

Ball God 401

Chapter 401

"It seems that I am impatient, but it doesn't matter if you don't understand the realm. Then I'll let you see the power of the realm." Muyang sighed lightly and said with a smile, his body moving faster.

Since the aura of her body was all locked in her flesh, Melissa could only judge Muyang's position with her naked eyes and combat instincts, which caused her to lose the first opportunity in every attack and had a feeling of facing Vis in the Destruction God Realm.

"Where the hell is it?" Melissa's eyes turned quickly, and her expression became increasingly serious.

"Here!"

Ding!

The biting wind blade brushed Muyang's cheek, only to see the corners of his mouth turned up slightly, and then flashed quickly, disappearing from Melissa's sight.

"Almost!"

Muyang's figure suddenly appeared beside Melissa's, and his clear voice rang in her ears.

Melissa's expression was stunned. A steel clamp-like palm was already on her shoulders, a huge force struck from the side, and Melissa staggered and was beaten hundreds of meters.

BOOM!

In the next second, Melissa stabilized herself as another attack from Muyang swept in.

BOOM!

Dust flew, and the ground shook violently, spreading out spiderweb-like cracks in all directions.

.....

April watched from afar as the two fought, her eyes shining brightly. Although she was not as severely paranoid as Melissa, or perhaps because she had been brought up in Muyang's care, she believed in his words. She had always taken his words well to heart.

"This is the freedom intent that brother said. No trace of aura can be felt at all. Now Melissa will be miserable."

The corners of her mouth rose to reveal a smile as if seeing Melissa defeated, and she felt very happy.

'In order not to repeat Melissa's mistake, one should pay more attention to the realm.'

'Well, I should always have in-depth exchanges with my brother.'

.....

On the other hand, the battle between MUYANG and Melissa lasted for a long time. Melissa did not have any advantage from the beginning of the battle.

BOOM!

Another attack.

Melissa's figure fell from the high altitude as if a meteorite fell and hit the ground hard.

"So fast, the feeling of having no aura is the most annoying."

The corners of her mouth twitched a little, and Melissa lay in the middle of the impact crater, feeling woefully out of shape.

MUYANG squatted at the edge of the impact crater and picked up a stone, and threw it towards Melissa in the pit.

"Earth martial arts' aura sensing' techniques are certainly excellent, but the universe is full of strange lifeforms, sometimes aura sensing also has a failure, you can go without comprehending the realm, but before that, you need to learn how to face the battle without aura. "

"I see." Melissa lay in the impact crater, looking slyly at the sky.

At this time, April flew over, helped her up from the mud and sand, and shouted to MUYANG with an angry face, "Brother, you're bullying Melissa too much."

"It wasn't....."

As soon as Melissa's words were about to be spoken, she saw April rushing towards MUYANG's arms in small steps.

April went to snuggle MUYANG and saying, "Brother, Melissa doesn't want to learn the realm, I am willing to learn, teach me!"

"Good!" MUYANG stroked April's head.

"(〜^〜ヮ)!!!"

Melissa's smiling face stiffened, a few black lines appeared on her forehead.

'This girl... she really knows how to steal opportunity.'

This battle showed Melissa her weak side. As MUYANG said, you couldn't expect every enemy to be the type you were familiar with; granted, there were very few races in the universe born without aura, but it was not like there weren't any.

And once they appeared, they were bound to be the ones with outstanding natural talent.

For such an enemy, it really was two eyes blind. All the previous combat experience was useless.

MUYANG, of course, was happy to point out the two, so from the most basic realm began to explain, but he did not know whether he told too much or what. April and Melissa had always seemed to understand but not understand.

'It seemed that I still have a long way to go if I want to teach them what the realm is!'

After all, the realm of this thing, to put it bluntly, this thing was beyond the reach of Melissa and the others. —It's almost as if a Majin Buu level.

Since the realm cultivation could not be done overnight, it is more practical to first adapt to the breathless fighting style.

In the following days, MUYANG restrained his aura and fought with April and Melissa.

After more training, there was always something to gain. At first, the two women were very embarrassed, but the fighting lasted for a long time. Then, finally, they found the feeling, and the combat intuition began to be honed.

.....

Time passed day by day, the planet YADRAT.

In front of an ancient temple, SIDA was ordered to come to see the clan's Elder DURRANK. —This YADRAT man named SIDA was a rare powerhouse on YADRAT, and he was once the guardian of the Secret Art Pyramid.

"Elder DURRANK!" SIDA walked up to the aged Elder.

"You are here!"

Elder DURRANK opened his eyes, a stream of light flashed in his rippling pupils, "SIDA, go and contact the Earthling MUYANG. They are on top of the gravity planet not far from the planet YADRAT."

SIDA was stunned for a moment and asked, "Elder DURRANK, the MUYANG you are talking about is the Earthman who visited the planet YADRAT more than forty years ago?"

"That's him." Elder DURRANK said leisurely, "I have a feeling of uneasiness in my heart. It seems that in the near future, there will be a great disaster will happen and that MUYANG is the key person to stop this disaster."

SIDA hurriedly asked, "What kind of disaster is it? Will it affect planet YADRAT?"

Elder DURRANK shook his head, "For the time being, it won't affect YADRAT. It's a catastrophe in another galaxy, it's about the Saiyans, but when it comes to the origin, maybe it has something to do with YADRAT."

Elder DURRANK pondered for a while but still didn't tell the matter.

SIDA knew that Elder DURRANK was versed in the secret art of prophecy. Since Elder DURRANK said that it would not affect the planet YADRAT, he settled down and bent towards the Elder respectfully, then slowly withdrew from the temple where the Elder was.

.....

On the gravity planet, the YADRATIAN, SIDA struggled to resist the gravitational force of the planet and conveyed Elder DURRANK's words into place.

"Mr. MUYANG, and the two beautiful ladies, I am the YADRATIAN, SIDA, Elder DURRANK asks you to come over for a moment."

"So it's SIDA. It's been a long time."

When Sida came over, Muiyang was instructing Melissa and April to cultivate. When he saw the visitor, Muiyang only felt that the other party looked a little familiar. However, only after the other party introduced himself, Muiyang remembered that this person was the secret pyramid guardian of the Yadrat planet more than forty years ago.

"Is Elder Durrank looking for us for something?" Melissa asked.

Sida said, "The elder said that a great catastrophe concerning the Saiyans would occur in the future, and you need to make a trip to the planet Yadrat."

In fact, Sida was also wondering why Muiyang, who was an Earthling, was needed when it was clearly a Saiyan disaster.

"What Saiyan catastrophe?" Melissa's face became serious all of a sudden.

The Saiyans of Planet Vegeta had long been wiped out for more than ten years, so if there was really a disaster, it must be directed at Planet Sara. As the princess of Planet Sara, Melissa certainly couldn't sit back and watch.

Chapter 402

Upon receiving the notification from Sida and learning that there might be a disaster on Planet Sala, the first reaction of Muiyang and Melissa was to associate it with the seal on top of Planet Sala. Otherwise, with the strength of Planet Sala, there was really nothing that could threaten them.

"The specific situation is not very clear to me. Therefore, it is better to let Elder Durrank tell you." Sida shook his head and took charge of conveying Elder Durrank's notice.

Muiyang gathered his smile and exchanged a look with Melissa and April, "It's better to ask Elder Durrank about this matter in person."

"All of you, please."

Sida breathed a sigh of relief and extended his hand to make an invitation. The gravity on top of the gravity planet was almost too much for him to bear.

"Let's go then."

Then they all cast instantaneous movement.

.....

The next second the surrounding scenery changed. The huge pressure exerted on the body suddenly disappeared. —The gravity of the planet Yadrat was only a little stronger than that of Earth, and it was not comparable to that of a gravity planet at all.

Suddenly entering such a relaxed environment, Muiyang's whole body was light and airy, and he had a feeling of floating up.

This time into the Yadrat star, although it was a return trip to the same place, the feeling was completely different from the last time. This was probably the confidence brought by the strength.

"This way, Elder Durrank is already waiting for you."

Receiving Elder Durrank's voice transmission, Sida led them towards the temple.

.....

Soon, Muiyang and the others met Elder Durrank in the divine temple.

Seeing after for decades, Elder Durrank had aged a lot, adding a few wrinkles on his pink forehead, and the bags under his eyes had become more prominent.

"Mr. Muiyang, long time no see."

Elder Durrank sat calmly in the center of the temple, his eyes looked at Melissa, showing a smile: "Congratulations on your successful reincarnation, well, actually reincarnated as a Saiyan, it seems that the underworld is probably destined, this disaster needs to be solved by you."

Melissa is now concerned about the situation on Planet Sala. She lightly saluted and asked straightaway, "Elder, what is the disaster you are talking about? Is it the ancient seal above Planet Sala?"

Elder Durrank was silent for a moment and said, "Yes, it is that seal. That is the ancient Beyadorian should say the ancestors of the Yadrat Star left behind on the planet Sala, things start from a distant and long time ago"

"It was a very distant and ancient time when the Saiyans of Planet Sala still lived on top of a planet called Planet Sharada."

'Planet Sharada?'

Muiyang smiled. His heart moved and nodded slightly.

Just listen to the elder Durrank continued, "There are a total of two Saiyans, respectively, the bestial Saiyans with tails and rational Saiyans without tails, that is. The later Planet Vegeta Saiyans and Planet Sala Saiyans. The original origin of these two Saiyans is no longer known, it seems to have appeared suddenly on the planet Sharada, but their existence made the ancient universe full of strife."

"Because of the difference in philosophy, although the two groups are the same Saiyans, the relationship is not very harmonious, and even often fight in a war."

Elder Durrank narrated, thinking as if back to a long time before that magnificent era.

The two Saiyans were often at war, and the battles often spread throughout the universe, and it was a time of great power.

Muiyang listened quietly. When Elder Durrank talked about the two different Saiyans and the war between them, somehow Muiyang's mind came back to the Saiyans of the sixth universe.

In the original, bestial Saiyans and rational Saiyans were not the difference between the seventh universe and the sixth universe Saiyans!

In the sixth universe, the planet Sharada lives above the rational Saiyans without tails. So where did the Saiyans with tails go, were they wiped out?

"..... the end of the war, no one knows exactly what happened. Perhaps because of what mutation, anyway, finally as a rational lineage of tailless Saiyans seems to have lost the war, forced to migrate to the distant planet Sala, while the planet Sharada became the home of the bestial Saiyans. "

"The Saiyans of the bestial lineage did not spare the Saiyans of Planet Sala, they pursued them to Planet Sala, and it was at that time that our ancestor Beyadorian joined the battle and cast the seal."

"Could it be that there are still surviving ancient Saiyans inside that ancient seal?" April asked as she raised her head and gazed at Elder Durrank.

"The seal can block the contact with the outside world. If those ancient Saiyans are strong enough, there should still be many surviving now."

Elder Durrank nodded his head and said, at this time, Sida also showed a surprised expression.

"No wonder when I entered the Vegeta Star, I felt some annoyance when I saw those Saiyans with long tails. It turned out to be the reason for the natural bloodline clash!" Melissa muttered.

