

Ball God 501

Chapter 501

"Yes, the Dragon Balls can fulfill a person's wish." Bardock nodded, "Your name is Vegeta, is the prince of Planet Vegeta, I met you back then, by the way my name is Bardock."

Bardock was considered a celebrity at the time of Planet Vegeta, Vegeta more or less heard of his name, but now he was more concerned about the resurrection of Shasley. His eyes swept over the people present, and then stopped at Piccolo's body, "I've long heard that Namekian can do magical magic, is that Dragon Ball made by that Namekian?"

Piccolo skimmed his mouth, "I didn't make the Dragon Ball, but it does have something to do with me."

"Where are the Dragon Balls and how can I find them?" Vegeta asked excitedly, "I just want to save Shasley, absolutely no other ideas."

"No hurry, originally you as an intruder, Kanalita and I should have arrested you, but for the sake of the same Saiyan, I will let you off for the time being, as for the Dragon Balls, wait until you have destroyed the one above"

"There are people?" Vegeta's face hardened, "Is what they call Hore?"

"Probably." Bardock cast his eyes into the distant space.

At this time, tens of thousands of kilometers away from the Earth's location, Hore and others who had been monitoring the Earth's situation through the scouter already know what happened above the Earth. They did not expect that the proud Hore Special Force Team were actually killed by three or two people, which was really ironic!

"District low-level planet, I am underestimating them." Hore's face was gloomy, his purple eyes flashed with a cold light, and his fingers tapped rhythmically on his seat.

He was not sad about the death of the members of Hore Special Force Team, he was angry simply because the other side had made him lose face.

"Dragon Balls? Namekian?"

Hore suddenly ordered, "Hurry up and land the ship, I want to get that so-called Dragon Ball." If that whatever Dragon Pearl could really make a wish, then it was bound to be in his grasp.

The subordinate cosmonauts were thinking that Hore was going to be angry, but they were all relieved to hear such an order and hurriedly controlled the ship to land.

To be on the safe side, Hore released all power before entering Earth. Immediately, a small figure like the Frieza Final Form appeared. It was white, only the top, shoulders and abdomen were bright red, powerful power scraping. There was a burst of whirlwind, and the alien on the spaceship was under pressure, like a sea, constantly rising and falling.

.....

"Here it comes.

"Bardock whispered.

Son Goku, Piccolo and Vegeta and others looked at Bardock with concern, but the next moment, a dark aura from the abyss passed from outer space, Son Goku and others looked horrified, all stunned by the terrifying aura.

"So terrifying, even from a distance to sense a little, the blood has a feeling of stopping the flow!"

"With the other party's strength, if you want to kill me, you only need to blow a breath. His strength is similar even compared to Birgil....." Bicker's face was ugly, Birgil has at least 50 million combat power, the strongest person he knows, and this aura that suddenly appeared is even more powerful than Birgil.

"What's wrong with this world, why are the experts coming out one after another!" With crystal cold sweat on his forehead, Vegeta hugged Shasley's corpse and muttered to himself.

What he saw and heard this day, let Vegeta physically and mentally exhausted, there was a feeling that the world was strange.

People said 10,000 power level were rarely seen it, how come so many strong people suddenly appeared?

Kanalita tilted her head to the sky, clear eyes narrowed, "Mr. Bardock, I'm afraid you'll have to step in this moment."

Bardock laughed loudly, "Leave it to me, just a worthless guy. If you don't make a move, you'll be preempted by those little guys." He was not the only strong person on the earth, and Bardock already felt three powerful ki starting to rise up in the direction of the Great Azure Mountain.

Hoo-hoo-hoo! The sky was as black as ink, the terrifying ki kept pressing down, as if to herald something, and lightning started flashing in the dim clouds.

A disc-shaped airship revealed itself through the clouds.

"Ah, so there are other enemies, that huge spaceship, does it mean that the enemy is the whole fleet? I wonder if Goddess Kanalita has any way to stop the other side!"

The blonde host had already jumped down from the helicopter, and the camera was about to point at Kanalita when she saw Kanalita's side suddenly swept up a golden glow, and a sky-rushing aura rose up.

"Hmm? What a powerful energy!" Violent storm wind blowing over, all people could only use both arms to block in front of the forehead, the body in the huge wind in the Middle East shaking west like floating weeds.

"Ho!"

A low bellow.

Bardock went against the wind split the air waves, and suddenly golden flames burned up.

Bardock's hair and eyebrows instantly turned golden. His eyes turned from black to turquoise, flashing a cold light, turquoise pupils cold and piercing, without a trace of emotion. The whole person was wrapped in a blazing flame, aura like a rainbow, like a dazzling star.

Vegeta came loser, dazzled at the changes in the body of Bardock, "Is this"

"It's Father's Super Saiyan Transformation!" Son Goku said enviously. Although he had seen it countless times, it was still overbearing. The violent power, surely worthy of born Warrior Race.

"Super Saiyan, Sure, Super Saiyan was born in Saiyan!"

Vegeta was amazed at mutter to oneself, perhaps because the previous battle had caused him too much shock. In the face of Bardock's Super Saiyan Transformation, Vegeta didn't have the idea of giving up, but instead looked like a target. Perseverance.

Nappa was now incoherent, "Vegeta, that is Super Saiyan in Planet Vegeta, actually exists..."

"It's Ah!" Vegeta lamented.

Piccolo gave Vegeta a glance, "You have been wandering in the universe for so long, haven't you heard of God Mu Force? Earth is the home base of God Mu Force, and Bardock is the well-known Warrior in God Mu Force, at Earth. There is more than one expert like Bardock."

Vegeta expression was bland.

There were several similar to Super Saiyan? If he knew this point early, he would not choose to come to Earth.

But... to be able to see Super Saiyan, this choice did not seem to be bad. The premise was that Shasley could be saved... Dragon Balls, he must get it.

When Bardock transformed into Super Saiyan, it seemed that the sense came to the sky, and the three powers on the Great Azure Mountain were all smothered and concealed.

"Kakarot, take a good look, I will show you the power of Super Saiyan." "Yeah!" Son Goku forced nods.

Raising the head, Bardock's body was short, then jerked up, and immediately grounded down the severe dozen meters, and the range of one kilometer of the circumference collapsed.

The golden blond hair host and his team were standing still, and if it wasn't for Kanalita, they couldn't see it. They used Kami's power to help, and they all fell.

The golden blond hair host who stood firm did not want to miss this once-in-a-lifetime opportunity, and quickly called his team to point the scene at the sky.

In the golden Lookout, there was a loud noise of bang bang bang, and the Disc Spaceship all fell.

"Hateful, that person... is the general of God Mu Force, how can he be on Earth?" Hore studied the information that King Cold gave them, so I knew Bardock's identity. When he saw Bardock, he had a huge heart. The sense of crisis.

"Even King Cold is not his opponent, I can't face him hand to hand combat, but Dragon Balls is on Earth..."

Hore had a tangled look and was really reluctant to give up Dragon Balls.

The last greedy thought took the upper hand and he was ready to let go.

But Hore didn't know, this time he had to pay a heavy price for his greed.

Bardock's strength was far above him. Although Bardock hadn't made an upward breakthrough in recent years, there was at least 500 Million in power level. Even if King Cold sees him, he has to worry about it. Hore's strength was similar to that of Frieza. How was his opponent.

So the next battle was almost a one-sided blood abuse.

In the face of Super Saiyan Form's Bardock, Hore continued to be embarrassed.

Swoosh, Bardock's energy blade was cut on Hore's body. Hore had a painful pain, and the pain of the heart rushed into his heart. His white tail was cut off, and then it was even more miserable. The arms and legs were cut off successively, and the handsome body was cut. Become incomplete.

"Aaah Ah! !! Hateful, how could I not be your opponent? Is this the power of Super Saiyan?" Hore looked bitter and couldn't wait to slap himself. He knew that he shouldn't come to Earth.

"Cracking a joke, I can't die here!"

Escape! Just escape from Earth and he would be safe.

Hore knew that he was invincible. When life was threatened, life-saving was the first choice. At this time, dignity could be put down, so Hore did not say anything, directly moved towards outer space.

Chapter 502

"This guy wants to run and escape!"

When he saw that Hore was going to escape in the direction of outer space despite being hit by Bardock's ki wave, everyone present immediately knew what he was planning to do.

Although the Saiyans were able to exert unparalleled power on the planet, the body had limitations. Once the battlefield was transferred to outer space, then even the Super Saiyans could only stare, after all, they were not like Muyang who could survive in the universe.

