

## Ball God 451

### Chapter 451

After knowing the origin behind God Mu Force, Birgil's heart relaxed. It turned out that everything was his overthinking. The fact that the person behind God Mu Forces forces was Muiyang meant that it was something to be celebrated for the entire North Area.

Next, Muiyang invited Birgil to enter the small building for a short rest. Then accompanied by Melissa, he ascended the Great Azure Mountain to the Kami School's martial arts building.

The elders of the Kami School, including Isaac, Clarissa, Beyaros, and others, saw the Namekian for the first time, and their faces could not help but show a hint of curiosity.

Speaking of which, Isaac and other elders were already 80-90 years old. The older ones were already close to 100 years old, belonging to the well-deserved elderly. However, because they had taken Elixir of Immortality, their appearance still looked middle-aged. —, with the increasing level of martial arts in recent years, as well as the increasing popularity of technology, the average life expectancy of Earthlings was increasing significantly.

After Muiyang's introduction, several elders knew the identity of the Namekian in front of them and came forward to offer warm hospitality to the Birgil.

Birgil had stayed on Earth for a short time last time because of the affairs of Planet Ambera. After that, he went to Planet Namek and did not visit Earth properly, so he visited the whole Great Azure Mountain at the invitation of the elders of the Kami School and gave some instructions to the disciples on the Great Azure Mountain.

These disciples, either sitting on their knees, closing their eyes and meditating, or practicing in pairs, sweating like rain, or a person diligently studying and honing their basic Fighting Technique, all of them were very serious and did not slacken a bit.

Looking at these martial arts practitioners diligently practicing, Birgil nodded appreciatively, "These disciples of the Kami School are good children who are willing to suffer, and the method they practice is very subtle and seems to hide even more esoteric connotations."

Birgil saw that there was a deeper connotation hidden in it after just a few glances.

Melissa laughed, "This is Kami School that Muiyang has improved, and when practiced in conjunction with the Heavenly God Fist, it can greatly stimulate the potential of Earthlings."

Birgil nodded and observed carefully, feeling more and more the profoundness of the Kami School martial art.

Walking along the way to see over, the degree of hard work of the Earth martial artists exceeded his imagination and moved him very much.

In contrast, the Namekian living in the Planet Namek was much slacker. Except for a few combat-oriented Namekians, the other Namekians would not take the initiative to practice at all but instead lived a leisurely and relaxed life like a small farmer. Perhaps it was the nature of the Namekian, who preferred to be close to nature and resisted violence from the inside. However, this also predetermined that it was very difficult for a master to appear among the Namekians.

As the times continued to change, the strongest people of this era would eventually grow old one day. Birgil was worried about the future development potential of the Namekian.

With a sigh in his heart, Birgil felt a lot.

Next, after staying in the Great Azure Mountain for a while, Birgil said goodbye to MUYANG and the others and was left alone with a heart full of thoughts.

This time, in addition to asking about the background of the God Mu Force's power, Birgil's second purpose was to meet with the Earth's previous Kami. That Namekian who fled from Planet Namek to Earth because of the climate catastrophe, the son of the excellent Dragon Clan KATAS.

Shifting in direction, Birgil flew towards the temple like a lightning bolt.

With Birgil's power level of tens of millions, the whole process was exceptionally easy. It took only a short time to cross the Korin Tower and the lightning space on it, and he quickly entered the space where the Lookout was located.

.....

On the Lookout, Birgil met the aged Old Kami. Like the Namekian Grand Elder, the Old Kami's body also emitted a decaying and weak aura.

"This senior from Planet Namek, I am the previous Kami of Earth." The Old Kami's thin figure appeared in front of Birgil, with a very weak aura.

"I'm confused!" Birgil sighed in pain as he felt the weak aura of the Old Kami. He had heard about the Old Kami from MUYANG before and felt even more deplorable when they met.

Obviously, he was an extremely talented dragon. Still, because of a little bit of evil thoughts in his body, he hardened his body into two parts, and after the split, whether the Namekian was still the original Namekian, no one knew? Pure good, pure evil, what was the point of differentiating so far? Even Birgil himself did not dare to say that there was no evil in his body.

However, things had come to this point. The situation of the Old Kami was irreparable. His body, soul, bloodline, and potential had long been incomplete because of the split, and the potential for development had been limited.

"Son of KATAS, I feel happy to see the clan outside of Planet Namek. Only you and Guru are left among the Namekian from the same era as me," Birgil said in a complicated tone.

He was the only one of the three Namekian from the last era who was still in a youthful state, and the Old Kami in front of him was as old as the great elder.

The Old Kami's old eyes showed a trace of nostalgia, "Is Planet Namek my home planet? I don't even know what it's like there."

Birgil said, "Go back and take a look sometime!"

The Old Kami nodded, "I will go back."

The position of Kami did not bring the Old Kami a long life. Like the great elders of Planet Namek, the Old Kami was nearing the end of his life, and before he disappeared, he wanted to go back to his home planet to have a look.

After staying in the Lookout for some time, Birgil and the Old Kami left with a lamentable farewell.

.....

Yuzabits Heights.

A deep and narrow canyon-like rift valley lay on top of the plateau, like a giant dragon, cutting the whole vast and boundless plateau into two sides. The slightly flat hills were covered with reddish-brown sand and gravel, and there was no grass around because of the lack of water. Even life was rarely found here.

Lighthouse-like stone pillars rose from the ground, the top of the stone pillars.

The newborn Piccolo draped in a white cloak with a cap on his head, sat quietly in the void. The cold, cold wind whistles, hitting the cheeks. It hurts.

Perhaps because of the inheritance of the majority of the power of the Great Demon King Piccolo, the newborn Piccolo was different from the ordinary Namekian at the beginning. A year and a half, Piccolo had grown into an adult state, with a power far exceeded that of the Great Demon King Piccolo.

Piccolo sat motionless in meditation. Suddenly, he opened his eyes and vaguely felt a trace of energy that made him cold approaching him.

"Not bad, although the power is a little weaker, the reaction ability is good and rare is that you actually do a see the combat type Namekian!"

A cold voice rang out from all directions. Piccolo looked around in all directions but did not find any figure.

"Who is it? Come out!"

Piccolo stood up with a grim face and viciously stomped on the stone pillar under his feet.

*'Could it be those martial artists from above the earth?'*

*'Did they find my traces?'*

Thinking of this, a cold killing intent emerged on Piccolo's face.

"Alas ..... after all, it is laced with the aura of the Demon Race. If this evil thought controls it, you won't be a pure Namekian."

Although the newborn Piccolo was coalesced out of the power of Great Demon King Piccolo, he also inherited the bloodline of Demon King Piccolo. It was half of Namekian bloodline and half of the demonic evil thought. If it could dissolve this evil thought, the newborn Piccolo was the real Namekian.

"What the hell are you?" Piccolo's heart was puzzled, and then he saw a person he was very familiar with appearing in front of him.

Green skin, pale red muscle lines at the abdomen and arms, and two tentacles at the top of the head, the appearance actually resembled himself. Could it be that the person in front of him was also a demon or related to the Kami?

"Young Namekian, my name is 'Birgil!'"

As he spoke, Birgil saw the untamed character of Piccolo and smiled lightly on his face. A small amount of breath was released, which was very weak for Birgil, but it was as vast as the sky for Piccolo.

Instantly, Piccolo couldn't move. He suddenly felt that the end of the world had come.

Chapter 452

"Damn, who the hell is this guy? How can he have such powerful energy? When did the earth have such an expert above?" Piccolo mentally roared in anger, and his two sharp demon teeth almost crumbled.

If the earth had so many strong people, when would he be able to clear the obstacles and complete his rule over the world?

Extreme anger and resentment filled Piccolo's mind.

"Huh?"

Birgil looked at Piccolo with interest, seemingly generating a hint of interest by his will. Suddenly, Birgil increased his aura, abruptly like being in the ocean. Piccolo felt his body tumbling, and this power froze his soul.

Rumble!

The huge momentum crushed down, the stone pillar under the feet soon appeared cracks, and then more and more cracks. Broken stones had fallen, Piccolo and the mountain stone fell together, the ground was soon pressed out of a "man" shaped depression.

Gritting his teeth, Piccolo tried hard to get up, but his body seemed to be pressed against a huge mountain so that he could not move.

After a long time, Birgil looked at the panting Piccolo and quietly withdrew his strength, "Not bad, although the strength is weak, the will of the body has a bit of merit."

The only thing that caught his eye was Piccolo's strong fighting spirit.

"Who the hell are you? How come I don't know there is such a strong person like you on Earth?" Piccolo struggled to get up from the ground and looked at Birgil with a complicated face.

During this period of time, he had learned about the history of the Earth, and except for that God of Martial Arts, Muiyang, who had resisted the invasion of the Demons and seemed to be quite powerful, no other person Piccolo had put in his eyes. But the appearance of this person in front of him broke his perception.

To put it another way, the other party just casually released a little bit of energy, and he could press him to move. If it was a head-to-head fight, he was afraid that he would not even have a chance to fight back, and he would be completely killed.

Birgil laughed, "I am not an earthling, but a Namekian like you."

Piccolo's pupils shrank, "What Namekian? This lord is the king of the Demon Race."