"Those guys got the planet Sharada in the end, but in the end, they left planet Sharada. What a bunch of losers."

Bestial Saiyans in ancient times drove away the rational Saiyans to get to the planet Sharada but did not keep long, the planet Sharada because of the war destroyed it. Thus, they had to wander in the universe and finally migrated to Vegeta, until more than ten years ago, Vegeta was also destroyed by Kevlar.

As Melissa said, the bestial lineage of Saiyans was born to destroy the planet. The home planet was made without them.

Muyang stood beside Melissa, thinking of another problem, "If the ancient Saiyans still exist inside the seal above Planet Sala, then how strong those Saiyans should be? I'm afraid they will be very strong!"

Maybe the reason why Planet Sala lost the Super Saiyan heritage was because of those wild Saiyans.

It was not guaranteed that those ancient Saiyans would still transform into Super Saiyans.

At the thought of possibly facing the Saiyans who were fully open, Muyang felt a pressure on his shoulders... But, the story on the other side of the Earth has just begun. So, why did he jump to the middle and late stages of the story all at once?

Melissa's face changed, and she also thought of this problem. Although she had not seen the Super Saiyan, under the eyes and ears of Muyang, she also probably know the strength of the Super Saiyan.

In the words of the story, that was the fate of the protagonist ah!

However, such worries were fleeting. Melissa licked her lips, her beautiful eyes flashed a cold light, "Hey, Super Saiyan, I wonder how it compares to my golden pupil state?"

"It should be very powerful, but even if it's a Super Saiyan, I should be able to deal with one or two." April looked at Melissa, a little eager to try. After becoming a cyborg, her self-confidence also suddenly skyrocketed. She was no longer the little girl who could only hide to the side.

As for Muyang, after the initial mental stumble, his gaze became clear and cold, even Super Saiyan 2 level Saiyans, as long as the base combat power was not particularly terrifying, it should not be his opponent.

"Come on, let's go to Planet Sala together and see what's going on."

"Wait a minute."

At this time, Elder Durrank's flat, waveless eyes swept a glance at Muiyang and them, shouted them to stop. He then told Sida to take out an ancient stone carving from the temple and handed it to Muiyang.

"The seal on top of Planet Sala is bound to break soon. The appearance of the ancient Saiyans is already inevitable, but I prophesied the future... it seems to hide some kind of crisis, here is a copy of the stone carving, which contains the ancient power of the Bayadorian, it may be able to help you."

Muiyang received the stone carving from Sida.

A pale, ancient aura came to his face, the surface of the stone slab has been baptized by the years, some weathering at the edges, complex patterns are drawn on it, should be very some years old.

"Thanks."

"I can only provide this help. I hope it can be of some use. After all, this is also considered to complete the unfinished business of our ancestors." Elder Durrank finished speaking and fell silent.

Chapter 403

Muiyang nodded deeply and received the ancient stone carving presented by Elder Durrank into the world of acceleration, then bid farewell to Elder Durrank and the others and led Melissa and April to rush towards Planet Sala.

At the same time, on the great Gobi of Sala planet, the rich cyan gas had reached the level of blocking the line of sight.

The Saiyan warriors stationed around the sealing ground were affected by the dense gas. So they had to pull back a few thousand meters. —This was already the second recent retreat. From the last retreat, it was less than seven days have passed.

Now the situation was getting more and more unpleasant, the wind hunting, the vibrancy was forcing, the ancient seal was more and more fragile. It looks like it would collapse anytime.

.....

At this time, not far from the central break, a simple tent set up a temporary headquarters behind a bulging soil bag.

Wayne stood in front of the tent and looked up at the sky, seeing the sky gradually dimming and foreseeing that a new storm was coming.

"Wayne, this is the latest data obtained by the monitoring department. The instrument has detected that the energy in the Gobi Center has exceeded the threshold. This is a dangerous signal...The seal inside may not last long."

Wayne took the document and reviewed it, and his face solemnly ordered: "Let the people on the planet leave Planet Sala in the spacecraft first, and then come back when the situation subsides."

"Yes!"

The Saiyan warrior in front of him responded loudly and then turned to execute Wayne's instructions.

Wayne thought for a moment, and then sternly ordered to his own guards, "Nok, go and transfer the Sala Special Forces and escort team here, order them to be ready, once the seal is broken, launch an all-out attack, absolutely do not let the monster inside walk out."

The researcher of Planet Sala conducted a detailed study on the seal and prepared several plans. The best plan was, of course, to repair the seal, but this was obviously impossible. Monsters are coming out of it.

Such preparations have also been completed.

"Wayne, please rest assured. All the fighters are in place, ready to launch the strongest attack." The Saiyan warrior named Nok patted his chest confidently.

The strength of the Saiyans of Planet Sala was well-known in this galaxy. The Sala Special Warriors and Guars were the best of them who have been selected by thousands. The strongest warriors had a terrifying power of more than 50 million combat power, which were extremely rare masters in the whole universe.

With such two powerful teams, what enemy was there that cannot be dealt with?

"Don't make any mistakes."

Wayne once again admonished for his subordinate's confidence. He faintly glanced at, his eyes then turned to the distant Gobi, and his face could not help but show a few worries.

The next evacuation work proceeded in an orderly manner. Finally, the civilian Saiyans of Sala entered the spacecraft one by one and flew towards outer space under the unified command of the terminal.

Everything seemed to be going so smoothly.

Just then –

A buzzing roar came from the ground, a very dull sound that grew more and more intense like a war drum. Soon, the ground shook violently, accompanied by a tsunami of violent tremors, a powerful aura like a dam breaking without warning like a dam.

Wayne and others were closest to the seal, the first to be swept away by those Ki. The horrifying aura made their bodies stiffen, and their expressions could not help but bring a horrified look.

One, two, three...

The powerful aura was increasing, and there were more than two thousand in total.

"Hahaha, I finally came out."

"I have had enough of that dark place, the damn Beyada star people. This time I must destroy you."

A sturdy black figure emerged from the cyan cloud, and the terrifying aura spread out like a wind blade.

"Hahahaha, the Saiyans of this planet is still there!"

"Orfido, let's revel in the destruction of those inferior Saiyans without tails."

"Kill!"

"Here it comes."

The burst of awe-inspiring killing intent made Wayne's face cold. Then, looking at a fierce figure in front of him, the familiar appearance made him froze a little.

"They are also Saiyans!" Wayne muttered to himself in disbelief.

However, compared to the Saiyans of Planet Sala, these people in front of him had an extra tail behind them, and the Ki on their bodies was particularly furious.

After the initial shock, the Planet Sala Saiyan warriors quickly calmed down, "Fortunately, the strongest power is similar to that of the special battle team's warriors!"

Although those more than two thousand energy sources are very powerful, still within the acceptable range.

"Everyone prepares. Start attacking!" Wayne decisively gave instructions.

All Saiyan fighters had been gearing up for a long time. While responding loudly, they leap forward one by one. In an instant, turbulent energy blasted into the air. Without unnecessary nonsense, countless energy attacks blasted toward the seal.

With countless electric auras cutting through the sky, all the high-ranking warriors of Planet Sala struck.

"DESTROY THEM."

"KILL KILL KILL!!!"

RUMBLE!

A storm rolled up, the calm atmosphere was broken, electricity and fire densely covered the line of sight in an instant, and a massive ball of fire rose like the rising sun.

At this moment, the hot fluid glued together, as if a scene of the burning sky and boiling sea general scene.

But soon, Wayne felt that something was wrong. In that scene of horrible indiscriminate bombardment, the other party's breath actually not only did not decrease but began to strengthen gradually and soon rose to the point of fear.

"NOT GOOD, EVERYONE RETREAT!"

Realizing that the situation was not right, Wayne hurriedly ordered.

Several high-ranking Sala planetary warriors also noticed that something was not good, "ALL RETREAT!!!"

However, just at this time, a flash of golden lightning flashed past the eyes, and a golden-haired, blue-eyed figure with golden Ki flames burning all over his body flew through the crowd.

PENG PENG PENG-

Hundreds of Sala planetary warriors instantly lost their lives, and a corpse fell from the sky.

"Hahaha, what an inferior Saiyan, with only such a little fighting power. I am really sorry for the title of the fighting nation."

It was a golden figure, his whole body shining with golden light, burning with golden flames. His hair raised high, like a heavenly god looking down from high in the sky.

In the other party's eyes, Wayne only saw indifference and ruthlessness and the desire to kill.

This is Super Saiyan!!

"What's going on, that strange state? Is it some kind of special transformation?"

Wayne looked at the opponent in shock, a little trembled in his heart, and the strength of the opponent's body was no less than 1 billion.

Puufff-

The opponent smashed a warrior's head with a punch and leaned over and laughed wildly, "Hahaha, Saiyan of Planet Sala now even can't transform into Super Saiyan? That's really a disgrace!"

"Dodoni, you first quiet down."

A harsh voice sounded. The Super Saiyan named Dodoni settled down and then retreated to the side.

'This powerful warrior is not the strongest among them?'

'There are even more powerful people who could order him around!'

At this moment, cold sweat brushed out from Wayne's forehead, and he realized that Planet Sala was in big trouble.

Immediately in Wayne's line of sight, a big, sturdy man full of evil smiles came. The majestic and cold aura instantly enveloped the whole planet. When this big man stood there, the dark blue sky suddenly became gloomy.

"Young man, you are the leader of the contemporary Saiyans of Planet Sala, right?"

The big man came to Wayne's body, slightly bowed his head. His sturdy body was several heads above Wayne, bringing an inexplicable sense of oppression.

"Don't go near the king!" A member of Wayne's guard beside him stepped forward and tried to stop the other man from approaching.

"Noisy!"

The opponent's face was cold, casually slapped out a Ki wave. The Saiyan guard could not resist before being directly blown into powder.

"AAAAGHHHHHHH!" Wayne yelled with a face of grief and anger.

The big man laughed loudly and said unconcernedly, "Don't be angry, it's just the elimination of an ant, alas, your generation of Saiyans, such a shame!"

Chapter 404

"Who the hell are you people?" Wayne looked at the other party angrily and managed to calm himself down.

"Tch, you actually asked what we are, it seems you guys lost a lot of valuable information, what a bunch of pathetic guys."

The big man shook his head and said, "My name is Felix, barely the leader of these guys. You should see that we are also Saiyans."

Felix reached out and rubbed his chin. His tone suddenly became cold, "Now I give you two choices, either submit to me and obey my orders; or I will personally kill you. You should be able to see that it is absolutely very easy for me to kill you. "

"Want us to submit to you, simply delusional."

Wayne was not sure where exactly the other party was from, but definitely not a kind person. —and as the leader of the Planet Sara Saiyans, he definitely would not bow down.

"Hmph, don't know how to raise your head. But, of course, since that's the case, there's no use keeping you." Shaking his head in slight disappointment, a cold smile crept onto Felix's cheeks.

