual powerhouses in the universe sometimes had frighteningly high energy levels. The power he had at his disposal was obviously not enough to allow him to dominate the universe.

"I can't go out yet until Big Gete Star has been able to create powerful warriors with a power level of more than one billion."

After thinking about it, Loomu gave an order to the distant Big Gete Star, "First, postpone the manufacturing plan of the Level 2 Yakon and Level 1 Yakon, and fully develop the metal body warriors. I need super warriors that can suppress the entire universe!"

"As ordered."

An electronic synthesized voice came from the Big Gete Star lifeform.

With the current technological capacity of the Big Gete Star, the energy tolerance of the general biochemical transformation body was limited. Even the Level 1 Yakon could only withstand 100 million power level, and Loomu needed super-warriors, so he needed to use all the energy and materials saved by the Big Gete Star to create the most perfect metal body warriors.

After disconnecting from Big Gete Star, phantom man Loomu's eyes squinting at the bonfire in front of him. His eyes are a bit fascinating.

.....

On the other hand, four light blue figures sat on a giant tree in the North Area Southern Part Starry Sky.

These figures had the same image. They all have orange hair, their skin is light blue, and they have copper-colored earrings hanging from their ears.

If North Kai and others were here, they would have recognized these people as the Galaxy Soldiers who had escaped from Prison Planet.

Each of them possessed the ability to turn the galaxy upside down.

"Bujin, where exactly is the boss sealed, how come we haven't found it after searching for so long?" The one who spoke was a woman with orange curly hair. The woman was short, and her face was childish, but her eyes had a chilling coldness in them.

The short man named Bujin craned his neck, "Be patient. We have waited for 300,000 years, what do we care about this little time? Sooner or later, we will find the boss."

"Zangya is just so eager." A big tall man sneered.

Zangya showed a cold light and stared at the big man, "Bido do you want to get into trouble, or shall we fight?"

"Hm?"

The big man named Bido's gaze was steeply cold. His body energy rolled over, and the whole planet began to shake in a moment. Zangya also did not show weakness, and her gaze collided with it.

Just as they were about to make a move, the man who had been sitting next to them carrying a sword appeared beside them and stopped the conflict, "Don't mess around until you find the boss. Do you want to be put in jail if you attract the attention of those Kai?"

Zangya and Bido smiled, grunted coldly, and continued to sit on the tree trunk.

"Maybe we should work with that phantom man. Maybe he has a way to find out where the boss is." The Galaxy Soldier holding the sword was named Kogu, the more powerful of the few.

"That phantom man has that ability?"

Zangya looked suspicious. When they escaped from Prison Planet, the phantom man Loomu had to ask them to join. Only at that time, the self-proclaimed strong Zangya and others simply could not see Loomu's ability. Now, if they looked for it again, they would not be able to save face.

"The ability of the phantom man is there. After all, to be able to be locked up in Prison Planet, I'm afraid it is not a simple character."

The phantom man Loomu had the Mind Control's Dark Magic even Kai was extremely afraid. If not for his lack of strength, the entire galaxy might have fallen into his hands.

After listening to Kogu's words, Zangya, Bido, Bujin fell silent. Relying on their power to find a sealed place in the entire galaxy was like looking for a needle in a haystack, and using the power of others seemed to be necessary.

"Then we will go over and try to find him. He should also enter the North Area."

"But I'm afraid it's troublesome to find him!"

"No need to worry. If we are looking for him, he must be looking for us too. Watch out for the North Area, he will make something happen sooner or later."

Without the need, Zangya and others should not reveal their identity, otherwise attracting the attention of Kami and other people, which would only cause complications and affect their plan to rescue Bojack. As for when Bojack was released, the whole galaxy could not be peaceful.

They decided on a plan and then began to move. Four streams of light quickly fly out of the planet and soon disappeared into the vast sea of stars.

Time passed quietly in the quiet sea of stars. During this period, the phantom man Loomu, Zangya, and others were busy with their respective plans.

In North Area, Big Gete Star swallowed the High-Level Planet along the route according to the established route step by step. Of course, it did not let go of the Low-Level Planets in the way. Gradually, the energy accumulated inside the metal planet grew more and more.

Finally, one day, after the energy accumulated to a certain level, Loomu could implement his ultimate metal transformation body plan.

.....

North Kai's Planet.

The administrator of the North Area, North Kai, had already panicked at this time.

Seeing a planet being mercilessly swallowed, North Kai was so anxious that he was sweating profusely, constantly spinning in place. He wanted to contact MUYANG, but at this time, MUYANG was not on top of the planet, so he could not contact him at all.

"Shit, shit, that Big Gete Star is already controlled by Loomu. I can't stop it at all, what should I do?"

North Kai held his head with both hands. He was at his wit's end, wanting to send powerful warriors to stop it, but he didn't have the right people on hand. Grand Kaiser said he would leave the task of cleaning up to them, and Heaven would definitely not intervene. Now, the only victim was him, the North Area, the other Kai would certainly not risk sending people.

He said that he had spoken too much at the time of the Heavenly Martial Arts Tournament and that the North Area would be free from worry.

Look at this crow's mouth.

North Kai couldn't wait to slap himself twice. At that time, how could he be so proud of himself and so floating? This retribution came too soon!

"Where did MUYANG go at this time? It would be great if I could find him."

After scanning the location of the earth, MUYANG was not up there. If he could get MUYANG's help, he would not have to be so anxious now as if he was an ant in a hot pot.

North Kai did not know that the reason why he could not contact MUYANG. It was simply because MUYANG was not in the space of the Universe 7 at the moment...

.....

In the Acceleration World.

The two electric lights kept rushing and circling in the void. After each fierce collision, the two electric lights would speedily pull away from each other for some distance. In a short while, they would collide together again. They were like two silk ribbons that kept meeting in the air, weaving a beautiful texture pattern.

At this time, Melia and Melis were maintaining a Golden Eyes state with light green flames surrounding their bodies.

After a brief pause, the two suddenly attacked each other. The two flashes spiraled upwards in a tangle, constantly colliding, bursting with terrifying energy, then suddenly diving towards the ground at the same time.

BANG!

Near the ground, the two bands of light with a ninety-degree turn. Closing the ground away from each other, the violent impact cut two deep openings. There was only a flash of lightning, and the two turned back again, rumbling in the center rumbled a large transparent hemisphere.

Briefly stalled in the air, Melia and Melis stared at each other. Because the two sides were connected, they had anticipated each other's next move, so the battle was extraordinarily gluey.

The battle lasted for a long time, and only when both of them were almost exhausted did Melia and Melis exit the Golden Eyes state at the same time and took a small breather.

"Sister, have some tea." April brought tea to them.

"Thanks."

Melia directly and comfortably lying on the bamboo chair. She took the tea handed over by April, took a big sip, and crossed her two feet directly to the opposite side of the coffee table, shaking her beautiful white legs.

When she wanted to fight, she fought painfully, and there was someone to take care of her when she was tired, such a life, it was too enjoyable.

"April, how is your Androids research going?" Melis sat on the side and asked April about her research.

April said, "The research is going pretty well. When we get another handful of data, I think it's almost ready for human transformation."

"Be careful. Make sure to be prepared for everything before you start." Melia put down her teacup and said with a serious face. —Regarding the plan that April was carrying out, they were very clear. However, Androids' transformation wasn't a child's play, and something could go very wrong if they weren't careful.

April smiled, "I understand. That's why I'm going to conduct another experiment. I won't joke with my life, and this is senior brother's private space. Even if something really goes wrong, senior brother has a way to get me back."

Melia and Melis saw that April had her own plans, so they nodded and said no more.

DING DONG DONG.

The wind chimes in the warm breeze issued a crisp sound. This was a small wooden attic located in a large ecologically sound forest. The small building stood by the mountains. The air was fresh, most suitable for health conditioning.

After the birth of Muqiu and Amelia, Melia and Melis stepped up to recover their power. It took several months to return to their peak condition at the beginning. After that, in order to provide a better growing environment for the two children, Muyang decisively took the family to move into the Acceleration World, and this stay was a year.

Of course, this was the time inside the Acceleration World.

In fact, Muyang found that if he reduces the time difference between the Acceleration World and the outside, especially when it reaches synchronization, the environment seemed to have an even better effect on the body's embodiment. The reason for this, Muyang speculated that it was probably related to the energy required to control a large percentage of time flow. To some extent, the change in the rules of time was also consuming the internal energy of the Acceleration World. If this energy was used to disperse in the "world", the local energy density should be increased.