"Do not worry, will not let him escape." A cold light flashed across his face, and Bardock said confidently.

Swoosh! Swoosh! Swoosh!

Bardock threw a series of continuous ki waves toward the sky, which were one after another, densely covering the entire sky like a dense curtain of bullets forming a huge covering net. Faced with the saturation attack released by Bardock, Hore's eyes were red with anxiety, his body power exploded steeply, and he ran towards the universe regardless of everything.

"Escape, escape!!!" In addition to this one thought, Hore's brain was blank.

Reality was such a bonehead, giving Hore not much chance. His escape was fast, and he was about to break out of the atmosphere, when he saw the deep background of outer space, he revealed a smile, the joy of surviving after the robbery made him forget the defeat he had suffered earlier.

"You want to escape just like that, did I agree?" Bardock's cold voice suddenly sounded beside his ears.

The golden light rushed up from the ground to the sky, and Bardock had stopped in front of him.

As if seeing a ghost, Hore's heart trembled, his face was swiftly pale to the extreme, he spat blood in despair, "What to do, is it really going to die here?" Hore then angrily roared, he sinisterly opened the purple pupils, apparently wanted to fight for his life!

At this time, the thought of escape had been impractical, not to mention the ability to escape from the hands of this Super Saiyan. To escape, that the vastness of the endless universe he would wander alone for how long? At this time, King Hilch and King Cold must have known the situation on this side of the Earth, but look at the Super Saiyan's momentum, perhaps even if his father came personally, it was also bad luck.

It would be a dream to expect them to send a spaceship to Earth to save him, maybe they were already heading towards the so-called Planet Namek.

"I'm not willing!" With such grief and anger, Hore's heart was endlessly regretful. How he would not have come all the way to the North Area if he had not received the message from King Cold.

If not for the pursuit of Vegeta, he would not enter the Earth, the dragon's den. However, it was useless to think about this now.

As in the original Frieza was not an opponent of the Super Saiyan state of Son Goku, Hore was also the same. In the hands of Bardock, he did not have any power to fight back.

"Your biggest mistake is to come to Earth."

Bardock leapt to catch up with Hore, and then aimed his palm at Hore from a high position, a bright and eye-catching ki power chop round and light fly over, all the way to cut open everything along the way.

"Puff!"

The expression stiffened on his face, and amidst a look of dismay and remorse, Hore's body was split into two halves by the sharp ki chop.

"A pathetic end, but you are to blame for this!"

Bardock finished with an expressionless face and released a ki wave to completely destroy Hore's torso.

"The enemy has finally been eliminated." When he saw that the battle was over, Son Goku said excitedly.

Vegeta looked on in shock, "This is the power of a Super Saiyan! I'll definitely have it too."

"Although the enemy was destroyed, but the environment here is also destroyed!"

Looking around the face of the prairie, Piccolo frowned, but to be able to preserve the Earth in the face of such a powerful enemy, it had been very rare. Although he had experienced a Dragon Ball strengthening, in the face of increasingly strong enemies, the strength of the Earth couldn't keep up again.

"Mr. Bardock, please use the Dragon Balls to resurrect Shasley." Vegeta put aside his condescension and pleaded with Bardock.

Bardock stared straight at Vegeta for a long time, "Wait for this."

Speaking of Vegeta's identity or the Earth's invaders, despite the Saiyans, he could not be spared because of his identity, not to mention the Dragon Balls was the Earth's secret treasure, how could it be so easy to lend. Vegeta probably knew this, so the request was particularly sincere.

Eventually Vegeta borrowed the Dragon Balls as he wished, but also paid a great price.

After successfully resurrecting Shasley, he would need to join the God Mu Forces in the days to come and fight around for them, but of course such days were actually voluntary for Vegeta, who wanted to explore the secret of turning into a Super Saiyan from Bardock's body.

Meanwhile, the other side of the universe.

King Hilch learned through the contact device of the news of the death of his son Hore. His heart was saddened at the same time, but also shocked by the news coming from the Earth side, "The Dragon Balls that can grant wishes, does it mean that the rumors about the Namekian are true?"

"Someone, hurry up and gather information about the Namekian for me."

Compared to the death of his son, King Hilch was swayed by even more fiery emotions at this time. If the rumor of the Dragon Ball was true, then he was going to be happy.

And Earth, he was not willing to risk.

.....

"Hey, although that guy Hore died, but he brought me good news. I didn't expect that the tiny Earth is actually the stronghold of the God Mu Forces, but it's really a dragon's den!" King Cold's eyes glittered with a cold light, "That guy Hilch must have already gotten his idea on Planet Namek."

"Someone, sail the king's ship to Planet Namek, in addition, put the news out, I want more people to know that I went to Planet Namek."

King Cold believed in the authenticity of the Dragon Balls of Earth more than the illusory Planet Namek.

Soon, the news about King Cold's whereabouts leaked out through certain channels, and when it was learned that King Cold had led his army to Planet Namek with great fanfare, King Hilch's side became even more anxious, and ordered his men to march towards Planet Namek without much preparation.

The intelligence network of the God Mu Forces spread all over the North Area, so of course they also got the news, and the results soon reached Earth.

Bardock decided to reinforce Planet Namek after thinking about it, and the experts sent were the elites of the God Mu Forces. Son Goku and others strongly requested to go, and Piccolo, because he had received instruction from Birgil, finally also followed along.

When all the people hugely walking in the road to Planet Namek, King Cold was leisurely drinking wine, sneaking towards the Earth in a small spaceship.

All of this seemed to be in his plan.

Now that the strongest enemy had been lured by him to Planet Namek, the Dragon Ball of Earth was within his reach.

Universe 6.

Two streams of light traveled through the dusty deep valley, both extremely fast, quickly separated after each collision, and then collided together again the next second. Two silhouettes were seen in the sky as they sped past, hitting the ground to the sky, and scurrying all the way down from the sky to the ground.

The sky lightning and thunder, fist shadow intertwined, qigong wave overflowed out, tiny gravel was directly crushed into pieces.

All kinds of earth-shattering sound constantly came, just a few breaths, Muyang and Hit fought countless times.

The "Flashing Time" technique was very strange, but under the restrictions of Muyang's Acceleration World, this set of tricks lost its mystery for the first time, and now both Hit and Muyang were competing for their true strength, and many of their supernatural abilities were discarded.

The two sides had been fighting back and forth for some days, but neither side could do anything to anyone.

Chapter 503

On a broken stone hill, Hit, wearing his leather-like coat, sat still on the raised rock, his blood-red eyes looking ahead as the sun set over the hill, the sky reflected in red fire, the clouds as if they were on fire.

"You are the first person to have fought me for so many years and still be alive." Hit's hard voice said.

Muyang laughed, "So I'm really lucky."

"No, this is because you are strong enough, so strong that even I can't help you, and should be second only to God of Destruction in the universe." Hit's words were few, and this was the first time he positively evaluated Muyang's strength.

Hit's eyesight was extremely high, his own strength was the top of the Universe 6, the strength of the second only to the God of Destruction, the only time he failed was when he faced the destructive Champa, but now, Hit's list of strong people to add the name of Muyang.

"Thank you so much." Muyang smiled lightly. The strength had indeed improved a lot in the past few years, from a few years ago when he needed to borrow the power of the Acceleration World to barely stay alive in front of Hit, to now being an even match.

Hit said, "My mission has been completed, I expect that the next time we meet we can still have a painful fight."

The next time we meet, it might be the time of the Universe 6 and 7 Martial Arts Tournament Muyang thought silently in his heart, then nodded, "Goodbye, I'm going back to Universe 7 as well."

Hit waved his hand towards Muyang, then stood up and turned his back to Muyang, his hands in his pockets, his stride forward, and his figure became blurred, seemingly entering a mysterious other dimension.

"It's time for this adventure to end here, it's been a few years, I don't know how it is over in the seventh universe."

Muyang took stock of the time, "Gee, it's already time for Vegeta to enter the Earth. It's hard to say if he'll still come."

The plot has been ruined by him, and the butterfly effect was even bigger, and Vegeta would eventually come to Earth Muyang. Of course, the strength was achieved by him. He was no longer stuck to the so-called original story plot, because the familiarity of the plot could no longer help him, at most as a flavoring agent, adding a little taste to the plain life.

The only thing was, for nothing less than a good show, his heart felt some regret.

"It's time to go back." Patting down the dust on his body, Muyang grinned and prepared to go back to Universe 7.