But to be honest, Felix didn't expect Wayne to really surrender to him from the beginning. He glanced at Wayne indifferently, lamenting the other party's ignorance.

Raising his hand, Felix condensed a group of terrifying energy balls. The energy balls were round and red, and the crystal light filled the sky.

The horror atmosphere made the entire atmosphere uneasy.

"GO TO HELL!"

The aura on his body suddenly soared, and his body was full of killing intent. The energy ball shining with fierce energy suddenly turned into an ellipsoid and shot towards Wayne.

"Not good!"

Wayne's face changed wildly. Then, when he was about to dodge, he was shocked to find that several Saiyans had blocked his way.

"..."

'This is bad.'

As the leader of Planet Sara, it would be too embarrassing to die without even a single move.

Cold sweat slipped down his cheeks. Then, just when Wayne desperately thought he would perish from Felix's energy, a beautiful, splendid light suddenly appeared.

Several figures blocked in front of Wayne. One of them stretched out his palm and directly grabbed Felix's energy ball in the palm of her hand.

"You want to kill my brother. Have you asked my opinion!"

Melissa appeared coldly, and at the same time, a cold question came from her.

Now, Melissa was also a little dumbfounded. She just came to Planet Sara a moment ago. But, before she could react, she suddenly found a wave of heat hit her.

Moreover, this person is trying to kill her brother!

Her white cheeks were cold as frost, and with a pinch of her fingers, she crushed the other party's energy ball into a mist-like energy beam.

"..."

'Did we see it wrong? the leader's energy ball..... did that woman squeeze it?'

Although the leader was now in a normal state, it was not that anyone could take his attack.

For a while, the field was silent.

Finally, the surrounding Saiyans who came out of the seal couldn't help but freeze.

"Hey, what's the matter?"

Looking at the few figures that suddenly appeared, Felix's face flashed with surprise, and he quickly reacted, "Hahaha, it turns out that there are masters among the Saiyans on the planet Sala. Dodoni, Alfid, go and kill that woman!"

"Yes, chief!" Dodoni answered.

Suddenly, a Saiyan named Ovid walked out from the crowd behind with a grin, licked his lips, "This woman is so beautiful, it's a pity to kill her, why don't you let us play with her?"

Looking at Melissa's charming face, he had this sudden urge to grab her and smash her.

"Melissa, be careful. Those guys are very powerful!" Wayne shouted uneasily to Melissa.

"Don't worry. They are not my opponents." Melissa waved her hand at Wayne confidently.

Looking lazy and casual. Her green eyes stared fiercely at these Saiyans in front of her. —especially the Saiyan named Ovid, who had already been included in the kill list in her heart.

To actually want to ravage her, did he also qualify?

"Hahaha, I just like this kind of savage female Saiyan!" Ovid laughed with a grinning face, then yelled, the billowing golden arrogance burned, and suddenly became like a super Saiyan. His fighting power instantly Time increased to about 1 billion.

Ovid: "Hey, I'll let you see how good I am!"

'Super Saiyan!'

Muyang looked at the other party's changes in surprise and paid special attention.

With blond hair, green eyes, and the golden flame rising to the sky, the characteristics of the Super Saiyan were extremely obvious, and he absolutely can not be mistaken.

Just before Muyang was thinking about it, the Super Saiyan named Ovid had already stepped forward. But at this moment, Melissa showed a sneer, golden light flashed in her eyes, and a terrifying aura was released.

Ovid's expression stiffened, and then a dangerous signal was born in his heart.

"Shit, danger!"

He was trying to avoid it, but it was too late.

PUFF!

A sharp light pierced the void.

At the moment when the light fell, Ovid hadn't reacted yet... with a crash, blood and flesh splashed, and the bright red liquid fell from the sky like raindrops.

Ovid was stunned to find that the picture in front of him had been dislocated. The scenes were scattered on both sides.

"Wow...cough cough!"

There was no wailing, no cries, and Ovid's consciousness had plunged into darkness.

"Can't even block one of my attacks. You deserve to die!"

Melissa looked at the opponent's corpse coldly, spinning a sharp wind blade between her fingers, brushing and smashing the opponent's corpse into pieces.

Silence!

The scene fell into silence again.

A powerful Super Saiyan was actually killed by the woman in front of him three or two times.

Such a result immediately subdued everyone. Even Wayne did not expect that his sister was actually so powerful!

"I just said that I'm going to kill another one!" Melissa's golden eyes swept towards another Super Saiyan, Dodoni, and her body suddenly moved forward.

There was a slight fluctuation in the void, and Melissa's athletic figure then appeared above Dodoni.

She clasped her hands. An attack fell to the side of Dodoni.

"Boss..."

With Ovid's lessons learned, Dodoni, the Super Saiyan, was a little flustered and yelled in horror.

With a bang, Felix's figure suddenly appeared and blocked a heavy blow from Melissa in the form of Super Saiyan.

Melissa's body shook, slightly numb at her arm, and the huge reaction force caused her to retreat more than a hundred meters.

"..."

Melissa's face changed, and she finally retreated to Muyang's side.

"Brother, the state of those people just now is the Super Saiyan?" April asked in a whisper as she stood by Muyang's side.

Muyang said, "That's right, that's the Super Saiyan."

"Awesome!"

"These guys, I can defeat them in three or two blows." Melissa rubbed her arm that was a little numb, her attitude was as high as ever, but although her mouth said so, her heart did not dare to be careless at all.

The ordinary Super Saiyan was able to boost his strength 50 times on top of his normal state. However, the transformation mode was very different from her golden pupil state. Still, the energy boost situation was the same unreasonable.

"Wayne, you are not their opponent. Take your people and leave Planet Sala quickly."

At this time, MUYANG glanced at the people on both sides. Although the Saiyans on Wayne's side were powerful in normal combat, they couldn't transform into Super Saiyans. So staying here would only increase their casualties.

Wayne nodded in silence and said, "I know, you have to be careful. These long-tailed Saiyans have a fierce power inside."

"Do not worry, this power of theirs, I understand!"

Wayne then said no more and then led his men to exit towards the distance.

In the whole process, Felix and other ancient Saiyans did not stop, seemingly not bothering at all.

To be honest, a group of guys who could not transform into Super Saiyans, he did not even put in his eyes, but it was the power that Melissa just showed that scared him. —A master who could instantly kill Super Saiyans.

It seems necessary to take a good look at the strength of these people who suddenly appeared in front of him.

Clap clap clap clap-

"I did not expect that there are actually experts like you on top of Planet Sala. However, this lady, the ability used just now seems to be not Super Saiyan Transformation, but the effect is similar. Can you tell me exactly what is going on?"

Felix's expression was courteous, but with his brash appearance, it always felt out of place. "This is the golden pupil state of the 'Legendary Super Saiyan'." While answering the other party's question, MUYANG also carefully looked at Felix.

This Saiyan's leader was burly tall and looked like a Nappa type. If it weren't for the thick hair, MUYANG couldn't imagine what a rugged person like him would look like to become a Super Saiyan.

There was an answer in front of him. It was not particularly handsome, but it was also considered mighty.

Chapter 405

"The Legendary Super Saiyan?"

Felix repeated in a low voice and turned. Suddenly his face showed an incredulous expression, "The Legendary Super Saiyan physique. Could it be the bloodline of that 'Ellipmont' Lord... that is the legendary physique if I can get it..."

At this moment, Felix was no longer calm. He was looking at Melissa's eyes full of greed. The Legendary Super Saiyan was a very scarce resource even in ancient times. If he could get it or breed a new descendant with the help of her, it must be a very valuable resource.

MUYANG revealed a cold aura.

Felix's eyes made him very unhappy. It was naked possessiveness. How dared he tamper with his woman? He was really looking for death.

In an instant, Muiyang had given the death sentence to the opponent.

"Muiyang, I want to kill him!" Melissa narrowed her eyes.

"No, leave him to me. You guys go destroy the remaining Saiyans." Muiyang stopped Melissa and prepared to do it himself.

"Okay!" Melissa smiled sweetly. She turned to the other people at the scene together with April.

This time, Dodoni, who had previously escaped from Melissa's hands, had a cold face and immediately shrank into the crowd.

"April, I will take you to finish off a kill today. If you don't do well, Muiyang will not spare you at night."

Melissa's words made April blush and look at Melissa angrily. This girl didn't know the occasion when she spoke! The little train drove up with a whimper.

Melissa laughed loudly, raised her hand, and rushed into the crowd as if her body had grown wings.

"Be careful. This woman is very powerful." The Saiyan standing in front suddenly shouted, and the Saiyan behind him quickly finished arming.

HUM!

More than two thousand Saiyans with long tails, half of them actually turned into Super Saiyans!

In an instant, the golden ki flames burned, and the sky was dyed golden yellow. These terrifying powers intertwined together like waves of the ocean, and the terrifying power immediately caused the Planet Sala to tremble violently.

"Hahahaha, they have all transformed. Good, good, it's fun to kill like this!"

Melissa shouted loudly and wildly.

Melissa clutched her fists and flung them down from her chest so hard to the sides that the grass-green glow suddenly shone.

"Come on, show me your power!"

The voice was crisp and pleasant but full of madness. —The brutal energy overwhelmed those Super Saiyans at once.

The berserk aura, the icy coldness.

Hearing Muiyang said that even when the Saiyans flourished, Super Saiyans were extremely rare. But now, there were actually more than a thousand Super Saiyans in front of them.

To say the least, when Muiyang saw so many Super Saiyans in front of him, he was also very speechless.

'What is going on?'

'Is this a big sale of Super Saiyan?'

After seeing such a scene in front of him, he always felt that Son Goku and the others had somehow fallen off the price.

"It's not good. This woman is still getting stronger. Hurry back!"

Feeling the aura emanating from Melissa, a slightly weaker Super Saiyan hurriedly shouted.

.....

On the other side of the distant planet, Wayne and the others preparing to leave Planet Sala noticed the situation over there, and their faces turned pale.

"It's so strong, these horrible guys. I feel suffocated even if I get a little closer. It's really like the world is about to end!"

Some Saiyans stopped and incredulously felt the terrifying aura on the other side of the planet, which would really explode out. —Even if it were a High-Level Planet like Planet Sala, it would be a matter of minutes before it faced disintegration.

"Those guys know a strange transformation. Their power level can instantly skyrocket by dozens of times."

"This might be some kind of ancient inheritance!"

Wayne guessed, in fact, was very close to the truth.

"King, Princess Melissa's ki is actually stronger than those monsters." Wayne's guard officer opened his eyes wide in shock, leaning in envy and admiration.

Wayne laughed bitterly.

Yes, this "sister" of his, really extraordinary.

It was up to them to save Planet Sala.

.....

SWISH, SWISH, SWISH!

In the middle of the battlefield, Melissa was like a forest spirit, constantly weaving through the crowd. Nothing could stop her.

BOOM!

The figure abruptly just flashed, the green light crushed over, only to see her arms tremble violently, crackling a series of movements.

The ancient Saiyans had fallen down.

POOF POOF POOF!!!