This he asked April to measure, and it was true.

A state of high energy density was obviously more conducive to training. Of course, a person couldn't take up all the energy scattered in the "world", so in terms of the overall effect, it was obvious that it was better to plunge into a large percentage of the time flow – to "long years" to train. The harvest was more.

But then it could easily be several years, or a dozen years, quite boring and uninteresting. Muyang, on the other hand, had clearly passed that period of pressing the need to improve his power level.

So, whether to choose time or efficiency, it could depend on the specific needs.

During this time, they were not listening to anything outside the window, living their own little lives, so they knew nothing about what was happening outside.

.....

At this moment, Muyang sat in meditation in the spaciousness of the attic. Beside him, there was a nurturing capsule filled with light green liquid. There were two tiny toddlers with their eyes closed and their mouths gurgling and bubbling.

Muqiu and Amelia kept absorbing the nutrients in the nurturing capsule, all of which entered their cells and had already accumulated an extremely strong base for them.

"Grumble Grumble"

The two children opened their eyes at the same time, and the terrifying aura was released from them. The surface of the tempered glass of the nurturing capsule clicked and cracked.

With a bang, the glass exploded, the light green liquid overflowed and flowed down, while Muqiu and Amelia floated suspended in the air. After seeing Muyang, they danced their hands and pounced over.

"Hee hee."

Muyang held the two children in his arms; Muqiu and Amelia struggled and played in his arms.

"Senior brother, let me hold it for a while." April picked up her younger sister Amelia from MUYANG's arms and carefully coaxed.

"Mama" Amelia tilted her head in her arms and pounced on April's chest. Her head kept rubbing April's chest.

April picked up Amelia, "Call me Mama April."

"Mama!" Amelia seemed to understand, cheerfully shouted.

"The girl likes your big boobs just as much as I do." Melia came over and gently scraped Amelia's cheeks.

April didn't have the good grace to give Melia a white look, "Sister, don't make little Amelia sound like you. I didn't know before that you were such a dirty person."

After sharing a bed, Melia's previously established image completely collapsed. April realized that Melia, who was full of majesty in her mind, was actually a completely dirty woman. She didn't only dominate her senior brother but actually even took advantage of her.

In her heart, April even thinking: Perhaps the reason Melia was so kind to help her and senior brother was because she was tired of playing the game between men and women and wanted to change something more exciting.

Melia justified, "What's wrong with dirt. Food and sex are the nature of human beings."

MUYANG said, "So you only know how to eat and do dirty things."

Melia coyly said, "Actually, I can fight."

MUYANG: "....."

"Mommy, hug!" Little MUQIU blinked her eyes and waved towards Melia.

Melia regained her modesty as a mother all of a sudden, carefully picked up MUQIU and held him in her arms to nurture him.

MELIS, who was on the side, laughed, "Little MUQIU's face shape looks so much like Amelia's. As a boy, he will be too soft and beautiful."

MUYANG took a look, and indeed it was true. He laughed, "Boys and girls, there's nothing wrong with being pretty."

It was natural for them to look alike when they were children, as they were siblings and their mothers were twins. Besides, it was true that before the development of boys and girls, you could not see much difference. However, in the future, it would surely become different slowly.

"By the way, both MUQIU and Amelia's nurturing period is over, shouldn't we go out for a walk?" MELIS asked.

"Yes, Calvin group is still quietly developing their power in the North Area. Bardock and the others have already gone over to fight, there is no point for us to stay on earth or in the Acceleration World. Why don't we go over there?" MELIS, whose strength had improved, began to feel itchy again, looking forward to the opportunity to show off her skills.

MELIS said, "Just think of it as a tour."

Muyang pondered for a moment and nodded in agreement, "Yes, then go over there and see what's going on there by the way."

Calvin and the others were a group of aliens collected after the elimination of Cooler. Now, they are working on Muyang's orders to develop their power in the North Area. —As a Saiyan, Bardock was a natural warrior and naturally could not be idle on earth, so he had already taken Raditz to go on a training trip not long ago.

Muyang thought he should also go out and walk around.

Chapter 374

Between the North Area Southern Part and the Northern Part, there was a settled area.

Silver shining metal corridors hovered in the outer space of the planet. The two corridors, one large and one small, intertwined with each other. One was along the direction of the planet's meridian, and the other was located over the equator. The two space corridors were connected to the planet by dozens of super elevators. The overall appearance was full of technology.

"Lord Muyang, this is the central planet of our God Mu Force. Those two space corridors coalesce the vast majority of technology, with countless high energy emitters deployed on them, sufficient to block any situation of invasion."

The person who led the introduction was called Calvin. He was an alien with a pointed mouth like a pterodactyl, who had been a researcher of the Cooler force.

Muyang looked up at the technological space corridor and nodded but had reservations about Calvin's claim of being able to resist any attack. There was no equipment in the world that could defend against any attack. It could only resist because the energy of the attack did not reach the upper limit of the equipment.

"Describe the rest of the situation."

"Okay."

Calvin sniffed and excitedly introduced the recent gains of the God Mu Force, "After these recent years of development, the God Mu Force now control a total of two star domains with a total of 324 planets. Because of the addition of Lord Bardock, we have even surpassed the original Cooler's reign in terms of high-end battle power..."

The preliminary development of the pastoral forces was not smooth, mainly because this group of personnel was only the unofficial troops leftover from the Cooler legion back then, lacking a large number of high-ranking combatants. Not only lacked the appeal but also had the same danger of being surrounded by wolves.

However, the good thing was that the Cooler Forces and Frieza Forces had long since fallen apart, leaving a large number of unowned planets in the North Area Southern Part and Northern Part, which allowed the God Mu Force to have the most basic prototype. Later, under the collusion of a soldier named Raymor, many members of the original scattered Cooler legion reunited and formed the current Pastor Expeditionary Force, which had a certain power in the North Area.

Even when this force had been extremely weak compared to the original Frieza Force or Cooler Force.

However, in line with the principle of lack rather than indiscriminate, Calvin didn't dare to rashly recruit hired warriors wandering in the universe. Thus, the development speed was limited.

Before Bardock arrived from the earth, the strongest combatant of the God Mu Force was only 14,000 power level. There were not many people close to 10,000 power level downwards, completely unable to compare with the Cooler's era.

So, the occupied were some Low and Medium Level Planets. They didn't dare to touch those High-Level Planets.

"In that case, doesn't that soldier named Raymor get a lot of credit? Where is he now?" Muiyang became a little interested in this Raymor. If he was trained a little, he should be a good administrative staff.

"Does Lord Muiyang want to see him? I'll go and get him immediately."

Calvin understood what Muiyang meant and sent someone to bring Raymor over.

Soon, a skinny orange-skinned alien came out of the electronic door, an alien who did not look very strong in combat.

"Greetings to all the lords, Lord Muiyang!"

Raymor saluted everyone in the room very respectfully, finally fixing his gaze on Muiyang and bending down respectfully. There were six people in the room besides Calvin. The other black and one brown-haired woman and the two children they were holding in their arms should be Lord Muiyang's wife and children.

Melia and Melis, who have now fused into Melissa, held Muqiu and Amelia with April one each.

Raymor had seen Muiyang as well as her wife from afar during the great battle on Vegeta. He knew that they were terrifyingly strong people capable of defeating Cooler, so he put his posture quite low as soon as he entered.

Muiyang also surveyed Raymor after he entered. His body was relatively thin and weak, his power level was not very high, and he wore an orange woolen hat on his head. However, he was able to gather the original Cooler legion together, so his ability to handle things should not be bad.

"Well, not bad. The God Mu Force can develop to the present, your credit is not small." Muiyang looked at Raymor and nodded.

In the early stage of the development of the force, he did not need particularly high-intensity fighters. He needed this kind of character who could stabilize the situation. Although Raymor's power level was not high, he could play a huge role.

Raymor humbly said, "I don't dare. I only played a small role in the beginning. The back is all the credit of Lord Calvin and the other lords."

Especially after Bardock joined, the expansion of the God Mu Force accelerated for a time. It was hard for Raymor to imagine that such a strong person like Bardock would be added to their forces, knowing that during the Cooler period, the strongest Cooler Armour Squadron was only less than 200,000 power level. Having a super strong person with a 3 million power level was something that was previously unthinkable.