However, just at this moment, the Accelerated World in his consciousness violently and violently shook. The cluster of tremors emanated from the depths of the soul and seemed to have a feeling of tearing the soul apart, yet the next second the Accelerated World calmed down again, as if it came and went without a trace, without a trace.

Muyang was very attentive to the Acceleration World to do some checks, and the result was it did not have any abnormalities.

"It's not the Acceleration World, could it be the influence of the external world?" Muyang sank his mind down, the Acceleration World was his most important magic treasure, something must not go wrong.

Closing his eyes, the silver energy shone with a cold glow, a flawless pressure spread out, Muyang's mind spread out with the power of the Acceleration World, as if the time had gone backwards, the light and strange visual scenery clashed directly with the sensory experience, Muyang stood on high overlooking the entire universe.

Then the thinking continued to rise, and then into the chaotic sea of energy, where there were several large blue-colored water balls resting peacefully, one, two, three, four, a total of four all-universe

Uh four?

Muyang's soul suddenly hit a chill.

He remembered that when he looked here a few years ago, it was clearly three full universes, when there was one more?

The three Multiverse time and space were divided into original story world, parallel world, and world formed by itself. The parallel world was generated long ago by the Universe 12 scientists using Time Machine. That Time Machine was now in the hands of Supreme Kai in Universe 12.

Then, how was the fourth all-universe world born?

Could it be that the violent shaking of the Acceleration World before was because of this?

Muyang, whose mind was hard to calm down, put his thoughts away and later thought that he still had the contact card of the Time Patrol in his hand, so he hurriedly contacted Pitou and Noether who were on a mission.

"Mr. Muiyang, so you have noticed the situation over there! The fourth multiverse was caused by people in a certain world messing around with time machines not long ago, it's not a big problem because it's within the multiverse space-time defense system and won't affect the world."

Was the Time Machine caused by other Parallel World trunks, or Cell?

After hearing the time machine, the first thing that came to Muiyang's mind was them, but of course, he did not rule out the case that the time machine in Universe 12 was used again.

"The real problem facing us now is what the group from the Dark Demon Realm is planning again!"

"What? How is it related to the Dark Demon Realm again?" Muiyang's face was puzzled. The story of Dark Demon Realm Pitou had previously been introduced, and it seems to have something to do with Demon Kai Mechikabura.

Pitou located on the other side of space-time said, "A few hours ago I and Noether just destroyed a space-time singularity, the location is out in that full universe where you live, the time is probably some time thirty years ago"

Getting Pitou's answer, Muiyang knew why his Accelerated World would produce violent tremors, because someone was trying to split the space-time of this whole universe that Muiyang was in.

If the other side chose a little earlier, such as a hundred years ago, then the space-time split would have split, because after the split was a completely different parallel space. Muiyang didn't believe that at that time the parallel space after the split, there would be another "own" soul from outside the sky to cross over.

At most, there would be a parallel space and time without himself, and most of them would follow the plot development into the world of the original

No! Muiyang snapped awake.

The Dark Demon Realm's practice of creating space-time singularities was not as simple as time machine travel. When they jumped the timeline, the parallel space-time function of the entire universe was completely disabled, once they were allowed to change history, the world they were in would instantly collapse, and then all the energy would be absorbed by the Dark Demon Realm.

Damn, one actually walked through the ghost gate without realizing it.

The violent shaking of the Acceleration World should be instinctive in self-preservation, wanting to break away from the current full universe.

Although himself who had the Acceleration World enchanted might not be destroyed along with the world because of the change in timeline, there were too many uncertainties.

"It's really too much trouble, suddenly found living in the Dragon Ball world is really full of crisis everywhere."

"Even if you are invincible one day, you still have to live in fear, as long as someone does something in the timeline, you will be knocked back to the original shape at once, the group in the Dark Demon Realm is too unstable."

Muiyang thought with a heavy heart.

The good thing was that this Time Patrol acted fast to avoid a big disaster, but good luck wouldn't always be there, if the next time a person didn't let the other side get it, wouldn't he suffer along with them?

If he could transfer himself out of the timeline, it would be good, Muiyang thought whimsically.

He was not afraid of the time machine, as long as he did not travel to the decades of their lives, there would not be a second self, and even if there was, as long as they do not meet, there was no embarrassment, the problem was the guys who traveled the timeline indiscriminately.

Worried to think for a good, Muiyang did not come up with a good solution, and finally found that just asking for trouble. If he had no way to solve the problem, he simply did not think about it.

Sighing and looking around the dry environment, Muiyang opened the ability to communicate with other worlds by accelerating the world, and instantly a short flash of haze passed, and the next second Muiyang's figure left the Universe 6.

Chapter 504

Time flew. Time passed like a shuttle.

When he returned to Universe 7, it had only been a few years since he left. The God of Destruction Planet had never changed, and the cleansing of time did not seem to leave any traces here.

Melia, Melis, and April were training in the God of Destruction Planet environment created by Whis. Now, the three of them were also in the stage of rapid improvement, and their strength had increased a lot compared to a few years ago.

At this time, a silver lightning flashed.

Whis was slightly surprised and revealed a faint smile. "Muiyang, every time I see you, your strength changes. If you include the ability of Acceleration World, the current you will be able to hold on for a while even if you face Lord Beerus."

Whis greatly praised the changes in Muiyang's strength. The Half-God Level was a region with a relatively large gap in strength. If it were replaced by the level that Muiyang knew, the Super Saiyan God had a preliminary step into the Half-God Level. The Super Saiyan Blue was the middle tier of the Half-God Level, and the Super The Saiyan Blue Evolution or Crimson stage was the peak of the Half-God Level.

Only at this stage did one have the qualifications to compete with the God of Destruction.

For Muiyang, who had the Acceleration World as his backing and had no limits to his strength, the increase in strength was like drinking water. Especially in the stage of showing comprehension of the realm, his advantage was even more obvious. Using martial arts as an example, other people had to work hard to train and accumulate, while he was directly using an ace to push through.

It was really infuriating to compare people.

But even so, the current Muiyang was only able to compete with the God of Destruction, Beerus.

"Whis, how is my strength compared to Beerus?" Muiyang asked with interest.

Whis thought for a moment and said, "With both sides not using special abilities, your strength is equivalent to 80 percent of Lord Beerus' strength. You can last for about ten minutes. If Lord Beerus

uses the power of the Destruction God and you also use the power of the Acceleration World, then it will be very difficult to judge."

"Perhaps Lord Beerus will instantly destroy you, or perhaps you will be able to resist the power of the Destruction God. Although the result of the collision of rules is hard to predict, you will most likely lose. After all, your Acceleration World is still growing, and it is temporarily unable to contend with the laws of the entire universe."

Muyang nodded seriously. "So there's still so much of a difference."

His pure strength was equivalent to 80 percent of that of Beerus.

Beerus had the 'destruction' skill, and he had the 'obliteration' ability. In terms of potential, he might be a little higher, but at this stage, he was definitely not a match for God like.

In the original story, Beerus faced Son Goku, who had just reached the realm of Super Saiyan, and said that his strength was equivalent to 60 to 70 of him. Now it seems like it's mostly just a joke. It's already good enough to have 10.

After all, Son Goku and the others had used the power of multiple Saiyans in order to enter the God Realm.

The real situation might be about the same. The Super Saiyan Red was about 10 percent of the strength of Beerus, and the Super Saiyan Blue was about 50 percent. The strength that Vegeta later reached was about 90 percent when he reached Super Saiyan Blue.

"By the way, Whis, there is another parallel space outside the universe. Do you know about this?"

Whis was stunned. He picked up the Divine Staff and looked at it, "Eh, that's right. Did someone use the Time Machine recklessly? That thing was forbidden by the gods."

"This is bad. My Acceleration World was shaken violently before..." He then told Whis about what Pitou knew, and Whis' expression became serious.

"There's such a thing... Unfortunately, the Dark Demon Realm is beyond the entire universe. There's nothing we can do." Whis rarely felt troubled, but the Dark Demon World was one of them.

These fellows kept disrupting the Time Axis, but only Time Patrol with Supreme Kai of Time subordinate could resist. The gods of the entire universe could only stare. After all, the gods of the entire universe were gods in the field of space. They didn't have deep attainments in time, so it was impossible for them to shuttle through the time axis.

Muyang nodded and sighed, "This is the most troublesome thing."

Whis nodded. "That's right!"