Numerous lightning penetrated the air and hit the target. In just a moment, hundreds of ancient Saiyans lost their lives at the hands of Melissa.

"Hahahaha, painful... April, you will have to be punished if you don't do it!"

April shouted, "Melissa!"

"Hahahaha, no more, the fight is over!" Melissa's long hair fluttered, and her spirit went into a state of exhilaration.

The "group fight" in front of her was much more interesting than the few people practicing combat. At this time, she suddenly felt a huge breath coming from not far away, and Melissa looked stunned for a moment. Then, her body flashed in the air several times and went towards that breath.

April looked at Melissa speechlessly, ruffled her brown hair, blocking the messy whirlwind in front of her, also joined the battle.

The energy of up to 2.8 billion power level was squandered like a thug.

If they really wanted to fight, April couldn't be an easy mark.

The Infinite Energy Model Androids had more energy!

PENG PENG PENG!

A huge mushroom cloud rose from the ground, almost immediately followed by a slap. So April picked those weaker Saiyans and Super Saiyans. —Because she had more power than the Android 16, ordinary super Saiyan was not really her opponent.

In a time, the two women stirred up Planet Sala.

BANG!

Over here, Melissa's figure was blocked, a Super Saiyan with hair standing up to the sky blocking Melissa's front. —It was a female, with a layer of crystal shining lightning wrapped around her body in addition to her golden aura.

Beep-

Compared to other Super Saiyans, this female Saiyan looked more formidable.

If Muiyang was around, he would have told her that the form was called: Super Saiyan 2!

"Little girl, don't be so arrogant." The female Super Saiyan on the other side said coldly.

"Huh, you're in a different state." Melissa cocked her head and smiled. —Forget it. She didn't care what state her opponent was in, just recognize it as an enemy.

"Hmph!"

The female Super Saiyan on the other side grunted angrily. Facing Melissa's attack, her body twisted slightly. After avoiding Melissa's attack, she continuously grabbed an opening and swung her fist.

A corona of light coalesced at the tip of the fist and then struck down violently.

The speed was so fast that one could not defend against it.

Faced with the powerful attack launched by this female Super Saiyan, Melissa reckoned that she couldn't dodge it, so she simply bowed her body and curled her arms to resist it.

BOOM!!!

The powerful pounding hit Melissa. Even though a lot of the force was removed by the arms, the remaining force was still extremely powerful.

"AHHHHH...."

"TORNADO STORM!!!"

The emerald green light flashed up, and Melissa shouted in her heart as countless tiny inches of mane shone in the sky, converging into a tornado storm.

This powerful force finally suppressed that Super Saiyan 2 level woman.

.....

The gale blew, and the smell of smoke filled the air.

While Melissa, April, and those Super Saiyans were fighting like fire, Muiyang was confronting the ancient Saiyans' leader, Felix.

The two held their breath. No one moved first.

The ki was stagnant to the extreme.

Suddenly, Felix reacted first, already maintaining the Super Saiyan state. His ki began to further enhance.

BOOM!!!

The winding silver lightning suddenly appeared. Then, Felix actually upgraded to Super Saiyan 2 State with a power level of more than 8 billion to make the air stagnant.

'Super Saiyan 2!'

Muiyang muttered in his heart, but his face did not change much.

Ho, Muiyang fully released the ki in his body.

The power level was 4.5 billion!

Knock knock-

The planet shook violently. The riotous energy made the stones levitate out of gravity. The mountains and rocks collapsed, the seawater in the ocean stirred and churned violently, and the waves lapped the shore.

Chapter 406

The hurricane rolled up, lightning in the clouds. The dark and low sky turned up a huge whirlpool as if the next moment would pour from the sky and wash away the whole annoying earthly world.

Muiyang and Super Saiyan Felix were only a dozen meters apart, which was almost negligible for the strongest, and when the momentum brewed to about the same time—

HO!

Two divine awnings quickly flashed, cutting out two dappled trajectories.

The two struck almost simultaneously, colliding in the sky and soon pulling out a distance, colliding continuously, exchanging numerous blows in a flash.

For the combat style of the Dragon Ball World, Muiyang had long been familiar with, and he couldn't be more familiar. So, when he saw Felix rushing towards him, he did not show any weakness and followed up to meet the attack.

With a few fists and kicks, a judgment was made about each other's strengths and weaknesses.

'This Saiyan's base power level is more than 80 million. However, after turning into Super Saiyan 2, the strength is at least 8 billion.'

Muiyang's mind rippled and roughly judged the gap between the two of them. Then, he soberly realized that these ancient Saiyans were different from the Saiyans of Planet Vegeta. They were all familiar with the martial arts!

In front of Felix, he obviously only had a power level of 8 billion, but he had mastered the "Unfettered Instinct" and his strength had reached 4.5 billion, making him felt a little tricky.

This was very scary!

To some extent, the opponent's control of the physical body had also reached a considerable height.

However, he didn't know whether their understanding of the martial arts was the fruit of the civilization originally mastered by the ancient Saiyan Race, or whether it was simply because of the long period of sealing, which gave them time to patiently specialize and belonged to the patent of the strong.

If it was the former, then Muiyang really had to be impressed with the ancient Saiyans, which showed that the Saiyans of Planet Vegeta had also lost their heritage, just like the Saiyans of Planet Sala! —The ancient Saiyans, both the bestial lineage and the rational lineage, surprisingly, were so good!

On the contrary, even if this was not the civilizational achievements of the Saiyan Race, it still impressed Muiyang. After all, as far as he saw just now, there were more than a thousand super Saiyans on the scene.

It was really a rare and big scene!

Muiyang vaguely remembered a saying that the ancient Saiyans were born with a special cell called S cells. The source seemed to be some special individuals. The number of S cells was directly related to whether the Saiyans could become Super Saiyans.

The modern Saiyan S cells in the body had been sporadic, so the power level had been sharply reduced, simply couldn't compare with the ancient Saiyans.

Only after strenuous exercise and emotional stimulation, the modern Saiyan body S cells could proliferate.

The reason why Felix was looking at Melissa's bloodline was perhaps the special S cells within her, and the "Ellipmont" he was talking about might be one of the sources of S cells.

'The older the Saiyan, the closer to the origin of the Super Saiyan.'

'Perhaps in ancient times before, the Super Saiyan was born a very terrifying master. After that, in the iteration of the group, S cells gradually became scarce.'

Muyang launched a roughly reasonable idea.

However, these were not important. After all, no matter what the truth was, the glory of the ancient Saiyan Race belonged to the past, and these Saiyans in front of them were all enemies! So it was natural to treat the enemy, like the autumn wind sweeping leaves, as crisp, cold, and ruthless.

This Felix was undoubtedly a strong person. Facing a Super Saiyan 2 level expert like him, Muyang takes out all the strength.

Although thinking so much, the reality was just a moment of work in the past. Clattered, the figure pierced through the thin air, Muyang straightforwardly attacked towards Felix.

Felix gave a tsk, his fierce eyes rolled, lifted his fist, and swung it towards the front.

BANG!!!

The strong impact made Muyang's body shake. His body unconsciously took a few steps back and only felt his arm tingling.

"Awesome, what a tough body!" Muyang marveled.

"You guy, it's not bad. You can actually reach the level of blasting against me, but unfortunately, it's your misfortune to run into me!" Felix laughed, and then his eyes stared. His body suddenly stepped forward, and...

BOOM!

The hard palm of the golden flame suddenly grabbed the wrist of Muyang. Muyang's heart was tightened, and he swung his wrist to break free from the opponent's restraint. However, Felix's attack was very swift and fierce. A huge force erupted from the palm, directly throwing Muyang out and quickly turning into a black spot in the sky.

"Go die!"

Felix dodged and quickly appeared in the front of Muyang's, holding up an iron fist and smashed down hard.

With a bang, a black shadow fell quickly, and Muyang fell straight down like a cannonball. The next second, Felix reappeared, the corners of his mouth condensed with a cruel smile, and was looking for an opportunity to launch a violent attack.

Seeing this, Muyang hurriedly adjusted his direction and shielded his hands on his chest.

"Humph!"

The silver-white flames of the air suddenly rose. The power from the Acceleration World automatically acted on the surface of the body, blocking the enemy's attack for him, and then moved away from the battle line quickly.

"Where did he escape?" Felix chased after him again.

However, after flying for some distance, Muyang suddenly turned his body around, "Now it's my turn to attack!"

Swoosh!!!

Muyang approached Felix's heels, and a fist containing a huge force was aimed at Felix.

Under the full power of the Unfettered Instinct, the power displayed by Muyang was not much worse than that of Felix's Super Saiyan 2 state.

BANG!

Felix's pupils shrank slightly. Then, he let out a stifled grunt, his face turned white, and a strand of blood spilled out of the corner of his mouth.

"It works!" Muyang's eyes lit up. He took the opportunity to stabilize his body and attacked again.

The two had a back and forth, constantly attacking each other, and for a while, they actually fought to a standstill. —The style of Muyang's combat once belonged to the gentle rain. It was the kind to cherish the use of power, which was completely different from the defeated woman of Melissa.

However, after mastering the Unfettered Instinct, Muyang's fighting style had changed. He also began to open wide, swinging a massive ball of energy with one hand and then backhanded. It was a cannon of ki wave, with a strong kick and a knee strike, which also had a different sense of exhilaration.

This was the battle!

Muyang's whole body and mind stretch, the blood boiling. This moment, his mind stirred, began to understand why Melissa always likes to go crazy in the battle.

The point was that Felix's defense was so high that ordinary attacks on him were just like scratching an itch, not even breaking the skin. Even an expert like Muyang had to attack with all his might.

Fighting, indeed, should be bold. This was the real enjoyment!

Earth martial arts had completed its mission. It was time to integrate into the new martial arts as "nutrients".

.....

At this time, Muyang saw Melissa fighting in the distance. The one who confronted Melissa was a female Super Saiyan, and her status was obviously Super Saiyan 2. In addition, there were also many Super Saiyans on April's side, and there were actually more than a thousand Super Saiyans on the entire Planet Sala.

Although most of these Super Saiyans were the most junior Super Saiyans, reaching the second level of the first stage of Super Saiyan and the Super Saiyan 2 was very few, but the number was too much.

"Super Saiyans are really overflowing...."

Just when Muyang lamented why there were so many Super Saiyans in the ancient Saiyans, suddenly, a bloody and brutal aura was approaching him.

Muyang's heart was fiercely tightened, and his Unfettered Instinct perfectly controlled his physical body. As a result, every force was exerted several times more effectively.

"SKY SPLITTING FIST !"

"HEAVENLY GOD BEAM !"

Muyang and Felix were entangled in a ball when countless fists appeared out of nowhere and quickly blasted out.

One strike!

Two strikes!

Three strikes!

PENG!

PENG!

PENG!

The Unfettered Instinct made Muyang's attack several times more efficient. Every ounce of power was not wasted. The silver ki flames burned. Then, suddenly, the field of vision was filled with unreadable fist shadows and biting wind.

Facing Muyang's attack, Felix actually had a feeling of being suppressed.