Birgil shook his head, "Ignorant. With your strength, you can't even be considered a miscellaneous soldier in the Demon Race, and calling yourself the king of the Demon Race is really ridiculous."

"How dare you say that!!!"

Piccolo sniffed. He was the king of the Demon Race, but he was called a miscellaneous soldier by this person in front of him? How could he stand it! However, in the face of Birgil, the words that Piccolo was about to say were stuck in his throat, and he could not say anything at all.

After all, the other party had such a strong power, and it seemed that there was no need to deceive himself.

"Kid, for the sake of also being a Namekian, I'll teach you to change the evil aura in you! The power of the Demons, especially the power of the low-level Demons ..... left in your body, will only pull down your potential, such power, it is better not to."

"You can make me stronger?" Piccolo didn't fully believe Birgil's words, but the desire to become stronger made him unable to resist opening his mouth to ask.

"It depends on your own will, and no amount of work by others can help you."

"Did you just say that I am a Namekian?"

"Yes, as you can see, Namekian are all like us, your father and mother were Namekian who had to leave and escape to Earth because of the climate catastrophe of Planet Namek, so essentially you should not become a Demon."

Of course, the words were full of disdain for the demons, knowing that the Namekians were a nature-loving and peace-loving race, and there were very few evil people. Birgil naturally did not want to see a clan member with a powerful talent continue to fall.

"....."

In response to Birgil's statement about the identity of the Namekians, Piccolo was silent and did not express it.

"Next." At this time, Birgil threw a cloth bag towards Piccolo, who reflexively took it.

"What is this thing?"

Opening the bag, Piccolo saw that the cloth bag actually contained dozens of green dry and flat beans, wholly stripped of water, and looked particularly ugly.

‘What was this?’

Piccolo stared at the beans in his hand and suddenly felt a pang of absurdity.

This seemingly very powerful Namekian in front of him somehow appeared in front of him, after giving himself a downward spiral, and then sent himself dozens of beans. What exactly did he want?

"This is called Senzu Beans, and you will soon know its use." Birgil indifferently said. These Senzu Beans were the treasure he got from Muyang. If not for the fact that the other party was a rare combat-type Namekian, Birgil would not have taken them out at all.

"Ha!" Piccolo picked up a Senzu Bean and put it in his mouth and bit into it, and suddenly found amazing energy spreading in his mouth, and all the fatigue and injuries he had before miraculously disappeared.

"This thing ..... so amazing ....."

Piccolo's eyes fiercely wide, clenched both fists as if there was inexhaustible energy, and then looked at the remaining dozens of Senzu Beans in the cloth bag, as if looking at the world's rare treasure.

"Great, with this thing, this Demon King has nothing to fear. The whole world sooner or later is mine," Piccolo shouted excitedly, his body's demonic aura once again emitted.

"Don't get carried away!"

Birgil's face was cold, and his arm fanned out and slapped Piccolo out with a snap. The powerful force made Piccolo rampage all the way and smashed several stone pillars in succession before his body was set on the rocky cliff in a wretched manner.

Birgil ripped Piccolo from the rock wall, "Kid, I begged for this stuff from others. How can you waste it like that!"

Piccolo wiped off the blood from the corner of his mouth and looked at Birgil with a gleaming gaze.

"Master, I already know how powerful you are. Please teach me martial arts."

"It depends on your enlightenment!"

A smile appeared at the corner of Birgil's mouth.

.....

Several months later.

The night was slightly cool, and the white moon was in the sky.

The night of the desolate Yunzabit Heights was still cold and lonely, and Piccolo, clad in a cloak, was gathering energy in the middle of the sky. Suddenly he stared ahead. His black pupils suddenly flashed a ray of brilliant light. A flash of appalling aura burst out from his eyes, hitting the rock wall not far away.

There was a rumble, and fine pieces of rock fell down.

Just then, the aura on Piccolo rose wildly, several times in just a few seconds. His arms opened fiercely, a hemispherical flash suddenly spread in all directions with Piccolo as the center, as if a great sun rose from the horizon, the vast highlands were instantly illuminated.

Rumble!

A huge mushroom cloud rushed up, the entire cloud of Yunzabit Heights trembled, a terrible storm directly destroyed the raised rocks, swept over.

Piccolo indulged in releasing the power of his body. At this moment, he felt as if the world was in control.

"Hahahaha, I did it. My power has increased by several times."

Several months of day and night of hard training, Piccolo has constantly been subjected to Birgil purgatory-like training. Although the process was arduous, today finally cast incomparably powerful moves, quite some bittersweet feeling.

Looking at the stone wall, he had destroyed and the scorched land that had collapsed below, Piccolo felt that it was all worth it.

High in the air, Birgil hands were on his back. Looking down at the spirited Piccolo, he nodded slightly, "Although the evil in the body has not been completely removed, the desire to fight has vaguely suppressed the evil. Good, good, worthy of being a combat-type Namekian."

"It's a pity that the origin and soul are missing. Otherwise, it may not be impossible to become a Super Namekian!"

Most of the extremely gifted dragons had extraordinary potential, and Piccolo, if he were in a complete state, would have more development potential than Slug.

Now it was really a pity.

#### Chapter 453

Birgil stayed on Earth for so long, not purposely teaching Piccolo anything, but he didn't want a potential combat-type Namekian to be reduced to a Demon Race. After all, the Namekian was already a sparsely populated race, and every clan member was precious.

In addition, the Namekians were good by nature, and the kindness in Birgil's heart did not want to see the fall of his people.

In fact, in Birgil's opinion, Piccolo, whose origin was not good, had no potential to compare with Nail. In the future, unless it was the fusion of the Old Kami or the fusion of another extremely talented combat type, Namekian, to make up for the lack of soul and body, otherwise it was feared that hundreds of thousands of power levels was the limit of the other side.

Staying on Earth for several months was already the maximum care for Piccolo. After seeing that Piccolo was roughly able to suppress the evil thoughts in his body, Birgil nodded, and with a flash of his body, he quietly left the Yuzabits Heights.

.....

Under the moonlight, Piccolo enjoyed the pleasure brought by the power increase, and when he came back to his senses, there was no longer Birgil's energy around.

After thinking for a moment, Piccolo knew that the other party was already leaving the earth.

"Hmph, finally gone away, so that I will have one less obstacle to rule the Earth." Piccolo bristled.

Although the mouth said so, his eyes still couldn't help but look into the void and bowed slightly in the direction of Planet Namek, then his body floated and sat on top of a cluster of rocks again, closing his eyes to recuperate.

.....

The Lookout.

The Old Kami leaned on his cane to keep an eye on Piccolo's side. Seeing Piccolo's behavior after Birgil's departure, the Old Kami was a bit surprised and said with relief, "Piccolo, there really seems to be some change."

At this time, Birgil suddenly appeared beside the Old Kami, "Piccolo's change is subtle and will continue to be observed in the future. If you want to eradicate the demonic evil in him completely, I'm afraid you need some deep emotions to make him."

The Old Kami nodded, "My approach back then really lacked consideration."

Although separating the evil thoughts and becoming a Kami, he also caused a catastrophe to the creatures in the Lower Realm, which was really a sin. If he could let Piccolo out of his demon identity, the Old Kami would be able to have some peace of mind.

"I'm going back. Do you want to go with me to Planet Narmik to see?" Birgil invited.

The Old Kami wrinkled face showed a smile, "Let's go together. The Earth has Kanalita to look after it with or without me. I am very curious about the home planet you said. After more than 300 years away, it is time to go back to see."

The Old Kami didn't have the impression of Planet Namek in his mind. But for the home planet, there was a natural yearning.

"The people of Planet Namek, I wonder what it will be like?"

"You will understand when you arrive," Birgil said.

With a relaxed smile on his face, the Old Kami showed up, and next explained to Kanalita that he was leaving Earth temporarily with Birgil. The Old Kami accompanied Birgil, flew down to the Lookout.

When Birgil's spaceship stopped at the desert area where people were rarely seen, a white light rushed out of the Earth after the Old Kami and Birgil boarded the spaceship, and the Old Kami stepped on the road to the home planet.

.....

On the other hand, when the Old Kami left Earth, April's research on the Majin Android 21 cells had also reached its end and had entered the clinical injection stage a few months ago.

In a pill-shaped culture chamber, April was naked and curled up in a ball in the underground research institute. Her head buried between her knees, her hands clutching her calves, her brown hair fluttering in the solution, "gurgling" bubbles coming out of the corners of her mouth from time to time. The special solution had been deployed by April to suppress the evil thoughts in the cells of the demons and prevent the phenomenon of rampage.

A few months had passed, April's body of the demon cells continued to proliferate, but because of the Majin Android 21 gene and April's genes themselves had some commonality, essentially the same body of cells. As a result, April's cells were not devoured by the demon cells, the two were instead fused, and everything seemed to be developing for the better.

Time passed day by day, as more and more demon cells in the body, April's body's eternal energy source was stimulated, the energy grew wildly.

At the same time, the skin on the surface of April's body was also changing.

The original delicate and soft skin became full of elasticity, the color began to shift to pink, brown hair also gradually became pink and white, and a small flesh-colored tail grew up from April's tail vertebrae, becoming longer and longer .....