Supreme Kai could use the spatial ring in his hand to investigate the number of parallel dimensions. The authority of an angel was a bit higher, and he could learn more things through the divine staff in his hand. However, even an angel could do nothing against a parallel dimension that had already been born. They could only try their best to reduce the possibility of a parallel dimension being born.

At this time, Whis suddenly smiled. "In fact, the increase in the entire universe doesn't cause any special harm to the entire universe itself. It's just that there are more variables to be wary of."

Muyang was stunned for a moment and asked in confusion, "What do you mean?"

Whis thought for a moment and decided to tell Muyang some secrets. When he first saw Muyang's Acceleration World, he saw his potential.

"Simply put, the development of the entire universe is the same as the change of seasons. There is also a cycle. Every season, there is only one universe in the entire space-time, and there are eighteen universes inside. But as the times develop, the number of parallel universes and the entire universe will increase one by one."

"This is actually very unstable, so Lord Zeno work hard to eliminate the fallen universe under the supervision of the Grand Minister."

"Right, Lord Zeno and the Grand Minister are the highest gods in the entire universe." Whis deliberately explained the identity of Lord Zeno and the Grand Minister.

In fact, Muyang knew their identities.

"Lord Zeno has a Multiverse Supreme Authority. He can clear out all universes and life, and the form is a bit similar to your 'obliterate' ability. And when all the universes in the parallel worlds are wiped out, all the accumulated energy will form a completely new initial universe on the other side of the sea of time and space, and we angels will descend along with him."

"At that time, all Zenos, Grand Minister, and Angels that were split apart because of the appearance of the parallel worlds would once again merge into one and carry out a new development. However, at that time, the newly born universe would no longer have you."

So this was the reason why Zeno recklessly destroyed the universe, and the Grand Minister did not care at all

After Muyang heard this, he roughly understood that the destruction of the universe would not affect the highest gods. Only the eighth level and below would be in danger. And when all the internal universes of all parallel dimensions were destroyed, the season of the entire universe would end.

Sometimes, when faced with problems that could not be solved, Zeno would even take the initiative to destroy all the universes and start a new season ahead of time.

This was the power and ease of a high-level god.

However, for low-level life and gods, it was too cruel.

Space and time is the most mysterious and forbidden power in the world. The destruction of an entire universe is certainly not a small matter. It will be accompanied by the death of billions of lives. Although I have already seen this as a god, from the perspective of human nature, it is indeed a pity.

Noticing the surprise on Muyang's face, Whis smiled and said, "I think there is hope for your accelerated world. If it develops well, it might be able to bear the life of the seventh universe. I am looking forward to it."

Muyang smiled awkwardly, "This really makes me feel flattered."

"That's why you have to work hard. Recently, I heard that the king is very dissatisfied with the current universe. Maybe he will clean up the universe at any time." Whis calmly reminded.

I know that Zeno has been cleaning the Universe for more than a decade... It was the Zeno Tournament of Power.

Muyang secretly said in his heart, but at least Whis' reminder made him mentally prepared.

Chapter 505

For High Level God, the lives of mortals were not the focus of their attention. Their values were different from that of mortals. For them, ensuring the operation of the laws of the universe was the top priority. It was rare to see a god like Whis who could consider the lives of mortals.

After learning the secrets of the entire universe from Whis, Muyang finally solved the doubts that had been buried in his heart for a long time.

Why would the entire universe be destroyed without restraint? The reason was that the entire universe could be reborn again. Sometimes, using the life of a universe to exchange for the death of an unstable factor seemed to be quite cost-effective.

Of course, this was the perspective of life on another level of consideration. Muyang could not understand this.

In God of Destruction Planet, the wind was gentle.

After ending the discussion with Whis, Muyang took a step forward and instantly appeared between Melisa and Melis. When the three people who were fighting saw Muyang appear, their bright eyes suddenly lit up and they actually attacked him at the same time.

Muyang chuckled and raised a hand, drawing a beautiful arc in the air.

Based on Muyang's current realm, although Melia and the others were comparable to Super Saiyan 3, they were still far from being comparable to "Half-God Level".

Taking their attacks lightly, Muyang's figure flashed like a ghost and hit the three of them on their butts.

"Muyang, you actually hit my butt again." Melia looked shy, as if she was recalling the scene when she was a child.

Muyang laughed, "This is your punishment for attacking me. Do you want to do it again?"

Melia rolled her eyes. "I'm not coming. I can't beat you at all."

"Senior brother, when can we become as strong as you?" April's small body leaned over. As her realm increased, the closer she got to the Half-God Level, the more she understood how difficult it was. Sometimes, when she was stuck for a step, no matter how much time she spent, she would not be able to break through.

"Take it slow. The cultivation realm must be calm and collected," Muyang consoled. April walked the traditional path of the entire universe, and what mattered most was the realm.

As a "Legendary Super Saiyan", due to her innate nature, the road ahead was even more difficult. Because she could not comprehend the realm at all, if she wanted to advance to the Half-God Level, she could only rely on brute force. This kind of advancement was equivalent to leaving the mainstream in the entire universe.

If Melia was a beastman Saiyan, she could try to break through to Super Saiyan 4 in the GT World at this stage, but unfortunately, she was not!

Moreover, Melia's so-called Golden Pupil State was essentially holding the power of the Giant Ape in her human form. Its content was already equivalent to Super Saiyan 4, so how could she achieve the breakthrough of Super Saiyan 4 in the GT World?

Of course, the Legendary Super Saiyan was also an extremely unreasonable physique. It was not that there was no hope of breaking through, but it was more difficult compared to it.

After staying with Melia and the others for a while, Muiyang took them away from Weiss and returned to Earth.

"Whoosh". After a sparkling light flashed, the four of them appeared in the small building on Great Azure Mountain. After not seeing each other for a few years, the two children had grown up. According to Melia and the others, Lazuli and Lapis had already been transformed by Android. Their bodies were now soaking in the underground laboratory.

After meeting the two children, the few of them talked about the situation on Earth for the past few years. Only then did Muiyang know that Earth had been invaded by the people of the universe not long ago.

Although the plot had been changed beyond recognition due to the influence of Muiyang, Vegeta still came to Earth as usual and was now following Bardock, Son Goku and Piccolo to Planet Namek.

"They have been away from Earth for almost a month. They should have already reached Planet Namek..." Muqiu asked Muiyang if he wanted to go to Planet Namek. Muiyang shook his head and felt that it was enough to deal with the problem with Piccolo and the others.

"Oh right, what about the Saiyan called Nappa? He and the son of Vegeta, Alex, are now detained in the Lookout by Sister Kanalita. Sister Kanatita wants to send them to the central star of the God Mu Force."

"Send them over. In the future, they can stay with Raditz," Muiyang said.

Muqiu smiled. "Because the battle a month ago was broadcast live all over the world. After knowing the strength of aliens, the martial arts atmosphere on Earth seemed to have become hot again. I heard that the videos of the Martial Arts Tournament have been sold crazily in the past few days."

"This is because I felt danger at close range. It was the same when the martial arts era first opened. It will calm down after a while."

Humans were often a hot species and needed to be stimulated regularly. After a period of madness, they would calm down and forget many things.

Muyang and Melissa hadn't returned home for a long time. However, their home had been cleaned up by Muaiu, Amelia, and the others. After a short gathering with Broly and the others, Muyang brought Broly's son, Elek, to the Lookout to visit Kanalita. There, he saw the Old Kami.

The Old Kami's forehead was full of vicissitudes. He had been living in seclusion above the temple for the past few years. His body was already emitting an aura of decay. He had a feeling that life was coming to an end.

"Muyang, I always have a bad feeling in my heart during this period of time. I thought it was Saiyan who invaded, but now it seems that it is not the case."

The Old Kami said the worry in his heart with a gloomy face.

"Oh, is there such a thing?" Muyang was a little surprised. When he looked at Kanalita, Kanalita shook her head in confusion.

Muyang thought for a moment and suddenly thought of something. He said to Kanalita, "Kanalita, hurry to the west side of Earth, especially in the area near a mountain, see if you can find a strange flying device and confirm if there are any signs of corrosion on the glass cover of the flying device."

Even though Kanalita didn't know what her teacher meant, she still went to the side and began to seriously search.

"Muyang, do you know something?" The Old Kami asked.

Muyang shook his head, unable to determine if his thoughts were correct.

The few of them waited patiently. At this time, little Elek began to run around the shrine mischievously. He met Alex, who was of the same age, and the two children began to play.