"Haha, boy, your skills are not bad, but unfortunately, the energy is too much worse than mine."

Felix's somewhat wretched but emotionless face appeared in front of Muyang's eyes.

To be honest, Felix was also intimidated by the opponent's strength. If he didn't take advantage of the transformation, he really wasn't an opponent.

Felix was thankful.

Fortunately, the Saiyan of Planet Sala had lost the ability to transform into a Super Saiyan. Otherwise, with the opponent's great power, even if he became the most ordinary Super Saiyan, the power could be raised to a terrifying level.

Think about it, 4.5 billion power level, if 50 times more, what a terrible power!

Even Son Goku in the Majin Buu chapter had a normal power level of only tens of millions!

'I must absolutely kill the opponent as soon as possible!' Felix said secretly in his heart.

Muyang coldly snorted. His eyes rolled, once again looked at the distant April and Melissa.

Melissa was facing that Super Saiyan 2 level female Saiyan, showing high emotions throughout. The intensity of the battle made the average Super Saiyan did not dare to approach. In comparison, April was under more pressure because she was facing so many enemies alone.

"April had too many enemies on her side. So even if the energy will not fail, it is inevitable that she will be injured."

After roughly estimating the situation of several parties and judging that April's side needed support, Muyang then tried to find a way to get out. The most convenient way was the Solar-Flare, so he rushed at Felix to make a Solar-Flare.

Muyang temporarily left the battlefield and appeared by April's side.

.....

PUFF!

A fist blasted away a Super Saiyan, and Muiyang ringed April's slender waist and carried her to another place.

April frowned, feeling the familiar scent around her, delicate face revealed a charming smile, "Brother."

A bright smile appeared. Because the clothes on the body were somewhat broken, the snow-white skin was exposed, "These guys let me come together to clean up."

Muiyang nodded a little, estimated that Felix had not regained his sight. For the time being, he must hurry to strike. So, he stretched out his palm and aimed at that one fierce ancient Saiyan.

"DEATH GOD CHAIN!"

Suddenly, the power from the Acceleration World fell from the sky.

Clanking, the void floated with tiny ripples, and white and silver chains pierced out from the void. The ancient Saiyans in front of April were all bound by the silver chains.

"What the hell is this?"

"I can't move my body."

Whether it was Saiyans or Super Saiyans, those whose strength was lower than Muiyang's were all imprisoned in their movements.

The next step was to get rid of these "miscellaneous fish" as soon as possible.

"WIPEOUT!"

A cold and merciless voice sounded, and a mandatory rule came down.

In an instant, the sky changed color, the clouds disappeared, and the gloomy atmosphere was filled with a sense of oppression.

These ancient Saiyans bound by the divine chain were unable to resist at all. In their intense reluctance and struggle, they saw in disbelief that their bodies were being crushed into powder little by little.

Chapter 407

"Damn it!"

"What's with these chains?"

"Help me. My body is disappearing...."

The bizarre scene made everyone go crazy. Those Saiyans who were covered by the wiping power of the Acceleration World had their eyes filled with blood and struggled frantically.

However, the silver chains firmly confined their bodies, and every resistance was futile.

The crystal fragments were like snowflakes scattered. In the desperate gaze, the bodies of these Saiyans from the bottom to the top began to gradually turn into crumbs, and a few seconds later, even the consciousness fell into darkness.

This sudden turn of events scared everyone present.

Run!

Without thinking, the Saiyans near the side of Muyang all chose to escape.

"Do you want to escape? I will not allow."

The cold gaze swept towards those ancient Saiyans. Muyang, who had already tasted the sweetness, naturally would not let them go easily. Snapping his fingers, the void floated and once again descended a silvery chain.

PUFF, PUFF-

Hundreds of more people were trapped by his chains, and then the same trick was repeated to wipe these people from this world.

He knew he was very pressed for time, and when Felix over there recovered, he wouldn't have as much leisure to deal with these people.

The wipe ability could only clean up these opponents whose power level was much lower than his, and an expert like Felix would have no effect.

"What the hell is that ability?"

"A lot of people died somehow. Is it an ability developed by modern-day Saiyans?"

"If he uses it again, we can't resist."

"Run away, run away!"

Those Saiyans who were lucky enough not to be covered in the divine power of the Acceleration World were already fearful at this moment and were all frightened by the bizarre ability displayed by Muyang. They withdrew backward for thousands of meters. After keeping a certain distance from each other, they looked at Muyang again with fear in their eyes.

With a few cleanups, Muyang disposed of at least five hundred ancient Saiyans, including some powerful Super Saiyans.

Even the female Super Saiyan who fought with Melissa could not help but look sideways. Therefore, the movements of the hands were slowed down, at which Melissa laughed heatedly and attacked more fiercely with her superpower.

"You're so confident that you're fighting me and looking around!" Melissa's hair rose, and a shockwave that could easily pierce the planet was thrown out.

"Get lost!"

The female Saiyan on the other side roared, hastily blocking Melissa's attack, and then looked at Melissa viciously, with a grim look on her face. Then, suddenly, the ki rolled up, and the silver lightning around her body crackled and slapped.

This Super Saiyan 2 stage female Saiyan is called Millif. She was a powerful Saiyan, second only to Felix. In ancient times, countless Planet Sala Saiyans died in her hands. She was a ruthless and bestial Saiyan.

"What is it about this form of yours? It looks so good. It's not like an ordinary Super Saiyan!"
Melissa curiously surveyed the other form. Why did it feel like there was more and more lightning?

The female Saiyan, Millif, did not answer her words.

Melissa felt bored and muttered, "It doesn't matter if you don't tell me. I feel like I'm not far from the Super Saiyan state."

"....."

Millif: 'Not far from your head. You were already more powerful than most Super Saiyans with this strength!'

Seeing Millif did not speak, Melissa narrowed her eyes. Then, her onion-white fingers tore open the air and instantly came to Millif's side.

Because of the breakneck speed, the air partially turned into a vacuum.

There was a boom, accompanied by a sound explosion.

An attack was struck out, targeting the face of Millif.

As Melissa said, she had reached the third level of the Golden Eyes state for a long time and had vaguely touched a higher state level.

"What a speed."

The opposite Millif's pupils shrunk into a small black dot. If she was smashed by this attack, it was hard to say whether she was seriously injured, and that pretty face was definitely going to be ruined.

This woman with golden eyes was a vicious fighter!

In an emergency, the power of Super Saiyan 2 suddenly erupted. The body was tilted to the side, and the palm of the hand traced an arcing trajectory, grabbing Melissa's arm as her attack fell.

Using this as a fulcrum to adjust the angle of her body, Millif struck Melissa's chest with an attack containing terrifying power.

BOOOMM!

The powerful impact almost caused the heart to stop, and Melissa's face turned white. She felt the tightness in her chest, and along with the scattered blood splashing out, Melissa laughed madly.

The silver bell-like laughter echoed in the void, surprisingly unafraid of injury, rushed towards Millif.

"Come on. Wound for wound. I love to spar with others blood baths." Melissa smirked.

The Legendary Super Saiyan could withstand the most attacks, and her resistance to blows was excellent. But Melissa had Senzu Beans to restore her strength at any time, so she was most unafraid of exchanging injuries for injuries.

"Crazy!!!"

Millif was furious, waving her fists against the other side.

.....

While Melissa was fighting fiercely with Super Saiyan Millif, Muiyang was still exercising his wiping ability. —Endless majestic energy was falling from the sky wherever his eyes passed.

In just a few seconds, more than half of the ancient Saiyans had died in his hands.

Scanning the situation on Melissa's side, Muiyang smiled, "Melissa seems to be playing like crazy."

Although he could appreciate the kind of enthusiasm that Melissa enjoyed fighting with, but being so mad, he still couldn't imagine.

"Isn't that her character? I have never understood why the Saiyans are so warlike. Is it simply because of being a fighting people?" April stood by Muiyang's side. From time to time, sent a few attacks to kill a little weak Saiyans.

"Maybe it is influenced by the genes in the body." Muiyang incidentally hit a ki wave to help April to destroy the Saiyans close.

Because the previous melee damaged her clothes, April's current appearance can be described as beautiful.

Fighting with such a beautiful woman, the mood also became pleasant.

"Huh?"

Suddenly, Muiyang raised his head and looked in a direction.

"Senior brother, what's wrong?"

"....."

Muiyang did not answer, both eyes gazing.

At this time, April also felt a powerful force was rapidly approaching. It was a dark blue energy light pillar.

SWOOSH

When the energy light pillar was close, Muiyang fiercely pushed April away and opened the Acceleration World to take in all the energy.

The efficacy of the Solar-Flare passed, and Muiyang let out a secret sigh in his heart.

After a period of blindness, Felix's eyesight had recovered.

"April, the rest of the Saiyans are in your hands. I'll go and lure the other side away." Muiyang stroked April's head.

Some of the more powerful Super Saiyans had been all taken care of by him. Although the remaining ancient Saiyans were also very strong, they could no longer threaten her.

"Senior brother, you have to be careful," April said with concern.

"Don't worry!" Muiyang showed a bright smile, then his face straightened and launched an Instant Transmission towards Felix's side, blocking him tens of kilometers away.

.....

Dozens of kilometers away, more than a hundred meters above the ground, high in the air, MUYANG blocked in front of Felix.

"Let's continue the battle we just had."

"Abominable brats, using some despicable skills! Ah, my brothers!"

Felix's anger boomed. His whole body muscles were knotted, a sinew was exposed. He had sensed that in the very short time he was blinded, most of his own brothers had actually been lost, which taught him to be furious and furious.

This was probably the last remaining clan member of the team he led.

The ancient war killed most of them, and several tens of thousands of them were sealed up by Beiyalian. Although the world in the seal was isolated from the outside world, the long years still consumed a large number of brothers. Thus, when the seal was broken, several tens of thousands of Saiyans were left with only two thousand people.

Now, actually slaughtered nearly half again!

"ROAR!!!"

Felix roared in anger. The anger stirred up the energy in his body, his golden hair stood straight up, and his aura rose again.

Seeing this, MUYANG's face instantly darkened. Previously, Felix's power level was about 8 billion, but now it was close to 10 billion. Such a huge gap, plus Felix's control of power, was not bad in the first place. Even the Unfettered Instinct could hardly make up for it.

"Damn, this guy is just like the original Son Gohan. His power has skyrocketed."

RUMBLE!

The sky changed, the continental plates broke, and terrifying energy swept through the entire planet in an instant.

.....

At this time, whether it was MUYANG or MELISSA, APRIL, were shocked by this power.

"It's so powerful," MELISSA said in shock.

"....." APRIL also felt a chill.

'Such a powerful aura, could senior brother be able to resist it?'

.....

SHOO SHOO SHOO!

The awe-inspiring electric ki blasted through the air. Felix's ki had turned into a solid. The crystalline wave of aura cut through the ground, directly shoveling an arc of craters on the ground.

Felix landed on the ground, step by step, towards MUYANG. With every step, a collapse appeared on the ground. By the time it reached MUYANG, thousands of meters in circumference had been crushed by the chaotic qi.