This was what Android 21 looked like.

"April is looking more and more like the Majin Android 21." Melia pressed against the glass cover and looked at April's condition.

The hair all over her body had turned pink and white.

Muyang carefully observed April, "It's different. April is transforming into Android 21. The most obvious thing is the color of her eyes, Majin Android 21's eyes are blood red. Look at April's eyes are still azure, which means everything is under her control."

Melis stood next to her and nodded. If they went deeper into April's body, then they would find that at this time, the cells in April's body were fusing wildly with the demon's cells.

The experiment had proceeded to this point. Basically, April's transformation was complete.

Exiting the underground laboratory, Muyang, Melia, and Melis quietly guarded the small building. As the headquarters of the Kami School, the Great azure Mountain was a martial arts sanctuary like the Korin Tower. Although there were pilgrims who came to pay homage, they generally stayed in the city of Azure Mountain below the mountain.

Thanks to this generous external condition, the size of Azure Mountain City has grown bigger and bigger.

However, one day, terrifying and powerful ki suddenly enveloped the whole earth. The moment that ki appeared, the whole earth stopped rotating, and in just a moment, all the people of the earth felt a depression, especially the martial artists who had exercised their ki, and their bodies were as if they had been pressed with a thousand pounds.

BOOM!

A storm swept away, the ground beneath the Great Azure Mountain shook, glass shattered. Muyang and the twin sister, who were at Kami School headquarters, instantly sensed what was happening.

"Earthquake?"

"Not good. The energy is coming from April's lab."

The three of them flew to April's lab. However, what caught their eyes was a scene of wreckage and disarray. All the instruments were ruined, smoking, the pill-shaped culture chamber cracked several cracks, culture potion spilled out from the cracks, the pill-shaped culture chamber is still intact, but the April inside, but still disappeared.

"Where's little April?" Melia rubbed her eyes and looked at the intact culture pod.

"Disappeared ....." Muyang's face was ironic.

"How can a good person disappear? Is there some kind of accident?" Melis heart worry.

"Wait, I'll search for April's ki. As long as it's still in Universe 7, then we can find it." After Muyang finished speaking, he closed his eyes and sensed April's ki. Although the ki on the android was extremely weak, April, who had fused with the demon cells, naturally carried messy ki on her body.

Melia and Melis sniffed and also searched up with Instant Transmission ability.

Half a long time later, the Instant Transmission's ability to diffuse the breath had scanned a large area of the universe. At that, Muyang captured April's ki.

Sure enough, it was found.

The three people's expressions were relieved for a while.

However, just as they were about to teleport over, April's ki disappeared again. Just like hide-and-seek, the ki kept appearing in different directions of the universe, and finally, it disappeared completely.

"There's no more. It can't be captured at all."

"Universe 7 is too big, and the Instant Transmission simply can't be scanned completely." Melis lamented.

"Let's go! Let's go to the God of Destruction Planet and let Whis look for her." Muyang helplessly put down his finger that was pointing at his eyebrow and could only ask Whis for help.

#### Chapter 454

The accident at the end of April's experiment took Muyang, Melis, and Melia by surprise, and now that April's ki had disappeared from their perception range, the only way to find her again was to seek help from Whis.

But the God of Destruction Planet was in the highest dimension of Universe 7, and that area was not something that could be entered casually.

Luckily, Muyang and the others had been to the God of Destruction Planet several times before and were quite familiar with it. Next, Muyang, Melia, and Melis concentrated their minds. After some brewing, the three of them finally found the location of the God of Destruction Planet based on their previous memories.

With a blur of light and shadow, Muyang and the others instantaneously moved towards the God of Destruction Planet.

.....

The time went back to a few minutes ago, at this time transformed into the Android 21 April body had been demonized, the body of the wild energy constantly rushing, provoking her nerves. If it weren't for her eyes still shining blue luster, I thought she had completely lost her mind!

But now, April really wasn't much different from losing her mind. Because she had awakened the power of a demon, this wild and overbearing energy was beyond her ability to manage, and she needed to vent it wildly.

April continued to transient everywhere in the universe, almost every appearance, accompanied by the destruction of countless planets, and then stay for a few seconds, and then quickly transient disappeared.

That was why Muiyang and the others were too late to catch April's scent.

Fortunately, most of these destroyed planets were rocky or gaseous planets with no traces of life. Otherwise, the damage caused by April's series of destruction would have been no worse than that of Majin Buu. If the East Supreme Kai saw April's current appearance, he might have thought that the Majin Buu had appeared in the world and scared off half their lives.

Wow~

The pink figure flashed once again, and a sharp chirp came out of his mouth. As if a long sword pierced through space, several planets in front of them began to collapse from the inside and turned into huge balls of molten lava fire in the blink of an eye.

"Destruction, the huge power is so hard to bear!" April yelled, clutching her head, the remnants of her sanity trying to keep her as far away from the planets as possible.

"Roar ....."

The "sound wave" swept through the star, instantly triggering the star to fail prematurely, throwing out a massive stream of energy.

At that moment, in the star's gravitational field, an ellipsoidal cosmic flight suddenly came through space and time. With a flash of light, the ship revealed its full shape. As if it had just completed a wormhole shuttle, it was waiting for some time to stabilize when suddenly a violent burst of energy made the ship tremble violently.

The "buzzing" alarm sounded frantic on the ship, and the building also lit up with a flash of neon lights.

"Android 16, check what's going on?" A woman in a white trench coat swooped down in front of the cockpit to control the stability of the ship while instructing the big, burly man beside her to check the external situation.

The person's appearance was identical to April's.

"Checking. Wh, Android 21 look, we found Evil Android 21." Android 16 pointed in surprise at the image displayed on the screen.

"Ah, where is it?"

At that moment, Android 21 pounced over with a handful of beautiful eyes staring intently at the figure revealed in the center of the screen.

A pink silhouette stood out in the cosmic starry sky surrounded by planet debris, white lantern pants. Pink and white slender hair, small arms, and chest wrapped only in black fabric, and it was the magical April!

Android 21 slender eyebrows raised, said thoughtfully, "Evil Android 21, I finally found her, this time must be done with her."

"Huh, no.. this girl is not Evil Android 21, her eyes are the wrong color, the energy in her body is wrong, and she seems to be out of control."

Android 21 noticed the color of April's pupils, which were blue like hers. In her impression, the pupil color of Evil 2 Android 1 was blood red, with no eye whites, only black eyes.

"Strange indeed, is this person really not Evil Android 21?" Android 16 wondered.

"No matter what, let's stop her first."

After thinking about it, Android 21 took off her white jacket on the spot, then urged Majin power in her body and instantly transformed into a Majin Form as well. Pink and white hair fluttering, and the outside April was generally the same.

Android 21 appeared to April's side. A slender palm grabbed April's wrist and cast a magic spell to freeze her in the void. April struggled a few times, but her strength was clearly not yet comparable to the mature Android 21.

"It's really out of control, and the power is not as strong as Majin Android 21. Maybe it's a newborn Android."

"Strange, I have not heard of Android 21 in the whole universe, ah, is it an outsider like me?"

Android 21 imprisoned April and dragged her into the ellipsoid-shaped ship.

Because they were worried that the commotion just now might attract the attention of the Universe 7 Supreme Kai or God of Destruction, Android 21 immediately decided to leave this space-time temporarily. At least until they found Majin Android 21, their whereabouts could not be discovered by the People of Multiverse God or Time Patrol.

"Launch the time jump. Let's get out of here first."

"Okay."

Android 16 nodded and pressed the ship's jump button, followed by a visual effect of a period of light being stretched. Android 21's ship left the current universe and entered the hourly space near the Multiverse. It was still in the Multiverse rules, but at least it was not easily detected.

.....

After the operation, the ship entered the space-time jump stage. The outside world is white, belonging to the middle of the space-time sandwich.

Android 16 looked at April, who was imprisoned by Android 21, and asked, "What's with this guy? It really doesn't look like Evil Android 21."

"Hmm." Android 21 nodded and looked at April carefully, parting her eyes to judge, confirming that April was not evilized and had just lost control simply because of a power outburst within her body.

"She may be the 'I' of other time and space. I will take care of her next. You go out for a while." Android 21 ordered.

Android 16 nodded and opened the electronic gate, leaving the cab.

After Android 16 left, Android 21 pressed April's eyebrow, put power into it, a cool feeling, April gradually settled down, the Majin Transformation also began to lift, suddenly a naked brown-haired young girl appeared in front of Android 21.

"It really is exactly like me...."

Android 21 looked at April's pink skin, picked up her white coat, and wrapped it around her body.

At that moment, she noticed that the person in front of her was still a little different from her. The other person did not have a pair of surprisingly large earrings above her ears but a small set of crystal pendants.

"It looks like she's just been transformed into an Android. After traveling through so much time and space, this is the first time I've encountered another of my own. But why is she in the whole universe?"

Android 21 itself was born in a broken hour space; that was a world where Android was the rule. Of course, the last strongest person was naturally her Android 21.

The whole universe was a relatively complete large world than the surrounding hour space, broken world, the more complete the rules. The more the ability to time travel was limited by the gods, as far as Android 21 knew, the current all-universe time-space had not yet appeared in the shadow of Android 21 and most likely will not appear.