In a corner of the Lookout, Nappa carefully hid behind a pillar. "It's the person who took away Raditz. It turns out that he is a member of the God Mu Force. This is their base camp. Fortunately, when he came here with Nappa, he did not cause a big trouble. Otherwise, he would have been slapped to death."

After seeing Muyang, Nappa was scared out of his wits. Fortunately, Son Goku and the others came in time. If he waited for him to kill a portion of the people on Earth, what awaited him would be to be buried with him!

Fortunately!

About ten minutes later.

"Teacher, I saw it. In the mountains near District 1050 in the west, I found the spaceship you mentioned."

When Muyang heard this, a light flashed in his eyes!

"There are signs of corrosion on the glass cover of the flying device?"

"Yes."

Sure enough.

Cell, who was riding the Time Machine, actually came to this world.

Muyang did not think too much about which parallel world this Cell came from. He got the specific location from Kanalita and told her to take good care of Ilk. Then, Muyang teleported away from the temple.

In the next second, his figure appeared in Mount Paozu

"Uncle Muyang?" Bulma, who was drying clothes in the courtyard, cried out in surprise when he saw Muyang.

Muyang said, "Bulma, come with me to a place. There is something you need to study."

"What is it?" Bulma asked.

"Time machine!" Muyang cut through metal.

Chapter 506

The time machine was a device that often appeared in science and illusion. It shuttled through time and space and changed the cause and effect. As a top scientist, Bulma naturally understood the meaning of it. Moreover, it had appeared many times in her sister Tights. It could be said to be famous.

It was just that he had heard of it, but Bulma had never seen the time machine with her own eyes. When she first heard Muyang say that she had a time machine for her to study, Bulma's eyes suddenly lit up.

"Uncle Muyang, do you still have a time machine?"

Then she was puzzled, "But with the technology on Earth, it should be impossible to create a time machine. Could it be made by aliens?"

Muyang smiled. "Don't think too much. Although that time machine has a certain ability to shuttle through time and space, it is actually a space shuttle. You should know that there are many parallel worlds in this world. There are also many genius scientists who can invent a spaceship."

"Oh, so that's how it is." Bulma nodded.

Borna had a very scientific mind, but she didn't think that there was anything more powerful than her in other worlds, because on Earth alone, like Dr. Brief, Dr. Gello, April, and Dr. Omori, who had passed away a long time ago, were all genius scientists that weren't inferior to her.

In fact, this time machine was invented by you in a parallel space... Looking at Bulma's thoughtful expression, Muyang secretly muttered in his heart, but he didn't say the situation out loud.

Whether it was the time machine of Trunks or the time light machine that Cell rode, although they had the ability to travel through time and space at the beginning, it was later confirmed that this kind of travel was a one-time one, and the follow-up was just crossing space.

However, to be able to travel through the entire universe space was also a very impressive achievement. As an inventor, Bulma was indeed a genius scientist.

It was just that Bulma did not know about this right now.

In another completely hopeless world, the enemy was already too powerful to be defeated. In the case of all the warriors dying, at that time, Bulma was at his wit's end. He could only work hard to

study the time technology left behind by the doctor and the space technology left behind by Dr. Brief. He placed his hopes on using the time light machine to change the time and space.

This idea was very vague and bold, almost impossible to see the hope of success, but Bulma in the future world had no other way.

Fortunately, the ending was not bad. Although the time machine did not directly save her world, it gave Trunks the hope of becoming stronger at that time and the world was finally saved.

Floating thoughts stopped here.

Muyang looked at Bulma. "Pack up your things. I will take you to where the time machine is now."

"Okay."

At this time, Bulma didn't care about the work in her hand. She hurriedly ran into the room to pick up her backpack. Muyang also told April about the situation through the communication device. After knowing the news, April also quickly rushed over.

"Brother, where is the time machine you mentioned?" April had just appeared in an instant and came to Muyang to ask.

"On the mountainous region in the west outskirts of the city, but we will only know if it is a time machine after we study it." Although they had already confirmed that it was most likely a time light machine that Cell was riding in the Lookout, they still needed professionals to determine that Bulma and April were the best professionals.

"Uncle Muyang, I am ready. Aunt April, you are here too..." Bulma greeted with a smile after she finished packing up her things and saw April.

"Long time no see, Bulma."

April smiled at Bulma. Then, the two of them were lifted up by Muyang's divine power. It was as if time and space were changing. The surrounding scene suddenly distorted. When they looked clearly again, they were already in the mountains. There were green but sparse vegetation around them.

Muyang and the others were on a hill.

"Come with me. The time light machine is there." Following the path pointed out by Muyang, the few of them passed through the sparse bushes and found a machine covered by leaves in a small forest.

This machine had five metal frames to support it. It looked like an erected capsule, and the upper half was transparent material. But now, the transparent material had corroded a large hole, and the rest of the parts looked brand new, as if they had just been created not long ago.

"So the time machine looks like this." Carefully stroking the metal on the surface of the time machine, there were traces of scratches on some parts.

"Eh?"

Bulma let out a surprised cry and pointed at the logo on it. "Why does this logo look like the symbol of the all-purpose capsule?"

April came over and wiped off the dust on the surface, revealing a circle of special patterns. "It doesn't look like it. This is the Capsule Corporation." In this world, the Capsule Corporation was jointly established by Dr. Brief, April, and Dr. Gero. The logo was also designed by them.

"How could this be? This time machine actually has our company's logo on it. Could it be that it comes from the future?" Bulma was surprised when he saw the logo clearly.

April thought for a moment and shook her head. "It shouldn't be the future. It might be from a parallel world."

Muyang nodded. He was an expert in this aspect. "There are four large worlds like ours in all of the dimensions. There are also many small fragments of worlds... The reason why this Epoch time machine appear here must be because it came from a world of the same scale as ours."

After hearing this, April understood what Muyang meant. This time machine must have come from other universes, or else it would be impossible to penetrate the barrier of the entire universe.

With her finger on her chin, she saw that a metal pillar of the time machine had a few letters engraved on it. It was the English word "hope". Because she had been to the Android World once, April immediately thought that there might be some kind of crisis in the future of Earth.

On this side, Bulma was an action specialist. She bent over and pressed a button on the body of the plane. With a "ka" sound, the transparent glass cover on the upper half of the time light machine opened. Bulma jumped in and found two hemispherical shell insect.

"Uncle Muyang, Aunt April, look what this is. It was found in the cockpit."

Bulma put the two outer shells together, forming a spherical shape.

"It seems to be an eggshell that is hatching something!"

Muyang flew up and held the two balls in his hand. He said to himself, "This is Cell's eggshell. He really came here from another world."

"Take a look at the date of the departure of the time machine and the date of its arrival here," Muyang said to Bulma.

"Okay."

Bulma searched around the cockpit in a flurry. After all, she was a genius scientist, so she quickly found a way to activate the machine. Uh... she pressed a button that was unexpectedly a bit familiar.

"Departure date 7... 88... Eh, it's actually 27 years later, and the date of arrival is a month ago, when the alien (Hore) invaded Earth!"

That's about it.

In the original work, Trunks was born four years later. When he was seventeen, he used the time machine for the first time to find Son Goku with the special medicine for heart disease and told him about the Android. Then he returned to the future and used three years to fill up the time machine again. After that, he found the design drawings of Android 17 and Android 18 together with Krillin and the others.

The time when Cell snatched the time machine from Trunks was three years after Trunks killed Android 17 and Android 18 by relying on the design drawings, which was also twenty-seven years later. The time he arrived on Earth happened to be when Vegeta invaded Earth in the original story.

This Cell came from the original world.

It was the most primitive Dragon Ball World.

Chapter 507

"Search around, maybe we can find something."

Cell should have just come out of the eggshell at this time, and was still in the initial incubation stage.

Muyang, April, and Bulma searched around the time machine, and then found a creature like a cicada in the grass more than three hundred meters away from the time machine. He was moving and struggling to remove the shell on the surface.

"Eh? What is so disgusting?" Bulma picked up the wooden stick from afar and poked it.

"Bulma, stay away from him." Even if it were Cell who had degenerated into his original form, it was not something a weak woman like Burma could deal with.

April approached Muyang and asked, "Brother, what is this?"

Muyang said, "He came from a parallel world in the year 788, which is 27 years later."

When Bulma heard this, she carefully observed Cell. Cell had two hard shells on his head. His limbs were curled and his head was slightly cracked. He was in the process of turning into a shell.

"Eh, the aura on its body is very chaotic, but I can feel the aura of Goku and Piccolo. At the same time, there are also a few other evil auras..."

This kind of creature is obviously not born naturally. Could it be an artificial life?