Ho, Muiyang step away, with one hand against his forehead. The upper half of his combat suit could not withstand the impact of the powerful energy and shattered into strips of cloth...

"DIE!"

Felix came forward with a bang, and his violent power seemed to have found an outlet, like a huge wave hitting the shore, which suddenly swept up hundreds of meters of waves.

In the face of Felix's tyrannical attack, Muiyang's heart chilled. He hurriedly harnessed his power to fight back, but to no avail, Felix laughed fiercely and attacked with his chaotic force.

The difference in power between the two sides could have resulted in a second kill. However, because Muiyang had comprehended the Unfettered Instinct, the gap between the two sides was reduced.

However, the gap was still a gap. Even if Felix was in a state of rage and could not bring out his peak power level, he was still a cut above Muiyang.

BOOM!!!

The thunder power was released, and the huge force hit Muiyang's chest.

POOF!

Muiyang's face turned white, a mouthful of hot blood spurted out from his mouth. His body, however, like a cannonball that had just been bored out, fiercely bounced backward, at once cutting a silver-white light in the sky.

Chapter 408

"Senior brother!"

April let out a cry of surprise. She saw a beam of silver meteors cutting through the sky and fixed her eyes to see that it was Muiyang, who had just met Felix and gone away, flying back again, but was beaten back!

Her eyes widened slightly, she hurriedly went forward and prepared to catch Muiyang. However, Felix won a move. He was unwilling to let go of the opportunity to kill Muiyang easily, so he pursued the attack and removed the grass to eliminate future problems.

"April, get out of the way."

The first thing that happened was that the person who was in charge of the situation was already in charge of the situation.

BOOM~~

The silver light burst out, the mountains and rivers shattered.

Facing Felix's iron fist, Muiyang made a split-second decision and poured all his strength into his arm, then a near-blazing white light covered the tip of his fist and swung out with force.

BANG!

The energy burst out in a flash.

It was unstoppable, the turbulence in the sky, the wind and clouds converged, the powerful pressure came down, and the ground spread out with countless cracks. And countless cracks were spreading on the ground, a few hundred kilometers short. But, the long above 1,000 kilometers, the gullies were jagged for a while, and they were still increasing...

April was also blown away by the turbulence for some distance. When she reacted, looking around, where was the trace of Muyang and Felix?

At this time, Muyang and Felix went to fight somewhere else.

April opened her mouth and wanted to go after them but thought better of it and gave up the plan. She intervened at this time, not to mention whether she would be beaten as a sandbag, but also very likely to pull Muyang's legs.

The sanity told her that she should not intervene in a battle of this level.

At this time, the other Saiyans had gathered towards her. April was feeling stifled in her heart, and when she saw the "meat" delivered to her door, her face was fierce, and a fierce light flashed.

.....

In the sky, Muyang flew at a speed that was not too fast or too slow, and when Felix caught up, he steeply increased his speed.

"Humph, let's see where you run!" With a ferocious cold smile on his face, Felix directly stepped forward quickly. With a flash of his figure, he suddenly appeared beside Muyang in an instant.

The two maintained an almost parallel trajectory in the high-altitude glide. Then, Felix raised his palm high. A purple ball of energy suddenly shone dazzling light with a tyrannical aura, making Muyang's pupils shrink.

In fact, in the collision just now, Muyang was eating some secret loss.

In the experts' duel, victory and defeat often lied in the millimeter. Some subtle differences could lead to a total loss.

If you fight with strength, it was obvious that Felix had the advantage.

At this point, even if he had mastered the Unfettered Instinct, he could not bring any change.

The Unfettered Instinct allowed him to maneuver around his opponent in a situation where the difference in strength was overwhelming and to significantly increase the use of power. However, an overly hard-hitting energy blast could be withstood for a short period of time. Yet, over time, it was never his forte.

One must take the initiative to attack and create opportunities.

Muyang understood this, but right now, he couldn't be careless.

"GO TO HELL!"

Felix roared loudly, throwing out the energy ball in his hand.

Faced with Felix's attack, Muyang's mind flashed instantly. He gritted his teeth and suddenly made a ninety-degree reversal of his body. The side reversal happened to let the purple energy ball pass by his side. It landed on the ground in the distance and stirred up a massive mushroom cloud.

However, Muiyang did not have time to breathe a sigh of relief. Another new crisis came when he saw Felix close to his side. His arm was raised above his head, and with a bang, Felix punched Muiyang's body.

BOOM!

The force of 10,000 pounds exploded in an instant, Muiyang grunted, his body fell straight down, looking like it was about to hit the ground.

On the ground, which was breaking up everywhere like the end of the world, Felix laughed. His body suddenly appeared, and then his hands gathered, releasing qigong waves towards Muiyang, who was falling in the sky.

"BURSTING BIG SHOCK!"

The heavenly pillar-like shock wave rose from the ground, like a dragon emerging from the abyss, such as a trapped dragon ascending to the sky, carrying an endless and violent power in the wrapping of silver lightning.

This energy shock wave was thrown by Felix with anger, containing enough power to destroy the world. Even if it slightly grazed the planet's surface, it could turn the entire Planet Sala into dust in the universe.

"Damned inferior Saiyan, go to the Other-World and bury a few of my brothers!"

"GO DIE!!!"

The atmosphere accumulates and rolls, and the powerful energy roars like a pale dragon, carrying a thick atmosphere and throwing it deep into the universe.

Looking from afar, even the firmament was blown a hole.

"Shit!"

The attack was not an ordinary shock wave, and Muiyang's heart broke out in a cold sweat. He knew it was absolutely impossible for him to receive this attack with his own strength. However, Felix had already locked him up at this time. Therefore, there was no possibility of evasion.

In the nick of time, Muiyang protected his body with both arms, and the power of the Acceleration World formed a protective film on the surface of his body.

At the same time, his hands were in the shape of claws, releasing all the energy he could!

"HEAVENLY GOD BEAM!!!"

The white pillar of light was released, and in the air, it collided with the energy of Felix carrying lightning.

RUMBLE!!!

In an instant, the world changed color.

The white light enveloped the entire land, and the air emitted a violent humming sound. Muiyang's Heavenly God Beam was, in the end, no match for the opponent's shockwave, and abruptly, it had been engulfed by a large mass of terrifying energy.

If one stood outside the planet, one could see the surface of Planet Sala suddenly shone a huge spot of light, where the shock wave passed. All the mountains, rivers, broken, countless trees, and branches were cut off across the waist, instantly turned into pieces, or scattered in all directions.

There was nothing between the world, and a deep vacuum suddenly appeared...

"Hmph, subjected to such an attack, even when I was fighting Planet Sala royal family, I could not resist. That guy must have died." Felix felt something and tilted his head and laughed.

Although the man in front of him was quite powerful and was able to fight with him for so long, in the end, he was more powerful.

The opponent was judged to be dead, and Felix was in a happy mood.

.....

On the other hand, April's hand raised her sword, killing a wailing in front of her. However, she just killed a few Super Saiyans and was radiated by the shock wave coming from MUYANG's side. The body rolled fiercely in the sky continuously. After stabilizing her body, she suddenly froze but no longer sensed the breath of MUYANG.

"No, senior brother will be fine."

April's phoenix eyes opened, angrily roared.

With a swish, endless energy was squandered. In front of this megalomaniac, the ancient Saiyans who were closer suffered at once and were all killed by her.

Melissa, who was tangling with the female Saiyan, noticed the situation on the other side and tried to rush forward with bloodshot eyes. However, Millif did not relent and blocked her way.

"GET OUT OF THE WAY!!!" Melissa roared in anger.

Unfazed, Millif sneered, "Little girl, you're not going to fly past my eyes."

"THEN I'LL KILL YOU FIRST!"

Melissa, cold as frost, looked at Millif. This time, she did not care about anything. She shouted out loud, endless energy bullets waved her hand and hit wildly, Millif was shocked. She didn't expect the opponent actually to have so much energy.

"Worthy of the 'Legendary Super Saiyan', your body must contain that 'Ellipmont' Lord's bloodline. If we can study thoroughly, our strength may be further enhanced." Millif looked at Melissa in surprise, as if she measured a treasure.

Super Saiyan 2 power was absolutely unbelievably powerful. Each Super Saiyan 2 had a minimum of 5 billion power levels! Super Saiyan, who had a little lower base power level!, due to the lack of heritage, the accumulation is not enough, basically hovering in Super Saiyan 1, simply couldn't become Super Saiyan 2.

The ancient Saiyans, like Millif, who did not know that Super Saiyan 2 existed above Super Saiyan 3, thought of improving themselves by the "Legendary Super Saiyan" bloodline and raising their bloodline level when she saw Melissa.

So when she saw Melissa, she saw the hope of a breakthrough.

"Are you going to dissect me?" Melissa became even angrier.

"Why would you be dissected? At most, you will be raised to draw a few tubes of blood. You are an important resource. We can not afford to kill you. You see, there are many male Saiyans here, enough for you to breed excellent offspring."

How could they want to take her back to be a sow!

This was unbearable!

Melissa felt her anger was already so high that the top of her head was about to burn!

"I can't stand it anymore!!!"

If her husband died, he could be revived with the Dragon Ball, but it would be unacceptable if she wanted to spoil her.

She, Melissa, was a woman who kept her womanhood.

At this time, the grass-green light on Melissa's body suddenly released in large quantities. The dense "energy beads" intersected in the sky. The terrifying energy gradually formed a dense and impenetrable net. It then erupted into a giant explosion that was enough to destroy the world.

At this time, Melissa's black hair alternates between black and gold. Her body was undergoing a huge change, and her aura was rising.

Melissa's sudden change scared the people next to her.

Millif said in amazement:, "What's going on? Is this little girl going to become a Super Saiyan?"

Frankly speaking, Melissa's previous Golden Eyes state was rather peculiar, saying that it was a Super Saiyan, but the hair and eye color were wrong. However, her previous energy growth was no different from that of Super Saiyans!

One could only think of it as a transition between the Saiyans and the "Legendary Super Saiyans".

At this moment, Melissa, who was in a rage, was finally going to advance.

"Damn it. We must not let her really transform!"

Thinking of the powerful energy increase brought about by the transformation into a Super Saiyan, Millif felt uneasy.

Coldly shouted, the palm of her hand in the void to draw an arc, and then dense energy rays from different angles scattered towards Melissa.

But at this time, the power that Melissa showed has gradually exceeded her energy range. All the attacks fell in front of Melissa. It was as if a wall of air was blocked, all dissipated in the surface.

"How can this be?" Millif panicked.

'Even the Super Saiyan 2 level energy attack had no effect.'

'What kind of monster is the Legendary Super Saiyan....!'

In the central position, the aura on Melissa's body became denser and denser. The golden light and the grass-green light were shining one after another. Her black hair raised high. Silver-white lightning crackled and flickered.

BOOM!!!

The needle of the scales finally tipped to one side.