Muiyang was very satisfied with Raymor's attitude. He asked Calvin, "Where is Bardock now?"

Calvin bowed and said, "Lord Bardock is taking his son to train in Planet Vine, which is an intermediate level planet."

After listening, Muiyang nodded and looked at Melissa and April, smiling, "It looks like the bitter days of Raditz are not over yet."

Melissa gave him a blank look and said to Muiyang playfully, "Isn't it because of what you said to Bardock at the beginning? Raditz's miserable life is caused by you any way, don't you think?"

Muiyang shook his head, "I can't be blamed. Even if I didn't say it, with Bardock's character, he definitely wouldn't have watched Raditz continue to waste."

"Give us the location of Planet Vine, we want to go there."

"Yes." Calvin responded, "Do you need me to arrange a ship? Planet Vine is not far from here."

Muiyang glanced at April and the two children and nodded, "Then prepare one."

"Please wait a moment, my lord, the spaceship will be ready soon."

The most luxurious seat had been kept in the God Mu Force, which was the flagship prepared for the head of the God Mu Force. Even if Muiyang usually seldom patronized the central planet, this spaceship was always on standby and ready to take off.

.....

The distant Planet Namek.

The sparse vegetation is scattered on the hard surface. Namek's environment hadn't recovered so far after the climate catastrophe, but the good thing was that there was no shortage of water on Namek. There was a huge lake almost a few dozen kilometers away, so the delicate blue grass grew quite lush.

The house where the Grand Elder lives was located on top of a towering cliff.

The cold wind blew, and the biting wind whistled.

Beyond the cliff face, a relatively young-looking Narmekian was floating cross-legged a hundred meters in the air, emitting strange energy ripples around him. Not far from him, another Narmekian was also painstakingly honing his strength.

"Nail, can you stop now, go prepare some spring water for the Grand Elder."

The Narmekian sitting cross-legged opened his eyes haughtily. A stream of light flashed, and instructed to Nail, who was far away.

This young Narmekian was, indeed, Birgil, who lived on Planet Ambera at the beginning. After defeating Lord Slug and losing Planet Ambera, Birgil finally returned to Narmekian's homeland, Planet Namek.

"Yes, Teacher Birgil." Nail bent towards Birgil respectfully, then took off into the air and flew towards the distance.

Looking at Nail's back, Birgil nodded his head and was satisfied with this new generation of Narmekians.

"Birgil, come here for a moment."

From the towering armor-shell house came the old voice of the Grand Elder of Planet Namek.

Birgil smiled and appeared on the second floor of the carapace room with a flash of his figure. The huge body of the Grand Elder was laboriously lying on the big chair, and the Grand Elder had aged a lot more than when Muyang had come last time.

Chapter 375

"Grand Elder, what do you want to see me about?"

Looking at the very old Grand Elder on the seat, Birgil's gaze was bland. It was hard to imagine that these two Namekians, who were so different in appearance, were actually survivors of the same era.

"Birgil, I feel a catastrophe is about to befall Namek. It will be a disaster more dangerous than the climate cataclysm. It is possible that Namek will be destroyed." The Grand Elder struggled to open his eyes.

Birgil frowned and said with a murderous aura, "Could it be that some powerful invaders have set their eyes on Namek."

Planet Namek was located in the fourth Planet of the 27th main system of the constellation Vega, in a remote corner of the North Area. The lack of ecological resources made Planet Namek less famous in the universe. The climate catastrophe more than three hundred years ago should have made people forget about them.

Could it be because of the Dragon Balls? Birgil's heart stirred, and his eyes looked at the huge Dragon Ball behind the Grand Elder.

"Yes, it will be a catastrophe. I saw countless evil and powerful Demon Beasts descend on Namek, each one very powerful."

"Even I can't defeat them?" Birgil frowned.

"Yes, they are many and very strong."

Birgil smiled, and his face changed slightly.

Birgil had a powerful power of over 7 million. After coming to Planet Namek and going through the potential development of the Grand Elder, the several hundred years of heritage had instantly pushed his power up to nearly 50 million. Even if Slagou had been resurrected back then, with his rich experience and strong physique, he would dare to fight with him.

The Grand Elder actually said that even such strength wasn't yet an opponent. So what kind of strength did the opponent have?

"What exactly is the opponent?" Birgil's icy voice asked.

"Big Gete Star."

The Eldest Elder said a few words with difficulty.

"Big Gete Star?"

Birgil thought back for a moment and seemed to have seen this name on the mission platform of the Galaxy Mercenary Headquarters. It should be a not-so-powerful planet. However, the Grand Elder

was a Narmekian with special abilities and possessed part of the ability of prophecy himself. Birgil had to believe in the words of the Grand Elder.

‘Could it be that this Big Gete Star really that powerful?’

"You go and contact MUYANG. I think that friend has a way to save the Narmekian." The Grand Elder half-squinted his eyes, and each word took a lot of effort.

"MUYANG?" Birgil froze slightly, "Guru, the MUYANG you are talking about is the Earthling MUYANG? I know him... He has a way to save Planet Narmek?"

MUYANG could defeat the powerful Slug eighteen years ago. For his strength, Birgil was recognized. However, even after the development of his potential, he couldn't deal with the strong enemy. Did MUYANG really have a solution?

"Can be. I have a hunch that he is the savior of Planet Namek, and this hunch was there decades ago."

Birgil nodded solemnly, "In that case, I'll go to Earth now to find him."

"It's too late, use the Dragon Balls. Porunga can contact him."

The Grand Elder proposed using the Dragon Balls to make contact, which was the most time-saving method.

With the safety of Planet Namek at stake, Birgil had to be cautious. But, at the same time, he took a look at the Grand Elder and couldn't help but feel that the Grand Elder had really aged a lot.

At this time, Neil had already obtained a jar of spring water and returned, and when he saw the grave faces of Birgil and the Grand Elder, he was aghast.

"Teacher Birgil, Grand Elder."

"Neil, you and I will split up to collect the Dragon Balls, we must be quick, there is big trouble on Planet Namek."

After saying that, Birgil's body flashed and had disappeared into the Grand Elder's residence.

"Neil, follow Birgil's orders and go bring back the three Dragon Balls from the Eastern village." The Grand Elder's old voice said.

"Yes, Grand Elder."

Although it was not very clear what exactly happened, it looked like there must have been a big trouble in Planet Namek. Otherwise, Teacher Birgil and the Grand Elder wouldn't have used the Dragon Balls of Planet Namek. Neil smiled, put down the spring in his hand, turned around, and flew towards the village of Planet Namek people in the east.

In these years, Neil had been trained by Birgil, and his power level had been raised to 180,000, so naturally, his speed was extremely fast.

After about ten minutes, Birgil returned to the place where the Grand Elder lived with three Dragon Balls.

After a few more minutes, Neil also returned with the Dragon Balls, and together with the Dragon Balls here in the Grand Elder, all seven football-sized Dragon Balls were gathered.

"Let's start summoning Porunga, hopefully it can bring the news to MUYANG."

Shortly after, the sky of Planet Namek darkened, and in the Northern Hemisphere where the Grand Elder was, a golden light that communicated between the world appeared. These lights combined together and finally transformed into a robust figure several thousand meters tall.

The divine dragon Porunga, in the language of the Namekians, means "God of Dreams".

.....

Meanwhile, on the medium-sized Planet called Planet Vine.

BANG!

The fierce beast crashed into the body of Raditz, and Raditz let out a painful scream. His body flew out like a cannonball, and he landed on the ground and got up with great difficulty.

"Ahem."

Raditz painfully covered his chest, and his face was bruised and purple. If Gine saw it, she didn't know what kind of heartache he would have.

"Get up. The opponent is just a senseless beast, open your mind, have you forgotten what I told you in the past few days? Use your energy to sense!" In the air, Bardock looked at his eldest son with dissatisfaction.

Because the youngest son Son Goku worshiped Son Gohan as a teacher and went for training in Turtle School, he had found the way forward. Bardock was very relieved that the next focus was placed on the sharpening of his older son, Raditz. However, what makes Bardock dissatisfied was that, after training for so long, Raditz did not even understand the nature of ki. Therefore, the battle still relied on the brute force of the past.

The teacher was not wrong. If he did not put a little pressure on Raditz, his son would be ruined entirely.

"Use ki to sense?"

Raditz looked with a bitter face at the fierce beast that was eyeing in front of him, not knowing how miserable he was in his heart.