April immediately thought of the artificial human in the small world.

"It can't be an Android again, right" Bulma asked in surprise.

"It's an Android." Muyang nodded.

Cell was a sFusion's Super Android for Saiyan, Namekian, and Frozen Caln Bloodline. However, due to the combination of too many high-level genes, they suppressed each other. They could only rely on devouring vitality and Android 17 and Android 18 to obtain the final evolution.

"I want to study it!" April's beautiful eyes flashed with a glimmer of light.

"Up to you." Muyang shrugged, indicating that he had no objections.

To be honest, Cell's body had many complicated high-level genes that limited his development. Before he became a complete form, it was a problem whether he could reach the Super Saiyan 2. For Muyang and April, it was like a little mouse in an experiment, a good material.

A smile bloomed on April's face. She held the cicada that was shedding its shell in her hand, and Cell immediately twisted it in resistance.

"Brother, look, he is actually resisting."

"Let me go, who are you people! According to the information, there shouldn't be people like you on Earth?" Cell let out a hoarse roar, like the cry of a cicada, which was especially ear-piercing.

"You can still talk..."

April was even more interested. The hand that was holding Cell directly transformed into the shape of a demon. Her tender arms changed shape like plasticine and directly wrapped Cell.

Cell found that his resistance had no effect at all. "Impossible, how can there be such a powerful guy on Earth? Are you an Android? No, other than Android 17 and Android. 18, there shouldn't be other Android in this era!"

A cold light flashed in Apulean's blue eyes. "You know Android 17 and Android. 18?"

Cell did not answer, "..."

Muyang said, "He is called Cell. He is a Super Android created by Dr. Gero on the blueprint of Dr. Gero. Because too many genes were integrated into his creation, he needs to devour Android 17 and Android 18 (mainly swallowing black stones) to evolve from the complete form."

"But in the era he was in... the Android has been destroyed, so he had to grab the time machine to come to us."

April's smile became brilliant. "So it's to devour Android 17 and Android 18! I almost understand his existence."

Android 17 and Android 18 were Lapis and Lazuli. They were the two well-behaved juniors of April. Now, someone actually wanted to devour them, and it was known by her as an elder. Thus, it was easy to imagine the fate of Cell.

"Brother, send me to Acceleration World. I want to study this cicada there."

Muyang smiled and nodded. Then, he opened Accerelation World's passageway.

No, it shouldn't be like this. The computer told me that as long as I devour Android 17 and Android 18, I can be invincible. I clearly came to this era... I can't accept this!! Cell twisted his body to come out of his body. However, April's magic wrapped around him. The more he tried, the faster the power in his body flowed. If this continued, he would not even be able to maintain his original form.

"Be honest."

April shouted coldly. She grabbed Cell and entered Acceleration World. As for what would happen to Cell if he fell into April's hands, it was unknown. It would not be good anyway.

Muyang was not worried about April's safety at all. Not to mention that Acceleration World was completely under his control, just based on April's own strength and ability, Cell could not resist even if he wanted to. In terms of devouring ability, how could Cell compare to April, who had the ability of Majin Buu?

It would be good if he was not devoured.

"Uncle Muiyang, is that guy also an artificial human?" Bulma was shocked.

After getting Muiyang's confirmation, Bulma sighed, "So Android can still be so ugly. I thought all artificial human beings were modified according to the human body."

Because of the good genes in their bodies, they were both beautiful and handsome. April was also a natural beauty. Even if she showed her demonic form, she was full of charm. Only Cell looked like a monster, completely breaking the impression that Bulma had of Android.

"That guy is a creature that Dr. Gello of another world synthesized based on the genes of various races. He is not a natural creature..." Then, he told them about the future of the parallel world.

"So that's how it is. The other world is very miserable. In the other world, I actually married that Vegetta. I can't believe it. Why would I give up on Goku..." Bulma shook his head, feeling worried for his own aesthetics.

"Because it's a parallel space, the development is different. There are no Melia and I there. Lazuli and Lapis are also demons that destroy the world."

Bulma knew that parallel worlds could not be mixed with her own world, so she did not continue this topic to avoid making herself feel uncomfortable.

Once again, she jumped into the time machine. Bulma checked every button in the cockpit. From time to time, she would think about the principle of the time machine. She wanted to see how the brain of the other world was grown. To actually be able to develop such an epoch-making equipment like the time machine, it was indeed amazing.

Muiyang saw that Bulma was studying the time machine in high spirits, so she did not disturb her. She contacted the Capsule Corporation and asked them to send more people to help Bulma. Then, she opened Acceleration World's passage and walked in alone.

When she stepped into Acceleration World, she saw that April had already opened her large experimental platform. Cell was fixed on the experimental platform by something pink like rubber. It was the body tissue of Majin Buu.

"Brother, help me. I want to dissect his body to see the internal structure."

Muiyang smiled faintly. "Alright."

Aphra immediately picked up the strengthened blade used for surgery and cut open the hole in Cell's chest. Then, strange internal organs were extracted one by one and placed into different training devices to store them.

"..."

Cell was already dumbfounded at this time and struggled with all his might. This was completely different from what he had imagined before he transmigrated.

Chapter 508

Cell was a genetically Bio Android created by a super computer. When he was born, the computer kept telling him that as long as he absorbed the Android 17 and Android 18, he would become a unique super artificial human in the world. At that time, no one in the world would be his match.

Cell believed in this and put in all his efforts for it.

When he learned that the Android 17 and Android 18 in this world had been killed by Trunks, in order to achieve the complete form of the computer, Cell planned to seize the time machine from Trunks and use it to venture to other worlds.

However, Cell was not very lucky. He came to the world where Muiyang was.

This world was completely different from what he had imagined. He did not see Android 17 and Android 18, but was instead captured by a strange couple that was not in the data.

When April took the strengthened blade and cut out his internal organs bit by bit, Cell struggled with all his might, but it was all to no avail. Looking at his organs being separated and kept separately, Cell's heart completely chilled.

His ambition had not yet been carried out, but it had already ended.

"Cell, your vitality is very strong. If it were for an ordinary life form, it would have died long ago... But you can still struggle. Can you tell me the secrets?" April asked as she cut open Cell's head with a shiny silver scalpel.

"..." Cell stared at her blankly.

"You're not telling me, right? It doesn't matter. I can find out the secret myself." April smiled. "In this era, there is something called immortal beans... Well, looking at your eyes, you must know about Senzu Beans. As expected of someone from a parallel space."

"I have a lot of Senzu Beans here, so I won't let you die before I figure out your secret."

"Who are you? Why is there no information about you in my database?" Cell's hoarse voice rang out.

April smiled and said, "Hehe, I'm also an expert in Android technology. In other worlds, I'm probably Android 21, but I'm different from her..."

"Android 21?" Cell was stunned.

Ignoring Cell's surprise, April opened Cell's head and found a small crystal like object in his mind. It was like a chip.

What is this,

Eh, it can actually run around in the organization.

April suddenly became interested, a charming smile climbed up her face, and her image immediately changed into the form of a demon. Then, she released the magic of the Majin Buu to imprison the crystal-like object. Her hand raised the knife, and with a click, the crystal-like object was stripped out of the brain tissue of Cell.

And after losing this crystal-like object, Cell's struggling body also stopped swaying.

"This thing is Cell's core chip." Muiyang walked over and explained.

"Chip?"

April carefully observed it and said in surprise, "So Cell's life consciousness comes from here. As long as this chip is not damaged, his body can regenerate infinitely!"

Cell contains the genes of the Namekian, plus the super vitality of the Frozen Clan. As long as he has enough energy, his organized organs can regenerate infinitely.

April probably knew the secret of Cell's body, so she carefully placed the crystal chip into the transparent vessel.

"Brother, I want to spend a bit of time to rearrange this chip. You set up a separate acceleration field for me."

April looked up at Muyang, her pink white hair fluttering.

After Muyang broke through the 6th limit, Acceleration World was the fastest to accelerate time by 128 times. Muyang naturally readily agreed to April's request. He also wanted to see what Cell, who had been rearranged by April, would look like.

With a gentle wave of his arm, he accelerated time on his own to April's laboratory.

If he were to stand outside the acceleration area and look inside, he would feel a strange incongruity due to the incongruity of his senses and vision.

In the Time Acceleration field, April was focused on studying the Cell chip. Such a woman exuded a sense of intellectual beauty. Seeing April immersed in it, Muyang smiled and left Acceleration World.