The golden-colored ki flames rose to the sky, and a majestic and vast aura instantly enveloped the entire planet Sara.

"Millif, what's wrong with this woman?" Felix was startled by the sudden rise of energy and hurriedly asked Millif.

Millif glutinously said, "Chief, she may.... be about to awaken the power of the 'Legendary Super Saiyan'."

"Useless thing, how come you haven't killed her after so long?!" Felix stared hard at Millif, and his eyes turned to the energy encased Melissa.

"This is"

There was a natural sense of oppression rising from the soul. However, it was not the oppression of the aura but the innate bloodline oppression.

Feeling the increasingly powerful spiritual oppression, Felix's complexion changed dramatically, "What are you waiting for? Hurry up and stop her!"

Once the legendary Super Saiyan awakens, it was no joke. —It was said that in ancient times there had been several incidents of the Legendary Super Saiyan awakening, and each of them had led to a great disaster.

"You are already too late!"

A cold voice came, followed by a sturdy figure who appeared in front of Felix and Millif.

Muyang had appeared once again.

Felix looked at Muyang incredulously and yelled, "How come you're not dead yet? My shockwave had clearly engulfed you!"

Muyang smiled smilingly, "My luck is good. You didn't kill me."

As Muyang said, his luck was good. In fact, the moment he was engulfed by the energy, Muyang also thought he was dead, and when he closed his eyes and opened them, he might have had someone summon him back to Earth with the Dragon Balls. —Of course, there was also the possibility of topping a circle of light in the heavens for a while.

But what Muyang did not expect was that the stone carving presented by the Yardratian elders came into play at this time.

In the nick of time, the stone carving actually formed a small circle of space around his body, temporarily blocking the devouring of those energies. Muyang took advantage of this brief gap to open the channel of the Acceleration World. Along with it, part of Felix's energy also turned into nutrients for the Acceleration World, allowing Muyang's strength to be further enhanced.

The stone carving, after completing its mission, completely turned into powder.

He didn't know if having April pour energy into the Acceleration World regularly in the future would speed up the growth of the Acceleration World.

"Hmph, even if I didn't kill you last time, I can kill you again." Felix's cold face looked distinctly fierce.

"I said, you no longer have a chance."

A smile appeared on Muyang's handsome face, and a pair of eyes filled with divine light looked behind Felix, where Melissa had already completed her final transformation.

CRACKLING!

The silver lightning flashes, Melissa's current form was like Super Saiyan 2. Her whole body was burning with a blazing flame, the original black and soft hair emitted a golden glow, a few bunches of hair on the forehead stood upwards, only the bangs and hair at the temples fluttered naturally.

With long hair and eyebrows, all showing a golden luster, the only difference was the pair of divine pupils, which were golden yellow.

The Legendary Super Saiyan!

Amid the golden aura, the young girl's delicate figure stood, full of oppression. She opened her eyes, and her golden pupils were cold and piercing, full of coldness.

"Is this the real form of the 'Legendary Super Saiyan'?" Felix muttered.

In the moment of seeing Melissa, he was like seeing a goddess who had descended to the mortal world, and every move was graceful and noble.

"How does the body feel different from before?" Muyang transmitted his voice towards Melissa.

"Great, my power has increased by a large margin, about 120 times increase."

The corner of Melissa's mouth turned up slightly, revealing a beautiful arc. Then, a little bit of emptiness, the bottom of her feet suddenly generated wisps of air whirl, shaking a little bit through Felix and Millif, and came to the side of Muyang.

'The 120 times increase in the base power level of Melissa makes her strength exceed 10 billion.'

'Tsk, worthy of the Legendary Super Saiyan, the effect of the transformation was extraordinary.'

Be aware that the general Super Saiyan 2 power increase was only 100 times; Melissa was just a normal transformation, which was a flight of fancy.

In fact, Muyang also knew that there was another transformation above the blonde state of the transmission Super Saiyan, that was the grass green hair form.

That was the absolute terror.

His wife actually surpassed himself in terms of strength, which was really a shame for him to say!

"Muyang, let's join forces to kill these long-tailed Saiyans." Melissa wrinkled her nose fiercely.

"Okay!" Muyang nodded approvingly.

Although his strength wasn't as strong as Felix's, he could still tangle with the assistance of the Unfettered Instinct. With Melissa's words, the battle was basically won.

"Big talk, do you really think that with the awakening of the ancient bloodline, the world is invincible??!" Felix's grim face, the corners of his mouth twitched.

But to be honest, Felix had been a bit panicked; admittedly, their power level was not bad. However, a man and a woman in front of them were too odd. The woman was the Legendary Super Saiyan. He never understood the man, so don't force a Super Saiyan to come out again.

"Millif, you go up first and try."

"Chief!" Millif called out in dismay.

"Go now!"

"Yes"

Millif's face was a little white, clenching her fist. —At least she was a Super Saiyan 2. However, it was still horrifying to fight for your life.

But the next second, there was a bang, and Melissa appeared without the slightest sign in front of Millif's body, containing a fist of frenetic energy forward, and violently erupted 10,000 radiant blinding light.

The flames on Millif's body suddenly scattered, and a mouthful of blood spurted out violently.

Melissa frowned slightly, haunted with brilliant colored light of the fist again blasted at Millif. Then, with a bang, as if instantly lost all energy, Millif's body, like a broken kite, flew backward and then slapped back by Melissa.

At this time, when Muyang saw Millif's body flying towards the ground, suddenly as if he thought of something, with a thought, he arranged a spatial tunnel in front of Millif's flight and absorbed her into the Acceleration World.

Melissa looked at Muyang strangely and asked, "What are you doing with her?"

Muyang said, "What the hell are you talking about? I'm thinking of you; that woman is considered a Super Saiyan with better natural talent. Study it well. It might be good for you in the future."

"Ha, I'm a Legendary Super Saiyan. So why do I need to study them?" Melissa disdained.

"You are not a wild Saiyan. So how do you know that there is no benefit to study them..."

Muyang looked at Melissa. The Legendary Super Saiyan would probably have reached the top when he was promoted to the grass-green hair form in the future. However, when he wanted to let Melissa comprehend the realm of ascension to God, Muyang thought this hope was not very big.

He remembered that the long-tailed Saiyan of Planet Vegeta Star had a more powerful Super Saiyan 3 and a more powerful Super 4 form, which was not worse than the God realm, so it would be best to give it a try to Melissa.

Super Saiyan 4 with the "Legendary Super Saiyan", was extremely powerful.

Of course, it was too early to think about this. The first task now was to finish off the ancient Saiyans on Planet Sala!

BOOM!

Muyang and Melissa were connected in mind and reacted at the same time. They saw two bright rays of light traversing the sky and rushing together towards Felix on the side.

Felix's face was gloomy and blackened, looking hideously at the two people rushing towards him and exploding all his energy in anger.

PENG! PENG! PENG!

They fought extremely fast, and the brief contact immediately erupted into a fierce battle.

The battle power of Melissa was no less than that of Felix's full-blown state, with the characteristics of the Super Saiyan. The more courageous the battle, it was not difficult to suppress Felix. With the assistance of Myyang on the side, the end was already predetermined when Melissa broke through.

.....

Beyond the planet, a ship docked in a distant fixed orbit.

The impact of the battle above Planet Sala had affected space.

"Princess Melissa's energy has been enhanced again. I'm afraid her battle power has exceeded 10 billion. Oh my, it's just too shocking."

"Yeah, it's too strong," Wayne said in horror.

His power level was considered stronger in Planet Sala, but only 40 million power level. Compared to his sister's 10 billion, it was like the difference between clouds and mud.

"King, the battle above the planet is getting stronger and stronger. I'm afraid that Planet Sala can't support for long."

Wayne waved his hand and said, "I don't care what happens to the planet now, as long as Melissa and the others can win."

"Yes, the planet can be rebuilt without it, as long as the enemy can be destroyed."

"Princess Melissa is so strong. She will surely win."

Everyone was talking, looking enthusiastic.

Chapter 409

When Wayne and other Saiyans of Planet Sala were looking at the scene of the distant planet, the situation on the battlefield was changing rapidly.

The ancient Saiyans, who previously held a huge advantage, were instantly overwhelmed by Melissa. She had transformed into the "Legendary Super Saiyan" and they fell into a disadvantage.

At this time, Melissa's long hair fluttered, constantly shuttling around Felix, with Muyang's attack. The two suppression let this proud ancient Saiyan suffer. Felix finally experienced the fear of the Legendary Super Saiyan, worthy of the bloodline closest to the origin of the Saiyan.

What attack had no effect, what resistance was futile.

Such innate suppression, whether mental or physical, gave Felix a sense of powerlessness when an inferior meets a superior, completely unable to make an effort.

"The power of the Legendary Super Saiyan has increased so much all of a sudden after the transformation. It's too terrible." Felix greatly regretted it.

It turned out that the biggest threat among these people was this woman. He should have taken action early and killed her instead of tangling with that man.

Now it was too late to think about everything.

.....

In the distance, April saw Muiyang's body safe and sound, finally was relieved. She then looked at Melissa with a powerful, heroic look. She beamed with envy. Her little heart also fluttered and exerted more effort to push the body's power. Then the infinite perpetual motion machine ran wildly.

"He just made me worried to death... So, now you all have to pay for it."

April's beautiful figure flew in the air, and her power rose another layer. The power of the attack became even more powerful.

If her senior brother died just now, what should she do? Should she be widowed after a few years of marriage! She was not willing to.

At this time, the more April thought about it, the angrier she got.

BOOM!

A fist pierced the air; scattered space seemed to shatter like a mirror, radiating out sinuous crystal cracks.

April was usually gentle, but now the little bird launched a ruthless. Not worse than Melissa!

"Run, this woman is too powerful."

"She's not a Saiyan but seems to have inexhaustible power."

The Saiyans who had fought with April earlier were having a nervous breakdown.

April didn't know how much energy she had squandered since the beginning of the battle. But, more and more Saiyans died in her hands, and there were few Saiyans left.

This was too terrifying. Even the Saiyans, who boast of being the top warrior race in the universe, did not have this lasting power.

"RUN!!!"

The surrounding ancient Saiyans immediately lost the courage to fight on. They flashed away like birds and beasts, but April would not allow them to escape. April quickly dashed into the void, stopping these Saiyans.

The harsh, vicious attacks came again.

A corpse fell from the sky.

Of course, those who were able to keep a corpse were lucky. Many of them did not even leave a piece of flesh.

.....

Seeing his men die one by one at the hands of the other side, Felix was so angry that he was going to vomit blood, "Damn it! How could this happen?"

Felix's face was bitter, and he wanted to slap himself twice. He should have said less nonsense when he first came and just killed the opponent directly. Alas, he was too proud of his strength.

All the Saiyans were a virtue, and they started to be unruly when they got the power.

At this time, Felix tasted bitterness in the hands of Melissa and Muiyang. His face was pale, and he started panting violently.

Poof!

A stream of blood spurted out of his mouth. Although he's still maintaining the state of Super Saiyan 2, his energy was getting shriveled up.