So for April's origin, Android 21 was very interested.

Chapter 455

With a soft sound, April woke up from her drowsiness. She opened her eyes, and a familiar face of her own appeared in front of her.

'Uh, hadn't woken up yet, how could I see myself?'

April closed her eyes and went back to sleep, but the next second, she opened her eyes violently and looked at the other side with an incredulous face, "No, I'm awake now. Who the hell are you?"

Android 21 looked at April's stammering appearance, elegantly smiled lightly, "I am Android 21. It is very wonderful to say that I can actually see another self, and I have never thought about it so much before." Android 21 reached out a hand and ruffled April's hair that was sticking up in front of her forehead.

'Android 21?'

April's beautiful eyes flashed a trace of surprise. Her body trembled, and she suddenly felt her body empty. Looking down towards her body, she realized that her body was actually only draped in a white-colored tunic.

April tightened the clothes on her body for a moment, "How did I get here?"

"The space ship was stirred by a huge energy flow during the previous voyage, and I found you after detection. I saw the storm phenomenon appear on you, so I took it upon myself to bring you on board. Looking at your appearance, you should be the first time to become a demon. Don't worry. You will be familiar with it after a few more changes."

Android 21 explained, handing over a few pieces of clothing, "By the way, I have a few pieces of clothing here. You should be able to wear them as well."

April froze, looking at Android 21. She took the clothes and put them on, and it was true that the two people had the same body type, and the clothes of Android 21 fit April perfectly.

After changing clothes, April's graceful curves look more soft and beautiful.

"Where are you taking me?" April asked.

"Before is in the Universe 7, it is easy to attract the attention of senior deities. We change a place where no one is disturbed."

"Are you afraid of the God of Destruction in the Universe 7 or the people of the Time Patrol?" April probably understood the situation of Android 21. Android 21 was being pursued by the members of the Time Patrol. Of course, the one they should really be pursuing was Majin Android 21.

"You know a lot . . . . ." Android 21 was a little surprised. This "her" in front of her didn't seem as young as she thought. When Android 21 saw the ring on April's left hand, she was surprised, "You're already married?"

"Yes, I'm married to my senior brother."

Android 21 was a bit dizzy, "I don't have a brother. Besides, how could a brother and sister get married?"

April explained, "Not a real brother, but a brother who adopted me as a child."

"It seems we are very different. Is it because of the different time and space?" Android 21 murmured. Having discovered the difference between herself and the woman in front of her.

The next time April and Android 21 were in deep communication. After a conversation, Android 21 realized that April was not herself in other time and space, but the original body that should have died long ago in "history". She became an Android as a clone of her cells.

And, April, with her clever mind, actually researched Android technology and even fused it with Majin Buu cells!

After understanding April's origin and experience, Android 21's eyes burst out with intense curiosity, as if to study April's entire body through! Because in a sense, April was her "mother". So, she couldn't help but feel that the whole universe was really a different world from other time and space.

"From what you said, Majin Android 21 has been severely injured by the angels of the Universe 7 and cleared out of the Universe 7, and is now hiding in a time and space to recuperate?"

April nodded, "That's what Whis said."

"Majin Android 21 is not that easy to die. Find her as soon as possible!"

"Can you send me back first? My brother and sisters will be worried if I leave like this." April inquired.

Android 21 had difficulty understanding the situation of April and other women serving one husband but still said according to the situation, "the ship has entered the time jump stage. If you want to return immediately, then I'm afraid it is a little difficult. In addition to several consecutive jumps, the energy of this ship has almost reached the bottom, so it needs to be resupplied in the next time and space. The process of replenishing energy will take several months. "

April was a little disappointed, "That means I can't go back now."

"Yes, at least stay in some hour space for a few months." Android 21 said with certainty.

"Hmm~" April pouted, a good powerless look.

Android 21 hid her mouth and laughed lightly, thinking that the girl in front of her was so funny.

?.....

.....

On the other hand, Muiyang, Melia, and Melis used instantaneous movement to find the location of the God of Destruction Planet. A burst of gorgeous light was born in the God of Destruction Planet, and the three of them had already appeared in the God of Destruction Planet.

On the huge diamond-shaped God of Destruction Planet, what entered the eyes was a turquoise landscape.

The sky was a light pink color, and as far as the eye could see, there were dozens of stars rotating around the God Planet. It was not the first time that Muiyang came to the God of Destruction Planet, so he was familiar with the scene in front of him. A red-colored figure flashed by, and Whis' figure appeared beside them.

Whis lightly laughed and said, "Muiyang, why have you come to the God of Destruction Planet? Did you guys decide to serve as the reserve God of Destruction?"

The crimson divine robe whirled and swayed, and the calm wind blew his white-gray hair.

"Whis, this time, we have something that we need your help with." Muiyang took a deep breath and directly asked Whis for help.

With a smile on his face, Whis asked curiously, "What's going on?"

Muiyang glanced at the girls, then told them about April, "April's ki disappeared from our perception range all of a sudden. I hope you can help us find her."

Whis nodded and said, "That little girl has really fused with the cells of a demon. Well, it's not a big deal. It's probably because the power awakened too suddenly and got out of control all of a sudden. Let me see where she is!"

Whis waved his divine staff, the crystal ball shone a few times, projecting an image, which was clearly the picture of April after she lost control.

In the picture, the Majin Transformation April wagged her tail behind her, terrifying sonic attacks and energy attacks came and went, countless planets were destroyed, a graceful and slender figure flashed a few times. It appeared in another star, also causing great damage.

"Yes, that's April." Seeing Whis release the image of April, Muiyang a burst of surprise.

"The destructive power is quite strong. Basically, it has the appearance of a demon." Whis looked at the image in the void with a calm face.

"Please wait a moment."

Whis tapped the divine staff, the image in the void began to accelerate. Soon an ellipsoid-shaped ship appeared in the image, then Android 21 appeared opposite April, the two briefly exchanged blows, and then April was dragged away.

"How can there be two Aprils." Melia's jaw dropped.

Muyang's face was ugly, "The other one is the Android 21. She took April away."

Muyang said anxiously, "Whis, quickly see where they went last?"

Whis shook his head, "No, they have left Universe 7. My ability can't spread to the space-time outside the Universe 7."

Muyang's expression was stunned, "What can we do then?"

Whis gently danced the divine staff, put away the image in the void, smiled slightly, "There is no way. Although my power can not spread to the space outside the Universe, Lord Dragon God can. Don't you have several Super Dragon Balls in your Acceleration World? Why don't you collect them and try it?"

"In addition, I can also ask the other angels for you to see if they have a way to detect things in outer space-time."

In addition to the twelve huge universes in the center of the universe, there were also many small universes, hourly spaces, and fragmented worlds attached to them, which were not as vast as the twelve universes, but were also within the rules of the whole universe.

The powerful angels might have other ways.

Chapter 456

Muyang considered the plan provided by Whis. At this point, it was the only way to try. Hopefully, the Super Dragon Ball could find April's whereabouts.

In this regard, Muyang gratefully said to Whis, "Whis, I am sorry to trouble you solution must be tried nowadays."

"There are seven Super Dragon Balls in total, I have already collected three Super Dragon Balls in the Universe, only the fourth one is missing, while the other three Super Dragon Balls are in the Universe 6, which requires you to send me there." The matter of crossing the universe barrier was something that Muyang could not do right now.

"Yes!" Whis promised down.

"Before entering the Universe 6, better say hello to the angel there, this I will contact for you. In addition, try to avoid meeting the God of Destruction over there, Lord Champa of Universe 6 is not as good as Lord-Beerus. Remember to avoid it."

"I understand." Muyang nodded seriously.

Universe 6 of the God of Destruction Champa and God of Destruction Beerus were two brothers, but the two were also deadly rivals. If the other side found out that they came from Universe 7, they would probably strike without saying a word, and then they would be tragic.

A gentleman did not stand under a dangerous wall, so it was better to avoid it.

For the search of April's whereabouts, Muiyang did not think of using the Earth's weakened Dragon Balls or the Dragon Balls of Planet Namek at the beginning, because these two Dragon Balls were obviously unable to detect the situation outside Universe 7, and only the Super Dragon Balls, which inherited the powerful power of Dragon God Zalama, had such great power.

"By the way, the equipment for searching the Super Dragon Ball you have there, right?" Whis suddenly asked.

"Yes, April has made the radar of the Super Dragon Ball."

"That's fine, I'll take you to Universe 6 now, you should pay attention to the situation there when you arrive."

"Mm." Muiyang nodded and turned to look at Melia and Melis, "You guys wait here for me for a while, with the Dragon Ball radar around, I should be back soon."

"We're waiting for your good news."

Melia and Melis looked at Muiyang and Whis, "Then ..... let's go."

Whis laughed lightly, the divine staff in his hand nodded a few times in the air, and suddenly the seven-colored light rose up, brilliant colors like fireworks, only to see a few points of starlight surrounding Muiyang and Whis, and then fiercely bloomed, with a clatter, like water flowing through

Leading the two towards the void.

The transfer from Universe 7 to Universe 6 was a long process, and even for the angels, it took a lot of time.