Cell had finally crossed the world, but it was his misfortune to fall into the hands of April who specialized in restraining him.

However, when it came to Cell, Muyang suddenly became more interested in his path of evolution.

Although Cell was still in the primitive stage where he had just shed his shell, there were still several stages such as growth, maturity, and complete. There was also a lightning form above the complete form... It was almost the ultimate form. Why did it look like a digital treasure?

In fact, Cell's four forms were: Imperfect Form, Semi-Perfect Form, Perfect Form, and Super Perfect Form correspond to Ordinary Super Saiyan, Ascended Super Saiyan, Full Power Super Saiyan, and Super Saiyan 2!

Super Perfect Form was Saiyan's Super Saiyan 2 Form.

Now that Melissa has a Super Saiyan 2 Level maid, Millif, and April will probably have an Attendant that specializes in sundries.

...

On the mountain on the west side, Bulma was studying the time machine in high spirits. At this time, the all-purpose capsule employees who received Muyang's instructions also arrived at the mountain area one after another. Then, under the command of Bulma, they carefully moved the time machine back to Mount Paozu.

"Be careful. This equipment is very valuable. There won't be a second one if it is damaged."

"The rubber on the anti-crash layer has to be thicker."

"Be careful, be careful..."

Although there was a space restraint button for the all-purpose capsule on the time machine, Burma attached too much importance to this time machine. She would rather work hard to carry it far away. She didn't want it to be convenient. She used the space technology to store it so as not to hurt the interior of the instrument.

"Bulma, I will go back first. You can do the next research yourself." Muiyang said to Blrma after coming out from Acceleration World.

Bulma was escorting the transport team. After hearing the voice, he said, "Uncle Muiyang, you can leave first."

Muiyang nodded and suddenly said to her, "By the way, this time machine has been filled with fuel before Cell used it. Although it was used by Cell once, the fuel was not exhausted. In theory, this machine can perform another space jump. So you have to be careful when you study it. Don't let any accidents happen."

Boma nodded seriously. "I know."

Bulma was a bit more active when he was young, but he became much more stable after marriage. Therefore, Muiyang was also very reassured about her. Seeing her nod, he smiled at her and then teleported back to the Great Azure Mountain.

Seeing that Muiyang had returned alone, Melia and Melis asked about April's whereabouts. After learning about Cell, the two girls also expressed their interest in seeing the Android from another world. In addition, Muqiu and Amelia also seemed to be very interested. Muiyang simply waved his hand and sent the few people into Acceleration World.

After Melia and Melis left, Muiyang sat alone in the courtyard for a while, conveniently comprehending the mysteries of the breakthrough of the "True God Level". However, after sitting quietly for a long time, he still could not grasp the gist of it.s

"The True God Level is indeed more profound than imagined. It is still a big step away from breaking through."

Letting out a sigh, Muiyang stood up and smoothed out the patterns on his clothes. Then, he walked towards the depths of Great Azure Mountain. That was the place where the disciples of the Kami School trained. Sometimes, he would also gain some insights while guiding the juniors.

...

At the same time, in the starry sky outside of Earth, a small spaceship was approaching Earth at a speed several times faster than the speed of light. Soon, a blue planet appeared in the star map of the spaceship.

King Cold's tall body sat in the cockpit. In order to not attract attention, he brought a driver and did not let anyone follow.

"Hehe, we've finally arrived on Earth. God Mu Force's Super Saiyan is in the Planet Namek to deal with the Hilch. No one here is a match for me." A cold light flashed in the eyes of King Cold, and then he revealed a sinister sneer.

"The Dragon Ball will soon be ours."

Clenching his fists towards the blue planet in his field of vision, King Cold laughed evilly as if victory was assured. The overwhelming energy turned into substance that made people unable to breathe.

Chapter 509

According to the data collected, the Namekian people did have magical abilities. Then the rumors about the Dragon Ball were mostly true. The Namekian probably had a Dragon Ball. However, compared to the Namekian' Dragon Ball, King Cold valued the Dragon Ball that had already been confirmed to exist on Earth.

King Cold first released a signal and lured King Hilch to the Planet Namek. Then, he revealed the news and tricked the Super Saiyan of the God Mu Forces to Planet Namek.

There were two purposes for this. First, he wanted the Super Saiyan to stop King Hilch, in case Planet Namek really had a Dragon Ball. Second, he wanted to reduce the threat on Earth and lure all the people who could pose a threat to him out of Earth to eliminate the obstacles when he searched for the Dragon Ball.

When there were no experts on Earth who could stop him, he would descend to Earth in a leisurely manner.

This was King Cold's plan.

After thinking it over several times from beginning to end, King Cold was confident that it was foolproof. His deep gaze turned to Earth. King Cold's cold face revealed a smile. With a wave of his hand, he ordered the pilot to move the spaceship toward Earth.

Ka!

The spaceship landed in a small village far away from the city. The environment here was fresh and the air was pure. Because the town was built on a plain, it was surrounded by vast fields and lush trees.

The hatch opened and the metal stairs extended outwards. The three meter tall King Cold stepped onto the earth.

King oCold looked at the surroundings with a cold smile. His scarlet eyes looked at the pilot. "Wait here peacefully. Without our orders, you are not allowed to leave the spaceship and you can not contact the headquarters."

The pilot shuddered. "Don't worry, Your Majesty. I will follow your orders."

King Cold nodded lightly, a cruel smile on his face. If not for the fact that he still needed the other party when he returned, King Cold wouldn't have wanted to keep his life at all.

"The Dragon Ball shouldn't be a big secret on Earth, but the people who have actually seen it must be a minority. I need to find the people who know the whereabouts of the Dragon Ball."

King Cold thought for a moment and decided to directly find the most powerful person on Earth. In the view of the strong being respected, the strong were the rulers of the planet. The three-meter-tall body rose into the air. King Cold used the detector to move towards the place where the energy reaction was the most intense – Sacred Land of Korin.

...

This evil aura,

Just like the universe person from a month ago.

In the Lookout, Kanalita looked at the lower realm with a solemn expression.

He had light purple skin and dark combat suit. He had two dark horns on his head. His face was cold and his entire body exuded a deep and cold killing intent. When Kanalita noticed King Cold, she was immediately intimidated by the evil aura on his body. Her expression became extremely grave.

This guy is even stronger than the previous universe people. Just the aura he revealed is enough to make people tremble. Could it be that this is the Frozen Clan that Teacher mentioned before? They are too powerful.

"At this time, Mr. Bardock happened to be at the Planet Namek."

Kanalita shook her head solemnly. This matter had exceeded her ability to handle.

However, since the sky had fallen, there would naturally be tall people holding it up. There were many experts on Earth. The responsibility of Kanalita was only to discipline the ordinary people on Earth. The matter of dealing with the people of the universe should be left to the other experts.

"Aunty Kanalita, there is a very powerful person coming in this direction." A four-year-old boy grabbed onto the sleeves of Kanalita.

It was Elek.

Broly and Launch's son.

Kanalita looked at him strangely, "You can feel the other party's aura?"

"Yes, dad taught me." Elek nodded.

"What a powerful little fellow."

Kanalita rubbed Elek's head. When she was at her age, she was still receiving the most basic physical training. She could not sense others with her breath. "As expected of Broly's son. He is too talented."

Her eyes looked at the other child – Alex. Although the child was not as good as Elek, he was still much better than the people on Earth.

Saiyan and Earthling's hybrid had a very high Innate Talent. This was why both Modern Saiyan's Bloodline and Earthling Bloodline had their own strengths.

Looking at Elek, Katarina thought of Broly, so she used the ability of the god to get in touch with Broly.

At this time, Broly was sitting at home, weaving a basket with bamboo strips. The wind blew in the courtyard, and Launch was training with Miliff, the maid of Melissa. After receiving a call from Kanalita, Broly nodded and put down his work. His deep eyes looked in the direction of Korin Tower.

There was a strong energy in that direction.

"Launch, I need to go out for a while," Broly said to Launch.

"Is it because of that aura just now?"

Launch stopped her battle with Miliff. When King Cold entered Earth, all martial artists with a bit of perception had discovered his whereabouts. The powerful energy source that was as bright as the sun was like a searchlight in the dark night. It could be found from afar.

"Yes." Broly nodded.

"I'll go with you. I've never seen such a powerful universe person."

Broly looked at Launch with difficulty. Launch's martial arts were naturally not bad, but compared to the alien who came to Earth, she was still far too lacking. For the sake of Launch's safety, he should not bring her.