"No, I can't die on top of this tiny planet."

With two eyes like vipers looking toward Melissa and Muiyang, Felix bit the tip of his tongue, and a thousand possibilities flashed through his mind.

'Escape!'

This mortifying thought flashed through his brain, and escape seemed to be his only option for now. It was a shame that Super Saiyan 2 had to choose to run away.

Felix's face was blue, his clenched fists trembled. He would remember today's shame in his heart.

Felix thought he was outmatched and had to find a way back for himself. He chose to retreat temporarily. His eyes were constantly looking around, looking for equipment that could be used as a spaceship.

"There it is!"

Felix's face burst in surprise, and he found a place similar to the terminal.

Felix's action soon attracted the attention of Muiyang. He waved his hand, and...

BOOM!!

Planet Sala's technological equipment was destroyed beyond recognition.

Felix's face was suddenly black for a while, coldly grunted, and quickly left to look for the next target. With a cold grunt, he quickly went in search of his next target.

However, every time a spaceship was on the ground, Muiyang would destroy it, not giving Felix any chance to leave the planet.

"Today, you are not going to leave from the top of this planet."

Melissa was much more straightforward and was only responsible for doing her best to block Felix. The calm voice fell into Felix's ears like a demon's whisper.

"The battle is about to end."

Muiyang raised his head, swallowed senzu bean in front of Felix.

OOH OOH OOH!

The silver-white ki flames became brighter, and his ki was a few points more potent than before.

"You..."

Felix's eyes stared straight for a moment, facing such an opponent, he suddenly felt the terror in his heart. Had he known this, he might as well continue to stay inside the seal for a few more years.

"I won't let you guys feel better even if I die."

With a cloudy face, Felix's body muscles quickly had to bulge. The taut muscles were about to split open.

The more struggling resistance in a desperate situation, the more likely it would explode into stronger energy.

When Muyang saw this, his face changed dramatically. He took Melissa's hand and was ready to leave, "Not good. If this energy explodes, Planet Sala will perish along with it."

Muyang saw April in the distance. He gritted his teeth and stomped his foot. Muyang performed Instant Transmission and flew to April's side.

"Hey hey hey, it's too late, follow me to hell!"

Felix's eyes trembled, frantically releasing the energy in his body. In an instant, it was like a great sun rising from the ground, and the violent power instantly swept across the entire Planet Sala.

At this time, space seemed to be torn apart...

.....

April shrank to protect herself when a warm arm reached across her waist and wrapped her in her arms.

"Brother!" April whimpered.

"I'll open the Acceleration World right now." Muyang clenched his teeth.

The three of them combined their efforts to resist the sweep of the spatial storm. At this time, the Instant Transmission was disturbed by the powerful energy and lost its positioning function, so Muyang had to try to see if he could open the channel of the Acceleration World.

Suddenly, with a boom, a piece of mirror-like block structure slipped from the void. Muyang's heart trembled as the spatial storm swept up and engulfed the three of them directly, and then they saw a scene of light...

.....

The outer space of Planet Sala.

The ship where Wayne was, detected a terrifying energy reaction that exceeded the upper limit, and the ship detected a sharp distortion of space.

BOOM!

A great sun suddenly rose above Planet Sala, followed by a ripple of space that swept through the planetary system and several planets of different shapes, including the sun. It was as if they were on the surface of the sea, rising and falling.

"The energy response in the direction of Planet Sala exceeded the upper limit."

"Sharp distortion of space is detected, space data is rising, a round of space storm is approaching."

"How can this happen?" Wayne asked aloud.

"Planet Sala is located right on the filamentary node of the 'cosmic web', the space structure here is weaker compared to other places, and may not be able to withstand such a huge energy impact."

The universe supposedly consists of a vast "cosmic web" of galaxies strung together in a filamentary or tendril-like pattern. On a large scale, each piece of the web was like a neural network of the universe. Between the filamentary nodes and the nodes, there must be many vulnerable places.

The planetary system where Planet Sala was located was probably on such a structure.

Wayne stagnated for a moment. He didn't know what to say.

When the storm passed, Wayne looked again at the location of Planet Sala. The third orbit of the star disappeared and was replaced by broken space cracks.

The entire Planet Sala disappeared...

Chapter 410

In the middle of a black and white channel, all kinds of crystal fragments were flying around, looking like a sea of stars from afar.

This was the place where the void was broken. Although it was still located in Universe 7, it was as if it was in an illusionary world, where it was impossible to distinguish where was before and where was after. The concept of space seemed invalid, and the strong wind swept up the crystal fragments. Everything was so light and strange.

At this time, Muyang fell into this bizarre place with Melissa and April in his left and right arms. The wind blew the hem of his clothes with a rustling sound, and the three of them made a joint effort to maintain the balance of their bodies in this area.

"Senior brother, what is this place?"

April curled up in Muyang's arms. Her blue eyes surveyed the surrounding scenery. The surrounding points of light seemed like a shining star, but the colour was unknown, and even the borders were blurred.

"It is not clear. Felix's self-explosion destroyed the whole Planet Sala, we are probably in the middle of a sub-dimensional layer." Muyang's gaze was fixed, and the divine power in his body probed out along the fault layer a little. However, it soon seemed to meet a barrier and was bounced back.

Universe 7 had countless small spaces and subspaces, God-World, Heaven, and Hell had countless spaces. Countless subspaces existed between these spatial and space, making up for the lack of emptiness as if they were fillers, glueing the various worlds together.

To get out from here, one needed to break several sub-dimensions.

"So what now, we won't be able to get out, right?"

"Don't think blindly, the boat will come to the bridge, there is always a way." Muiyang patted Melissa's head, "Do you want to stay in the Acceleration World for a while. My Acceleration World is not affected."

"Hey, hey, then what are you waiting for, hurry up and get in."

Melissa shouted happily, and the golden glow on her body gradually disappeared, maintaining the form of the Legendary Super Saiyan for a long time. This time the energy finally began to fail.

"You guys wait a minute." Muiyang nodded, silently opened the channel of the Acceleration World.

At once, a brilliant and flawless colourful light rose in the air, the brilliant colours reflected in the surrounding black and white lonely environment, as dazzling as fireworks.

The void was steeply filled with fine waves, and Muiyang, Melissa, and April instantly crossed into the channel amidst the chaotic waves of energy.

Swoosh!

After Muiyang and the others entered, the colourful light suddenly disappeared. The surrounding background once again turned into a deep, dead black and white.

.....

In the Acceleration World, the vast and spacious starry sky came into view. Three huge Super Dragon Balls stabilized in the void, looking as if they were only the size of small marbles in the entire spatial background.

The turquoise blue Planet Wudao was filled with white clouds and a pleasant climate.

The female Super Saiyan, Millif, had entered the Acceleration World for a long time. However, because of the time stand still, she had been unaware of what was happening until Muiyang and the others entered, and the time flow resumed.

"What is this place?" Millif's face was pale as she covered her injury.

At this moment, one of her cheeks was slightly swollen, and a few drops of blood spilt out of the corner of her mouth.

"Welcome to my Acceleration World, this is Planet Wudao."

A warm voice rang out in Millif's ears, and then the figures of a man and two women emerged from the void.

"How did I get here. Ah, it's you woman.... I'm going to kill you!"

When Millif saw Melissa, she instantly recalled the battle on Planet Sala. Her pale face was even more bloodless, and her colourful face yelled at Melissa, ignoring her body's injuries to attack them.

"If you don't know any better, why don't we just finish you off?" Melissa's eyes glared with a murderous aura.

Snap!

Muiyang snapped his fingers at that moment, and at once, the power of the Acceleration World worked, imprisoning Millif in the air, while Muiyang also stopped Melissa's killing action.

"Muyang, why did you lock me up as well?" Melissa struggled a few times and cried out in dissatisfaction.

Muyang laughed, "Leave this woman alive, she will be the perfect experiment material. When April will study the characteristics of the Super Saiyan clearly, she will give her as a servant girl, whether dead or alive is up to you!"

This Millif had more than 6 billion combat power, which belonged to the rare Super Saiyan 2. It would be too bad if she were simply killed by Melissa.

"Make her the maid, this is a good idea."

Melissa carefully surveyed the other side. Millif's slightly delicate face, which also looked more eye-catching. —Well, her body was also good, the convex-concave, or the smooth type.

Stop, she, Melissa, was devoted to Muyang.

"You actually dare to do this to me, my chief will not let you go." Millif threatened in a stern manner.

"Is your chief that super Saiyan before? He had already died long ago. Speaking of which, I'm also angry, if not for him, where would we be in such a mess."

As soon as the mention of Felix, Melissa was furious and went forward and grabbed Millif's hair.

"Chief Felix is dead?"

"Yes, he couldn't fight and blew himself up." Melissa said.

"....."

Millif bit her lower lip. Her eyes contained tears, remembering how she was ravaged by Melissa before. She looked at Melissa with fear in her eyes.

Muyang looked at Melissa as being a vicious lady and bullying her maid. He laughed and then instructed April to seriously research the bloodline of the bestial Saiyans, especially the S cells in the Saiyans.

April nodded obediently, and Muyang smiled at this. He just liked the way April obeyed.

The remaining time, after Muyang used his authority to block the power of Millif, he went to try to find a way to leave the debris space, while April began to start research on the S-cells.

The next second, Millif's eyes widened in dismay, and she was shocked to find that her body had actually returned to a healthy state, except for the energy confinement. Everything was in peak condition.

She never thought there would be such a holy medicine in this world.

However, she did not wait long for Millif to be happy. She saw April in a white coat, dragging a strange and bizarre equipment over, an operating table, and a culture chamber.... with a saw blade for cutting.

In April's hand, she held a large syringe that was used for large animals to inject. The diameter reached 30mm. The syringe was very thick and long.

"What are you doing?" Millif's voice trembled, full of fear.

"Draw a little of your blood for laboratory tests, and later cut a section of your tail for me to study. I wonder how the genes of Super Saiyans are different from those of ordinary Saiyans, this could be a subject." April's eyes glowed, encountering something worth studying. Her inquisitive mind suddenly became excited.

Gurgling, Millif swallowed her saliva, crying, cold sweat on her forehead. Now, she was on the chopping block, and life and death were in the hands of others.

"By the way, Senior Sister Melissa, I also want to draw your blood."

"What?" Melissa, who was sitting aside eating a snack, fixed for a moment and exclaimed in some disbelief.

Was it because she was too "cared for" between her bed that she wanted to take revenge on herself?

"Senior sister, just a little blood is enough, it's not much." April folded her hands and asked.

"Okay." Melissa looked straight at April for a while. She saw that she was sincere and did not look like she was taking revenge on herself, so she thought about it and agreed. In order to research the Super Saiyan's S-cells, she needed to draw some blood.

Next, April happily got the Saiyan blood from Melissa and Millif and went to do her research with satisfaction.

On the other hand, Muyang, in addition to enhancing his strength in the Acceleration World, also often went out to explore the situation of the sub-dimensional fragments, hoping to find a way to leave as soon as possible.
