

# Billionaire CEO Won't Leave

## Chapter 304

Qianqiu group was originally a company owned by Shen. After Bai nianxi went to Gobi, Shen Hedan handed Qianqiu over to Bai nianxi.

Originally, it was just for Bai nianxi to practice his hands. Who would have thought that Bai nianxi was also quite talented in business. Only through network operation, he developed Qianqiu in a short time.

Although Qianqiu's industry is not as strong as Kangshi's, it has spread all over the world, but in a city, it has been flourishing for a while.

Today, Bai nianxi is wearing a bean green professional women's suit. The color of the suit and her white skin complement each other. She is simple and bright.

Seaweed like thick, soft and dark hair is draped in the back of her head. The big wave hairstyle shows her various styles. Two years of experience has condensed her whole body into a capable and vigorous momentum.

Especially when Bai nianxi's face is serious, the fierce color in his eyes is enough to frighten people.

Bai nianxi walks in front of him. All the men who used to be dignified for thousands of years can only follow Bai nianxi in suits and shoes and walk into the conference room together.

Today is the first meeting held by Bai nianxi after his arrival in Qianqiu. Everyone is ready.

"Who is in charge of this project?" Bai nianxi threw the project document on the table, which made the atmosphere of the conference room more dignified.

"Mr. Bai, it's me." A woman stood up.

Bai nianxi's eyes faintly swept over the woman who stood up not far away. This is a very young woman. She is in her early twenties. She just graduated from university. She is also very beautiful. Judging from her position here, this woman's position in the company should be quite high.

"Introduce yourself." Bai nianxi stares at the woman and says without any emotional ups and downs.

The woman bowed slightly and introduced herself: "Yu Feixue, director of the project department."

Bai nianxi looked at Yu Feixue a few eyes, "young age, do this position, strength should be quite good?"

"I dare not." Yu Feixue seemed very modest and nodded, "compared with Mr. Bai's age, I'm still far behind."

As soon as Yu Feixue said this, everyone's faces changed. Bai nianxi also picked his eyebrows. It seems that Yu Feixue has something to say?

Indeed, Bai nianxi seems to be no more than a few years older than Yu Feixue, and Bai nianxi's actual age is just over 25 years old.

Is Yu Feixue questioning her ability?

Bai nianxi stares at Yu Feixue, smiles and gives a gentle hum. Then he draws the project file in front of him along the desktop and pushes it to Yu Feixue, "have a look."

Yu Feixue picked up the file from the desktop, opened it and looked at it carefully, then closed it again.

"No problem?" Bai nianxi looks at Yu Feixue and asks.

Yu Feixue shakes her head.

Bai nianxi chuckled, with a faint oppression in his eyes, "when I made it clear that there was a problem in the project document and asked you to conduct a second inspection, you still could not see what the problem was? Your working ability makes me wonder what you rely on to sit in this position

"Bai always has something to say." Yu Feixue understood the meaning of Bai nianxi dialect, and her tone became unhappy.

Bai nianxi doesn't answer Yu Feixue, but focuses on the girl next to Yu Feixue. This girl looks similar to Yu Feixue's age. She sits on the left side of Yu Feixue, and her position should be similar.

With the eyes of the girl sitting next to Yu Feixue, said: "how about you?"

The girl who received Bai nianxi's signal stood up and first introduced herself: "Xiang ran, deputy director of the project department."

After Bai nianxi gave a hum, he picked up the document on the desk and looked at it carefully. It took him five minutes.

In these five minutes, people in the whole conference room did not dare to breathe hard, for fear of disturbing the atmosphere.

"Mr. Hui Bai, there is something wrong with this project document." After reading the document, Xiang ran said.

As soon as he finished speaking to ran, Yu Feixue cast an unbelievable look at him with a faint hatred. Except for Bai nianxi, who just came here, other people know the almost irresistible relationship between Yu Feixue and Xiang ran.

Yu Feixue graduated from the school of economics of Washington University, while Xiang ran graduated from Harvard University.

Two people came to this company at the same time, from the beginning, the competition between the two people was extremely fierce.

However, Yu Feixue has another extraordinary relationship with Xiang ran, so he is promoted very quickly. Xiang Ran has accumulated more than a year in the company's grass-roots level, and recently he was promoted to deputy director of the project department by doing the next big project.

"He said Bai nianxi put his arms in his arms and sat on the top chair, indicating to ran to go on.

Yu Feixue looks at Xiang ran, and her eyes seem to sparkle.

Ignoring Yu Feixue's eyes, he said to ran, "director Yu has used general linear model, generalized linear model and mixed model in this project document. The previous parameter estimation and hypothesis test are all right." "In the later data prediction based on classical regression analysis and time, there was a little error in the data prediction. Of course, from an academic point of view, director Yu's algorithm is correct."

"It's just that it's divorced from reality. All algorithm predictions that deviate from reality are just words on paper. "

"On paper?" Yu Feixue chuckled with contempt.

"Isn't it?" Pointing to a piece of data on the project file, Xiang Rana said, "is it possible for the amount of data base you use in this place to really exist in the current market situation of city a?"

Yu Feixue looked at the place where ran pointed. After a moment, her face changed.

He said to ran that she had made a mistake.

Xiang ran continued to say with no expression: "the data of this project document made by director Yu is really beautiful, but if it is really put into the market, I don't know how much money will be turned into water."

Yu Feixue's face is very ugly.

Hearing Xiang ran finish, Bai nianxi's face showed a satisfied smile and said, "it seems that my men are not all incompetent."

In a word, I will step on the mud under my feet.

Yu Feixue couldn't bear it. His face turned red and blue. In a rage, he said angrily, "what does Mr. Bai mean? Is he questioning my academic ability?"

"Of course not." Bai nianxi shook his head. "You are from a famous overseas university. Of course, your academic ability is excellent."

Yu Feixue's huge and complex data prediction models used in project data prediction alone can not be achieved by everyone.