He had heard of special energy called "ki" on earth, which could sense the actions of opponents in battle. However, what exactly was "ki", he did not even have an idea. Perhaps his past experiences had burdened him too much, and it was not easy to turn around for a while.

Raditz wasn't a genius like Vegeta. It was impossible to comprehend the nature of "ki" on his own by looking at it a few times. To let him learn to use "ki", he needed training from the most fundamental aspects. However, Raditz's "starting point" was too high. When the enemy attacked, he subconsciously wanted to enlarge his moves to finish it off. So, again and again, he missed perceiving the properties of "ki".

Bardock also saw that Raditz was a goose. Because he had too many fancy thoughts in his mind, it was impossible for him to quietly comprehend. So, it was impossible for him to grow without a bit of irony.

It was in consideration of this that Bardock brought Raditz to Planet Vine to sharpen.

Planet Vine was a Middle-Level Planet. The beasts on it weren't strong or weak, just suitable for Raditz trial. After suffering a little more, even the stupidest people should always have grown.

Unknowingly, Bardock had included Ratios in the ranks of the stupid.

OWAAA ROOOAAARR!

The beast in the distance let out an angry hiss. Its eyes flashed fiercely, and its hooves stamped hard on the ground. It seemed like a strong earthquake, and the flat earth directly collapsed.

The fierce beast directly rammed and once again knocked Raditz to spit blood and fly out.

"STOP!"

Bardock yelled angrily, stopping the beast from attacking again.

"Raditz, forget the way you used to fight, looks like I'll have to train you from scratch."

Raditz sat on the ground in shame. His father was an Elite Warrior of more than 3 million. He put aside his training to personally accompany him to train on a remote planet, but he could not comprehend anything.

"Get up and start over." Bardock scolded sternly.

"Yes!" Raditz climbed up and responded loudly.

Just then, a luxurious spaceship landed in the sky. When the hatch opened, Muiyang, Melissa, April, and others came down from the spaceship.

Seeing Raditz's miserable appearance with a bruised face, Muiyang was surprised, "What is this, family abuse?"

Chapter 376

‘Family abuse?’

Hearing Muiyang's words, Bardock stumbled and almost fell, rubbing his head with some embarrassment. Raditz was even more ashamed of himself after seeing Muiyang.

"Teacher Mu, what brings you guys here?"

Muiyang glanced at Bardock and said, "I took Melissa and the girls out for a walk, and just happened to hear that you guys were also here, so I let Calvin fly the spaceship over to take a look. Bardock, this is a very unique way of training for you!"

Bardock said awkwardly, "I'm sorry to make you laugh. I've never trained anyone before, and I didn't get the right way."

"By the way, how do you think I should train in a situation like Raditz?" Bringing out the problems on Raditz, Bardock asked for advice.

After glancing at Raditz, Muiyang said, "For Raditz, this is fine, but the energy in his body interferes with his training..."

Glancing at Melissa beside him, Melissa walked forward with a smile, "Hey, hey, let me give you a hand."

The words just fell, and they heard a swoosh. A light green light fell into Raditz's body. Raditz's face turned white, and suddenly felt that all the energy in his body had disappeared.

"What's going on, where's my power?"

"Don't scream, your power is blocked by me. This blockade couldn't be lifted until you master ki or practice a new energy. Of course you can try to break through my blockade and see if you can succeed." Melissa's tone was bland.

Melissa used her super power to seal his power, and now Raditz had an empty strong body, but he could not even release a basic energy wave. The advantage of this was also there. At least in the battle, he wouldn't be reflexively releasing energy waves indiscriminately.

Raditz smiled, and his face turned pale. This woman was so cruel, he could imagine his next miserable days.

Bardock, on the other hand, was bright, and felt that such a training method was unique. Hastily instructed Raditz to hurry up and practice.

Seeing Bardock couldn't wait to take Raditz to practice, Muiyang couldn't help but shake his head. He looked around the scenery of Planet Vine, let Calvin and others find a place to set up a camp, and he started basic education for Muqiu and Amelia.

Education should start from a child.

The two children had already accumulated a deep energy base in their bodies while in the training cabin, and they needed to channel this potential step by step.

Under the patient education of Muiyang, Muqiu and Amelia were gradually able to control the power in their bodies. This genius-like qualification was envied by Raditz, who, frankly speaking, was not as powerful in power level as the newborn siblings.

.....

Some time later, suddenly, Muiyang frowned, as if he had received some information, his expression was out of focus looking in a direction.

"What's wrong with you, Muiyang?" Melissa asked with a blink of her eyes.

Muiyang came back to his senses and said to Melissa, "I just received a transmission from the divine dragon Porunga of Planet Namek. Something bad has happened over there in Planet Namek. The Grand Elder and Birgil are summoning us over."

"What can happen to the Namekian?" Melissa's eyes stared.

"It is not clear, Porunga did not explicitly say so, but to be able to make the Grand Elder and Birgil use the Dragon Balls to summon us, I think it is a matter of great urgency. The Grand Elder had provided great help in restoring the soul of your 'former life' Mexia, and if he had not provided the Dragon Balls, your consciousness might have sunk back then."

"Then we must go there." Melissa's expression was serious.

"Hm!"

Thirty-eight years ago, when Melissa was still Mexia, her soul was struggling in hell because she was infested with the power of the demons. If it wasn't for the generous lending of the Dragon Balls to Muyang by the Grand Elder of Planet Namek at that time, there might not have been the current Melissa.

Muyang once promised to help when Planet Namek was in crisis, and now for good reason, Muyang should go to Planet Namek to fulfill his promise back then.

After entrusting the two children to April, Muyang took Melissa's hand, "April, you take care of Muqiu and Amelia, I will go to Planet Namek with Melissa."

April's expression was serious, "Brother, don't worry, I will take care of them."

Muyang nodded towards her, signalling that she should also take care of herself.

His finger was placed on his eyebrow, and he used Instant Transmission to lock the direction of Planet Namek.

With a swoosh, the blurred light and shadow disappeared before his eyes. April took a look at the area where she had lost Muyang's figure, and then took the two children for a simple training session.

.....

Planet Namek.

On a windy and sunny afternoon, the place where Muyang and Melissa appeared was an endless grassland. What caught the eye was blue-colored grass everywhere. When the wind blew, the grass rolled up in waves, and the air was filled with the fresh smell of nature.

"The Grand Elder's residence is on the north side of the planet, let's go straight there."

"Huh, there's a very powerful ki on Planet Namek. It's Birgil, he's become so powerful."

Breathing in the fragrant air, Melissa sensed the powerful ki of Birgil. With an energy value of about 50 million in strength, it was far beyond her norm.

Muyang looked at her and said to Melissa, "It must be the Grand Elder's ability that has opened up Birgil's potential."

Melissa brightened up and said, "You said the Grand Elder's ability is so amazing, is there any way to open up my potential?"

Muyang smiled and fell into thought. Melissa was the Legendary Super Saiyan, as a rule, the potential was unfathomable. The Grand Elder had the ability to raise Birgil's strength to nearly 50 million, which was certainly because Birgil was strong enough and his body contained great potential, but the Grand Elder's guidance was also crucial.

With Melissa's current state, there might really be room for improvement.

"You can try it, but boosting the potential is still rather physically demanding. I'll prepare a meet and greet gift for the Grand Elder first."

After saying that, with a twist of his wrist, a small vial of emerald green liquid appeared in his hand, which was clearly the Life Essence produced by Gaia, which could greatly enhance the life element.

Holding the Life Essence in his hand, MUYANG and MELISSA leaped in the air and disappeared directly into two shadows of light in the sky.

After a burst of floating light, MUYANG and MELISSA landed at the Grand Elder's residence. The gullies and rocks were staggered together, and among them was a towering rocky mountain with a beetle-like building lying on top.

By this time, BIRGIL and NAIL were already waiting at the entrance. After seeing MUYANG and MELISSA, BIRGIL greeted them.

"MUYANG you guys are finally here...."

BIRGIL had seen MELIA and MELIS, but it was the first time he saw MELISSA. After the explanation, he realized that this rather cold and beautiful woman was actually a fusion of MELIA and MELIS. He was surprised, and then led them to the second floor together to meet the Grand Elder of Planet Namek.