A seven-colored haze formed in the channel, a variety of crystalline glitter by the space stretched incomparably slender. Muiyang's palm rested on Whis' shoulder, looking at the colorful scene around him, a burst of novelty in his heart, to be honest, crossing the universe is the first time he experienced things.

Although the speed of the angel's great movement was not as fast as Instant Transmission, it also had its great advantage, which was to travel through the universe.

"We will soon arrive, the situation in the Universe 6 is similar to Universe 7. I have contacted the angel there, she will meet us at the other end." Wise's bland and uninteresting voice came through.

For him who stood at the very peak of the universe, there was nothing that could surprise him anymore.

‘The angel of the sixth universe, was it Vados?’

Hearing Whis' voice transmission, a tall figure emerged in Muiyang's mind. He heard that the Universe 6 Angel Vados was Whis' sister, and among all the angels, their siblings were considered to be very nice to talk to.

Phew!

About a few minutes later, the colorful channel of seven colors suddenly disappeared, and the surrounding background suddenly turned into a deep and dark cosmic space. Against the dark red background, a blazing star blazed, constantly sending light and heat around.

Muyang and Whis were suspended in the cosmic space.

"It's here." Whis said softly.

‘ This was the Universe 6?’

‘It didn't feel any different from the Universe 7.’

Muyang looked around curiously and didn't see anything different. Universe 6 and Universe 7 were mirror-like symmetrical universes, and all the planets in the Universe 7 could be found in Universe 6. However, because of the countless years, the difference was starting to get bigger day by day.

Just then, a cluster of intense colored light lit up in front of Muyang.

The light dispersed, only to see a young girl dressed in a green divine robe with silver hair standing in the void.

An ethereal, holy feeling was born.

The young girl had a blue halo floating around her neck, and her silver-gray near-white hair was tied into a ponytail and draped high behind her back. Her bumpy curves made her look very attractive, and at that moment she was stationed in the void, and a pair of beautiful eyes were gazing at them.

"Gee, is this guy the little guy from the Universe 7, a very talented kid. Whis, you personally came to Universe 6 for him, do you want to seriously cultivate him?" Vados floated to Whis' heels with her divine staff in hand.

"Sister, I'll have to trouble you with this." Whis looked at the female angel in front of him with a faint smile.

Vados said seriously, "The wishing pearl is the jewel of the Universe 6 and Universe 7, I have no objection if he wants to borrow it, but this matter must not be known to Lord Champa, otherwise, the next days of my sister will be very traumatic."

"I think sister must have a way to deal with Lord Champa," Whis said lightly.

Don't look at Vados, who seemed to be very brainwashed, but in fact, her heart was very dark. She had a variety of methods, and Lord Champa often suffered in her hands, but also was tamed like a lamb. Whis didn't believe what Vados said.

Seeing this, Vados narrowed her eyes and stopped acting.

"Well long story short, Lord Champa is still in the God of Destruction Planet for the lunch break. I can't leave the God of Destruction Planet for too long, next you let this little guy from the Universe 7 go collect the wishing beads, then I will send him back."

"Well, of course, it's best if you can send him back, I still have something to do to look for sister." Whis turned to Muyang, "You should know what to do behind you, don't cause trouble."

"Understood."

With the strength of Muyang, who was completely close to the strength of the Majin Buu, he was also a supreme master in Universe 6.

Next Whis went one step ahead, and after a flash, the figure disappeared into the universe.

"Universe 7 kid, hurry up and collect the wishing beads, I'll wait for you here."

These were all discussed between Whis and Vados. Vados would send Muyang back to the Universe 7 after he finished collecting the Super Dragon Balls, while Whis still had things to ask the angel there in the tenth universe.

Muyang nodded seriously, and without delay, directly took out the large Super Dragon Ball radar from the Acceleration World. After pressing the button, three light signals appeared around the screen, and the red triangle in the middle was the current location.

Vados was surprised to see Muyang take something from the void, nodded after, but somehow understand why Whis so valued him, not hesitate to personally send him here.

"Miss Vados, I'm going to look for the Super Dragon Ball now, please wait here for a while."

"Go ahead."

Vados casually waved her hand and sat in the void with the divine staff padded under her body.

The Dragon Ball radar showed him the direction to explore the scent in a certain direction, and then use Instant Transmission to move over. This type of Instant Transmission was definitely a deviation from the real destination, but it was the fastest way he could think of. He roughly estimated that it would take at least two or three days to collect the three Dragon Balls.

After Muyang's transient disappeared, Vados looked at the void and smiled elegantly, "What an interesting little fellow, Whis seems to have found a good seedling."

Vados and Whis were siblings. They are both keen to find the next God of Destruction.

A circle was drawn in the void, and the picture showed the scene on Muyang's side, while Vados was very interested in enjoying it as a live screen.

## Chapter 457

"La la la la~~"

The field full of grass looked dim; the middle-aged man in sackcloth stood on the ridge in a happy mood, whispering an unknown ditty under his breath.

Pulling up his pants and walking down the ridge, the middle-aged man gripped the roots of the grass and slashed his sharp scythe a few inches above the ground with a click. The weeds were directly cut away by the scythe, revealing a small knot of roots. Raising his head to gaze at the green sky, a big sun and an orange planet occupies more than half of the field of vision.

This was a planet called Ruby, belonging to a low-level planet with a very low force value.

The people of Planet Ruby were indigenous to this planet. They were born simple and generous and lived a very simple life as diligent old farmers. In their life, labor was the most basic ingredient, and you could even say that it was the embodiment of their faith and values.

Although the most basic iron civilization had been developed, the hearts of the people of Planet Ruby were still full of reverence for the gods, and they believed that all good life was a gift from the gods.

The two great suns of different colors in the sky were the gods they believed in.

One gave them light and heat, and the other examined their piety.

On this day, Amos, a middle-aged man, worked in the fields with his children. The hot sun and the poisonous sunlight made beads of sweat burst out on the foreheads of the children.

"Ah, is the sun god angry these days? The weather is getting hotter and hotter." Amos' children wiped the sweat from their foreheads.

Amos chided, "Finish the job properly. This is a test from the gods to us."

"Yes, yes, yes!" Amos's child hemmed and hawed, having long since adapted to his father's strict demands.

Suddenly, the child's eyes opened wide, his finger pointed to the green sky, and his voice trembled, "Father, look, something is wrong in the sky, the sun god seems to be really angry."

"What are you kid talking about...." Amos was about to scold but raised his head to see the vision that appeared in the sky.

In the cyan sky, located next to the two great suns, a black point of light emerged...

These black points fell from the sky, and as they kept getting closer to the ground, the black points gradually grew larger and turned into a ball of red fire.

**BOOM, BOOM!**

A series of huge fireballs descended from the sky. Those were wandering stars that had entered the planetary system after a long interstellar journey. These reddish fires cut through the sky as if the gods had sent down divine punishment, causing the sky to be filled with fire and dust.

This thought made the simple people of Planet Ruby fall into extreme panic, and one by one, they kneeled to the ground, praying to the gods.

"Alas, the Sun God rest in his anger, please forgive our ignorance, and the gods bless."

Amos and the other people of Planet Ruby prayed to the heavens, but the fireballs that crashed into the planet did not hear their prayers at all and still slammed into the ground one by one.

The dust flew, the sky cracked.

The whole Planet Ruby seemed to have entered the post-apocalyptic scene.

The number of wandering stars that entered the gravitational field of the Planet Ruby was so huge that there were about more than ten thousand of them, and for several days in a row, all parts of the Planet Ruby were in the midst of the fire.

To calm the anger of the gods, the people of Planet Ruby beheaded cattle and sheep for sacrifice. However, the effect was not obvious.

Just when the people of Planet Ruby were about to despair, the real gods descended .....

.....

After several rounds of spatial jumps and long-distance travel, Muiyang's figure finally entered where the first super dragon ball was located.

When Muiyang proceeded to the planetary system where Planet Ruby was located, he saw a Super Dragon Ball floating near the star. Because it was big enough and close enough to the star, the orange-red surface of the Super Dragon Ball lit up with a crystal light under the star's irradiation, looking golden and shining like a carefully carved gemstone ornament.

Muiyang's face was happy, and he immediately approached the Super Dragon Ball.

"This is the first one; with the first one in hand, the next two will be fast." A smile crept onto his cheeks. With a straight face, Muiyang released the power of the accelerated world and began to capture the Super Dragon Ball.

Since breaking through the fifth limit five years ago, the spatial range inside the Acceleration World expanded to twenty million kilometers, and fitting a Super Dragon Ball with a diameter of 37,000 kilometers was as easy as fitting a small marble.

After making sure that the power of the Acceleration World was fully attached to the surface of the Super Dragon Ball, Muiyang's mind moved, and an ingesting power suddenly descended into Universe 6. With a gurgling sound, an invisible power field spread out, Muiyang's movements were swift, and before the rules of the Universe 6 could react, the entire Super Dragon Ball was ingested into it.

"Got it."

After completing the capture of the Super Dragon Ball, Muiyang was in a great mood and took out the Dragon Ball Radar to watch it.

"There are two more Super Dragon Balls next, located in the northeast and southwest corners. If I move fast, I can probably finish collecting them in two days."