"You don't want to take me with you? I'm going to get angry!" Launch's expression immediately became nasty, pinching Broly's arm and threatening him.

"Then... alright, be careful."

Broly muttered, since the other party wasn't particularly powerful, he just had to be careful.

Miliff walked over to Broly and Launch with light steps. "How about I go with you?"

"You don't need to look after Great Azure Mountain?"

"Lord Muyang is here. I don't think anything will happen." If even Muyang couldn't deal with it, then it would be futile to have one more Miliff.

Broly thought about it and agreed. Miliff was a Super Saiyan 2 powerhouse. If he let her follow Launch, then even if there was a problem later, she would be able to protect Launch.

"Alright, let's go together."

Launch couldn't wait to fly into the air, and then flew towards the direction of Korin Tower.

Broly and Miliff nodded and flew after him. They were faster than Launch and quickly reached the periphery of the holy land.

Whoosh!

The three of them stopped and stood in front of King Cold.

"It's this guy... His aura is quite strong." Launch glanced over and saw the tall and sturdy King Cold, who was wearing a cloak. He only managed to speak after being hit by King Cold's dark aura.

"It's alright." Broly looked at King Cold.

Broly was very muscular, but compared to the three meter tall King Cold, he was much shorter.

"Who are you?" King Cold looked at the three of them, "Eh, he looks very strong."

Although he didn't have the ability to sense the aura, King Cold had been through hundreds of battles, and he quickly felt something different from Broly.

"Broly!"

Broly stood in front of King Cold and flew to the same height as him.

This guy is no worse than his youngest son Freiza!

King Cold revealed a surprised expression.

Broley... Oh right, I've seen this person before in the previous information. He is also a member of the God Mu Force, but he rarely makes a move. Hehe, interesting, there is actually such an expert hidden in God Mu Force.

King Cold guessed that Broly's strength should not be inferior to Freiza, but in fact, Broly's current normal strength was indeed not inferior to Freia's Base Form, and his combat strength exceeded a hundred million.

Chapter 510

King Cold sized up Broly, and a sense of superiority rose in his heart. At his peak, King Cold wasn't any weaker than Cooler. He had a power level of 500 million, which gave him the confidence to look down on everything.

As for Launch and Miliff, he simply ignored them. Under normal circumstances, Miliff and Launch weren't too strong, so they naturally couldn't attract his attention.

"Broly, I have heard of your name. You are a fierce general in the God Mu Forces, but you are no match for me."

King Cold chuckled, his tone confident. His purple lips moved slightly, "But as long as you tell me about the Dragon Ball, we can generously spare your life."

"Are you looking for the Dragon Ball?"

"That's right." The King Cold looked at Broly with a fervent gaze.

Broly shook his head, "You're late. Earth's Dragon Ball has just been used. Every time the Dragon Ball makes a wish, it needs a year of adjustment, so the next time it is used will be a year later."

When the King Cold heard this, his face turned ugly.

"Who used our Dragon Ball?" His voice contained a monstrous rage, and the King Cold's blood-red pupils emitted a cold chill. Then, an overwhelming killing intent enveloped down from the sky, covering the entire Sacred Land of Korin.

His purpose of coming to Earth was to obtain the Dragon Ball, and now someone actually told him that the Dragon Ball had been used. Didn't that mean that his wish was going to be ruined? On the contrary, the King Hilch who was going to Panet Namek was more likely to obtain the Dragon Ball than him!

Thinking of this, the King Cold was furious.

"You better make things clear. We hate being deceived." King Cold's voice was cold.

Broly frowned, "Your aura makes me dislike it."

"Hahaha, you don't want to tell me? If you don't tell me, I'll kill those two women..." King Cold was so angry that he laughed. He looked at Launch and Miliff with infinite killing intent. He spread his aura and rushed at Launch and Miliff with an awe-inspiring killing intent.

"Huh?"

Since when had Miliff been targeted like this? Her face turned cold and she was about to turn into a Super Saiyan. However, before she could transform, a figure flashed by.

Broly was within a meter of King Cold and his hard iron fist landed on King Cold's abdomen.

Kacha, a powerful blow shattered the battle suit on the King Cold's body. King Cold bent his waist, his eyes bulging out, bloodshot, his expression extremely ugly.

"I don't like you looking at Launch with killing intent."

Broly floated above the King Cold's head, looking down at him from above.

"Cough cough!!" King Cold coughed loudly. "I didn't expect you to be so strong. God Mu Force has hidden his power well enough, but you are still no match for me."

"To tell you the truth, we are not in our peak state right now. We have to compress our strength in order to save our strength. Our true strength is far more terrifying than it is now!" King Cold raised his head proudly, his cold face full of arrogance.

King Cold was the same as Freiza. He usually maintained a relatively primitive state in order to save his strength. Only when he encountered danger would he release it instantly. The difference was that King Cold was stronger than Freiza. His normal state was that Freiza had released his first transformation.

"Now, I will let you experience my full strength."

As he spoke, the face of King Cold twisted, his entire body emitting a terrifying aura.

Broly looked at him calmly, letting him display his strength to his heart's content. Broly's attitude made King Cold heave a sigh of relief. He never thought that on Earth, he would actually need to use his full strength.

Boom! Boom! Boom!

Countless blinding lights flashed, and King Cold began to gradually release the power in his body.

After a wild roar that shook the world, a mighty energy surged out like an avalanche. The continuous mountain range was suddenly covered by an air pressure, and the tall trees were broken one after another. The energy that had nowhere to vent continued to press down, and immediately entered the ground level. For a time, the entire earth trembled.

Even the shrine that was tens of thousands of meters high trembled slightly.

"This terrifying aura is a bit similar to the aura that teacher discovered before..." Kanalita looked on in confusion, but because Broly and the others were below, there was no nervousness on her face.

"So strong, his qi is still growing stronger!"

Korin stood next to the water tank, paying attention to the situation in the lower realm.

At this time, the ki that King Cold displayed was already several times stronger than the previous Hore, but it was still growing stronger. The intensity had already exceeded Korin's imagination.

At the same time, all the martial artists in the world were shocked by this terrifying aura.

On Great Azure Mountain, Muiyang was paying attention to the situation in Korin Tower. After feeling the King Cold's anger, a smile appeared on his lips. King Cold's aura is indeed much stronger than Freiza's. Is that his ultimate form? Well, even Cooler is much stronger.

Cooler's full strength was about 4.7 billion, while King Cold's current energy was close to 500 million.

"Haha, my entire body is filled with power. I only need to lift my hand to destroy this fragile planet!"

King Cold enjoyed the destructive power of his actions. He had already completed his transformation. His form was similar to the ultimate state of Freiza, but his body and face were more burly and mature than Freiza's. His aura was also more terrifying. Around his body, there was a hazy and powerful, suffocating power.

Launch's eyes were shining as she watched, but her body was hiding behind Miliff. "So this guy still has some ability."

Miliff said indifferently, "Just so-so."

Broly said expressionlessly, "A little stronger than the guy from a month ago."

"Tell me everything about the Dragon Ball. We can let you die a quick death." King Cold arrogantly issued an ultimatum to Broly and the others.

Broly ignored King Cold and turned to look at Miliff, "Do you want to come or do you want me to?"

Miliff gently combed her hair. "I will take care of Launch for you."

Broly nodded. "Okay."

King Cold looked at Broly and Miliff talking at a moderate pace. He didn't take his threat to heart at all. His heart suddenly skipped a beat. He was so cautious that he couldn't help but wonder if he had missed something. King Cold's eyes were even more cautious. All his strength hit.

"Actually, the Super Saiyan on this planet is not just Uncle Batko alone," Broly said lightly.

"What do you mean?"

King Cold frowned.

"I am also a Super Saiyan, and I am the legendary Super Saiyan!"

After saying that, Broly's expression became serious, and his entire body suddenly blossomed with a golden brilliance. Then, a green and lustrous light covered the golden light, and his body became burly. His originally robust body became even more tall and straight. His black hair fluttered in the air waves, and his eyes shone with a strong golden light.

Golden Eye State.

Broly's Golden Eye State was comparable to Melissa's Golden Eye State, which was the full power level of Super Saiyan, but with Broly's 100 million power level, his Golden Eye State directly reached 8.5 billion, surpassing the average Super Saiyan 2.

"And me!"

Miliff smiled brightly, and with a crash, the silver lightning beat with a crackling sound. It was the form of Super Saiyan 2!

Two overwhelming momentum crushed over, and King Cold's expression suddenly froze, and then his scalp went numb.