"It's been a long time, MUYANG, and this beautiful lady.... Well, it's Planet Metamor's Fusion Technique, and it seems to be a little different." The Grand Elder leaned back wearily on the white bone-like seat and roughly put MELISSA's situation into perspective.

MUYANG was amazed at the Grand Elder's eyesight, and also sighed that the Grand Elder had aged a lot more compared to before, even talking was very tired.

"Grand Elder, long time no see."

The Grand Elder looked at MUYANG and was shocked by his overriding Dimension and laughed, "It seems my premonition was correct. You are indeed the one who saved Planet Namek."

MUYANG asked, "What kind of trouble has Planet Namek encountered?"

BIRGIL said, "The Grand Elder has a premonition that a group of terrifying beasts will descend on Namek, and I'm afraid I'm no match for them, so I asked you to come."

"Demon Beasts?"

MUYANG slightly frowned. In the original story, it seemed that such a thing did not happen. Sure enough, as he entered, the waves of incitement grew, and even things that would not have happened before appeared.

"MUYANG you come here...." The Grand Elder called out.

After MUYANG walked over the Grand Elder placed his hand on MUYANG's head and a picture representing the future surfaced in MUYANG's mind.

That was the herd of black Demon Beasts. The number was at least a few thousand, each with sharp fangs, sharp barbs on their backs and tails, and a few fingers as sharp as scythes. MUYANG saw, behind the group of Demon Beasts was the shadow of a white as snow planet existing....

MUYANG opened his eyes. His heart was greatly shocked, "That Demon Beasts seems to be YAKON, but what is that white planet?"

Chapter 377

'Big Gete Star!'

For some reason, this term suddenly appeared in his mind, it was a message transmitted by the Grand Elder.

After receiving the signal, Muiyang nodded slightly.

In the original anime, it was possible to use Cooler as a blueprint to create countless Metal Coolers, so it was a small matter to create a Demon Beast now. —Although this artificial Yakon was not as strong as the Metal Cooler, it was also an extremely powerful monster.

It was important to know that even ants in abundance could gnaw an elephant to death, not to mention Yakon.

"Grand Elder, I have understood the general situation. The most urgent thing is to please gather all the people of Planet Namek. Planet Namek is no longer safe."

The Grand Elder sighed, "I understand, I have asked Nail to inform. Those children of mine will be gathered to a safe place."

"That's good." Seeing that the Grand Elder had already made arrangements, Muiyang nodded, "I have one more unrequited request."

"Say it. As long as it is within my power, I will definitely grant you."

"It's...." Muiyang pulled Melissa and pushed her in front of the Grand Elder, "I would like to ask the Grand Elder to help see if I can develop my wife's potential."

"Hahahaha, that's easy, come on, little girl, step forward." The Grand Elder said amiably, and raised his big hand as he spoke. He then covered Melissa's head. Although Nail, who was at the side, was somewhat reluctant to see this, he did not speak out against it because of the Grand Elder and Birgil's face.

"Grand Elder, please wait..."

Of course, Muiyang would not let the Grand Elder overexert his strength, so he brought out a small bottle of Life Essence.

"This thing" The Grand Elder's drooping eyelids opened for a moment, revealing an astonished glow.

"This is the Life Essence, I think it is the thing that the Grand Elder needs the most at the moment."

"It's really amazing. I don't know why I see the shadow of the Dragon God's power in this essence. Could it be related to the Legendary Dragon God?"

After taking the Life Essence, the Great Elder's mental state was instantly much better, and the wrinkles on his forehead had also decreased significantly.

The Grand Elder lamented and found that his energy was restored to what it was decades ago.

Birgil was well aware of the power of Life Essence. That was the magical liquid produced by Gaia. Speaking of Gaia, Birgil remembered Planet Ambarra again, which was actually a super huge Dragon Ball. Gaia was the life on top of the Super Dragon Ball, and it was normal to have a bit of the Dragon God's ki on it.

In the end, whether it was Muiyang or Birgil, neither of them had figured out what species Gaia actually was.

After recovering his spirit the Grand Elder smiled and said to Melissa, "Child, you come over here, let me give a test to see if I can open your potential."

Melissa had been looking forward to it for a long time, and as soon as she heard the Grand Elder say so, she hurriedly went to the Grand Elder. The next thing she saw was the Grand Elder's huge pot lid-like palm over her head, and immediately a magical traction force arose from the top of her head that seemed to be inducing every cell of her body.

"Huh?" The Grand Elder let out a surprised cry, "What a peculiar physique. Your potential is simply unfathomable, let me see if I can channel your potential."

The Grand Elder closed his eyes and his whole body emitted a white light. Melissa felt that she was in a very peculiar environment, a great attraction arose from her surroundings and two layers of light green and grass green light began to emerge from her body. These two lights seemed to be fighting against the power of the Grand Elder, in a short while, beads of sweat popped up on the Grand Elder's forehead.

"So strong. It may take days if you want to channel your potential..."

Now, it wasn't a good time to develop Melissa's potential.

"Then wait until after the crisis of Planet Namek is lifted..." Melissa smiled sweetly as the Grand Elder regretted, "Unfortunately, it would have been possible to greatly enhance the power of justice if it could have been done earlier. "

"The next time I have time, if it's just Yakon and Big Gete Star, we have a complete victory." Muiyang's expression was quite confident.

Muiyang's current power level was roughly 2.5 billion. Counting the effect of the Unfettered Instinct, he could definitely exert more than 4 billion energy. Even if he faced the Perfect Cell, he would not be timid at all. If he went to the Heavenly Martial Arts Tournament again now, Muiyang was confident that he could fight with Uiyamons.

"I'm counting on you guys for everything." Birgil was a little embarrassed.

This was already the second time he asked Muiyang to save the planet. The first time was when Slug invaded Planet Ambera, and the second time was now.

Muiyang waved his hand, "No need to be polite, it's a small thing."

Birgil was about to say something else, when suddenly-

A rumbling vibration suddenly occurred above Planet Namek, followed by the ground began to shake violently, and a sound of fierce beasts hissing sounded in the ears. The shrill sound was like the stinging sound of a kettle boiling, and a large, dazzling patch of light rose from the surface of the emerald green planet.

"This is not good!"

"The attack of the Big Gete Star has begun."

When Muiyang and the others walked out of the Grand Elder's residence and looked up to the sky, they saw a large white image of the Big Gete Star suspended in the air, as if it was a huge moon.

.....

At this moment, a pitch-black Demon Beast was also spreading out from that moon. They were gulping the light and were continuously eating away at Planet Namek.

"That's the Demon Beast Yakon. The transformed Yakon is not only able to devour energy light, but even matter as well. It looks like these Yakons are collecting energy, could it be that other plans are brewing in the Big Gete Star?"

The scene in front of them made Muiyang and the others thought about it.

At that moment, Muiyang's face was cold, and his dark eyes flashed with a burst of cold light. Melissa also narrowed her eyes, and a light green glow gradually rose up.

"Birgil, guard the Grand Elder, and give these Demon Beast to me and Melissa."

"Okay." Birgil immediately answered. With 50 million power level, if he wanted to guard the Grand Elder, no one could get close to him.

"Melissa, let's show off our skills."

After saying that, Muiyang shortened his body and leaped up rapidly. Due to the excessive force, the ground beneath his feet haughtily appeared a hundred meters range of collapsed. The broken area extended all the way to a thousand meters away.

Melissa clenched her fist, her mouth babbling, and also took off after her.

"Nail, go back to your room and take care of Guru." Birgil stood guard on the outside of the building. His eyes frozen at the extent of the collapse around him.

"Yes, teacher!" Nail answered and faithfully returned to the room, guarding the Grand Elder's side.

.....

In the sky, when Muiyang and Melissa soared. These thousands of Yakons were like bloodthirsty bats that smelled blood and swarmed over regardless of whether they were opponents or not.

"I was afraid you guys wouldn't come." Muiyang sneered. His hair rose, and his body shone with a silver-white aura.

"Muiyang, we'll each have half, and I'll take care of the thousands on the left."

To deal with these millions and tens of millions of power level Yakon, Melissa showed great enthusiasm. Probably because she had been suffocating in recent years, wanting to painfully strike.

Muiyang couldn't help himself, "Then you take care of yourself."

"I know!"

BOOM!

The two exploded together.

Terrifying air currents swirled up, and the clouds in the sky surged like waves.

The two separated into two fields, each aiming at his own target.