Muiyang smiled, but now was not the time to relax, tidied up his grooming. He was ready to transient towards the next destination.

Just then, his eyes glanced slightly and noticed a planet that was being hit by countless meteorites not far away, and there were actually traces of civilization development on it.

"The life on that planet is also pitiful. If no one saves it, this civilization is kind of finished."

"Forget it. It's kind of virtuous to help you guys out. I hope you can bring me good luck."

Such a thing as saving a planet was just a handful for the current Muiyang. It just so happened that he had just harvested a Super Dragon Ball, and in a happy mood, he didn't begrudge helping people out.

So, a white light spread down, the meteorites that had not yet fallen into the atmosphere in the outer space of Planet Ruby were all moved away by a magical force, and the power of the Acceleration World also smoothed out the wounds and fires on the surface of the planet.

To the natives on Planet Ruby, the light wave of Muiyang's hand was like a god himself stepping into the mortal world to save them.

"Great Gods!"

"We are saved. Long live the Sun God."

All the natives fell to their knees at once, expressing their gratitude to the deity who had saved them in their hearts.

When they saw that the red star was missing in the green sky, they thought that the great gods had sacrificed their lives to save them, and they all burst into tears and worshiped for a long time.

"Really simple character of the primitive natives, saving you is considered to be a gift for taking away the Super Dragon Ball!" In space, Muiyang lightly laughed, then aimed at the next target instantaneously and went away.

The next target was the next one.

.....

The green skirt clung to her long and slender legs, and Vados nodded appreciatively at this human from the seventh universe.

"Nice kid, the power just now is also very subtle, and it seems that it should not appear in a mortal's body. By the way, his sublevel is comparable to Grand Kai, so it can't be said to be a mortal. It's just a pity that he's not from the Universe 6."

Grand Kai level Level 6 Dimension, one step away from the Level 7 Dimension of Universe Level, which was the level of Supreme Kai Apprentice and God of Destruction Candidate.

Vados had a feeling that maybe in a few years, Universe 7 would surpass Universe 6 in terms of experts.

Just then, a divine thought came through the divine staff underneath Vados, a signal from the God of Destruction Planet. The black crystal ball shone a few times, and Vados was sure that the God of Destruction Champa had woken up from his sleep.

"Hey hey, Vados, where are you? I am dying of hunger, go and prepare food for me. I want to eat delicious white-boiled eggs." The God of Destruction Champa's exasperated voice came from the crystal ball, but when it came to the last thing to eat, there was a faint sound of saliva swallowing.

Vados ruffled her hair and said with a serene face, "Please wait a moment, Lord Champa. I'll go prepare the white-boiled eggs for you right away."

He said, "You must be quick, and the bigger the egg, the better."

Vados pressed her forehead with difficulty, "Lord Champa, you are making it difficult for me, forget it, who called you honorable, I will think of a way, that's all ....."

After saying that, regardless of how Champa said, Vados unilaterally cut off the contact. She did not have the intention to move her body and continued to observe the movement of Muiyang.

"Lord Champa is so fat, starving a few days will contribute to his health. Well, let's say that the raw materials for white boiled eggs are particularly difficult to find, then casually bring him an ostrich egg. Lord Champa should be very happy."

"Alas, is it not a bit too extravagant to give Lord Champa an ostrich egg, in case his mouth gets gripped?"

Vados murmured as if she didn't think she should take out something that good.

## Chapter 458

On the other hand, after collecting the first Super Dragon Ball, Muiyang rushed to the other two places in a very good mood. The collecting of the second Super Dragon Ball also went very smoothly.

Once the power of the Acceleration World was covered, the second Super Dragon Ball had nowhere to hide and fell into Muiyang's control.

In the Acceleration World, including the three Dragon Balls that belonged to Universe 7, five Dragon Balls were gathered together, flickering rhythmically in the dark and empty space. It was only two short of collecting all the Dragon Balls.

"Keep up the good work, collect one more, and then I can return to the Universe 7."

After carefully observing those five Dragon Balls, Muiyang returned to the dark red background of the starry sky and continued to collect the last Dragon Ball of the Universe 6.

However, when collecting the last Super Dragon Ball, the process took some twists and turns because a group of cosmic forces actually occupied the Super Dragon Ball. A ship was stationed on the Super Dragon Ball and literally using the Super Dragon Ball as a fortress.

Muiyang wanted to take that Super Dragon Ball, inevitably had to clash with that force.

However, because of the final whereabouts of April, the importance of collecting Super Dragon Ball was too great. No matter what, he was determined to get this Super Dragon Ball. since borrowing it was impossible, Muiyang could only openly rob.

The result was very clear. With Muiyang's strength close to the Majin Buu level, the Universe 6 people were not his opponent. In this encounter with Muiyang, these people could only be considered unlucky.

The Super Dragon Ball was put away in the Acceleration World immediately after, and Muiyang smiled and left by teleportation.

Those cosmonauts with bruised noses watched their space fortress being taken away by a fierce bandit, each one with eyes wide open, not knowing what to do.

"Bad luck!!!" The bosses of the cosmic forces wanted to cry and looked at their bruised and battered men but could only bear the tears and eat this loss.

.....

"Junior, your action is quite fast, since you have already collected the wishing pearl of Lord Zalama, the Dragon God, then I will send you back to the Universe 7 next."

In the vast and boundless universe, Vados appeared beside Muiyang in an elegant posture.

"Miss Vados. I have troubled you." Muyang said politely.

"Oh, nothing, but you were actually able to collect such a huge wishing bead without a sound. You must have a lot of secrets on you," Vados said in a clear and cold voice.

"Mm." Muyang nodded his head by default.

Vados smiled and did not mean to look deeper. In fact, when you've reached such a realm as Vados, there were only Great Priest and Zeno above them, and honestly, there was nothing in the universe that could attract their attention.

Furthermore, the angelic race was originally a completely neutral divine race, and they would hardly interfere with any strife, a truly noble race.

"Well, come over and grab my shoulder. I'll send you back now." Vados waved the divine staff in her hand, and her delicate voice rang out at Muyang's side.

"Okay."

Muyang responded, walked up to Vados, and placed his hand on her shoulder. After all, it was a female angel. Muyang's actions were very disciplined, trying to show a gentleman's side so as not to give the other party any misunderstanding.

Vados calmly glanced at Muyang, nodded slightly, and then gently nudged the divine staff a few times. At once, a seven-colored light curtain shone up, just like before when Whis carried him through the universe, a seven-colored channel appeared in the eyes.

A glorious light shone in this closed passage; each light was stretched long, countless crystal clear spots flickered, as if the spring breeze blew by the cherry tree, bringing down a piece of delicate and graceful petals .....

"Don't be so nervous. When crossing the universe, you'd see that one spot that is attached to the universe outside the small world projection. According to Whis, you collect wishing beads because your wife disappeared in the Universe 7..... she may be in a world over therein."

"If you let go now, with good luck, you will be able to enter those worlds, but of course, with bad luck, you will fall directly into the chaotic energy turbulence, and your body will be torn apart."

A clear and ethereal fragrance came to the sense, Vados turned her head to jest at Muyang.

Muyang swallowed a bit, sure that this sister of Whis was really a dark angel.

Staying with such an angel, Muyang felt a lot of pressure, but it was good that the process of shuttling through the universe would not use up too much time.

About a few minutes later, a gorgeous pillar of light ran through space like a curtain of water, shuttling from the void to Universe 7.... The invisible ripples rippled out, the surrounding colored light suddenly flashed, and a dark and deep cosmic starry sky came into view, followed by bright starlight coming from everywhere.

Muyang and Vados floated in the universe, and they had arrived at Universe 7.

Vados nodded her divine staff and said, "We have come to Universe 7. You should be very familiar with this place, and there is no need for me to send you to the Destruction God Planet."

"Indeed, there is no need." Muiyang said seriously.

Vados nodded her head, the green skirt on her body whirring and swinging, "In that case, I'm going back to Universe 6. Lord Champa is hungry for several days, still waiting for me to go back to feed him!"

People who didn't know would think she was raising a pet!

Muiyang's head could not help surfacing a few black lines and had a deep understanding of Vados' character. She was even worse than Whis, not treating the God of Destruction as a god at all.

"Miss Vados, thank you for your help." Muiyang sincerely thanked her.

Vados covered her mouth and smiled lightly. Her beautiful eyes revealed a smile, "No need to be so polite, come and play in the Universe 6 often when you have time. I will treat you well."

After saying that, Vados very elegantly turned the divine staff. The divine staff flew in the air and tapped the void when it landed, and then the seven-colored light shone again, and then a closer look, Vados' figure had disappeared.

"She really comes and goes quickly!" Muiyang took a deep breath and took out the Dragon Ball Radar to look for the last Super Dragon Ball.

According to his knowledge of the Super Dragon Ball, the last Dragonball located in the Universe 7 was a four-star Super Dragon Ball. Due to its age and long exposure to the cosmic stars, the surface of this Super Dragon Ball was covered with a thick layer of dust, just like Planet Ampera, where Birgil had lived for many years, a rocky planet.

However, the difference was that there was no atmosphere on that rocky planet, and no signs of life flourished.

In the original story, it was not until the Universes 6 and 7 had a Martial Arts Tournament that it was inadvertently chosen by Vados to be the venue for the Martial Arts Tournament.