At this time, Muiyang's 2.5 billion power level burned up. His ki pushed across, and the closer ones were simply churned into pieces by Muiyang's ki.

PHEW!

Muyang stride forward, came to the front of Yakon. His arm suddenly stretched out, and his powerful explosive fist swept across, directly splitting the sky in half. Yakon swept by this force were turned into pieces.

CLAP!

After all, the lifeform class's transformation beast were not as powerful as the metal body. At this moment, Muyang transformed into an abyssal demon. Even if it was Metal Cooler, he could kill as many as he wanted, not to mention the strength of several million Yakon.

Between the destruction, the lost lives were uncountable.

"DESTROY ALL THESE ARTIFICIAL DEMON BEASTS." Muyang shouted, and the terrifying aura rose another notch.

.....

In the Grand Elder's residence, Birgil dumbfoundedly felt the terrifying energy filling the air, already too shocked to speak.

"Muyang, has actually become so powerful!!!"

He was simply unbelievably strong!

.....

"Wow, I can't be left behind!"

Melissa watched Muyang's great power, and also excitedly wailed.

With her eyes glaring, the golden light replacing the turquoise pupil color. The green grass glow wrapped around her body, Melissa's energy increase reached 65 times when she used the second level of the Golden Eyes state with a terrifying power of 2.1 billion power level!

Her body was seen flying rapidly in the air, and countless limbs and broken arms fell from the sky.

The corners of her mouth hung a cruel smile, accompanied by a sharp and clear laughter. —Once Melissa berserk, she was like a crazy bitch.

Chapter 378

The Legendary Super Saiyan was feared to be unimaginable once they went crazy. Melissa's figure flying across the sky with countless flashes of light suddenly connecting into one, and the sky boiling over with loud rumbling sounds.

"Whahahahaha, there are many more over here, and their bodies are so hard." Melissa shouted loudly in pain while flying.

The sky was filled with unreadable shadows, and Melissa flashed by quickly, bringing up emerald green light, and tearing them apart very brutally every time she touched Yakon.

The golden eyes glittered with cold light, and space exploded with a blinding flash as if it had exploded.

Suddenly looking at a target, Melissa shouted again on her mouth and pounced with open hands.

.....

The power level of these artificial Yakon was about 3 million to 100 million. In the universe, every one of them was an extremely terrifying monster. However, now in front of Melissa, they turned into small toys that could be torn apart by hand.

"Those Yakon are simply no match...."

Birgil looked in a daze at MUYANG and Melissa, who were in the sky with great power, and was already too surprised to speak.

Those artificial Yakon that were killed by MUYANG and Melissa included many monsters with a power level of tens of millions, and he thought to himself that if he was allowed to fight, it would definitely not be that easy.

The blood and severed limbs of the Yakon fell like raindrops, and just as Birgil was frothing, several Yakon with a power level close to 20 million approached the area where the Grand Elder lived.

A cold light flashed in Birgil's eyes, and his figure suddenly appeared in front of that Yakons.

"The main force of the Demon Beast legion has been stopped by MUYANG and Melissa. You feeble individuals will not be able to get close to here."

The palm of his hand slashed through the air, holding open an energy shield, blocking the oncoming Yakon with one hand.

.....

At the same time, in the Grand Elder's room, Nail looked through the window at the scene outside, and his whole body was in a cold sweat.

There was a rumbling and violent explosion, along with the ground trembling, and the commotion kept knocking at the door of his heart.

"Nail, don't worry. Believe in MUYANG and the others, they have the ability to save Planet Namek."

The Grand Elder had recovered a lot of energy after taking the Life Essence, and his speech was no longer as feeble as before.

"But Grand Elder, the enemy's power is too strong and there are so many of them. I am worried about those clansmen who are outside." Nail looked outside with worry.

The vast black Demon Beasts gathered together. The ubiquitous artificial Yakons were causing an extremely strong visual impact. These Yakons were each above Nail in terms of energy value alone, and if one attack was not blocked, it would be a world-class disaster falling on Planet Namek.

"The children are hiding in the camp made by Porunga. As long as they do not come out, there is no danger."

"Hmm."

Nail nodded with a gloomy expression when the ground suddenly shook violently and a blazing white light rose like a hoary sun.

.....

"HEAVENLY GOD BEAM!"

The pure white energy swept across the sky, and all the Demon Beasts swept by the energy did not have time to let out a scream. Their bodies were all swallowed by the terrifying energy. At this time, Muiyang took a glance at the Big Gate Star, which had stopped in the outer space of Planet Namek, and prepared to store his ki for the last attack.

.....

TIC-TAC-TOE!

A fierce alarm sounded inside the Big Gate star.

The central lifeform snapped open its eyes, and the computer core kept judging the level of crisis.

Rumbling, the Big Gate Star suffered a tragic blow. Half of the star was bombarded with ultra-high energy, and the white star was instantly scorched and blackened, with thick smoke rolling in.

With a rumbling explosion, the outer star of Big Gate Star began to change. The damaged area was covered with brand new metal.

"Star body damaged 33%, under full repair!"

"Judging that the opponent's energy intensity is higher than 10,000 degrees. Open the strongest defense, alternate plan activated, Metal Yakon is waking up...."

The 1 degree was equivalent to 100,000 energy values in the universe standard, and after detecting a minimum 1 billion energy reaction in Planet Namek, the first thing that came to the mind of the central lifeform of Big Gate Star was to activate the strongest defense.

With a clatter, five blackened Yakon awakened from the incubation chamber, and then with a few thumps, they were launched by the Big Gate Star.

At the same time, the Big Gate Star also received the order to retreat. —The huge Big Gate Star began to move away from the star where Planet Namek was located.

.....

"Do you want to leave now? Since you're here, don't go away!"

Muiyang ignored the five black objects that were ejected for the time being. After learning of the opponent's intentions, he sneered. He aimed at the huge Big Gate Star and proceeded to brew a new wave of ki, preparing to blast it down.

However, at that moment, the five black objects had already pounced in front of him.

These five Metal Yakons were built with metal materials all over their bodies. They were black and shiny, covered with hard shells, and their appearance seemed very creepy.

Muiyang frowned, "Yakon made with metal material. They finally come up with the strongest power, but unfortunately still not enough."

"Muiyang, these monsters do not seem to be the same as the ones before." Melissa floated to Muiyang's side and said with a slight frown.

Muiyang nodded lightly. He glanced towards Melissa, and then looked at those Metal Yakon "This should be the most powerful transformed body. More powerful than the Big Gate Star. Be careful, these transformed beings don't look simple."

Muyang intuition that the power of these Metal Yakon should be no worse than the Metal Cooler in the original anime.

Melissa's lips curled, "Then let me see how powerful they are!"

The words had just fallen, Melissa shadow flashed, and already a horse before rushing up.

As she let out a shout, her hand hit the body of Metal Yakon, and with a bang and a flash of lightning, Melissa's body couldn't help but shake and actually took a few steps backwards.

"It's so hard, my hands are a little numb."

Melissa grinned and was very surprised. She was about to attack again when the five Metal Yakons in front of her let out a beast-like hiss and actually charged over first.

Muyang's face sank, "The energy of these Yakos weren actually up to 1.5 billion!"

"That's just right. Let me move my muscles!" Melissa roared loudly.

The grass-green energy flashed in her eyes, and she charged extremely furiously towards those five Metal Yakons.

"Ow..."

An overlapping roar came through, and the Metal Yakons seemed to be enraged, attacking together towards Melisia.

"Good timing!"

Melisia was not afraid. Her eyes narrowed, and her tyrannical aura became like a million horses running. The grass-green light on her body became even more vivid.

The first thing she did was to get the head of one of the Yakon's head, and then twist it with force. With a sound of metal fracture, the head of one of the Yakon's head was twisted off.

Then with a bang, the Metal Yakon's head was destroyed by Muyang's ki wave.

However, even with the loss of the head, the Metal Yakon had a computer control inside, and the remaining body continued to attack in accordance with the instructions.

The so-called head was just a decoration.

"KILL!"

Muyang was cold as frost. The palm of his hand was squeezed, and the whole space was held in the palm of his hand and was directly crushed.

BANG BANG BANG!!!

The sound of the shattered fuselage.

TUK... TUK TUK!!!

A blazing white ray penetrated through.

Five Metal Yakon with more than 1.5 billion energy wasn't even a match for Muyang and Melissa. Several Metal Yakon soon suffered heavy injuries and their bodies gradually crumbled, and Muyang and Melissa made another move and soon suppressed them.

The next attack was even more violent...

Muyang waved his fist, and spider web-like cracks directly appeared in space. The space was completely shattered, and blood-red spatial cracks appeared. With a grunt, these few Yakon, whose bodies were all mutilated, were swallowed by the blood-colored cracks almost without any resistance.

"Muyang, only that planet in the sky is left."

"Don't let it escape. Join hands with me to bring it down."

Muyang stared at the Big Gete Star in the sky. This kind of technological creation was the most annoying and dangerous. —As long as the Big Gete Star was still there, they could make such as a modified body like Metal Yakon as many as they wanted, and the consequences would be endless.

"Okay!" Melissa nodded knowingly, and together with Muyang, they aimed at the Big Gete Star.

Chapter 379

BEEP BEEP BEEP!

The danger signal sounded again, and it was even more violent than before.

After the last defenses had lost their effectiveness, the Metal Lifeform inside Big Gete Star had already sensed that their lives were in danger.

Almost instantly, an emergency command was sent. The next second, the huge planet, which was the size of Planet Namek, actually began to disintegrate after receiving the command.

Like a planetary explosion, the planet instantly exploded and automatically disintegrated into billions of small parts with a diameter of a thousand meters, each of which hid one or a few of its bodies.

RUMBLE!

The vast and surging energy attack swept through the entire starry sky. The combined power of Muyang and Melissa was very powerful. Even Pikkon or Uyamons did not dare to take it hard.

All the areas swept by the energy rose in a ball of flame, and the material that Big Gete Star accumulated for a long time was completely destroyed..

At the same time, the explosion erupted a fan-shaped energy ray, and endless energy instantly spread, rushed to Planet Namek.

When Melissa saw this, she opened her arms and used her superpowers to form a protective net in the outer atmosphere of Planet Namek. The light green protective layer blocked all the energy blasts, and the sky was dyed blood red at this moment.

However, the speed of the disintegration of the planet was too fast. Even though a large area of the star was covered by high energy, some individuals still managed to escape, including the Big Gete Star's Central Lifeform.

.....

On Planet Namek.

The moment a large crimson fireball exploded, Muiyang frowned and sensed the changes in outer space. However, the metal individuals of the Big Gete Star did not have much energy reaction, and Muiyang was not sure if he had wiped out all of them or not.

After gazing quietly for a long time, until the energy of outer space calmed down, Muiyang still did not capture the signal of the Big Gete Star.

He said, "It looks like the Big Gete Star has been repelled, and the crisis of Planet Namek should be lifted."

"That's the end?" Melissa was not satisfied.

Muiyang clanked Melissa on the head and scolded with a smile, "What else do you want? Do want to see the Big Gete Star landing on Planet Namek?"

"I just think this battle is too easy." Melissa laughed heartedly, rubbing the place where she was hit by Muiyang.

In fact, Muiyang also felt that this battle was a bit of a tiger's head. He wasn't sure whether the enemy was too weak and was easily solved by himself, or the other side was hiding and had another purpose?

After thinking about it, Muiyang shook his head and pulled Melissa's figure in a flash and flew towards Birgil's side.

.....

"Muiyang, Melissa, thanks to you guys this time!" Birgil greeted them. He looked at Muiyang and his wife with eyes still full of shock.

Muiyang waved his hand, "You're welcome."

Melissa's spirits were particularly lifted after she regained her normal state: "It's time for me to develop my potential next."

Birgil said, "Please follow me, Guru is ready."

Following along with Birgil, Muiyang and Melissa reentered the Grand Elder's residence.

On the second floor, the Grand Elder was in good spirits, and this time Nail did not mean to stop the Grand Elder from developing the potential for Melissa again from the bottom of his heart.

"Miss Melissa, please step forward." The Grand Elder said.

"I'll trouble the Grand Elder." Melissa curved her crescent-shaped eyes and excitedly walked up to the Great Elder's heels.

The Grand Elder smiled and placed his large hand on Melissa's head, and instantly, a huge potential was channeled out.

.....

Planet Yellowstone.

In the gloomy grotto, Loomu sat on top of the stone with a gloomy face. He had been informed by the intelligence, and he was furious inside.

"Where on earth did those two people above Planet Namek appear from?"

He wanted to seize the energy above Planet Namek, but he didn't expect not to get the energy, but also lost all the materials he had collected before.

"That's a whole 5,000 Level 1 Yakon and Level 2 Yakon!"

The battle power of the Level 1 Yakon was close to 100 million, the Level 2 Yakon had 3 million energy. —It was so much loss of power level that Loomu's heart was dripping blood. Especially what Loomu deplores was the Metal Yakons. In order to build them, he didn't know how much effort had been spent, and the loss was so heavy that he could only continue to hibernate.

"Sorry, I was not aware of their existence. According to the database comparison, their appearance characteristics only match with Saiyans and Earthlings." The Big Gete Star Central Lifeform sounded calm.

"Saiyans and Earthlings, are you sure?" Loomu's said gloomily.

"According to the Galaxy database, the Saiyans are a Warrior Race living on Vegeta, but this group has followed their home Planet Vegeta to destruction eight years ago. There should not be many Saiyans surviving today. The other was Earthling, which was a life on a relatively remote Low-Level Planet in the Southern Region. It was a Low-Level Race with a single-digit power level. "

"In accordance with the judgment, the two people who appeared in Planet Namek are 99.99% probable to be the Saiyans who survived. The only uncertainty is that the Saiyans should not have such a strong power level."

The Big Gete Star Central Lifeform had no emotional fluctuations and said indifferently.

After listening to this, Loomu pondered for a while with a sullen face. He suddenly remembered that when he was on the Prison Planet, he heard the ancient monsters who were imprisoned talk about the appearance of powerful Super Saiyans in the universe a long time ago.

"Could it be that those two people were Super Saiyans?" Loomu rubbed his chin and suddenly ordered, "Immediately search the universe for any remaining Saiyans. I want to capture them and study them. I need you to create powerful warriors with the Saiyan bloodline."

"Yes, command received, proceed immediately... zzzzzz..."

Before the other side could finish speaking, the signal of the communication suddenly appeared to be interrupted, and a murmur of interference sounded.

"Big Gete Star Central Lifeform, what happened on your side? Answer me immediately!" Loomu sternly scolded, but the other side of the signal source had not responded.

After a while, an unfamiliar signal passed into Loomu's mind.

"Hey, hey, are you listening? This big guy is your subordinate?"

It was a crisp female voice, but somehow, it gave a creepy feeling...

Loomu's face changed and he stood up from the stone at once and said gloomily, "Who are you?"

"Hehe, Loomu, aren't you the one who is looking for us? Now we came by ourselves. I'm Zangya!"

‘Zangya?’

‘Who is that?’

Loomu looked stunned, then quickly realized that this woman named Zangya was one of the Galaxy Soldiers he had been trying to ally with! They actually came to him, he was surprised!!

"How did you find me?"

"Hahahaha, you made such a big fuss, of course it was easy to find you."

In order to find Loomu's whereabouts, the four of them spread out and searched all the way along the area where the big thing happened in the North Area, which led them to find the Big Gete Star Central Lifeform near Planet Namek.

"Galaxy Soldier, have you finally changed your minds and decided to join forces with me?"

.....

Some distance away from Planet Namek, Zangya, who had orange curly hair, blocked in front of the Big Gete Star Central Lifeform, and pressed one hand on the Big Gete Star Central Lifeform's eyebrow, sizing up this particular lifeform curiously.

"Join hands? No no no, I just trade with you ah."

Loomu was silent for a moment and asked, "How do you plan to trade?"

"You help us find the sealing place of our boss, Bojack, and we help you rule this part of the galaxy." Zangya narrowed her eyes and showed a charming smile, but as to whether her words were credible, no one knew.

Loomu wasn't a foolish person, naturally he wouldn't believe Zangya's side of the story. He sneered. ‘When I help them find the boss, perhaps I'll be the first one to be left out.’

However, even if Loomu didn't distrust Zangya and the others, he wouldn't show it at this time. — As a phantom people, he was best at Mind Control. If he could control the Galaxy Soldier during this time, it would be much more effective than finding any Saiyans.

“Yes, I agree to ally with you." Loomu said vainly.

"Ha, it's a deal, I'll come to you."

Zangya tapped the Big Gete Star Central Lifeform's brow, and a metallic, crisp sound came.