"The last Super Dragon Ball is farther away, from the radar, in the middle of an unfamiliar barren space, where it is near the edge of the universe, where living planets are scarce, and the ability to move instantly should not be of much use."

Muiyang calculated in his heart. If he were to use a spaceship to navigate, even with the fastest spaceship of the Galaxy Patrol, to fly to the edge of the universe, perhaps it would take a lot of time, so Muiyang directly ruled this option out.

After thinking about it, Muiyang found the only way to rely on Whis' great movement ability.

At this time, he began to envy the "Instant Transmission" ability of the Supreme Kai Apprentice Kibito. Compared to the Instant Transmission of the Yardartian, the Instant Transmission of Kibito was truly magical!

However, that was the ability given by the Universe Rules after becoming Supreme Kai Apprentice, and he couldn't learn it even if he envied it.

Shaking off his head, without thinking about those troublesome things, Muiyang closed his eyes tightly, searched for the location of the God of Destruction Planet, and then swooped to the God of Destruction Planet instantaneously.

When Muiyang arrived at the God of Destruction Planet, Melia and Melis spotted him first and flew over with a cheer.

Muiyang smiled and caught them, then recounted his experience in the Universe 6.

"Where's Whis? I need him to take me to the last Dragon Ball!" Muiyang swept a glance at the dense vegetation on the God of Destruction Planet. In the past, when he appeared, Whis was the first to find them.

Melia said, "Whis brought a small angel not long ago. They are now trying to open the space outside the universe to find April traces."

"A small angel?" Muiyang asked in amazement at his words.

"I think it's an angel, the clothing and dress are exactly like Whis, but short, Whis respects her a lot."

"The angel male and female?" Muiyang hurriedly asked.

'It should not be the Grand Minister himself who came over. He could not hold.'

"Female," Melis said.

At once, Muiyang sighed with relief.

'Wait, the female angel....'

'could it be Angel Kusu of Universe 10, that was the big sister of all the angels, second only to the Grand Minister in status!'

Chapter 459

Muiyang felt very surprised. He did not expect that Whis would actually bring the angel Kusu from Universe 10. They were joining forces to open the world outside the universe; could it be that they were helping to find the whereabouts of April.

If so, then Muiyang would have to thank them properly.

The angels of the two universes joined forces, the hope of finding April was instantly greatly increased. After knowing this news, Muiyang's confidence was instantly boosted.

Looking around the vast planet of God of Destruction, the emerald grass undulated with the wind, considering that Whis and Angel Kusu wouldn't appear for a while, Muiyang found an open space to sit on the grass and wait, while Melia and Melis sat beside him left and right.

"I hope Whis and the others can find out where Little April is." Melia's jewel-like eyes looked at Muiyang, and a clear voice came out of her mouth.

"Yes!" Muiyang nodded his head.

It was just that if Whis and the others were able to find the whereabouts of April, then was his own act of collecting the Super Dragon Balls superfluous? No, Muiyang gently shook his head. Super

Dragon Balls had been collected almost. Even if they could not be used in the end, there was no reason to give up halfway.

"Muyang, how about you accompany us for a little training?" Melis digressed.

Muyang was surprised to look at Melis, who said, "I think we should find something to do."

When Muyang thought that he was idle now anyway, he agreed, "Sure, will you guys come, or will Melissa come?"

"I'll go with Melia."

"Good."

Muyang's smile narrowed, and his body bounced up from the grass at once. Counting up, he hadn't practiced with Melia and the girls for a long time. He used to practice with Melissa in pairs, although they didn't need to be clearly distinguished from each other.

Melia and Melis also stood up, with charming smiles on their faces, like delicate peach blossoms in full bloom. They flew with a serious look to a place not far from Muyang and assumed a fighting posture.

Because there was no fusion into Melissa, so when facing Muyang, they were generally in a relatively weak state.

For his part, Muyang laughed leisurely, then closed his eyes and floated towards the girls. The "Unfettered Instinct" and "Extreme Instinct" were fully opened. Because the realm power had been mostly integrated into the physical body, there was no half-leaked aura on Muyang's body at this time. This greatly elevated the level of combat, as well as interfere with the judgment of the girls.

Before comprehending the advanced realm, they face this Muyang, so they could only rely on the naked eye to judge!

But how could the speed of the naked eye keep up with Muyang's movements?

BOOM!

The figure of Muyang suddenly appeared like a ghost on the side of Melia, stretched out his palm on the girl's stomach, and then with force, Melia was directly bounced out. Melis reacted to try to assist but was also knocked out by Muyang.

Melia and Melis possessed Melissa's battle consciousness, but their strength was only half of hers. Converted to Super Saiyan status, it was about Super Saiyan 2 strength, and the difference in strength was still huge in the face of a master like Muyang, who was close to the level of Majin Buu, so they were no match at all.

With a series of sprints, Muyang's cold face appeared in front of Melia, a hand raised, and sent Melia flying out.

After a few tumbles in the sky, both Melia and Melis landed on the ground.

The two women leaned together and seemed to be thinking, their dark eyes constantly turning, pondering how to face Muyang's attack. It was said that fighting is the best growth process, and the competition between several people of Muyang, although it was not a real battle, benefited a lot.

In order to cater to the power of the girls, Muyang had lowered his own power appropriately.

After about ten minutes, Melia and Melis began to pant, and their cheeks turned scarlet from the exercise.

The battle could almost be over by this point, just as MUYANG also saw the figure of Whis in the distance had flown towards them, and with him came a petite figure.

It was a small girl with a side twist braid, very childish in appearance, less than one meter two in height, light purple divine robe, draped with a set of black coats, and a blue halo around her neck like other angels.

MUYANG quickly judged the identity of the other party at first sight.

The angel of Universe 10 – Kusu.

If it were not known beforehand that the other party was the big sister of all the angels, MUYANG would really treat her as a child.

It was also very magical to say that the angel family, the more petite the figure, the higher the status, as in the case of the Grand Minister and angel Kusu, on the contrary, the middle-aged uncle and big mother image of the angel, the generation is rather small.

"MUYANG, you came back from the sixth universe so soon, ah, did things go well with the Super Dragon Ball?"

Whis landed next to MUYANG.

MUYANG said, "I have collected three Super Dragon Balls from the Universe 6, plus the ones I collected before. I already have six Super Dragon Balls in my hand, only the last one is in a more distant starfield in the Universe 7, so I need to use your ability."

"Well, this is no problem." Whis nodded his head with understanding.

At this time, the little angel Kusu said, "This is the person who needs help this time, the strength is good, I quite envy your Universe 7."

"Oh, sister Kusu, his name is MUYANG." After that, Whis introduced to MUYANG, "This is the angel Kusu from the Universe 10, a mighty angel. With the power of sister Kusu, we finally determined the whereabouts of your wife."

"April was found?"

That meant his collection of Super Dragon Balls was mostly useless .....

"Yes." Whis nodded clearly, then looked at each other with Kusu, and the two divine staffs were erected at the same time, crossed and touched together, and after a green flash, an image about the seventh universe beyond appeared in the void.

"Sister Kusu and I jointly searched Universes 12 and then captured this phenomenon when we transmitted our power to a small world outside the universe ....."

The scene in the picture kept changing, and it first broke through the boundary of Universe 7 to a more versatile blue world (Multiverse). In that blue world, countless fragments were shining with crystal light. Each fragment was a small world; the most striking thing in the blue world was the twelve giant water spheres located in the center, the twelve main universes.

These Universes were in pairs, opposing each other, and together they formed a giant ring, forming the main body of the whole universe.

"Searching according to the aura left on April, we found a world that is only the size of the universe, you see ....." Whis reached out towards the picture in mid-air, and the scene began to change again.

The pattern in the picture began to focus and then burrowed into a small world not far from the seventh universe. That small world was not large, less than one ten-thousandth of the volume of the Universe 7.

As if playing a movie, the picture kept fast-forwarding, and soon an azure planet appeared in front of everyone, and on top of that blue planet, a battle was taking place.

"That planet seems to be Earth."

"There is a fierce battle going on up there."

Muyang and Melia watched very carefully, not wanting to miss any of the images. After accepting the parallel world view, it was easy for them to accept the appearance of an Earth-like world outside the Seventh Universe.

"This is a scene that happened not long ago, the interesting one is later."

Whis once again accelerated the progress of the picture.

At this time, the picture of Earth in another world came out more clearly, and several golden shining figures in the sky gathered together to deal with a sturdy man. These people all had blond hair and green pupils, burning golden flames, but the stout man's body flames leaned toward grass green.

"Those people are Super Saiyans?" Melia's mind wondered.

"That is ..... Son Goku and Vegeta!"

Muyang's heart was shocked. It took him a glance to recognize the identity of those few golden light shadows.

Another parallel small world actually had Son Goku and others, and Son Goku had been able to transform into Super Saiyan!

"That green figure seems to be the 'Legendary Super Saiyan', is it Broly?!"

Melis eyes slightly open, recognizing the identity of the other party. He was her adopted son.

What was going on? How could Broly fight with Son Goku and others? And ..... the Legendary Super Saiyan was so weak, even the ordinary Super Saiyan state of Son Goku could bear him.

At this time, Kusu spoke, "The small world and the whole universe in the big universe are not the same. Although there may be a similar history, but not the same person."

For the people of Universe 7, only the Universe 7 in another parallel time and space was the counterpart to themselves, and the other small worlds were just similar.

Muyang nodded in understanding, probably judged that April entered should be a world similar to the theatrical version of Dragon Ball.

"So, where is April?"

"Don't rush." Whis held a smile, and then screen jumped again. This time April's silhouette appeared, accompanied by April also appeared Android 21.

As soon as it appeared, April transformed into her demon form and then attacked the crazy Broly.

Broly was completely irrational. In the face of April's attack, in addition to yelling, he was the instinctive resistance; there was no intention to escape, only the magic of April's figure constantly flashing wounded Broly seriously.

Then another fierce attack came.

The toe landed on the ground.

BANG!

Dust flew, the ground shook violently, and April's frenzied Broly was directly crushed and then completely killed.

"Well .....", the two women gulped.

"April has killed our adopted son."

"She really got a hand."

"That's not our adopted Broly," Muiyang said.

Their adopted son, Broly, was a humble and simple good boy, the one in the picture was clearly a madman, and his power was pitifully weak.

The "Legendary Super Saiyan" name was in vain.

After determining the world where April was, Muiyang was not worried about her safety. In that small world, the power level was obviously not high, and April's power was already invincible, plus Android 21, which did not look very evil. He could rest assured a lot.

Chapter 460

"That is a world where even Supreme Kai does not exist, and Supreme Kai is already the highest deity. No, perhaps there, the level of Grand Kai is able to be called a Supreme Kai."

Whis continued, "Combining the power of sister Kusu, we have pinpointed to that world."

"As long as they stop traveling through worlds indiscriminately, I think we will be able to find them soon. Luckily, their spaceship's energy has run out, so for the time being, we don't have to worry about them leaving that world."

"Then how should I travel to that world to bring April back?" Muiyang asked sincerely.

Kusu dragged her divine staff around Muiyang many times with interest and said, "I can use the angel's power to teleport you there, but we can only send you there, but we cannot guarantee that you can return safely."

'Only responsible for sending, not responsible for returning. It was the same as just killing but not burying.'

Muiyang spat in his heart.

When Melia and Melis heard that, they looked at each other. They did not want MUYANG to take this risk.

MUYANG gave them a reassuring look and let out a long breath, "It seems that my search for the Super Dragon Balls is still useful."

If you use the power of the Super Dragon Ball, you should be able to directly wish to bring April back, but to do so, was it too simple and crude? It would also be a waste of the Super Dragon Ball's wishing power.

The Super Dragon Balls had not been collected yet, so the wishing thing had waited to summon the Super Dragon.

After bowing his head and thinking for a while, MUYANG said to WHIS, "Now that things have come to a head, let's collect the Super Dragon Balls first. I may be able to obtain some special abilities through the Super Dragon Balls."

WHIS smiled, "That is indeed a good idea."

ANGEL's power to locate April's whereabouts was already the limit, and it simply could not penetrate the universe and other small worlds. Sending people back and forth, in fact, was not their area of responsibility. If something happened, he should go to the Time Patrol. —Of course, the Time Patrol was always understaffed, and MUYANG did not expect them to be able to help immediately.

Next, the plan was set, and WHIS took MUYANG to find the last Super Dragon Ball, while KUSU remained in the Universe 7's God of Destruction Planet.

A pair of lavender eyes wandered over the bodies of Melia and Melis, baring their mouths for a moment, wondering if they should be abducted to the Universe 20.

.....

The lower realm, The edge of the Universe 7.

The closer you get to the edge of the universe, the emptier the starry sky becomes. The barren area where the last Super Dragon Ball was located could hardly see any starlight, and naturally, there would not be any life coming here.

A haze of light came through the starry sky. MUYANG and WHIS floated above a rocky planet, surrounded by several other similar planets.

"Is this the planet?" WHIS pointed to the rocky planet below.

"Yes, that's it."

"Watch me."

WHIS nodded his head, and with a boing sound, the divine staff aimed a light point downward.

At once, an invisible wave of light jumped, dragging up a twisted band of light and blasting toward the rocky planet below.

That was the power of spatial distortion.

"Huh!"

KA-CHOW!

The universe was calm and soundless. One second it was uneventful, the next second the sky directly collapsed, as the twisted band of light fell on the rocky planet, the layer of rock wrapped around the surface of the planet that could be seen clearly with the naked eye collapsed violently inward the moment the band of light appeared. The whole rocky planet seemed to tremble.

The dust solids attached to the surface of the planet were violently shattered by the power of space.

Soon, the planet's surface cracked a deep furrow, and gradually the furrows grew until they covered the entire planet in various places.

BOOM!!!

Finally unable to withstand the spatial force of the bombardment, the entire planet exploded, revealing the orange-red as if glass-like material inside.

Four hot gold bright red stars were also revealed; regardless of the angle of view, it was very bright and vivid.

This was the Four Star Super Dragon Ball.

"No matter how many times you look at it, the grandeur of the Super Dragon Ball is awe-inspiring. The 37,000 kilometers in diameter is also a deterrent, and what great power the Dragon God Zalama who made it possesses!"

Looking at the Dragon Ball that gave off a pearly luster, Muiyang smiled happily.

"Take out the other few Super Dragon Balls. Summoning a Super Dragon requires the use of a special 'Word of God', which you have not learned."

'So, I'll have to rely on you later, Whis....' Muiyang silently thought in his heart. He took out the six Super Dragon Balls in the Acceleration World and was not at all worried that Whis had coveted this wish of his.

Because the position of the angels stands really high –high enough that they would not even put the Super Dragon Balls in their eyes.

Such a realm, Muiyang thinks he could not compare.

With an ooh, as the power of the Acceleration World opened, six behemoths appeared next to the Four Star Super Dragon Balls as if they had burst out from the other end of the wormhole. Then under the guidance of Muiyang, these seven Super Dragon Balls finally converged together.

At this moment, in the middle of the vast and boundless cosmic space, seven giant Dragon Balls were arranged together, looking spectacular!

"Do you want to summon the Super Shenron right here?"

"Yes." Muiyang stared at the seven Super Dragon Balls and said decisively.

Whis smiled, turned his head to the seven Super Dragon Balls, and used the "Word of God" to recite the summoning incantation, "Come out, Dragon God, please grant my wish!"

Because it was the language of God, so Muiyang did not understand a word.

When he heard Whis' voice, the entire void was silent, as if it was the calm before the storm. The whole universe was brewing a terrifying atmosphere.

After a long period of tranquility, the universe suddenly rang out a burst of thunder, as if penetrating the long river of time, from the distant chaotic era, that suddenly rang out like a thunderbolt at the opening of the universe, the moment countless sacred vastness of breath diffused up, in the blink of an eye, it diffused myriad galaxies.

The seven distant Super Dragon Balls, which were even more gigantic than the planets, shone with golden light more and more quickly, and these lights became brighter and brighter and soon exceeded the light of the stars.

By an infinite great force of traction, seven Super Dragon Balls were in a certain order. Four Super Dragon Balls in the middle, three Super Dragon Balls rotated around, a trace of golden lightning in the Super Dragon Balls between each other traction, turned the whole world into an incomparably magnificent golden scenery!

Golden clouds pervaded between the stars and rivers, and all the stars were bathed in a golden ocean.

ROAR!!!

A huge dragon roar resounded through the universe, and the seven Super Dragon Balls burst out in a massive amount of golden light at once, which meandered and soared towards the depths of the universe.

At this time, the Super Shenron appeared.

BOOM!

RUMBLE!!!

The golden body of the Super Shenron manifested, with a huge angular head and two blood-colored eyes full of majesty, the image of the Super Shenron was a sacred dragon with two wings, with a long and slender body, a strong physique, infinite golden light, very solemn.

With two wings on its back, everything changes!

After the Super Shenron appeared, the size of the Super Shenron began to expand rapidly, from the size of a planet at the beginning to the size of a star, then grew to the size of a river system... A bite of a planet, a bite of a star, and finally simply swallowed a river system in one bite. After the two wings opened, it directly exceeded the size of the galaxy, and after that, the body continued to get bigger .....

When the Super Dragon really took shape, each of its scales was the size of the galaxy, and the vast Universe 7 seemed to have become a cage to trap the Dragon, and the small space did not even allow the Super Shenron to soar to its heart's content.

Although he had been prepared, Muiyang was still stunned by the exaggerated size of the Super Shenron.

"This Super Shenron's appearance scene is much more imposing than the Earth Shenron and the Planet Namek Porunga!"

When the Earth Shenron appeared, at first glance, it was frightening; the Planet Namek Polunga was solemn; and the Super Shenron, on the other hand, directly made people feel the insignificance of the universe.

Ow!!!

A dragon roar that shocked the universe.

The Super Shenron, in its complete form, raised its head proudly, and countless spiraling river systems floated around the Super Shenron were as small as dust.

At that moment, the Super Shenron opened its huge mouth and swallowed the vast starry sky where Muiyang and Whis were.

Except for Whis, who remained calm, Muiyang felt his legs trembling.