"Okay, my location is at...."

Loomu transmitted his address and then hung up the communication with a sneer. Next, he had to set up properly and think about how to manipulate those four galactic warriors next.

"Hmph, I just lost Metal Yakon, and the Galaxy Soldier gang came to my door. It seems that even heaven is helping me."

As he was about to plot how to control Zangya and the others, a figure suddenly appeared behind Loomu's back.

The sound of slapping applause rang out, and Loomu's pores tightened as he looked back and saw a man in blue clothing with a gray cloak over his shoulder.

Loomu's pupils shrunk to a point, an evil force caused his body to break out in a cold sweat.

'Who is this man and how did he find me?!?!'

"Who are you?" With a powerful aura, Loomu said with difficulty.

The figure came out of the shadows, and a cold smile appeared at the corner of his mouth, "Don't you know who I am? One of my subordinates was captured by you!"

Chapter 380

"When did I ever capture your subordinates?"

Loomu looked at the person who suddenly appeared in front of him in confusion, and was intimidated by the opponent's great power to withdraw a step backward. His whole body was alert and on guard, then he thought of his identity as a phantom man and settled down a little.

"Have you forgotten so soon? How did those Demon Beasts you created using the life of the Big Gete Star come from?" The man in blue figure walked up to Loomu, his voice was full of coldness.

This person was wearing a cloak and had a strong body. His skin was flesh pink, with two pointed ears and a long chin, and a symbol like "M" emerged from his eyebrows.

Loomu smiled, his expression changed slightly, "Your subordinate is that Yakon?"

'Damn! That Demon Beast Yakon actually has a powerful master!'

Loomu couldn't help but be secretly annoyed at his own bad luck. It was so hard to catch a Demon Beast, he even invited his master.

"Come to think of it, to be precise that Demon Beast Yakon is a subordinate that this king is ready to take in.... However, before it can be put to great use, it was dismembered by you. How do you think... you should make up for the damage caused to my future subordinates?"

The blue figure's ruthless gaze looked at Loomu, "I see your ability is not bad, why don't you come and replace Yakon as my subordinate!"

"Don't even think about it!"

The first thing he needed to do was to use his power to control the opponent. The first time he thought about it, he released his spiritual power, but what he didn't expect was that as soon as he explored his spiritual power, it seemed to be stuck in a quagmire and he couldn't get out.

Poof!

Loomu spat out a mouthful of blood and his face turned white.

"Hahahaha, are you trying to control this king? Even Supreme Kai wouldn't dare to do that. Your strength is still too far off."

"Kai?"

Hearing the person in front of him suddenly say the name of Supreme Kai, Loomu's face suddenly turned miserable white, and his voice trembled, "Who the hell are you? You actually don't even put Supreme Kai in your eyes."

"This king is the king of the Demon Realm, Dabura!" Dabura said in a lone voice.

"King of the Demon Realm?!"

Now, Loomu was a bit dumbfounded.

The moment he heard Dabura's name, he knew he had met the iron plate.

No matter how crazy he was, he was only a demon in a galaxy. However, Dabura was the recognized king of the entire universe's Demon Realm. It was important to know that the Demon Realm was a particularly cruel place, and the first requirement to become a king in it was great power.

The king of the Demon Realm, Dabura, possessed the strength to defy everything.

According to the energy strength, Dabura's power was not weaker than the full power of the game of Full Power's Son Gohan at Cell Games. It was a real Super Saiyan 2 level, with a power level of at least 5 billion!

'Escape!'

In an instant, Loomu had no other thoughts. The king of the Demon Realm was too powerful for him to deal with.

Loomu looked for a spare time to run outside the cave, but Dabura wouldn't let him do as he wished. Dabura's body moved slightly to move a few steps towards the exit.

The cave exit was instantly blocked by a powerful demonic ki, and Loomu let out a miserable cry as a demonic ki bounced him back.

"Oh, don't rush away. This king saw your power is somewhat similar to Babidi. Do want to make you become my subordinate only." Dabura smiled, as if catching up with old times.

"How can your power possibly hit me?"

Loomu was a phantom man, his body was originally unreal, even the realm Kai could not touch his body.

"This is the power that Babidi gave me." Dabura looked at Lomou indifferently and shot out a purple-black energy with a snap of his finger.

This was the power given by Babidi, which could be used to control the power level not more than 100 million lifefoms. If it was stronger, it would need Babidi's personal hand.

When this purple-black energy entered Loomu's body, it soon flowed through his body and gradually entered his soul.

Soon, Loomu's eyes began to become dull, and the "M" symbol appeared at his eyebrows, just like Dabura.

"Lord Dabura!" Loomu respectfully stood in front of Dabura.

"Hahahaha, Babidi's Dark Magic is really magical, not only can it manipulate the mind, but also greatly enhance the power of the person being controlled." Dabura stroked his chin, sensing a substantial increase in the power of the phantom man in front of him, "Who were you in contact with just now?"

"It was a few Galaxy Soldier who escaped from the Prison Planet together with this subordinates."

"What's the origin?"

"It is said that they are strong people from other galaxies, named Zangya, Kogu, Bido, Bujin. They came to this galaxy 300,000 years ago and stirred up the four galaxies. Later it was the World of the Living and Other-World strong people who came together to subdue them."

"They contacted this subordinates just now, hoping that I would assist them in finding the whereabouts of their boss, Bojack."

Loomu was completely under control and told the matter honestly.

"So it's Bojack, this king has heard of this man." Dabura's eyes lit up.

Bojack was also an extremely powerful fellow, with a strength that ranked almost at the top of the entire universe, almost on par with the Supreme Kai. Dabura pondered that he might be only a little more powerful than Bojack if he had not received the power boost given by Babidi.

If he could control these Galaxy Soldiers as well, they would certainly be a very good group of fighters! The plan for Babidi to resurrect the Majin Buu wouldn't be too helpful.

"You continue to contact them according to the original plan, they want to find Bojack, then help them find Bojack."

"As ordered, Lord Dabura."

"The Big Gete Star technology under you is very good. It's actually able to transform the Demon Beast Yakon and create a Metal Yakon with superb power level. I wonder if it can be transformed for this king?"

"Ah!!!"

Loomu raised his head in surprise.

Then he contacted the Big Gete Star Central Lifeform and quickly received a reply, "If Lord Dabura wants to transform, you need to consume a large amount of the planet's energy. However, after the transformation, you can improve approximately 50% of your power."

"I can actually enhance 50% of the power?!" Dabura, the King of the Demon Realm, blushed furiously.

He had been stuck on top of his current power for millions of years. Although Babidi's Dark Magic had boosted his power level by several hundred million, the price he paid was not small either.

If the technological power of the Big Gete Star could really boost his power by another 50%, then with his current power level of 5 billion, he would have 7.5 billion power level after the boost. At that time, who else in the entire universe could be his opponent? Perhaps even the legendary Majin Buu would not be a match for him!

"Good, good, how much energy you still lack. Just mention it, I will provide it to you!"

Instead of relying on Majin Buu to rule the universe, it would be better to rely on himself. Even if Babidi knew what he intends to do, he would agree, right?

"Lord Dabura, the Big Gete Star had originally collected enough energy, but it was lost in a battle not long ago. If you want to transform your body for your lord, you will need the energy of at least 50 High-Level Planets or life races, plus hundreds of rare metals."

Dabura waved a big hand, "Report the list, I will let the Demon Realm prepare it for you. I have only one request, and it must be fast."

"I can put in a few good words to Babidi for you when the time comes."

"Yes." Loomu was moved to tears as if he had hugged a golden thigh.

Babidi's Dark Magic was so terrifying that even the phantom man, Loomu, lost his self-personality.

.....

About three days later, four figures suddenly came in the outer space of Planet Yellowstone. They landed across the starry sky to the planet's surface and then found Loomu's location.

The orange-haired Zangya walked in front, with a swaggering look.

At that moment Kogu, who was carrying his sword, said, "Beware of Loomu's Dark Magic. This guy is very weird."

Zangya smiled disdainfully, "His magic is only to control a few hundred million power level of the people. If he wants to control our terror, it is not easy."

Bido, the big burly man, said, "This time I agree with Zangya's words."

Bujin shook his head, "You two rarely agree with each other, but we have to listen to Kogu. There is always nothing wrong to be careful. After all, we do not have the strength to crown the universe like the boss."
